bearings and adjustment of the wheels. In Fig. 1 we show their Apollo Roadster, which is 28-inch, front and rear, fitted with 1¾-inch M. & W. Road Tires. Wood rims, best white ash, finished in natural color. Hubs made from best steel with tempered ball cases pressed in. Spokes tangent and laced in to prevent all rattling, swaged and adjusted at rim by improved nipples. Bearings are dust proof, made from a special quality of cone steel properly shaped and tempered. Wheel axles are also made from a special steel. Frame, regular braced diamond, built on correct lines, with brazed-joints and forced connections, made from best seamless steel tube. Front fork is made from Butler's best toughened hollow fork sides, brazed to our special design forged fork crown. Fork upright is made from heavy gauge seamless steel tube. Head cones and cups, also our crank axle cones, are properly shaped, made from best cone steel, and thoroughly tempered. The crank shaft, to which is keyed and brazed our light detachable nickeled steel sprocket, is also made from special steel; to this is attached by our new crank keys our improved 7-inch throw round forged crank. Seat post is made T pattern from best steel. Coasters and lamp bracket are stamped from heavy spring steel. Handle bar is made from ⅞-inch seamless steel tube, to which is brazed

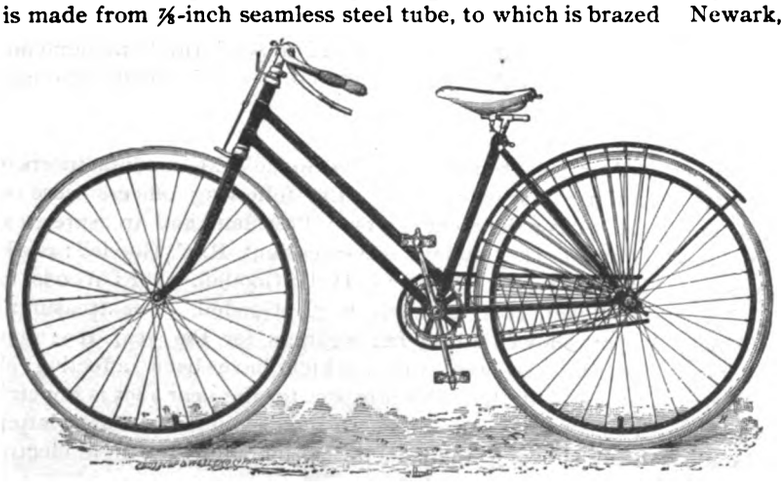

FIG. 2.—APOLLO LADIES' LIGHT ROADSTER.

the seamless steel upright. The bar is beautifully curved and dropped, and fitted with cork grips. It is held in the fork by a forged clamp. Chain of best quality, made to order, 5-16 inch wide, adjusted at rear by a special set screw. Finish: Frame and lower part of forks, four coats of best black baked enamel; all bright parts nickeled on copper. Garford saddle, tool bag, pump, wrench and oil can. Weight, all on, about 24 pounds. Apollo Gents' Safety, M. & W. Pneumatic Tires, $75.00 each. Extra for Dunlop Clincher Tires, $5.00 list each.

In Fig. 2 is seen the Apollo Ladies' Light Roadster of which the makers say: "In the past we have given our attention to the manufacture of a gentleman's wheel, at a popular price, and yet equal in quality to many of the so-called high grade wheels. Our efforts having met with such remarkable success, and feeling that our trade in this line is firmly established, we now place upon the market a ladies' wheel of the same high quality as our gentleman's Apollo. The quality of material is of the best, and the model is of the most improved '95 design, combining strength with lightness; 28-inch wheels fitted with M. & W. Tires, either wood or coppered rims, laced spokes, best steel hubs and bearing of special quality, with cones of steel, properly tempered and shaped. Frame, regular braced diamond, upper brace brazed to within 3 inches to base of hanger, made of best seamless steel tubing, and built on correct lines. Chain of best quality, 5-16 inch wide. Brake of direct plunger pattern with forged lever. Finish: The frame, lower part of forks and mud guard, four coats of black baked enamel; all bright parts, including crown of forks, nickeled on copper, handsome dress and chain guards. Garford saddle, tool bag, pump, wrench and oil can. Weight, all on, about twenty-seven pounds. Ladies' Apollo Safety, M. & W. Pneumatic Tires, $75.00 each. Extra for Dunlop Clincher Tires, $5.00 list each."

They also manufacture the '95 Cycloe Safeties, which are strictly high grade throughout, and which have become very popular with the boys, owing to the neatness of design and thorough make-up mechanically. It has, the manufacturers say, all the modern improvements, and is a facsimile in model of their Gentlemen's Apollo in a modified form. Their Fairy Safeties, which are built in the same style as their Apollo Ladies' Safety, has been greatly improved over their 1894 models, making it one of the finest girls' wheels in the market, neat in design with all modern improvements. The manufacturers will be pleased to send this catalogue and other information that may be desired, upon application.

Death of Julius Hahne.

Julius Hahne, the senior member of Hahne & Co., Newark, N. J., died Friday afternoon, February 8th, at his home, No. 51 Halsey Street. He was regarded as one of Newark's most successful and oldest business men. His ailment was pneumonia brought on by an attack of grip. Mr. Hahne leaves a widow and six children, three sons and three daughters. He was born in Germany in 1828. He came to America in 1845, and on September 1, 1858, he opened a small store in Newark with Adam Block, under the firm name of Hahne & Block. They had no employees, but their business grew, and from toys and crockery they went into other branches, increasing their store room and business facilities every year. In 1874 the style of the firm was changed to Hahne & Co., its present title. The business continued to grow, and now this great department store, of which Hardware and house furnishing goods are an important feature, occupies nearly the whole of one of the largest blocks in Newark, and gives employment to 800 persons.

A great proportion of the reclaimed rubber imported into this country comes from Canada, for the people there wear and discard a great many overshoes.

MINOR NOTE AND COMMENT.

The bowie knife obtains its name from Rezin P. Bowie, who lived in Maryland in the early part of this century. He had a brother who had many enemies, and he, being turbulent and fond of hand-to-hand fights, stood in need of good weapons. Rezin undertook to furnish him with a weapon somewhat superior to any that could be found in those parts at that period. A knife was made out of a blacksmith's file, and a blade was had nine inches long, to which was fastened a handle of six inches. The knife was simple, strong in build, and had an admirable temper. Bowie used it in nineteen sanguinary contests, and then, happening in Philadelphia, he met with a cutler who fashioned it over for him. Bowie afterwards settled on the Mississippi and entertained the celebrated actor Edwin Forrest, to whom he gave the original knife. Forrest placed the knife in his collection where he retained it until his death.

Tall frames with wire screens are coming more and more into use in households where there are small children. Placed around the stove or in front of a fire, they furnish special immunity against accidents, a frequent occurrence where great care is not taken. Around the baby's tub it protects him from draughts while getting a bath, around his crib it has many uses, a barrier against draughts, excessive sunlight and changing objects, etc. It can be utilized to form an enclosure making a small play-house for children from which they cannot escape nor be unreasonably disturbed. It can also be utilized for various other purposes not, however, germane to the uses for which it was originally intended, and which it would not be practicable to enumerate here.

For some time past the vigilance of the Dover, England, customs officers has been evaded with an ease which has made them redouble their exertions to apprehend the offenders. It was noticed that the tires of a bicycle owned by a party of tourists who had just landed, presented every appearance of being punctured, but on close examination it was found that the tires had been stuffed full of the very finest Turkish cigarette tobacco, which is in the United Kingdom subjected to a very high duty. Whilst the officer was busily extracting the contents of the tires the owner beat a hasty retreat, leaving both wheel and tobacco to the tender mercy of the official.

Quite a run has been made in the large cities of England on ladies' umbrella handles, they now being in expensive designs. The body of the handle is of steel or gun metal, well polished, with the usual rose at the end. It is the de-design that marks the elegance of the handle. Some are ovoid in shape with a small flower spray displaying diamonds; others have glittering stars, another a horse shoe set on the tip, others have an eagle with outspread wings rising from the metal, and so on in variations. Initials, and a design representing a serpent coiling round an olive shaped ball, are the favorites.

The use of reclaimed rubber by manufacturers seems to have become a very important one, the price now being very high as compared with former years. A debate has sprung up recently as to whether the bicycle men are using this rubber. Naturally a manufacturer is not carrying the secrets of his compounds upon his sleeve, and the discussion of the subject is almost fruitless, in reaching a truthful decision. That some mechanical men use reclaimed rubber is inferred by the price of their goods. Rubber goods composed largely of reclaimed have a peculiar odor readily recognized by the dealers,

The annual meeting of the stockholders of the Berlin Iron Bridge Co. was held at the office of the company, East Berlin, Conn., on Tuesday, January 29th. The following board of directors were elected: Chas. M. Jarvis, Geo. H. Sage, F. L. Wilcox and Burr K. Field, Berlin, Conn.; S. Howard Wilcox, Brooklyn, N. Y.; Julius Burr, East Berlin, Conn., and H. Peck, Waterbury, Conn. By vote of the stockholders the capital stock of the company was increased from $300,000 to $500,000. The new issue of stock has all been taken by the old stockholders.

It is said at Bristol, R. I., that the idea of using Tobin Bronze in the hull of the "cup defender" has been abandoned or very much modified. The chief reason for this change from the original plan is that bronze sufficient cannot be furnished in season for the race. About seventy tons of lead will be required for the keel, but the Herreshoffs have 125 tons on hand, so there will be no scarcity of the metal for the purpose required. Just now the drayman is an important man in Bristol.

Civilization is making rapid strides in South Africa, but the Bushman yet makes his own knife and with considerable ingenuity. They dig a little iron, find a broken hatchet, or a hoop from a rum barrel, and out of these parts they form even axes, adzes, hammers, and about everything they need in that line. These implements are of course very crude, but the native has much patience and will not forego his bottle of rum for the cost of the imported tool.

J. R. Nutting, of the Sickels, Preston & Nutting Co., Davenport, Iowa, HARDWARE'S Iowa correspondent, is spending his winter vacation in Washington, D. C., accompanied by his wife and daughter. Robert Sickels, of Sickels, Sweet & Lyon, No. 35 Barclay Street, New York, and wife, are also in the Capital City. Mr. Nutting is Mr. Sickel's western partner, and the two gentlemen will confer on business matters. We have a shrewd suspicion that Mr. Nutting is in Washington to keep his eye on Congress, and the readers of HARDWARE will undoubtedly hear from him before "springtime comes again."

There are many variations in the use of brass sconces when accompanied by the candles which generally form their adornment. The candles are now tinted to match the shade that beautifies them. An instance is given of the candle being of light lavender while the shade is of a deeper tint, with bunches of violets irregularly placed here and there.

Some cooks are making crusty bread in sections of stovepipe. These utensils are cut in the required length at the tinsmiths', and the edges turned over so the hands will not be injured. The dough made into a loaf somewhat shorter than the pipe, is placed in it. From this apparently crude affair comes crusty bread of excellent quality, if the cook knows her business.

Boreman & Strouss, wholesale dealers in queensware, glassware, etc., at Parkersburg, W. Va., say under date of February 4th: "Enclosed please find our check for $2, for two years' subscription to HARDWARE. The information that we have received from it has been worth more than the subscription price a great deal."

Some of the agateware men have reduced their prices since January 1st twenty per cent. Numerous adulterations in manufacture are creeping in, that of lead and arsenic being the most common. A good deal of this cutting is in Boston,

NEW GOODS IN THE MARKET

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

New Night Latches.

The Slaymaker, Barry Co., Lancaster, Pa., are just putting on the market two new Night Latches, illustrations of which are herewith shown. Fig. 1 shows the patent Horizontal Rim Cylinder Night Latch, B 248; Figs. 2 and 3 escutcheon and key for same. Fig. 4 shows the patent Horizontal Rim, Night Latch, B 245, and Fig. 5 key for same. B 248, the makers state "is made extra heavy and heavily and smoothly enameled; the draw-back knob, which is of bronze metal, is turned and heavily nickel-plated and the escutcheons are of cast bronze highly polished. The cylinder used in connection with this latch is made extremely heavy and stout, and the entire mechanism is so arranged as to necessitate extra security and great durability. The springs are of phosphor bronze, and keys are of rolled steel, cut milled and heavily plated. B 245 is made with bronze metal keys, nickel plated. This night latch is very heavy and stout, and extremely secure. The draw-back knob is of bronze metal turned and nickel-plated, and the escutcheons are of rolled steel heavily enameled."

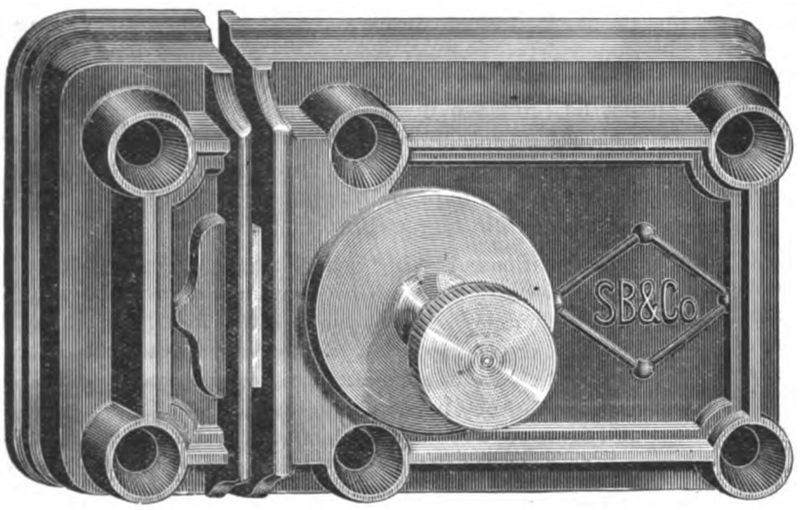

FIG. 1

FIG. 2.

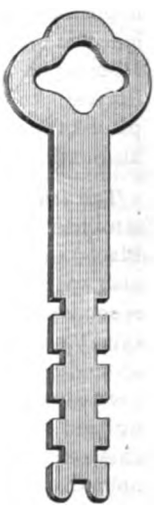

FIG. 3.

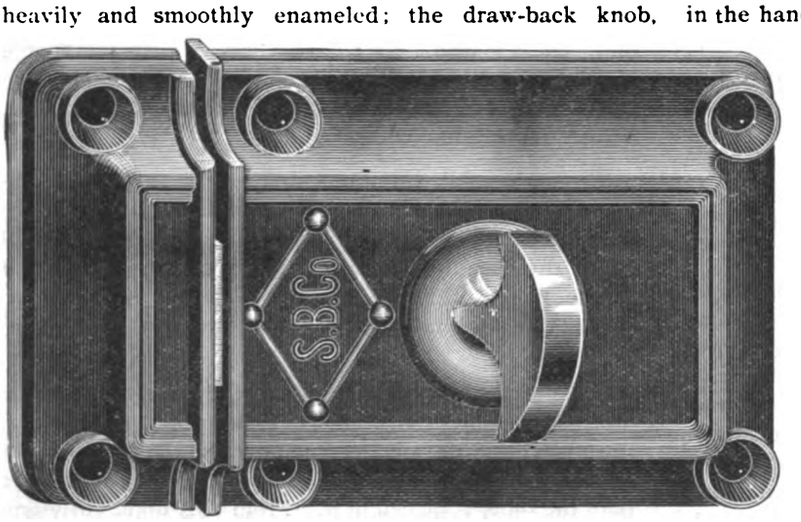

FIG. 4.

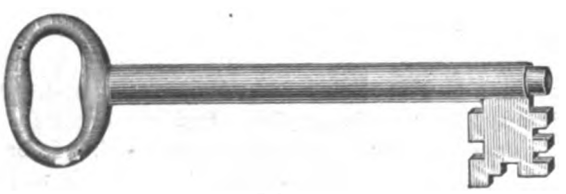

FIG. 5.

McCrum Chalk Line Case.

William H. Lothrop, No. 312 Dorchester Avenue, Boston, Mass., is offering the McCrum Chalk Line Case, a self-chalking line device. The manufacturer claims "that this device will recommend itself to all having occasion to use a chalk line. The construction of the case is simple, neat and durable, of convenient size, and furnished with stab and line. Any color chalk can be used in this case. The use of this case relieves the operator of handling the chalk in the hand while chalking the line, and more and clearer lines can be struck with lines chalked by the case than by hand chalking. The case prevents the line from getting wet or the chalk damp. The reel in the case will hold up to 150 feet of line, if desired. The case once chalked will last from three months to a year on ordinary work." This article should prove of great use to carpenters, fresco painters, stone cutters, masons, paper hangers, sail makers and others.

New Garden Weeders, Etc.

The Gibbs Mfg. Co., Canton, Ohio, who are always making some advance step in the character of their products, have opened the season of 1895 with several notable additions. We are permitted to illustrate several of

Digitized by Google

these in this connection. In Fig. 1 may be seen their "Ideal" Garden Weeder; in Fig. 2 their "Boss" Garden Weeder; and in Fig. 3 the "Ideal" with hoe. The "Ideal" is made in two sizes, four and six teeth; the "Boss" in

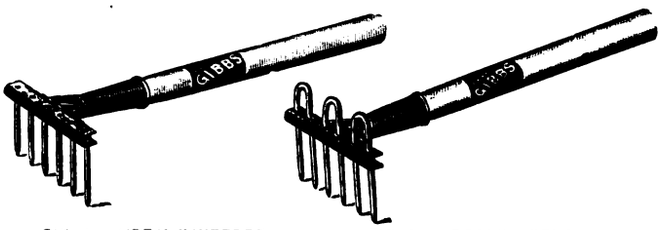

FIG. 1.—"IDEAL" WEEDER. FIG. 2.—"BOSS" WEEDER.

"Ideal" with hoe in one size with four teeth. The handles are of two sizes, four and six teeth; and of the best ash, four and one-half feet long, although they can be furnished with two-foot handles for florists' use. These goods are very durable and finely finished, are all steel, and brilliantly tinned. In Fig. 4 may be seen another of their specialties, the "Ideal" Garden Rake, which the

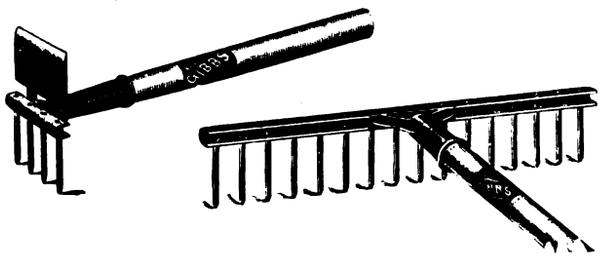

FIG 3.—"IDEAL," WITH HOE. FIG 4.—"IDEAL" GARDEN RAKE.

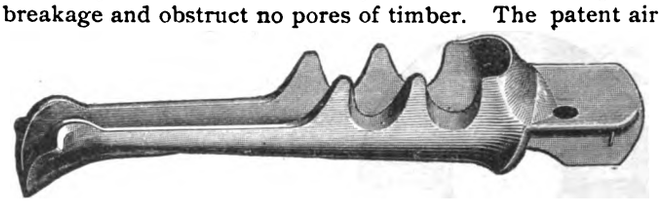
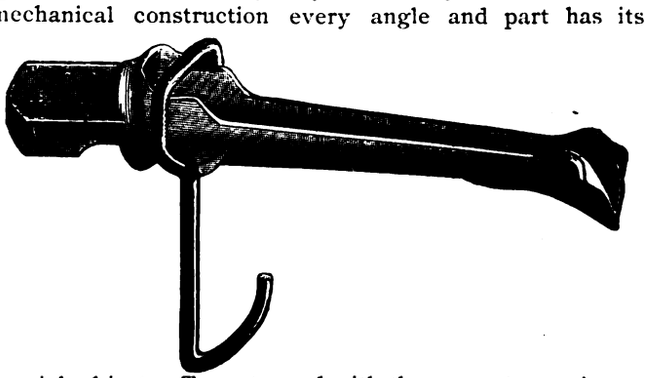
makers say "won't break." This is made in three sizes, 12 teeth, 14 teeth and 16 teeth. All are full tinned, with selected handles. The head is specially formed for stiffness and strength; socket strongly braced, and fastened without rivets or weld. "Guaranteed to be secure." The makers add "A more practical and durable rake cannot be found. Finely finished and very attractive. Send for prices."

"Only Perfect" Dustpan.

The Ennis Specialty Co., Troy, N. Y., and New York City, are marketing what they name the "Only Perfect" Dustpan, illustration of which is here given. It is fourteen

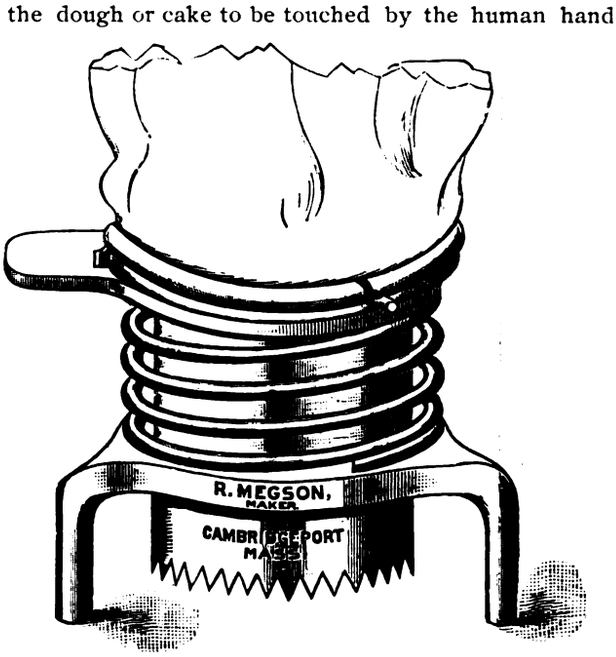




inches in diameter; is round in form, has an edge which will not twist or warp out of shape. "You can put your foot on it, hold it secure, and prevent moving when using. No stooping over to move it about, as you can readily do this with the foot. It will not upset. You can sweep the dirt from all sides into it without turning it around. It is strongly made in one piece of metal, handsome and useful. It has a detachable handle secured by a screw top, by which it can be nested, saving expense in shipping and store room."

Post's Improved Eureka Sap Spouts.

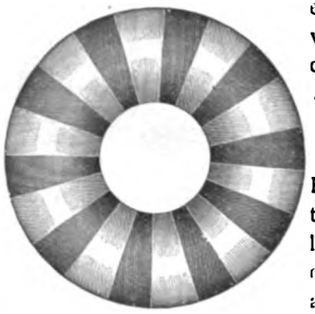
The Russell & Erwin Mfg. Co., No. 45 Chambers Street, New York, are marketing Post's Improved Eureka Sap Spouts, cuts of which are here shown. The makers state that they are made on strictly scientific principles: "They are the most simple, durable and economical. They apply to the tap hole in the tree firmly and without leakage or breakage and obstruct no pores of timber. The patent air



trap is one of the essential features found only in the improved Eurekas and without which the air would be freely admitted which dries up and closes the pores and materially lessens the flow of sap, but with this trap the discharge hole is effectually sealed and no air is admitted to freeze or dry up the sap. The bucket hanger of these spouts surpasses in every way that of any other. In their mechanical construction every angle and part has its

special object. Trees tapped with these spouts require no reboring during the season, the air being excluded from the pore (by the air trap) the pores of timber do not become seasoned or contracted as is the case when open spouts are used and the wound is left open. The inner end of the Eureka enters the tap or pore with thin flanges leaving open spaces between each flange for the flow of sap from the outer pores."

Megson's "Little Wonder."

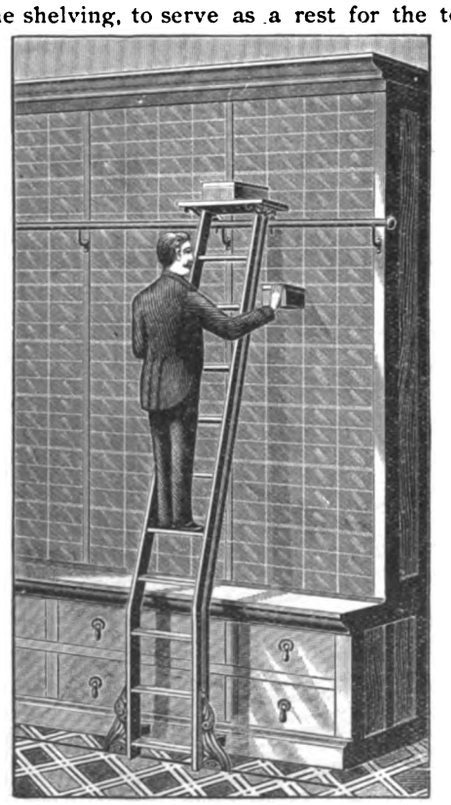


Richard Megson, baker and confectioner, Cambridgeport, Mass., is manufacturing a cake machine, cut of which is here shown; also cut of a cake made by this machine. He claims for it the following points: "There is no rolling, no cutting, no flour used for dusting, no waste, no occasion for the dough or cake to be touched by the human hand,

which from a health point of view is in many cases very desirable. The cake dough is deposited at once from the machine into the baking pan. The cakes are lighter and better than those made by hand or by any other method. The different machines make sponge lady fingers, sponge

Digitized by Google

drops and similar mixtures, macaroons, ratafias, ginger nuts, rifle nuts, chocolate, raspberry and other drops, all kinds of cookies, jumbles, vanilla creams, snaps, fig tarts, etc., besides making a very large variety of special goods that cannot be made by hand or by any other machines."



New Vine Holder.

The Rochester Radiator Co., Rochester, N. Y., are manufacturing the Vine Holder here illustrated. The Holder is made of 14-gauge galvanized wire, and when used the small hook is snapped on the trellis where it remains permanently. The vine is sprung into the lower or larger hook back of a bud or branch. This holds the vine securely, and does not cut or injure it, and the hook springs with the growth of the vine. It is stated that the hook will hold in either a vertical or horizontal position and saves time and labor.

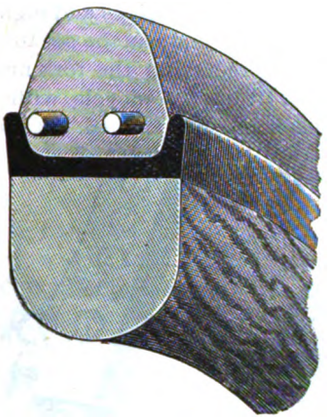
Bicycle Step Ladder.

The Bicycle Step Ladder, manufactured by the Bicycle Step Ladder Co., No. 50 State Street, Chicago, has been upon the market long enough to prove a great success, and its usefulness can certainly be understood from a glance at the illustration here shown. It is, as the name implies, simply a two wheeled ladder—a strong and well made ladder mounted on two wheels, arranged to roll on a light metal track, placed either on the edge of the base shelf or the floor, and provided with a round, nicely finished wooden pole, secured by ornamental metal brackets to the face or the shelving, to serve as a rest for the top of the

ladder, and as a smooth continuous surface along which it may slide in traveling from place to place along the shelving. A pair of stout iron hooks secured to the top of the ladder extend over and partly around this pole, but in such a way as ordinarily not to come in contact with it. These serve to prevent the ladder from tilting away from the shelving when one leans backward, standing upon it. "By reference to the cut one will observe that on whatever step of the ladder the operator may stand, the weight of his body may be adjusted so as to be directly in line with, and above the points of support of the ladder—the wheels. The ladder is thus balanced on the wheels, and will travel along the track with the expenditure of the least amount of exertion, as there is no friction whatever at the top of the ladder, and the very least amount possible at the wheels. It will be found so easy to move the ladder while standing upon it, that, were it desired to reach an object fifty feet or more distant, one or two pushes against the shelving with the hand, will propel you the entire distance with ease. The ladder occupies not more than one inch of the width of the base shelf, and is so constructed that the wheels will not run over or injure the smallest object that may be in its way. A very useful feature of the ladders and one greatly appreciated, is the addition of an extra wide shelf at the top, which in connection with the wide steps of the ladder proper, affords great convenience in handling goods and arranging stock on the shelving."

Seed's Vesuvius Gas Boiling and Cooking Stove.

J. H. Seed, Nos. 21–23 Center Street, New York, is marketing a Gas Boiling and Cooking Stove known as the Vesuvius, which is herewith illustrated. This device will rest on any ordinary gas burner; no screwing or fixing

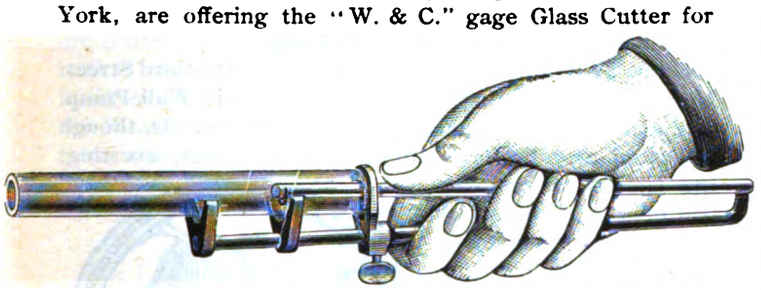


required. "It will boil a quart of water in three minutes. Cooking, frying and heating can be accomplished with it equally as well, and at very much less expense than by any other means." The following are the directions for using: Always light above the wire gauze. If lighted below the gauze it would soon burn out the stove. Let the gas pass through the stove a few seconds before lighting. This will positively prevent the gas from lighting beneath the gauze. By mail thirty cents.

Rubber Carriage Tire.

The Rubber Tire Wheel Co., Springfield, Ohio, are manufacturing a Solid Rubber Vehicle Tire for which they claim many excellent points. The cut given here shows a section (1) of the rubber, (2) of the steel rim, and (3) of the wooden felly, omitting only the bolts by which the steel rim is attached to the wood. "But instead of the rim flanges converging, to grasp the rubber, it will be noticed that the

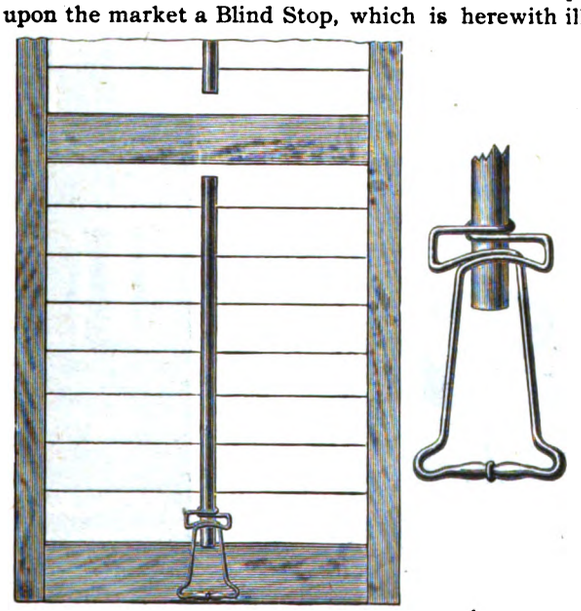
Digitized by Google



channel is broadest outwardly, leaving the rubber wholly without compression except such as comes from contact with the road. The remaining feature of the tire, and that which constitutes its chief novelty, is the presence of two wires, running longitudinally through the rubber, forming circles of such diameter that they cannot slip over the edges

of the steel rim. Thus, in addition to a tire which will stay on the wheel, a form has been adopted which makes available all the elasticity possessed by the rubber, while the absence of tension gives the rubber the utmost durability. Tires of this design are in use varying in width of the rubber from ¾ inch to 1½ inches." This tire is highly endorsed.

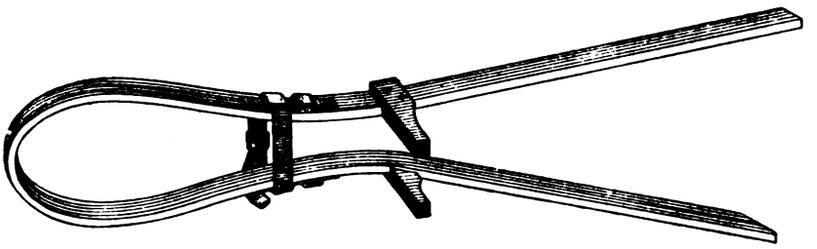
Glass Cutter.



The Wells & Coutin Co., Nos. 29 and 31 Gold Street, New York, are offering the "W. & C." gage Glass Cutter for

which they claim the following advantages: "It cuts in a perfect circle because the glass is held in the fibre rests n a parallel position. The glass does not come in contact with the metal, except at the cutting wheel, and will cut a greater length of glass from the end than any other cutter. The cutting wheel can be renewed without trouble."

Standard Blind Stop.



Hamblin & Russell Mfg. Co., Worcester, Mass., are placng upon the market a Blind Stop, which is herewith illus-

t rated. This device, it is claimed, "prevents shutters from rattling or moving from the position you place them in, and locks them open or closed."

Sunbury Horse Poke.

H. L. Wheaton & Bro., Sunbury, Ohio, are manufacturing a Horse Poke which they claim has many admirable features. It is here illustrated. "It is made of second growth ash, with no joints, hinges, or springs, and the brackets are bolted on with two bolts instead of one. The strap is adjustable up and down, by means of two loops, and the poke

can be made wide or narrow by means of the strap. This is a great advantage, as the same yoke can be made to fit large or small horses. There is no danger of it hurting a horse, as the brads in the brackets do not touch hard only when needed, and the poke will prevent the horse from jumping, but it is a positive preventive against accident on account of barb wire."

Handy Bit Box.

George H. Bartlett, Bethlehem, Pa., is offering a Bit Box to the trade, illustrations of which are here given. Fig. 1 shows the box closed; Fig. 2 shows it opened. It is of hardwood finely finished, and is trimmed with brass hinges and corners. Holes in the box accommodate the bits, thus preventing their getting loose or being damaged by striking together; this also obviates the necessity of catches or clamps, which are apt to get out of order. Boxes are made in four sizes for holding 6, 8, 9 and 13 bits, the latter being a set of 32½ quarters.

FIG. 1.

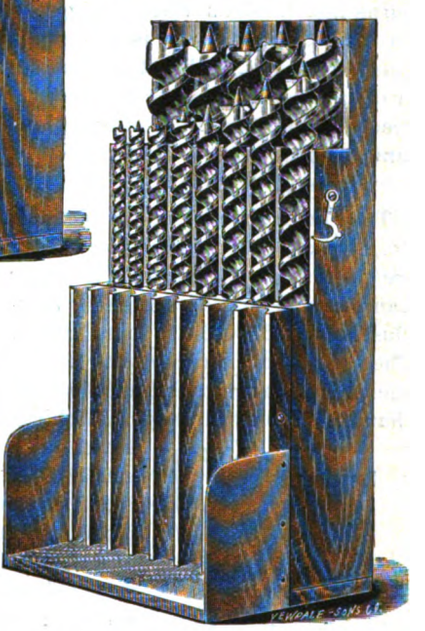


FIG. 2.

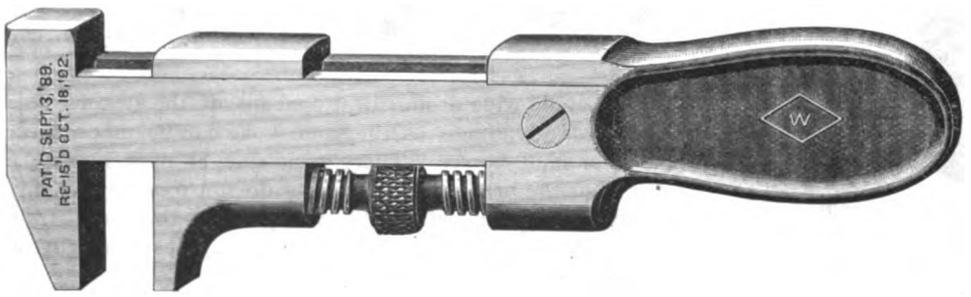
Allen & Allen, two young men who were formerly employes of the well known house of W. H. & G. W. Allen, Philadelphia, and who are relatives of these gentlemen, have opened a Hardware business at No. 1608 Ridge Avenue, Philadelphia. They are well posted, have a good stock, and are sure to command that success which they deserve.

A warehouse belonging to S. C. Rudow, a Hardware merchant in Henderson, Minn., was destroyed by fire on February 10th. Stock valued at $2000, partly insured.

ILLUSTRATED BICYCLE NOVELTIES.



MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

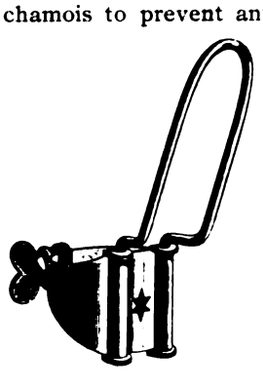
Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, whic hwill appear immediately.

The Williams Bicycle Wrench.

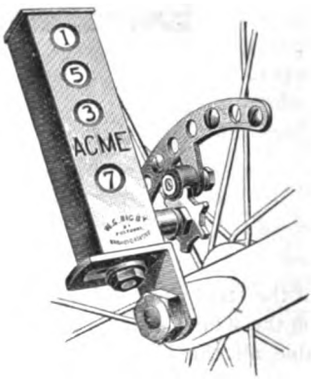
J. H. Williams & Co., Brooklyn, N. Y., are offering the trade a Bicycle Wrench; illustration of same appears here.

The makers state "that the sliding jaw moves between double bars, giving the greatest strength with the least weight, while the quick motion imparted by the double (right and left hand) screw, makes the tool especially convenient and rapid in use. The high grade material which alone is used in these wrenches, and the accuracy with which they are finished, give them the greatest possible durability. They do not become weaker when opened wide to take a large nut, and they are guaranteed not to bend in service. The jaws are case-hardened, and opened full 1⅛ inch. Each wrench is packed in a separate paste-board box."



Lester's Solidlite.

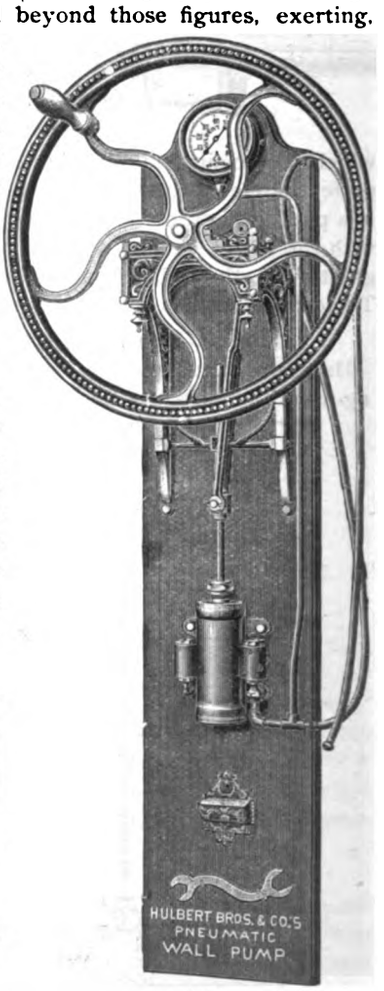
Bevin Bros. Mfg. Co., East Hampton, Conn., are manufacturing Lester's Solidlite, a solid illuminant for bicycle lamps. They claim that this illuminant melts as the light burns and hardens when extinguished, and burns with a pure white light. "It is not extinguished by jars, and will not smoke or char the wick, and is in every respect superior to oil." Put up in half pint and pint cans.



Star Lamp Bracket.

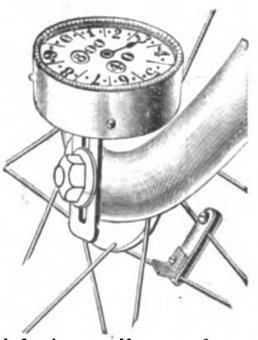
The Bridgeport Gun Implement Co., No. 313½ Broadway, New York, are putting on the market the Star Lamp Bracket, in three sizes for 1895, illustration of which is here given. The Star Lamp Bracket has been especially designed for quick attachment on the head of a bicycle, being lined with chamois to prevent any scratching incidental to frequent attachment to a machine. The smaller size is adapted to attachment on the post of handle-bar. This bracket is made in the form of a steel wire loop, with a spring steel collar and adjustable thumbscrew and weighs 1½ ounces. Star No. 1, for head, 1 inch in diameter, 50 cents; Star No. 2, for head, 1⅛ inches in diameter, 50 cents; Star No. 3, for head, 1¼ inches in diameter, 50 cents; Star No. 4, to fit any size fork, 50 cents. A liberal discount will be made to the trade.

The Acme Cyclometer.



W. S. Bigby, Nos. 31–33 Fulton Street, Brooklyn, N. Y., is placing on the market the Acme Cyclometer. The manufacturer claims that it is "simple, light, compact, easy running and cheap, and it will record miles and eighths to 1000 miles and repeat indefinitely, and can be set to zero at the pleasure of the rider. By removing the fork nut it can be attached to or detached from the bicycle without further adjustment after it has been once applied. It can be swung

from the centre of the wheel to any desired angle, reads from the top downwards and is easily read from the saddle, while in the directness, certainty and plainness of its reading it is unrivalled. It records with absolute accuracy at the highest and lowest speed, is dust-proof, and the glass front is so protected that it is not liable to breakage."

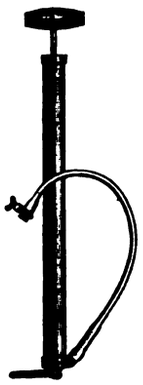


Pneumatic Wall Pump.

Hulbert Brothers & Co., No. 26 West Twenty-third Street, New York, are offering the trade a Pneumatic Wall Pump. The dial will indicate a pressure of eighty pounds, though the hand may be forced beyond those figures, exerting, the makers state, sufficient pressure to burst any tire. With the finger on the end of the tube one revolution of the wheel marks a pressure of forty pounds on the dial. It is stated that the pump is simple, effective and handsome.

The Crown Cyclometer.

The Boston Meter Co., No. 22 Chapman Place, Boston, Mass., are manufacturing the Crown Cyclometer, illustration of which is here given. This cyclometer they claim is light in weight and registers 1000 and repeats. It has a fine white dial,



which is easily read and is moved positively, by every action of the bicycle wheel. "It is readily seen from the saddle, extremely easy to attach, and perfectly noiseless."

Digitized by Google

1895 Cyclone Pump.

Hay & Willits Mfg. Co., Indianapolis, Ind., are offering a '95 Bicycle Pump. The pump is described as having a barrel eighteen inches long, and is constructed of twentygauge, one and one-quarter inch brass tubing. It has a light bass wood handle, and is provided with a hose eighteen inches long.

Cyclone Pump No. 2.

The Davis & Stevens Mfg. Co., Seneca Falls, N. Y., have put on the market their '95 model Cyclone Pump, an illustration of which is herewith given. This pump has a full nickel cylinder, 1¼x12 inches, and a thick brass plunger and improved valves. It is also fitted with the company's improved air-tight base, which will not allow the air under heavy pressure to pass. Its principles are scientific in every way.

We are in receipt of the following good news from the Dille & McGuire Mfg. Co., Richmond, Ind.: "We of late have been so very busy with our orders in hand that we have had very little time to attend to anything else. We are having a large run in our line just now; everybody, it seems, is after our goods, both in the best and cheap grade of mowers; our order book was never so full as it is at this time, and there is plenty of trade yet to hear from. We are running full handed and expect to continue until June next if not later. Our company has been in the mower business a long time, being one of the first to take it up in the West. Over 200,000 of our mowers, with their various trade marks, are scattered throughout the civilized world; there is no country where the lawn is a pride but that our mowers can be found. We are in it to stay."

The Farrel Foundry & Machine Co., of Ansonia, Conn., have decided to build a new roll and machine shop and have placed the contract for the building with the Berlin Iron Bridge Co., East Berlin, Conn. The building will be 104 feet wide and 260 feet long, constructed entirely of iron, brick and glass. The roof will be of copper.

William T. Walter's Sons, No. 1233 Market Staeet, Philadelphia, dealers in Hardware, woodworkers' tools, etc., write under date of January 31st: "Enclosed please find one dollar for subscription; HARDWARE bill just received. We subscribe to a number of trade papers, but we know of none that we like better than yours."

B. H. Warner & Co. have opened a new factory for the manufacture of screen doors at South Zanesville, Ohio.

Recent Incorporations.

Cincinnati, Ohio.—The Insurance Oil & Stove Co., incorporated by Herman H. Uckotter, Andrew J. English, William Uckotter, George Uckotter, Charles A. Ahlborn, for the purpose of manufacturing and dealing in vapor stoves, together with other machines and devices; also for the purpose of dealing in oil. Capital stock, $10,000.

Sioux City, Iowa.—The Gillette Hardware Co., incorporated by T. H. Green, T. H. Preston and C. E. Hughson. Capital, $20,000.

Belleville, Ill.—George Eidman Implement Co., incorporated by George Eidman, Charles W. Fischer and Phil Huecke. Capital stock, $5000.

Burlington, Mo.—Bloom Rotary Oven Co., incorporated by John Cook, A. Sciel and S. Black, with a capital stock of $2100.

Shawano, Wis.—The Schweers & Nachtweg Hardware Co., incorporated by John C. Schweers, Frank Schweers and Henry Nachtweg, with a capital stock of $20,000.

The Man in the Corner.

It has been so long since we heard from "The Man at the Corner Desk," in the house of the W. Bingham Co., Cleveland, Ohio, that we were afraid that he was snowed in. He now comes to the front, however, and has, as usual, something of interest to say:

"A few days ago I got hold of a file containing letters from the W. Bingham Co.'s travellers replying to inquiries for information regarding this, that and the other, and noted with pleasure the good feeling displayed on both sides and the appreciation of the fact that their interests are identical—a state of affairs not always prevailing. A Toledo drummer devotes a whole chapter in a book he has written to condemning the office for its treatment of accounts, and a Hardware paper recently contained a tirade by a Southern jobber blaming the road salesman for declining margins and the other evils he found in his business. Then, the drummer who finds fault with his house and the employer who belittles his traveling man by criticising him to the firms he visits, are familiar to us all—a suicidal policy on both sides, for there must be confidence in both the seller and his salesman before the buyer cares very much about treating with either. One of the letters said: 'A traveller may not always meet the ideas of a Man in the Corner, but I am under the impression that the Man in the Field, if he takes any interest in his business, works to the best good of his house and himself.' Surely, if he does his best for his house he gains the greatest benefit for himself, and his hardest work for himself benefits his house the most. 'As unto the bow the cord is,' etc. Though he influences the bent of the house's business he obeys its behests, and though he leads it into many ways he follows its directions. I suppose no part of a business receives so much care and attention as its representation on the road, for upon this largely depends the measure of its prosperity. The buying is important—very—and the caring for orders, collections, etc., demand constant care, but the thing that keeps the business man awake nights and turns his hair prematurely gray is maintaining upon the road a force of eager, active, aggressive men who will work for his interests—who can command the respect of those they visit, tactful, honest, conscientiously following out his policy whether it suits them or not, and working in complete harmony with him. He doesn't expect to be pleased at all times, for angels of light have not yet taken to the road, but he has a definite idea of what he wants accomplished and does expect to see it reasonably well filled. He admonishes one man, braces up another, urges a third to renewed effort, exchanges congratulations with a fourth over a good stroke, and pours upon them all an unceasing flood of circulars, prices, samples and miscellaneous information and advice. He studies their reports and sales, and combining what he thus learns with information gained elsewhere, determines upon his course of action; but it is his course and, while from the drummer's standpoint it may not always seem the best, he will alter it only when a change proves to be necessary."

Six months ago a destructive fire practically destroyed the business portion of Hudson, Mass. The business men there took hold with a will to rebuild the town, a generous rivalry arising at once as to who would make the greatest effort in a short space of time. Holder & Robinson, Hardware merchants, were the first to order a supply of Hardware; in fact they sent the first order for any class of merchandise that came from the town after the fire. The firm have now taken a store in the new block owned by H. W. Chase, and which is a handsome structure of brick trimmed with pink granite and red spotted brick, copper cornices, etc. The store is piped for steam and wired for electric lighting, and will be handsomely fitted up.

The Latest Catalogues.

O. J. Faxon & Co., Nos. 3-7 Appleton Street, Boston, have issued a handsome descriptive catalogue of the Puritan bicycles, a line which is well known to readers of HARDWARE. This little book is one of the handsomest we have seen this season, and that is saying a great deal, as at no time has bicycle literature approached the artistic excellence of the present year. It is printed in colors with illustrated margins, and full-page cuts of their various wheels. They show the Puritan Full Roadster, Puritan Semi-Roadster, Ladies' Puritan, Puritan Two-Speed, Puritan Tandem, etc., etc. Other matter of an interesting character is presented. In a note of introduction the company say: "The opening of the new year marks a great advancement in cycling interests throughout the country. The establishment of the bicycle as a vehicle of pleasure and of business is beyond question. We find new uses constantly presenting themselves in almost every channel, and people becoming interested in cycling that a year or two ago did not give it a passing thought. The advancement in the construction of safety bicycles of the higher grade during the past three or four years has been almost phenomenal, and has exceeded the anticipations of the most sanguine admirers of the safety. Improved facilities for manufacturing have fully kept pace with the increased public interest, and the public has been the gainer, as manufacturers have been enabled to continually produce better work, and by the use of automatic machinery to make considerable reductions in the selling price. In offering to the public a standard bicycle of the highest grade at $100, manufacturers are naming figures that only two years ago would have seemed impossible. It is now only possible to make a standard machine and sell it at that price on account of this increased interest in bicycle riding by the public, and a corresponding increased patronage. We believe that this reduction in price will be appreciated, and that we shall receive public endorsement that will repay our efforts. We have made such changes in our plant and equipment as will render it possible for us to please our increasing host of patrons."

The Reading Hardware Co., Reading, Pa., with New York offices at Nos. 96-98 Reade Street, have prepared a handsomely illustrated portfolio of artistic design, which shows their line of builders' Hardware for the use of architects and other customers. These views are shown on separate sheets of heavy card board, which are 9x12 inches in size, made round at the corners, and held in a handsome leather case. Many of these are reproductions of photographs, and most of the cuts are one-half the actual size. An architect or builder would be hard to please who could not find something in these selections that would entirely cover any want in the way of artistic Hardware that can be imagined. There are three sections of cards in this portfolio, each of which is devoted to a distinct class of goods. The first shows their locks; the second their plain and ornamental escutcheons, push buttons, knobs, etc., and the third their miscellaneous bronze goods, which include a complete line of Hardware in plain bronze. Upon the first card is a list of the finishes, with a description of the goods, and upon each of the other cards is given a further description of the goods which are shown thereon. By a very simple system of numbering, they have done away with any possibility of misunderstanding, and greatly aid the customer in ordering. The portfolio is very convenient to carry, and the trade as well as the company are to be congratulated upon this artistic addition to Hardware literature.

The Relay Mfg. Co., Reading, Pa., have published an illustrated catalogue of their Relay bicycles. In a note of introduction they say: "For the season just closed our output has been almost double that of the preceding one. This, in the face of the general depression in business, shows more forcibly than words the reputation the Relays have made for themselves. Progress in excellence is our motto; and, however high in merit have been our '94 wheels, the '95 Relays show great advancement in lightness, design and finish. It has been our aim and purpose to make a strictly high grade wheel, the very best that could be made, keeping in mind that the riding public, as we ourselves, are satisfied with nothing less."

Sargent & Co., New Haven and New York, have issued their Wire Screen Hardware catalogue for 1895. It contains not only their revised price list for this line of goods, but also illustration and description of everything in Hardware necessary for making and putting together screen doors and window screens, for opening and closing them properly, and for keeping them shut when desired. The company say "the demand for these goods is very great at this season of the year, and orders should be sent in early to insure prompt shipment."

The Monarch Stove Co., with headquarters at Mansfield, Ohio, and branches in Chicago and St. Paul, have issued under the name of "Catalogue E" a very handsome book presenting the claims of the Monarch stoves and ranges, for gas and gasoline. It is very thoroughly illustrated in colors, and shows a large variety of goods. The Monarch Stove Co. is, as the trade knows, the successor of the Baxter Stove Co., the three gentlemen composing the new firm having, while members of the old firm, given the Monarch goods their special attention.

S. L. Allen & Co., Philadelphia, have issued a handsome little leaflet in colors showing the operation of their Planet, Jr. combined drill, wheel hoe, cultivator, rake and plow; double wheel hoe, cultivator, rake and plow combined; the Planet, Jr. single wheel hoe, cultivator, rake and plow combined, and the Planet, Jr. all steel horse hoe and cultivator. Descriptions of these goods are given, and this little pamphlet will be sent to those who desire it.

"A Discourse on Cycling, with Special Relation to the Sterling Bicycle," is the heading found upon a publication just received from the Sterling Cycle Works of Chicago. The artist and antiquarian seem to have united with the printer in the preparation of this quaint and curious publication, but while the letter press and illustrations suggest the ancient times, the information contained therein in regard to output and prices for 1895 is distinctively modern.

Union Cycle Mig. Co., Boston, with branches in Milwaukee and Philadelphia, are sending their friends a handsome illustrated catalogue of the Union Bicycle. These various lines are illustrated in colors with full description. The company say that as "progress" was their aim in 1894, the report upon the year closed was "expectations realized."

The Davis & Stevens Mfg. Co., Seneca Falls, N. Y., are sending forth a little hand-book of their Cyclone Bicycle Lamps. These articles are illustrated and described in full, and prices are given.

The Central Cycle Mfg. Co., makers of the Ben-Hur cycles, Indianapolis, Ind., have issued a catalogue for 1895, illustrating and describing their line of wheels.

J. P. Lindemann & Sons, Milwaukee, Wis., have issued a catalogue of Bake Ovens and Oil Cans. The line is quite complete, is well illustrated, and prices, etc. are given.

The Black Mfg. Co., Erie, Pa., have issued a handsome catalogue of their Tribune Bicycles. This is printed in colors and is very finely illustrated.

The Toledo Saw Co., Toledo, Ohio, have issued a little hand-book describing their saws of every description for mills, factories, machines, etc.

A Hardwareman Killed.

A natural gas explosion totally wrecked the Hardware store and office of Cutter Bros., Meadville, Pa., February 13th, and fatally injured Geo. H. Cutter, one of the partners. Mr. Cutter's residence was also entirely destroyed. For some time a leak had been noticeable in the gas main running in front of the buildings, and it is supposed the snow and frozen earth had become thoroughly saturated. A flash was seen to leap from the fire-box of a passing locomotive, and in an instant almost an acre of ground appeared to be a mass of flames. The roofs of both buildings were lifted almost simultaneously, and the buildings entirely demolished.

Mr. Cutter, who was at the time outside, was hurled against the building with such force that his neck was broken. He lived about thirty minutes after the explosion. His son, George H., was pinned in the cellar beneath some timbers and the heavy slate roof, from which he was rescued after an hour and a half of the hardest kind of work. The entire efforts of the firemen were required to prevent him from being roasted, so that considerable more headway was gained by the fire in other directions than would otherwise have been.

The loss is the two buildings, a fine line of Hardware and a quantity of lumber stored in the lumber yards adjoining; in all variously estimated at from $15,000 to $30,000.

After the explosion fire was seen running along the gutter opposite, and the snow was in flames in places for several seconds. The gas seems to have permeated the entire vicinity. Latest reports are that the coroner's jury have passed a verdict of censure against the Oil City Fuel Gas Co.

The St. Louis Bicycle Show, which was announced to be held on the 7th and 8th of February at St. Louis, was a success, in that the exhibition was first-class, and large numbers of people visited the exposition. The booths were tastefully decorated, and some of the displays were very excellent, among which may be mentioned that of the St. Louis Cycle Co., St. Louis; the Diamond Rubber Co., Akron, Ohio; American Dunlop Tire Co. and New York Belting & Packing Co., New York; Boston Woven Hose & Rubber Co., Boston; American Sporting Goods Co., St. Louis, and the A. F. Shapleigh Hardware Co., of St. Louis.

The Barber-Koenig Mfg. Co., Hazleton, Pa., manufacturers of household specialties, are offering the trade the Common Sense Broom Holder. The makers state that "You will have the satisfaction of having a place for your broom. Furthermore and of more importance is the fact, that with its use your broom is kept in proper shape, thus prolonging its usefulness indefinitely." The cost is trifling. A sample will be sent by mail for ten cents.

If a large and perfectly equipped plant, long experience, and ample capital, count for anything, W. W. Lawrence & Co., Pittsburg, and Buffalo, N. Y., are well supplied in these elements of success. The reputation of the Lawrence Colors and paints is very enviable, and dealers will do well to get their new price list of colors in oil, and benefit by the reduced prices which the firm have just issued.

The Colebrookdale Iron Co., Pottstown, Pa., have formed a connection with W. H. Jacobus, No. 90 Chambers Street, as their New York agent. They have issued a circular to the trade which announces this fact, and state that all communications referred to Mr. Jacobus concerning their goods will receive prompt attention.

They have in St. Louis a Vehicle Owners' Association, in which the question of overloading of teams and other like questions are discussed twice each month.

Francis B. Griffin, Director of the Shoe & Leather Bank.

At the recent reorganization of the National Shoe & Leather Bank, New York, Francis B. Griffin, of the firm of C. E. Jennings & Co., No. 97 Chambers Street and No. 79 Reade street, New York, was elected a director. Mr. Griffin is well known in business circles, especially to the Hardware trade. He was born in Catskill, N. Y., on November 8th, 1852. He obtained his early schooling and received the greater part of his education in Elizabeth, N.J. He was first associated with the Hardware trade in the fall of 1870, when he was connected with the firm of Clark, Wilson & Co., No. 81 Beekman street, New York. He remained with this company until September, 1876, when he left, and with C. E. Jennings, organized the present firm of C. E. Jennings & Co. Mr. Griffin is treasurer of the Jennings & Griffin Mfg. Co., with factories at Port Jervis, New York, and Yalesville, Conn. As a partner in C. E. Jennings & Co. Mr. Griffin has had entire charge of the inside work, which includes all financial matters. He is a prominent clubman, being a member of the New York Hardware Club, City Club and

FRANCIS B. GRIFFIN.

Good Government Club "A"; also a member of the Society of the Sons of the Revolution and of the New England Society. He is treasurer of the New York Infant Asylum, and is also on the board of managers and the executive committee of the same institution, and is chairman of the house committee, and one of the executive committee of the Presbyterian Hospital. Mr. Griffin possesses all the qualities that fit one for success in any business—push, energy and a keen perception. Those who have had either business or social intercourse with him, speak of him in glowing terms. The National Shoe & Leather Bank is to be congratulated by his appearance in its directory, and the Hardware trade of New York upon having so able a reprensentative in this great financial institution.

Elliott W. Langley, manufacturer of razors and pocket knives, No. 74 Reade Street, New York, is overhauling and rearranging his place in anticipation of a large spring trade. Every piece of furniture and all the fittings are being treated to generous coats of paint and varnish, giving a bright and wholesome appearance. Things were at sixes and sevens for some little time.

Little Giant Steel Trucks.

The G. L. Van Namee Mfg. Co., Gouverneur, N. Y., on page 53 of this issue present to the Hardware trade the claims of the Little Giant Steel Trucks manufactured by them. These trucks have been upon the market long enough to demonstrate their practical use, and the fact that there is a great field open for their introduction. They are adapted for general use, and especially the handling of flour, sugar, ash or other barrels. Speaking of these goods the company say:

"This truck, so properly named, is the result of experiments made by manufacturers, who have placed it upon the market as a strong and reliable truck at a very low price. While combining great strength, it is in construction comparatively light, total weight 14 pounds, a point to be appreciated. This truck is made entirely of metal, has wide tired wheels with well fitted bearings. Its compactness is a feature found in no other; occupying but little space, it can be used where other trucks would be an inconvenience. It is indispensable in factories, flour mills, etc., and for removing ash and garbage barrels it has no equal. The patented adjustable clamp makes a sure and positive grip on a barrel, and its range of adjustment will permit various sizes of barrels to be handled on the same truck. The trucks are neatly finished in black japan. The manufacturers offer this truck as being thoroughly reliable and well constructed and warranted in every respect." They will be pleased to send prices, etc., upon application.

West's Dust Pan.

The two artistic little illustrations here shown present to the eye of the reader a new article that is being placed

FIG. 1.

FIG. 2.

upon the market by James R. West, Gas City, Ind. It is West's Dust Pan. In Fig 1 is shown its method of use; in Fig. 2 a demonstration that it does not spill out in carrying. The maker describes it as dainty, handsome, clean, convenient and cheap. In use the foot is placed upon the tread, the dust is swept into the pan, and by an easy movement the contents shake down where they cannot fall out while being carried away. The manufacturer will be pleased to send further details, prices, etc., to any who may be interested.

A Factory Record.

The Julius Andrae Co., No. 225 West Water Street, Milwaukee, Wis., have figured out a method of record keeping of testing, in their bicycle factory, which is valuable, interesting and unique, and by permission we are permitted to reproduce the same in this connection. It carries its own explanation:

DATE OF TEST: Dec 20 — TESTED BY: AWS — LOT { Samples of — Wire

RECORD OF TEST --- JULIUS ANDRAE, TESTING DEPARTMENT --- MILWAUKEE, WISCONSIN.

A FACTORY RECORD

Wilmot & Hobb's Mfg Co.'s Fire.

The great works of the Wilmot & Hobbs Mfg. Co., Bridgeport, Conn., were visited by a severe fire on the evening of February 4th. The fire was discovered at midnight in the main building, and before the flames were extinguished, the main plant with the exception of a portion of one building was destroyed. The burned buildings were erected at various times since the company built their plant on the present site, some fifteen years ago. All their work, except the hot rolling, which is done at a branch of the factory on Howard Street, was performed here. Their machinery was the most complete of any of its kind in use in the country, and was very valuable. The origin of the fire is a mystery. It is needless to say that this interruption will be but temporary, as the enterprise and energy of the Wilmot & Hobbs Mfg. Co. are such that the loss will be repaired at the earliest possible moment.

Mr. Haines Will Advance Prices.

EDITOR HARDWARE: Will you allow me to say in your columns to the Hardware trade, that having very largely oversold any previous year's production, and believing that prices of lawn mowers are *unnecessarily low*, we shall, one month from date, advance our prices ten per cent.

Yours truly,
DILLE & MCGUIRE MFG. CO.,
Per S. A. Haines, Manager of Sales.

Richmond, Ind., February 20, 1895.

The Moline Plow & Agricultural Implement Co.'s warehouse, Minneapolis, Minn., was totally wrecked by fire on Sunday, February 3d. The large stock was also entirely ruined. The warehouse was a four-story brick structure, 80 feet by 150, and the four floors were stocked with heavy farm machinery of the newest and most modern make. The damage to both building and stock is estimated between $75,000 and $100,000, fully covered by insurance. Daniel Ougheltree, the manager of the establishment, says that the business will be resumed immediately.

New England Hardwaremen.

THEY CELEBRATE "LADIES' DAY" BY A DINNER IN BOSTON.

A NOTABLE AND HAPPY GATHERING.—REPRESENTATIVES PRESENT FROM ALL PARTS OF NEW ENGLAND.—SPEECHES AND MUSIC.—MANY LADIES GRACE THE OCCASION BY THEIR PRESENCE.

The Second Annual Ladies' Night of the New England Hardware Dealers' Association fell upon Wednesday, February 13th, 1895, and the United States Hotel, Boston, was selected as the place where the banquet should be held. There was a meeting of the Association in the afternoon, but little business was transacted, as the affair of the evening was of so attractive a character, as to naturally take the minds of the members from everything else. The annual election therefore went over to the meeting of next month.

The dinner was given in the banquet hall of the United States Hotel, which was handsomely decorated, four tables being set for the guests. There was a large attendance, the ladies showing their appreciation of the annual invitation by accepting in large numbers. Those who were present were as follows:

At a few minutes before five P.M., President Samuel H. Thompson, accompanied by his wife, took his position in the main parlor and formally received the members and their guests. Excellent music was meanwhile discoursed by the Howard Orchestra, composed of a half dozen young ladies, who added very much to the pleasure of the evening by the selections rendered during the dinner. At a little after five the company marched two by two to the dining room, where each lady and gentleman took position in accordance with the diagrams elsewhere shown.

The company stood while Anthony S. Morss asked a blessing. The dinner was first-class in character, and excellently served. We give the

MENU.

Blue Point Oysters, on Deep Shell.
Green Turtle Madeira. Consomme Jardiniere.
Queen Olives.
Baked Stuffed Smelts, fine herbs.
Iced Cucumbers. Potato Croquettes.
Young Turkey, cranberry sauce.
Fillet of Beef, with stewed mushrooms.
Victoria Potatoes. French String Beans.
Sweetbread Cutlets, with flageolets.
Rissoles of Chicken, supreme.
Banana Fritters, cabinet sauce.
Claret Sherbet.
Lobster Mayonnaise. Dressed Lettuce.
Tangerine Bavarian Cream.
Harlequin Ice Cream. Frozen Pudding, Wine Jelly.
Assorted Cake.
Fruits.
Water Wafers. Pineapple Cheese.
Coffee.

Ample preparation had been made for the usual intellectual feature of the evening, the arrangements, both as to entertainment and reception, being in the hand of the following well-known and capable gentlemen:

ENTERTAINMENT COMMITTEE.

Charles E. Adams. Elisha J. Neale.
D. Fletcher Barber. Charles P. Darling.

RECEPTION COMMITTEE.

Hiram G. Janvrin. Frank O. Barber.
George J. Mulhall.

The set programme of the evening was as follows:

PROGRAMME OF TOASTS.

GREETING, - - President Samuel H. Thompson.
READING, "Jean Valjean and the Bishop," Miss Zitella E. Ebert.
"OUR LADY GUESTS," - - - Anthony S. Morss.
ORCHESTRA. - - - - - - - -
"OUR ASSOCIATION," - - - D. Fletcher Barber.
READING, "Since Birdie Commenced Her Delsarte," Miss Ebert.
"OUR WHOLESALE ASSOCIATES," - - Albert M. Wiley.
ADDRESS, - - - - - - Solon W. Stevens, Esq.

When the gastronomic portion of the exercises had been disposed of to the evident satisfaction of everyone, President Thompson called the gathering to order, and delivered a "Greeting" in these words:

PRESIDENT THOMPSON'S "GREETING."

Ladies and Gentlemen—friends of the New England Hardware Dealers' Association:—I desire to thank you, in behalf of our Association, for honoring us with your presence here to-night, and extend to you a most cordial welcome.

If ever I was convinced in my life that woman is the making of a man, that conviction has deepened to-night by the scene before me; for, while I know that our members are a fine looking body of men, yet I must confess I am staggered at the transformation. I didn't suppose they could make up so finely, but 'twas always thus; by woman's art and power the best there is in man is brought to the surface. (Laughter.)

I suppose Scott recognized the two extremes of woman's power when he wrote those memorable words:—

Oh, woman, in our hours of ease,
Uncertain, coy and hard to please,

Digitized by Google

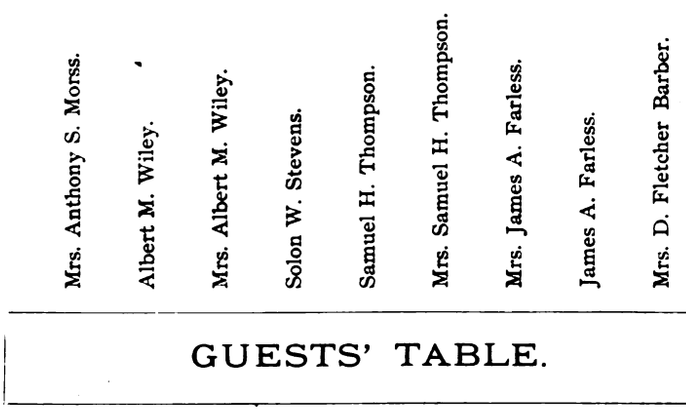
And variable as the shade
By the light, quivering aspen made:
When pain and anguish wrings the brow,
A ministering angel thou.

While I was at the fair in Chicago I was fortunate enough to be able to attend some of the meetings of the Woman's Congress, and at one of those meetings, Mrs. Lillie Devereaux Blake spoke on the subject, "Our Foremothers." In her remarks she said that one of the greatest hardships our foremothers had to endure was our forefathers. I thought this was rather hard on our forefathers, but before she got through with them, I felt sorry that they ever existed (laughter), because all the glory they ever had in history was shorn off by the relentless shears of the speaker, and "as the sheep before the shearer is dumb. so I opened not my mouth." But as I left the hall and looked at the building in which it was situated, I was made to realize, in a measure, Woman's Triumph and her fast-ascending power: for not only in the woman's building did her power shine forth, but it threaded every avenue of trade and art, and amid the nations of the earth the woman of America reigned supreme.

Someone well remarked that ever since man's fall in the Garden of Eden, by Eve's temptation, woman has been at work, unceasingly, to help him regain his former position, and in all this labor woman has been made to realize the weakness of men and her own strength, and she has begun also to know how to use this power; but man need never to fear that woman will usurp *his power;* she will displace *his weakness* by her strength of will and of purpose.

I think you will all agree with me that woman wields a power in the world to-day greater than ever before, and in this country greater than in all the world. The Joans of Arc are not all dead yet, and although they lead on in bloodless fields, their triumphs and achievements are greater than ever before. We have in this country scores of colleges for young ladies, and the evidence of the power that these are wielding is seen in all departments of work and life. The almost astounding fact that woman has been admitted into Yale and Harvard and nearly all the great colleges of the land, shows the position that she is destined to occupy. By the will of the late Mrs. Jackson, of Providence, $70,000 was given to Tuft's College for a building to be known as the Cornelia M. Jackson College for Women, and to provide for the instruction of women in the duties of American citizenship and in the theory and workings of the United States Government.

The splendid intellects of our women are a marvel to all the world, and you may rest assured that her ability will win in her claim for equal suffrage in states and nation. (Applause.)



Man has ever been ungenerous in dividing with woman the honors of any field, and in the literary field there was no exception; but her right there to-day is one of supreme fitness and ability, and stands unquestioned, and the names of Helen Hunt Jackson, Margaret Deland, Margaret Sangster, Louisa Alcott, Harriet Beecher Stowe, and scores of others, help to build the defences around her position in the field. She has simply made man stronger, in strengthening her own position, and thus it must ever be.

Her triumphs in art and music, and whatever realm she has entered, have been the same, and when I mention, among the leaders of thought and progress, such women as Mary Livermore, Frances Willard, Lady Somerset, Mrs. Foster, and scores of others, you will agree with me that her power is being felt more than ever before.

Man has built and ever will build monuments of reverence and love to woman. We boast of that greatest shaft in the world—that monument in Washington, built in honor of man, but it sinks into obscurity, beside that marvel of grandeur—The Taj Mahal—built by the great Mogul ruler, Shah Jahan, in honor of his wife. It is the most ornate, wonderful and beautiful piece of architecture in the world, requiring the labor of 20,000 men for twenty years to complete it.

But I can see the foundation that was laid for a greater monument than the world has ever seen yet, in memory of woman. Already the superstructure is rising in grandeur above the dust of selfishness, ignorance and jealousies of the past, and the twentieth century is to see the most glorious achievements in the history of the world, in which woman's part and glory will be equal to man's. (Applause).

I want to say, in closing, that all this has an import and bearing on Hardware and the vender of the same, little as he may dream of it. Were it not for the progress woman has made, during the past years, in all these other lines, our Hardware would be the same old prosy stuff of by-gone years, and the Hardwareman, prosier still, would sit on a nail keg and consider: that the world was growing smaller each year, by reason of his contracting mind, and if he sat long enough, there would not be room even for the keg he sat on; but woman's taste for the beautiful has displaced all this, and so man has evolved from his nail keg to better things in life and living, and he owes it all to the triumph of the woman of to-day. (Applause.)

The chairman then continued: My friend from Lowell and those on my right, have just been discussing "talks from a life of experience," and we were saying how good it seemed to listen to one who was full of years, with a rich experience mingled. We are honored in having with us to-night one whose life is crowned both with years and a rich experience, and who is the oldest Hardware dealer in Boston. Although his memory runs back over the course of years yet his heart is ever young, and his love for the ladies has never diminished. To him we have given the first toast, and it was from his lips we enjoyed the words last year in response to this same toast, and it gives me more than ordinary pleasure to introduce to you A. S. Morss, the oldest Hardwareman in Boston. (Applause.)

Mr. Morss responded as follows:

ANTHONY S. MORSS ON "OUR LADY GUESTS."

Mr. President, Ladies and Gentlemen: Our Association again honors me with the privilege of extending to the

Digitized by Google

ladies present their salutations and hearty welcome to its banquet.

"Ladies' Night" has now become everywhere essential to the prosperity of organizations of this nature and of kindred character. So attractive has this feature become that some associations already enjoy two of these occasions each year, and it is claimed by some that every meeting would be benefited by their presence. This, however, would hardly be profitable, because if called to listen to our oftentimes prosy discussions in practical business matters, it would so weary you that you would easily be recognized as our sleeping partners, and so for the present we must be content with an annual visit from our estimable lady companions and friends.

The fact is, we love to hail you rather as silent partners and as such to prize your contribution to our capital. Such in part do we welcome to-night in the bright youth and young manhood of many who join us in these festivities,

and who are to become the stalwart merchants of the coming year.

My brief response to the toast to our lady guests will allow me, I am sure, to bespeak for such, if any there be, who reluctantly part from husband, brothers and friends for eight or nine evenings during the year to attend the meetings of our association, your willing, yea cheerful, send-off. We promise in return that they shall come back to you improved in thought, plan and purpose, for what surprises await some of us upon meeting at our Club some fierce business competitor, to find him a genial, companionable good fellow, and that fellow-craftsman who went for our scalp with a whoop! (Laughter.) We take his warm and friendly hand and cease at once to regard him as an enemy; indeed, we are stimulated to become ourselves courageous and aggressive in turn. (Applause.)

The sharp competitor has inspired us with a determination not to be out-done, and the flint has struck a spark from the steel which has fired our business purposes as never before!

So that, ladies, in calling your companions and friends to our monthly meetings, from the glow of the evening fireside, be assured that good results shall follow your sacrifices and a better equipped manhood shall reward your surrender.

Mr. Morss concluded with some remarks of a general character, in which, illustrating the cutting of prices, he told in a taking manner of a case where, as justice of the peace, he had cut the regulation marriage fee. His remarks were received with many expressions of pleasure.

President Thompson then said: I refrained from explaining the origin, plan, and purpose and hopes of this organization, for the reason that we have one with us to-night who was one of the promoters of it, and whose heart and soul have been in the work it has been doing since its establishment. His experience in Hardware is such that he can look at it from all sides, and can present the topic in the best light; and it gives me pleasure to introduce to our guests D. F. Barber of Boston.

Mr. Barber then bowed in acknowledgment of the applause with which he was received, and said:

SPEECH OF D. FLETCHER BARBER.

The remark our president has just made, that the topics selected by the other speakers left him very little to talk about, has a touch of humor which I can hardly appreciate, as the chairman of the committee assigned a certain topic and requested me to speak upon it. The president has still further defined this so that I am restricted to a certain line of thought and cannot, as have other speakers, overlap one another and take in a few generalities to make up a respectable toast. The previous speaker in his generous toast to our lady guests took from me the only brilliant thing which I thought I had to work into my remarks. This occurred to me in the middle of the night and made such an impression on me that it seemed to me that it must make a hit—the reference to our "silent partners" who grace this occasion with their presence. My idea was that in a certain sense this Association is theirs as well as ours, and we depend upon the loyalty of their sex to uphold the membership and interest in our Association which they know so well how to do.

Do we, as individuals, need this Association? We each have our church, lodges and clubs, but very rarely we find

Digitized by Google

more than one member in our line of business belonging to any one association of this class. We think possibly our president may be an exception to this, as we believe that one church in Lowell can claim two deacons as competitors in the Hardware business. Just what state of love and unity they live in we are unable to state. Any association of this kind cannot take the place of this New England Hardware Dealers' Association, as it has been in the past, or may be in the future. We need to mingle with men engaged in the same line of thought, in order that we may secure greater harmony and the best results. We cannot know our competitors in competitive trade. We must learn to know them in some social manner; then instead of hogs,—hedgehogs,—bristling with bad points, we find them lambs, sometimes with horns, (laughter), but surely not the animals we thought them to be. (Applause.) We must have a feeling of fellowship,—friendship would be better.

This will alleviate a large part of the loss which the trade

is heir to. I believe in it more than I do in any combination of prices or of rules, and if each member will stand for this principle we shall see through the next year a larger membership, greater loyalty, less cutting of prices and increased profits (applause), and at our next annual banquet we shall greet a larger and possibly a more enthusistic gathering than we do to-night.

The chairman continued: It always takes three classes to make up a successful business, viz.: the buyer, the retailer, and the wholesaler. The two former we are well acquainted with,—the latter we hold in mysterious awe. We, however, welcomed him with open arms to the benefits and influence of our association; realizing we could do him no harm, and hoping he might do us great good by his mature experience. He is with us for better or worse, aud his mystic relation to the retailer will be explained by one of their number. It gives me pleasure therefore to introduce our "wholesale" friend Albert M. Wiley of Boston.

Mr. Wiley, to whom had been assigned the toast, "Our Wholesale Associates," responded as follows:

REMARKS OF ALBERT M. WILEY.

Mr. Chairman, Ladies and Gentlemen. It is with pleasure that I recall the fact that upon the organization of this Association that the jobber was invited to become a member, and the relations now existing between the jobber and the retailer in the East are so amicable. However, it must be admitted there has been created in certain localities a feeling of antagonism toward that class of merchants who stand as a distributing body between the producer and those who come in contact with the consumer. The facilities for shipment and delivery are such, personal contact with the manufacturer is so frequent, that there is a strong temptation on the part of the retailer to ignore the jobber, and deal direct with the producer.

Even when conditions and quotations are equalized—and it is rarely they are not—the preference is given to the manufacturer, for the reason that he is a manufacturer.

In this Association, to which you have invited the jobber to become a member, there is an opportunity, by combined action, to render to each other that service whereby the

SAMUEL H. THOMPSON, PRESIDENT.

good work already commenced may be pushed to greater and better results (applause), meeting, as we do, from month to month; having in mind one another's welfare; using every possible means to attain the end for which this Association was formed; inducing every retailer, every jobber, every salesman, to become so thoroughly interested in its working, that every one identified in Hardware interests may recognize its benefits and advantages.

I do not hesitate to affirm that the time is not far distant when, by the combined action of these Associations, you may say to those manufacturers who are making direct bids to consumers, and materially affecting your interests, that this practice must be stopped.

However, let us first correct abuses existing in our own ranks, before even making suggestions to others. This means hard work, perseverance and an abundance of patience. It means that our neighbors and competitors have rights equal with our own, and their rights must be recognized. (Applause.)

Since this Association was formed you have had hard and perilous times—times when business men have been taxed to the extent of their ability to keep their ventures

Digitized by Google

upon a paying basis. Three years ago, had we left our business and gone into politics, and sent business men to Washington (applause), we might to-day be enjoying more prosperous times. Could some of our politicians listen to the hard, sound, common sense of our business men, who by their ability and experience are in a position to pass judgment upon these questions, our business would be better and our prospects brighter. (Applause.)

Whatever may be the feeling of the retailer toward the jobber, I can safely affirm that the relation of every jobber in the city of Boston toward the retailer, is such that he stands ready and willing, and welcomes the opportunity, to push this New England Hardware Dealers' Association along such lines that its influence may be recognized, and we sincerely hope for it years of prosperity.

Mr. Thompson, in introducing the principal speaker of the evening, Solon W. Stevens, Esq., of Lowell, said: In ancient times the saying was "Go to Rome for your warriors but go to Greece for your orators." This same saying might be applied as between Boston and Lowell. (Laughter.) When the leaders of our political party were at their wits' end as to where to find a leader, they thought of Lowell—they had been there twice before, and they knew it was a place to which they could always flee and find refuge. Just so was it with an entertainment committee after they had looked the State over, they began to look close at home, and they were more than rewarded, and the success of their efforts will be heard in the words and voice of the coming speaker. I have great pleasure in presenting to you one who may be a stranger to Hardwaremen, but not to Boston, for many of the halls have echoed with his eloquence. I present to you ladies, and gentlemen, Solon W. Stevens, Esq., of Lowell, Mass.

After a few introductory words, by way of extending thanks for the courtesy of the invitation to be present, and also in pleasant allusion to the ladies, Mr. Stevens spoke as follows:

ADDRESS OF SOLON W. STEVENS, ESQ.

In selecting some topic as the subject of my remarks, I thought it might not be altogether devoid of interest to ask your attention briefly, and perhaps in a somewhat superficial way, to some of the social problems which occupy more or less the attention of thinking people at present in all parts of the country. Standing here in the evening of the Nineteenth Century, in the middle of all the great ideas which science and scholarship are constantly crowding in upon our attention, however much we may be inclined naturally to look with the eye of the optimist in forecasting the future, no reflective mind can study without some apprehension the social questions of the hour, in their relation to the great central question arising from the friction which exists between capital and labor. This is not a question which is to be settled in our times. It is a theme designed to run far into the future, under conditions now in the initiatory process of formation, and upon principles, the application of which people are just beginning to understand.

After enlarging upon this thought, Mr. Stevens called attention to the enormous area and extent of this country as portrayed by Doctor Strong, and alluded to the astonishing rapidity with which it will in all probability be populated. If we could take five of the great European powers, say Great Britain, Ireland, France, Germany and Austria, and by some superhuman effort could lift these lands up and weld them together into one vast plateau and bring it across the ocean, we could lay it down three times on unoccupied land west of the Hudson, and then only cover a portion of our arable soil. We read of Rome as once the mistress of the world, but the Roman eagles in their wildest flights never flew so far as from Plymouth Rock to the Golden Gate. Measure the distance on the map from Boston to Chicago, and you will see that the line varies but very little in length from the longest measurement of the single State of Texas. Think you that in time to come this State with its 262,000 square miles of territory, will be contented with two representatives in the Senate, while the 62,000 miles east of the Hudson have twelve such representatives? Think, too, of the probable rapidity of our future growth. If the man from about the middle of the first quarter of this century is alive to-day, he has seen this country grow from five to upwards of seventy millions of people.

If the statistics of scholars who have made this matter a special study are true, the babe born to-day, at the age of thirty will see this country inhabited by 100 millions, and if he lives to the age of seventy, he will be one of a population of 200 millions of souls. What shall be the character of these future residents? Will they loyally regard this as a nation, or simply as an aggregation of separate States? Will they loyally yield to the supreme law of the land and act for the welfare of each and all, or will they perpetuate and foster, and legislate in accordance with the spirit of discontent which even now like a cloud foretells a storm,

JAMES FARLESS, SECRETARY.

and chokes the enthusiasm of the business man and the scholar as well?

In connection with the subject of the greatness of our country, Mr. Stevens related the story told by John Fiske in his lecture on the manifest destiny of America. A party of Americans met to dine together one 4th of July during the war of the Rebellion, when the prosperity of their native land naturally became the subject of their thought. "Here's to the United States," said the first speaker, "bounded on the North by British America, on the South by the Gulf of Mexico, on the East by the Atlantic, and on the West by the Pacific Ocean." The sentiment was received with applause. "But, I'll go one better than that," said the second speaker. "Here's to the United States bounded on the North by the North Pole, on the South by the South Pole, on the East by the rising and on the West by the setting sun." This was received with rapturous applause. But soon an old hayseed arose in the back part of the room and said: "Gentlemen, this is all very well, but why not put this thing just as it is. Here's to the United States bounded on the North by the Aurora Borealis, on the South by the procession of the equinoxes, on the East by primeval chaos, and on the West by the day of judgment." (Applause and laughter). Continuing, Mr. Stevens said: When

Digitized by Google

during last summer Mr. Debs held supreme control of affairs in Chicago, when commerce and industry were paralyzed for several hours by the dictum of one single man, who in arrogance defied the law of the land, didn't you and I look at each other with anxious eyes and ask, what next? Didn't we realize, or rather did we fully realize what a critical moment it was? And when President Cleveland, guided by his accomplished and learned Attorney General, made the insolent usurper feel the force of law, were not our hearts thrilled with joy because the world has been made to see that ours is a nation, and that obedience to its laws is the supreme condition of citizenship! (Applause).

It was all so quickly done, the dignity and the honor of the Nation were so effectually maintained, that we did not at the time fully comprehend the fact that we had narrowly escaped the perils of a Parisian Commune like that of 1870. Then, too, think of this: that at that critical hour the governor of the State which gave to the world the greatest man of this century, Abraham Lincoln, had the audacity to tell the President that his official acts which saved the

D. FLETCHER BARBER, TREASURER.

country from peril were in violation of law! What would have become of our interests had a man like Governor Altgeld at that moment been the occupant of the Presidential chair? (Applause). Suppose the conditions were such as to place in power men who were in sympathy with this sympathizer with Anarchists? What security would you business men feel under such circumstances? Happily, all this has been avoided. But I submit it is a fair question to ask, whether or no it is altogether impossible for such conditions to exist in the future.

In view of all this, I think the all-important lesson of the hour is loyalty to American institutions, and loyalty to the Christian ideals of American citizenship. (Applause). The lesson cannot be too often taught that this government is republican in form and spirit; that the Constitution is the supreme law of the land, and that every citizen regardless of color, race or creed, must not only acknowledge allegiance to it, but live in obedience to its commands. Go stand at Castle Garden and bid the stranger welcome, if you will, to the royal privileges of citizenship in this Western World, but as you take him by the hand tell him in unmistakable accents—teach him so that he will never forget it—that liberty is not synonymous with license; that this land is not the dumping ground for the lawless overflow of other climes; that this is not the rendezvous for the hair-brained apostle of discontent, nor a shelter for the assassin with his stiletto, nor a home for the Anarchist with his torch of flame, and make him understand clearly that before he can sit at our family board, he must lay aside his peculiar prejudice of race and education, and adopt as his own, the spirit of American institutions, conform to American customs, be henceforth American at heart as well as in name, and at all times and forever be loyal to the American flag. (Applause). And in addition to this, teach him that while we believe in toleration of belief in every variety of political or religious creeds, this is a land with open Bibles upon its altars, and that no man, be he ecclesiastic or layman, can be allowed to abate by one jot or tittle the integrity of our system of free, common, public, unsectarian schools. (Great applause).

Furthermore, I believe the instruction in our schools should be given in the English language. This nation is not to be considered an aggregation of European communities, but a nation of English-speaking people, whose language is to become, I fondly think, the language of the world.

As we think of the promises and suggestions which the outlook for the future presents, there is one other thought in this connection which is interesting. The study of the evolution of society has recently been carried on along lines where it has been found necessary to recognize what scientific thinkers call extra-rational or altruistic influences. Mr. Benjamin Kidd has taught us that social evolution can be accounted for in no other way than in accordance with religious principles. So that what we have long been taught by dogma, we are now learning by purely philosophical methods, and science even is teaching the foundation idea of the Golden Rule.

Socialism seeks to do away with the competitive principle, but social development carries this principle to a higher degree and admits all the poor and the rich to a contest for the prizes of life, and seeks not the welfare of the individual selfishly, but the good of others as well. So it seems to me that in reference to the great question between the wage-earner and his employer, there is a necessity for the application of this principle in order to obtain its solution. When Abraham Lincoln in the dark days of the war was depressed and felt that the Fates were against the salvation of the Union, suddenly he heard a voice from the heavens saying, "let my people go," and with one stroke of his pen he lifted four millions of souls from bondage into freedom. (Applause). As we read the signs of the times, ladies and gentlemen, and think of these perplexing questions which confront us, we must acknowledge that they can never be settled until they are settled on the basis of right. And it seems to me if we listen we may hear a voice from the clouds saying to the capitalist and the wage-earner, to the rich and the poor, "As ye would that others should do unto you, do ye even so to them."

After further discussion of the Darwinian and Spencerian theories of social evolution, and their failure to account for social development without the recognition of religious influences, and after a few pleasant personal allusions, Mr. Stevens concluded as follows:

Our individual lives are like the sands on the shore—for a moment they are seen, and in an instant they disappear forever. But the influence of each one remains. We live, we dream, we think, we hope, we love, we plan, but of the impenetrable future we do not, we cannot know. It is only by reliance on Him who holds the nations in His hand, that we live and move. Trusting thus, let each one do his part for the strengthening of sentiments, loyal to American ideals of Christian manhood, and if the dark days of distress and distrust shall come, let each be firm in the faith, and show that loyalty to our cause which was typified by the sailor in classic story, who, when the waves were beating upon his

Digitized by Google

craft, and darkness had robbed him of the knowledge of his course, exclaimed, "Oh, Neptune, you may drown me beneath the waters, if you will, but as long as life and strength shall last I'll keep my rudder true." (Applause).

We read in sacred story that the wise men of the East followed the star westward until it rested over the cradle of the Babe at Bethlehem. We read also in secular story that the star of Empire passed westward from Persia to Greece, thence to Rome, thence still westward to the hills of Albion. Can any one who reads the signs of the times with discernment fail to see that the same star of Empire is in these latter days moving in westerly course, destined, it would seem, to pause in its career over this beloved republic of ours, which, among the nations, is but an infant still. May He, who has thrice rescued the nation from the agonies of war, preserve this people from internal strife, and hold them in the bonds of peace until the remotest generations of time. (Applause).

When the applause which attended the close of Mr. Stevens' admirable address had subsided, Chairman Thompson said: Unexpectedly we have with us to-night one who looks at us from a newspaper and editorial point of view, and we feel the meeting would not be complete without a few words from him; and it gives me pleasure to introduce to you James H. Kennedy, editor of the well-known journal HARDWARE.

The response was as follows:

REMARKS BY JAMES H. KENNEDY.

Mr. Chairman, Ladies of New England, and Gentlemen of the New England Hardware Dealers' Association: In accepting the cordial invitation of your secretary to meet with you this evening, I had but two objects in mind; one, that I might listen to the able and entertaining speeches that are certain to be heard when the members of this Association come together in their annual meeting; the other, that I might meet in person many gentlemen with whom I have had pleasant business correspondence for some years past; but it was nowhere within my expectation to be called to address you in formal speech, especially at this hour, when the minds of most of us are upon the time-cards of the railroads leading out of Boston.

I am persuaded that, in calling upon me, your president has, for the once, made a mistake. He was searching about in this end of the room for some good man—some better man than myself—with whom to fittingly end this pleasant programme. An evil star has led him to the end of this table. Perhaps in his search for that better, that best man, he found himself in the condition of the Irishman who came to his post of duty in a dilapidated condition—one arm in a sling; his nose where his eye should have been; an ear hanging by frayed edges to his bandaged head.

"Why, Patrick!" said his employer, "what does this mean?"

"I've been to a wedding, your honor."

"A wedding! You mean a wake!"

"No, sir. I went to this wedding and there was thereabouts a slip of a dood who was carrying too many airs to suit me; an' I walks up to him, an' I sez, 'Who be yez?' An' he sez, 'I'm the *best man!*'—*and be gorry he was!*"

I have listened with the deepest interest to the able speeches your entertainment committee have provided. The one to which we have just listened—that of Mr. Stevens, was a bugle call to the great moral battles of the near future. A speech indeed worthy of utterance even here at the foot of Bunker Hil! I would that it might be sent broadcast through all the land; placed in the hands of American lawmakers, and teachers, and parents of the coming generation, everywhere! (Applause). The address of your chairman also interested me—but for one brief moment I listened, and trembled. When he forsook the safe level of Hardware dinner prose and dropped into poetry, I was reminded of the fate that befell the luckless youth of whom we were told by Mr. Rex at the recent annual dinner of our brethren in Philadelphia. Called upon for the first time in his life to respond to the toast, "The Ladies"—and in their presence too,—he essayed the lines of the Scottish bard, which our president has so melodiously quoted:

"Oh, woman, in our hours of ease,
Uncertain, coy and hard to please,"

and here he was stricken with the fever of stage fright—most of us have had it;—floundered about for a moment, and then, in a wild grasp at some poetic straw, ruined his oratorical reputation forever by concluding:

"Yet, seen too oft, familiar with her face,
We first *endure*, then *pity*, then *embrace!*"

Then our friend at the left, (Mr. Morss), uncovered before us some of the dark secrets of his profession. Perhaps he is the man for whom I have been looking for twenty years. He was careful not to tell us how much that wedding fee of which he cut the price, amounted to. In the historic incident which memory now recalls, the groom asked the 'Squire how much would be the fee. "Well," said the

SOLON W. STEVENS, ESQ.

modest official—you know all New England 'Squires temper justice with modesty—"the law allows me two dollars."

"It does, does it!" ejaculated the groom; "well, here's fifty cents more,—*and that makes it two dollars and a half!*" (Laughter). I see Mr. Morss nods his head in acqiesence—we have fitted the case to the culprit.

I have had the pleasure of visiting Boston but once before. I came to-day expecting to see many strange faces; but as I look about this board upon the faces of New Englanders from several states, it seems as if I had known you all my life. It was my fortune to be born and raised in Ohio—in that glorious New England section known as the Western Reserve: that section which has done for the farther west what New England had before done for it;—aiding by money, and sinew and brain in the creation of those fair commonwealths—of Illinois, and Michigan; of Colorado, of Iowa, of Kansas. Speaking of this last-named land of cyclones and sockless statesmen, recalls that Populist who came down east and made a call upon his friend—a thrifty farmer of New England. "And you call this agriculture!" he said in contempt; "this farm of yours, which is nothing but a ridge of rock set up edgewise! You ought

Digitized by Google

to see my farm in Kansas—six hundred acres of rolling prairie, covered with waving grain—and a mortgage."

"Yes," said the horny-handed son of the old Bay State, "*I hold that mortgage!*"

The portion of Ohio of which I speak was, in my boyhood days, like a corner of New England taken up bodily near a century ago, and set down in the wilderness—the wilderness which, at the touch of Yankee thrift, soon blossomed as the rose. The new-made towns were named after the dear old communities left at home—Farmington, Bristol, Southington, Newton, Hartford. The people were all New England in name—the Wolcotts, the Beldens, the Curtisses, the Adams, the Holmeses, the Hatches, the Pecks. They attended the Congregational church, as did their fathers: they all talked through the same Yankee nose, (laughter); they held the same ideas of liberty, of the rights of man, of religion, of God. They planted a portion of Plymouth Rock upon the banks of Lake Erie.

When they chose their land and settled down upon it, the first thing they did was to stake out a grave-yard—too

ANTHONY S. MORSS.

often the thing first needed; the next, to reserve a corner for the church; and after that came the school-house. They had no gilded codfish on the steeple of that church (laughter), but the real thing itself was piled—high, and salt, and dry, in every country store; they still hung, with thirsty hold, upon the food of their forefathers.

Mr. Chairman, it is not for me to tell you what New England is. I need not tell you what she makes in the Hardware line; how much of it she makes; how much she makes upon it. There is no corner of the world that does not thankfully use her finished products. When I came in to-day from my home toward the southwest, I could see all along the line—in the scores of busy towns through which we passed—great factories bearing upon their fronts the names of manufacturers known the world over; names grown very pleasant and familiar to me in these years that have passed since I entered the Hardware trade through the modest door of trade journalism.

When Mr. Morss so eloquently quoted the words of Webster, there came into my mind one remark made by this mighty man to which I must take exception: "Massachusetts! *There she stands!*" She does not stand! She has not stood still for one moment since the winds of God drove the argosy of liberty upon these shores! (Applause). She moves on and on. From conquest to conquest. From triumph to triumph, in the world of invention; of material things; of civilization; of moral improvement, and mental example before the world.

There was another feature I was compelled to observe when passing over the wintry landscape to-day—countless bill-boards, and barns, and sheds adorned with such legends as these—a pertinent preparation for some dinners, perhaps, but not needed here—"Castoria, children cry for it!" "Beeman's Pepsin Gum cures Indigestion." "Little's Liver Pills." I do not, however, hold the Hardware trade responsible for this defacement of the face of nature.

One word in conclusion is necessary for the full easement of my mind. We have had several great trade dinners in New York, but there was, in each, some undefined lack—some "Lost Chord"—that marred the harmony. I did not, until to-night, know what that was. We have had rows of white shirt fronts and black coats—that monotonous array of which Mr. Stevens so eloquently spoke—but we have never realized the full measure of our opportunities; never had all that we might have had of grace, and sweetness, of color and smiles; never have done as we might have done—entertained angels—as you have to-night. (Applause).

Edwin L. Haley & Co., No. 185 Fort Hill Square, Boston, Mass., are sole New England representatives of the following houses: Phœnix Horse Shoe Co., Poughkeepsie, N. Y.; Columbia Spring Co., Leggett Spring & Axle Co., James McKay & Co., Pittsburg, Pa.; Columbus Bolt Works, Columbus, Ohio.; Lebanon Rolling Mills, Lebanon, Pa. Edwin L. Haley is well known in the Hardware trade, having been for twelve years a member of the well known firm of Dodge, Haley & Co., and also president of the New England Iron & Hardware Association. In boyhood, Mr. Haley commenced with the old house of Butler, Sise & Co., who were located at No. 120 Milk Street, which was located upon the site now occupied by the Exchange Club. He was also employed for eleven years by the well known house of Bigelow, Dowse & Co., Boston.

During the blizzard of this month the water poured into the wheel pits in the engine room of the Narragansett Electric Light Co., Providence, R. I., ruining the large belts which transmitted power to the dynamos. New belts were needed at once, but by a liberal use of the telegraph and telephone the factory of the Page Belting Co. at Concord, N. H., was reached, and before midnight two of the largest belts in the country were on their way to the scene of the disaster. These belts are made of three-ply leather, one of them being 137 feet long and 72 inches wide, the other of similar proportions. The combined weight of the two belts is 4,720 pounds. And so the good people of Providence did not have to go around by the light of the moon but a single night.

The Hardware trade have a very extended and pleasant acquaintance with Olney Arnold, II, secretary of the American Screw Co., Providence, R. I. This acquaintance, we are afraid, does not yet extend to Olney Arnold, III, who became a prospective voter of Rhode Island, on February 12, 1895. As the young gentleman weighed nine pounds at the time of his advent, and as the horoscope of a newborn child is usually forecast in accordance with his avoirdupois on his first weighing, it is hardly necessary to say that a prosperous and pleasant future extends before the young gentleman. The best wish that can be extended him, is that he shall in all ways walk in the steps of his father.

The wire screen factory owned by E. T. Burrowes, Portland, Me., was damaged to the extent of $10,000 by fire on February 13th. The loss was fully covered by insurance.

Death of Eugene L. Maxwell.

Eugene L. Maxwell, of the firm of Manning, Maxwell & Moore, railway and machinists' tool supplies, No. 111-113 Liberty Street, New York, died suddenly Saturday night, February 9th, at his home, No. 100 Eighth Avenue, Brooklyn, in his forty-fourth year. Mr. Maxwell was prominent in Brooklyn club circles, being a member of the Montauk, Hamilton, Atlantic Yacht and Riding and Driving clubs, having served as treasurer in the latter organization for some years. He was associated in business with President Moore, of the Montauk Club. Mr. Maxwell was also a well known clubman in New York, being connected with the Rembrandt, Lawyers' and Engineers' club. Henry W. Maxwell, his brother, is a member of the Board of Education. He leaves a wife and two daughters. J. Rogers Maxwell, President of the New Jersey Central Railroad, is also a brother of the deceased. The following touching tribute to his memory from the *Brooklyn Eagle* sums up his character in fitting words: "A better man than Eugene L. Maxwell did not live in Brooklyn. Death recalls the classic theory of its preference for the best by taking him. There was every feature of untimeliness in the stroke. Life, love, affairs and the unsettled problems of reform and progress, seemed to need him. While no man is indispensable, and while the illusion that any man is indispensable is one which fate cynically delights to dispel, this man was so useful, so helpful, so inciting and so exemplary that his loss is an impoverishment of those to whom his career and character were dear and inspiring. We gratefully, but with deference, number ourselves among them. So will every advocate of truth in business, toleration in faith, charity in estimate, patriotism in citizenship and principle in politics and in government here include his heart among those that loved him and mourn him. He touched no life he did not better. He spoke no word that did not cheer and clear. He did no deed that was base or little. His was a constant fitness for life, and, hence, a constant readiness to die."

The funeral was held on February 12th at Mr. Maxwell's late residence on Carroll Street and Eighth Avenue, Brooklyn. The attendance was exceedingly large, more than two hundred representatives of the machinery and kindred trades, business acquaintances of Mr. Maxwell, coming from New York in a body. Mayor Schieren, President Charles A. Moore and Col. Henry S. Manning, partners of Mr. Maxwell for many years, and many representatives of the Hamilton and Montauk clubs, and a large number of his neighbors of the Park Slope were present. The Rev. Samuel A. Eliot, pastor of the First Unitarian Church, of which Mr. Maxwell was a trustee, conducted the service. The pall-bearers were: William H. Williams, Timothy L. Woodruff, Francis E. Dodge, W. W. Rossiter, Sturgis Coffin, Stephen Aller and Alfred Brotherhood. The floral offerings were numerous and beautiful, some coming from friends in Philadelphia, Boston and other distant places. The interment was in Greenwood.

Pursuant to a call sent out by Lewis S. Silva, of the George F. Blake Mfg. Co., No. 95 Liberty Street, New York, the following named gentlemen met at his place of business at 12.30 P. M. on the 12th, and in a body attended the funeral:

George H. Stover, the George F. Blake Mfg. Co.; James D. Foot, President Kearney & Foot Co., No. 102 Reade Street; A. Aller, No. 109 Liberty Street; John H. McCoy, Leonard & McCoy; J. Q. Maynard, No. 114 Liberty Street; F. M. Reynolds, Graves Elevator Co.; L. A. Kimball, No. 107 Liberty Street; J. F. Rogers, 107 Liberty Street; John J. Canavan, No. 139 Liberty Street; T. R. Almond, No. 83 Washington Street, Brooklyn; J. F. Holloway, Snow Steam Pump Works; A. Saunders, D. Saunders' Sons; A. A. Dame, Dame & Townsend; John Harlan, McNab & Harlan Mfg. Co.; James H. Goldey, Hardware Board of Trade; R. Dudgeon; John H. Lidgerwood, Lidgerwood Mfg. Co.; Russell R. Brown, Snow Steam Pump Works; W. L. Clark and E. M. C. Davis, Niles Tool Works; F. H. Stillman, Watson & Stillman; J. C. Saxton; J. S. Mundy; E. T. Copeland, New York Safety Steam Power Co.; L. S. Silva, A. A. de Bonneville and James G. Winship, the George F. Blake Mfg. Co., No. 95 Liberty Street; Mr. Shippey, John A. Roeblings' Sons Co.; C. L. Waterbury; Angus Sinclair, *Locomotive Engineering;* P. M. McLaren, Abendroth & Root Mfg. Co.; J. W. Cooke, Cooke & Co.; Andrew Mercer; E. P. Hampson; C. H. Dickerman, Milton, Pa.; C. P. Day, *Locomotive Engineering*.

They adopted this plan that they might more fully show the thorough respect and appreciation that the machinery and kindred trades held for one who had been so long and well known to all of these branches of the business community.

The Geuder & Paeschke Mfg. Co., manufacturers of tinware, Milwaukee, Wis., offer to the trade a full line of cream cans and cream can trimmings for the ensuing spring trade. Among the specialties they make for the dairy trade are their celebrated Fairmont cream can gauges, and their self-locking cream cans, and self-locking trimmings, patents on which have just been granted and which they now propose pushing vigorously, having lately very materially perfected their tools for the production of these goods. The trade are cordially invited to write for prices on anything they may be in need of in the various lines manufactured by this firm, and they can rely on always receiving the very lowest market quotations in answer to their inquiries.

The Paint & Oil Club of Boston, Mass., held its eleventh annual dinner on the evening of February 14th at the Brunswick Hotel in that city. A new departure was the presence of ladies as invited guests. President Anthony Wayne Strauss presided, and at the table with him sat Mayor Curtis, Mrs. Helen H. Gardener, Rev. C. W. Biddle, Miss Alice Stone Blackwell, Miss Florence G. Shaw, Mrs. May E. Shipp, Thomas E. Johnson and Lewis E. Tilden. Felicitous speeches were made by the ladies, guests and the members of the club. Some fine vocal and instrumental music was rendered, and at a late hour the assembly departed for their homes well pleased with the gastronomical and social events of the evening.

There will be an important meeting of the National Board of Trade of Cycle Manufacturers in New York on February 25th. The Board have sent circulars to the manufacturing trade, asking the following questions: 1. Are you in favor of one or two cycle shows? 2. What city or cities do you prefer? 3. What dates do you recommend? 4. How many days should each exhibition remain open? 5. How many days should elapse between the closing of one show and the opening of the other? 6. If two shows are given, which section, East or West, should be given first? It is expected that the answers to the above questions will make interesting reading.

S. W. Entrekin, No. 204 North Second Street, Harrisburg, Pa., introduces to the readers of HARDWARE, upon page 62 of this issue, the Entrekin Combined Cutter, Punch and Plyer. He has sold large numbers to the sewing machine trade, and has also been pushing it successfully into the Hardware trade. It is made expressly for sewing machine and other round belting, and as there are a number of other machines using belts of this character, the jobbers can no doubt find it well worth while to look into the character of this article. The manufacturer will be pleased to hear from any who are interested.

Hardware Club Notes.

The following correspondence carries its own explanation, and was brought out by the recent burning of the new home of the Merchants' Club:

HARDWARE CLUB,
No. 253 Broadway, N. Y., February 14, 1895.

To the Officers and Members of the Merchants' Club:

In behalf of the Governors of the Hardware Club, I beg to extend to you our cordial sympathy in the temporary misfortune which you have sustained, and also to offer you the privileges of the Hardware Club, which is open from 8 o'clock in the morning until 8 o'clock in the evening.

Yours truly, WM. H. WILLIAMS, President.

William H. Williams, Esq., President Hardware Club.
No. 253 Broadway, N. Y., February 14, 1895.

Dear Sir: In behalf of the directors and members of the Merchants' Club, we beg to thank you most heartily for your expressions of sympathy, and for your generous invitation to our members to avail themselves of the privileges of the Hardware Club during our temporary misfortune, which we thankfully accept.

Your kindness will be held in grateful remembrance by our Club. Yours very truly,

WILLIAM E. GELIN, President.
ED. N. TOWNSEND, Jr., Secretary.

At a recent meeting of the board of governors of the New York Hardware Club, a committee were appointed for the presentation at the coming annual meeting in March, of the names of gentlemen to succeed the following members of the board of governors, whose terms at that time expire: Alfred D. Clinch, Charles Daly, Brace Hayden, M. C. Ogden and Webster R. Walkley. The gentlemen constituting this committee are Frank H. Thompson, of the Stanley Rule & Level Co.; George Munson, of Sargent & Co.; George B. Germond, Russell & Erwin Mfg. Co.; George A. Graham, John H. Graham & Co., and James D. Foot, of the Kearney & Foot Co. In accordance with the provisions of the constitution, this committee shall nominate in writing the members of the club who have consented to serve as governors, and the names of these gentlemen shall be placed upon the bulletin board, at least ten days before the annual meeting.

The following gentlemen have been unanimously elected to membership in the New York Hardware Club since our last report:

L. A. Kimball, No. 107 Liberty Street.
Abner M. Wilcox, No. 23 Park Place.
John A. Hiltner, No. 271 Broadway.
Edgar W. Abbott, No. 29 Barclay Street.
Ernest F. Birmingham, No. 253 Broadway.
Henry Bright, Tribune Building.
Fred. W. Coffin, No. 238 Columbus Avenue.
Daniel H. Dorsett, Jamestown, N. Y.
Clarence W. Fox, No. 52 Park Place.
Joseph A. Fuller, No. 33 Chambers Street.
Harry Hoyt Good, No. 57 Murray Street.
Frank H. Hoffman, Waterbury, Conn.
Frank H. Lancaster, Jersey City, N. J.
John N. Lindsley, Orange, N. J.
Jas. F. Maccabe, No. 16 Murray Street.
Albert J. Milbank, No. 71 Hudson Street.
Henry Morgenthau, Tribune Building.
Duane H. Nash, Millington, N. J.
E. T. Perry, Tribune Building.
Chas. Porcher, No. 29 Broadway.
Herman Ridder, *Staats Zeitung*.
W. F. Rockwell, Meriden, Conn.
L. C. Smith, Syracuse, N. Y.
Geo. B. Tripler, Tribune Building.
William Whiting, Holyoke, Mass.
F. W. Woolworth, No. 280 Broadway.

Philadelphia Association Committees.

We have already published the results of the annual election of the Hardware Merchants' & Manufacturers' Association of Philadelphia, when President William W. Supplee, Vice-President Samuel Disston, and Secretary and Treasurer T. James Fernley, were unanimously reelected to the positions which they have so long and honorably occupied. The committees for the coming year have now been appointed, and we are pleased to present the same herewith:

Grievance Committee: Wm. D. Supplee, chairman; Jas. S. Bonbright, Paul A. Griffith, Walter J. Parsons, Tyler B. Hendrickson.

Freight Committee: James H. Ritter, chairman; Wm. C. Peters, Fayette R. Plumb, Ralph H. North, Thos. Devlin.

Membership Committee: Robt. W. Mallon, chairman; Chas. M. Biddle, Alfred C. Rex, Geo. B. Darby, T. James Fernley.

Room Committee: Frank H. Taylor, chairman; Wm. H. Allen, Henry A. Terry, Wm. S. Lloyd, Thos. W. Sparks.

Jobbers' Committee: Wm. D. Supplee, chairman; John R. Griffith, James H. Ritter, John R. Seltzer, James S. Bonbright.

Iron and Steel Committee: H. B. Nicholson, chairman; Einwechter & Wyeth, Cann & Saul, E. L. Hand & Co., Ellicott Fisher Co., Nicholson & Renwick, W. H. Bennett & Co.; Park Bros. & Co., Limited.

Manufacturers' Committee: Fayette R. Plumb, chairman; Samuel Disston, Lewis W. Klahr, Geo. Barnett, Ralph H. North.

Death of Mahlon J. Woodruff.

As this issue goes to press there comes the sad news of the death of Mahlon J. Woodruff, president of the Russell & Erwin Mfg. Co., who departed from a life of active usefulness on February 22nd, at his residence, No. 20 East Eightieth Street, New York. It had been feared for some days that his severe illness might at any moment have a fatal termination, but a temporary rally a couple of days ago renewed hope in the hearts of his friends. Only a brief note may be here made of Mr. Woodruff's business career or personal character, more detailed mention being reserved for a later issue. He was born near Sherman, New York, some fifty-nine years ago, and it was in early manhood that he entered the service of the great company with which his entire business life was passed. He served as its treasurer from 1885 to 1893, and as president from the date last named until his death. He was also director in the Menantic Steamship Co., Limited, of Bristol, England; a member of the Ohio Society and of the Hardware Club. A widow and two children, John S. Woodruff and Mrs. Arthur F. Hogar, survive him.

The works of the Watson Iron Co., Bridgeport, Conn., have been leased by the Bridgeport Mfg. Co., which has been organized for the purpose of manufacturing cutlery and Hardware specialties. Willis F. Hobbs, the president of the company, was formerly treasurer of the Wilmot & Hobbs Mfg. Co. E. N. Sperry, the tresurer, is a prominent banker and president of the Bridgeport Board of Trade, and formerly treasurer of the Monumental Bronze Co. The secretary, Anton Trauk, has been connected with the Bridgeport Knife Co. On March 1st the company expect to have some of their lines ready for the trade.

Another example of "the right man in the right place," may be found in the fact just telegraphed from Cleveland, Ohio, that T. James Fernley, secretary and treasurer of the Philadelphia Hardware Merchants' & Manufacturers' Association, has just been elected secretary and treasurer of the recently formed National Hardware Association, of which Mr. Supplee is president. Good!

The Coburn Trolley Track Mfg. Co., Holyoke, Mass., have just put in a galvanizing plant, and are prepared to furnish all their track and fittings, galvanized as well as japanned, at short notice.

Review of the Markets.

Financial: There has been no change worthy of mention in the New York money market, though it has been somewhat influenced by the turning into the national treasury of nearly $11,000,000 in gold, on account of the local subscription to the new bond issue. The ten days which were allowed Congress to act on a currency bill, have expired without that august body arriving at any decision. Advices from London are to the effect that in spite of the uncertain action of Congress with regard to the bond issue the new loan of the United States Government is regarded there with a great deal of favor. In advance of the announcement of any terms of issue the new bonds are bid for at a premium.

Hardware: No great changes have been noted, but there is a steady though slight improvement in the tone of the market. The general opinion is that if the currency question were settled in a satisfactory manner business would improve wonderfully. The stocks carried by both jobbers and dealers are quite small, and will probably be kept so for some time to come. The volume of trade is fair.

Wire Nails: The Wire Nail market is in better shape than it has been for a year. The mills have orders enough to keep them busy till about the 1st of May. Dealers are pleased with the present condition of affairs. Large lots at mills are held at 90 cents and carloads are bringing from 92½ to 95 cents. The tone is firm.

Cut Nails: There is no change in the Cut Nail market; 85 cents is the quotation for lots on dock at New York, 60 to 65 cents average. Small lots at store bring from 90 cents to $1.00. Business is dull.

Bolts: The volume of business is materially the same. The meeting of the manufacturers of Common Carriage Bolts, Machine Bolts, Lag Screws, etc., which was to have taken place in Cleveland on Wednesday, February 13th, was postponed until February 20th, when the discounts on the new list will most likely be determined. In the meantime business transactions will be based on the old lists.

Axes: The old prices govern. There is no change in the demand.

Locks: The market is unchanged and prices are still at the same low figure.

Tacks: The trade in tacks is quiet. Prices are the same as a month ago.

Knives: There is a good trade in the domestic grades of cutlery, especially in the cheap lines. The import trade is not yet fairly started.

Skates: The large sales of skates that were made during the cold snap has left that trade in fine shape for another season. Most of the retailers have disposed of their stock, and will have to lay in entirely new stock for the next season.

Linseed Oil: The advance of prices by the western dealers was expected to cause a similar advance in the east, but so far there has been no change. The depression in the cake market is a great incentive to putting oil here on a higher basis, but the possibility of increased foreign competition impels the crushers on the seaboard to go slow. In the west there is no fear of competition from abroad, and hardly more of competition from the eastern mills. It is generally understood that there is more oil here than is needed, and in spite of the light demand in their own markets, it is thought that with the freights against them the eastern crushers would not attempt to find a market in the west unless prices there should advance considerably.

Red Lead: Business is quiet though prices are well maintained by the various dealers for German makes at 4⅞@5¼ cents on the spot, as to quantity. For future delivery there is not much inquiry, and prices may be called nominal at 4⅝@4¾ cents.

White Lead: Business has been almost stopped during the past week. The heavy storms that prevailed in the whole country made the transportation of goods impossible, and checked what little trade there was in sight. Dry Lead is at 4½ cents, less the usual discount. There is no change in the price list recently issued by the National Lead Company. The list appeared in our last issue.

Litharge: Very little new business is reported, about all that is being done being regular contract deliveries to the glass trade, as about all the rubber factories have shut down for the present. Values, however, remain at 4¼@4¾ cents.

Window Glass: The keen competition between the manufacturers in the Pittsburg section and those of Indiana has had a demoralizing effect on the market, and prices have suffered in consequence. Discounts are in some cases as great as 85 and 25@90 per cent. off the old list.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Copper.	
Lake, ingot... ℔	10½
Arizona & Baltimore Cast'g	10½
Ansonia "A" Casting	10¼

Do. 20x28	8½

Clapp & Co., bankers and brokers, New York, in their latest weekly letter speak as follows: "The persistent faith of investors seems likely to secure the reward it deserves. Private hoarding of gold may not prove profitable. Business interests may shake off the incubus of political control. The strong, deep current of national prosperity will carry all who have faith, energy, economy, honesty, skill and industry. For about twenty-three months the country has suffered from a variety of experiments made by a party that for the first time in thirty years had complete control of our national legislation. Their success in doing the right thing at the wrong time and the wrong thing at the right time is now historical. They have seemingly preferred any wild method to cover a tariff reform deficit rather than foster home industries or reciprocity with foreign nations. The tax collected on foreign importations has not prevented buying gold or borrowed money at a 25 per cent. increased rate of interest. Many miners are now devoting their time to digging gold rather than silver, which never sold lower than recently quoted. The imports, exports and re-exports of Great Britain as reported by the London *Statist* for years named indicate their highest expansion of trade was in 1890, 1891 and 1892, and that a slight shrinkage in business has been in progress during the past two years. Possibly their loss was in American business."

THE CLEVELAND TRADE.

For the most of the time during the past two weeks we have been storm-bound and experiencing the difficulties in communication that have beset the whole country. The result has been a lull in business. Now that the mercury is registering a more reasonable temperature trade has revived, and, if we have no more misfortune, February will close with a record of natural improvement over February of 1894.

The firmer feeling in prices of Wire and Nails which commenced two or three weeks ago, on the part of manufacturers, continues in full force, and prominent makers claim, not without reason, that March will show a still further stiffening in prices. All mills have received orders for

Digitized by Google

Wire and Nails that will tax their ability to fill, and dealers who have not made their arrangements for spring stocks will do well to provide for them so that they may not be disappointed.

Seasonable goods, such as Wire Cloth and Poultry Netting, are in good demand, and prices are very firm. Manufacturers of these commodities are also well supplied with orders, and with the limited capacity for production and constantly increasing consumption, it is fair to presume that when the season actually arrives there will be the usual difficulty in obtaining supplies promptly at any price.

Hand Farming Tools are not moving with their usual activity at this season of the year. Reports from country dealers are to the effect that the consumption of 1894 was not so large as usual, and, as a consequence, many have sufficient carried over to give them a good start.

Builders' Hardware will be in active demand, if reports are to be relied upon. Locally, a large amount of building is projected both in business blocks and residences. This condition will naturally bring about a demand for mechanics' tools, which was conspicuous by its absence during the past year.

Manufacturers' Supplies: One of the best evidences of a steady improvement is in the fact that the demand from manufacturers for supplies of all descriptions is much better than it has been. Belting, Wood Pulleys, Packing and the numerous articles in this class are in very much better demand.

Bicycles: While it is not possible to use Bicycles at present with any degree of comfort, much interest is displayed by dealers in providing for the large demand which all feel is bound to come with the opening of the spring. The demand seems to be very largely for the better class of wheels that are offered at a reasonable price: next to them the cheap grades; while the high-priced wheels are neglected except by the class of riders who believe that nothing is good unless it is high in price. This class is, we believe, only a minority of the whole.

Financial discussions in Congress seems to have no appreciable effect on general business. Collections continue satisfactory, and every one is looking forward to 1895 as a year which, while it may not prove a banner year, will be such an improvement upon its predecessor that the "tales of woe" related in 1894 will have no place in its history.

We congratulate the trade upon the improved outlook and hope that all may have their full share of the prosperity. McINTOSH-HUNTINGTON CO.

THE BOSTON TRADE.

Although February business does not exceed that of the month previous, sales are reported as being ahead of last year. Traveling salesmen have been out with samples and quotations on such goods as are usually offered early in the season for future shipment, and the retailer has had the opportunity to decide where to place his orders to the best advantage. The receipt of orders for such goods as Mowers, Screens, Doors, etc., has been largely in excess and more satisfactory than last year, and although prices are lower there seems to be a better grade of goods than has ever been offered.

The larger jobbing houses have responded to the request of their customers and are placing a line of Bicycles in stock. The distribution of these goods to the consumer seems to be more satisfactory when carried on by the retail Hardware trade than by irresponsible agencies. High grade machines upon which full guarantee is given are now being offered by the retail trade as low as $60. This price shows a good margin to the retailer.

Prices generally remain about the same, and as trade increases there is little opportunity for further decline. Wire Nails are firm, and prediction that they will reach $1 base at factory before April 1st, is likely to be fulfilled. Barbed Wire has also advanced, and the low quotation named early in the season will not probably be made again.

The conditions are exceedingly favorable for a good spring trade, and if merchants only felt that the currency question was safe, their purchases would undoubtedly be larger, but possible dangers from this evil are making buyers exceedingly cautious and disinclined to increase their indebtedness beyond possible necessity. FRYE, PHIPPS & CO.

THE PHILADELPHIA TRADE.

The country is once more converging from its blanket of snow, and the increasing warmth and power of Old Sol reminds dealers it is time to examine their stocks, and lay in some spring goods for which there should be a fair demand this year. In 1894 purchases were very cautiously made, and there is reason to suppose stocks were generally cleaned out, so that replenishment should be the order of the day.

As a matter of fact this is the case. Door and Window Screens, Refrigerators, Ice Cream Freezers, Hoes and Forks are going out in quantities—everyone quoting the old belief that a cold winter makes a hot summer.

If there was ever any doubt as to Bicycles belonging to the Hardware business, it would seem to be effectually settled from the number now being sold. They are in great demand; orders are coming in from all sides, and as for ourselves, we are far behind on orders. Dealers who formerly would not handle bicycles now order them as they would strap hinges, and the very fact that a bicycle is worth some money is a strong incentive to a dealer whose business has been cut down greatly by low values, to handle them as one item at least which will count into money.

It stands to reason that a dealer who did an annual business in 1885 of $30,000, now, by reason of the decline in the value of Hardware, finds his business in 1895 one-third less, or $20,000, His expenses are probably greater—certainly no less—in dollars and cents, and he welcomes bicycles at $60 or $80 apiece as a pleasant change from nails 1½ cents, or strap hinges at about 2½ cents per pound.

As for Wire netting—the fool-killer has not been at work lately, and there seems to be a general effort on the part of everyone to sell it at cost or less. In the meantime the prudent man notes that one larger factory is already closed out, having sold all their product for '95, and the future points to a short supply if there is anything like a fair trade.

In the meantime Congress keeps on wrangling over free coinage, land issues, moonshine money, and still we hear the cry from the business men of the country, "How long, how long?" THE BIDDLE HARDWARE CO.

THE DAVENPORT TRADE

The weather has been the leading topic of conversation since our last letter, in which we referred to the severe storm of the 25th of January. This storm was followed by intensely cold weather; high winds prevailed, delaying railway trains, blocking the country roads, and in many ways interfering with commerce; hence the volume of trade, for the last fortnight, will be less than it was last year at this time. The same causes have retarded collections, which cannot be reported as good as usual.

Linseed Oil has again advanced; the slight advance in nails is maintained, and price of barb wire seems firmer, as the time approaches for fence building. The manufacturers' representatives are out in force and report satisfactory amount of sales.

Indications point to early spring trade and we all have the satisfaction of feeling that we cannot experience the decline in values this year, that occurred in 1894. A large importation of Canadian cartridges by a prominent western house has produced quite a sensation among ammunition dealers. The Hardware trade seems at sea regarding the

. . THE MODELS OF . .

HUMBER CYCLES

In process of construction in our American factory have been designed since other cycle makers, European and American, completed their 1895 models and embrace improvements not to be found in other cycles manufactured in America. Stocks will be on exhibition and ready for delivery March 1st at our New York depot, **318 Broadway,** and at our agencies in all prominent cities in the United States. Cyclists before selecting their 1895 mounts should wait and see

THE AMERICAN BEESTON-HUMBERS,

Practically 1896 models, a year ahead of all others. Humbers are the standarp of quality with cyclists in all parts of the world and are the standard which all cycle makers aim to imitate. Unequalled in quality in any part of the world, they are leaders everywhere, on the Track, on the Road, in the Club. Second hand Humbers bring better price than any other make. Why?

Humber & Co., America, Limited, LONDON, PARIS, NEW YORK.

FACTORIES: BEESTON, ENG. WESTBORO, MASS.

AMERICAN OFFICES, 318 BROADWAY, N. Y.

new carriage bolt lists that have been issued of late, but it is likely that the list of Feburary 14th will be adopted.

Before this letter appears in print people will have celebrated Washington's Birthday; the Hardware business will be represented as usual with hatchets, and people will really believe that Father George was born on the 22nd day of February. It seems that the associates and biographers of the truth-telling patriot have been lacking in due regard for exactitude, for it appears now that Washington was born February 11th, 1732.

This change came about by an act of Parliament in 1751, decreeing that September 3rd, 1752, should be considered September 14th, 1752, by adding to the former eleven days. Just where or for what reason the birthday of Washington was changed from the 11th to the 22nd is not clear, but it is a fact that after the new style came into effect that Washington celebrated the 11th as his birthday, with one exception and that was on the 12th, as the 11th was Sunday.

The New York *Journal* of February 23, 1786, refers to news twelve days old in these words: "Boston, 13. Saturday last being the anniversary of the birthday of his excellency George Washington, Esq., the same was observed here by a discharge of cannon and other demonstrations of joy."

SICKELS, PRESTON & NUTTING CO.

THE ST. LOUIS TRADE.

The extreme cold and unpleasant weather that has prevailed all over the west and south during the last thirty days has somewhat curtailed the sales of general Hardware up to the present time, but we can soon expect a break-up, at which time light goods will commence to move. Such articles as have been shipped are seasonable goods, which retailers in the smaller places must have for early spring. Shovels, Spades and small agricultural tools are being sold quite freely. There has been a large demand for Poultry Netting so far this spring from all sections. Barbed Wire has stiffened a little in price, and the demand is fair. Wire Nails, owing to the factories being filled with orders, have advanced, and the demand is fully equal to last year from jobbers. Bicycles are being shipped even this early, and the trade in this line bids fair to be much larger than in 1894, and our jobbers are prepared for an increased business.

As soon as spring opens St. Louis looks for and will have a good business.

A. F. SHAPLEIGH HARDWARE CO.

THE MINNEAPOLIS TRADE.

There seems to be a little better feeling all around, although business has not improved materially. The annual meeting of the Minneapolis Hardware Association was held the 7th inst., and the following officers were elected: C. F. Stremel, president; J. Stoft, vice-president; F. R. Warner, treasurer; F. L. Stoddard, secretary. An excellent supper was served, and the local situation and the future of the association were discussed. All agreed that we had already accomplished a great deal in establishing an acquaintance among the members, as well as in smoothing over a great many difficulties that if left alone would have caused friction among various dealers in the same neighborhood. A determination was expressed to get all of the regular Hardware dealers into the Association, if possible.

The weather has not been quite as severe during the past week, and in consequence trade has been somewhat better.

W. K. MORISON & CO.

THE AUSTRALIAN TRADE.

The operations of the past month have not been marked by any noteworthy incidents. A retrospective glance at the year of 1894 is in many ways discouraging—in others, less so. As a result of the disasters of the preceding year business in all channels was materially restricted. Extreme caution was the guiding principle in all operations. Im-

Digitized by Google

portations were limited strictly to actual requirements, and what little trade was done, comparatively speaking, was on the basis of safety. A number of dealers have passed out of existence, to the benefit of those who remain. The future, therefore, offers several features of encouragement. Stocks all around have been considerably diminished and are more on a par with the existing demand. Liabilities have also been decreased, and the business now done is of a more healthy and legitimate nature, people buying only what they actually need and paying for what they buy.

Purely trade failures have been surprisingly few, the losses on speculations in land and shares furnishing the causes in the large majority of general collapses.

A movement is on foot looking to the federation of the Australian Colonies, which are now split up into six separate provinces—Queensland, New South Wales, Victoria, South Australia, Western Australia and Tasmania. Australasia comprises these Colonies and New Zealand. The latter colony takes no part in the present consolidation scheme. As each colony possesses individual governments and diverse tariffs, it can readily be seen that the existing system has a restrictive effect on inter-colonial trade, beside being both cumbersome and costly.

The project, which is now assuming some definite shape, has been agitated more or less in a desultory way for many years past, and it really looks now as if it might soon become an accomplished fact.

McLEAN BROS. & RIGG, LTD,
Walter J. Travis, Mgr.
Nos. 52 and 54 New Street, New York.

As the season advances when hammocks will be again in use, any device connected with them will prove interesting, and nothing more so than a fly protector which will insure comfort and rest to their users. The Oriental Hammock Co., No. 501 Broadway, have placed on the market one that is simple, easily adjusted, and affording perfect security against flies, mosquitoes or any other insects. They will be pleased to quote terms, etc., to any who may be interested.

The second annual banquet of the Membership Club of the Philadelphia Hardware Association was given on the evening of Wednesday, February 13th, at Bache's Restaurant, Philadelphia. There were about fifty members present, and pleasant remarks at the close of the banquet were made by James H. Darnell, Aaron I. Sanson, Jr., James Young, William E. Andrews, H. A. Phillips and others.

At the annual meeting of the Stanley Works, New Britain, Conn., and No. 79 Chambers Street, New York, held February 19th, the following officers were re-elected: William H. Hart, president and treasurer; Peter McCartee, vice-president; L. H. Pease, secretary, and George P. Hart, assistant manager.

New York Office, David Eastman. Manager, 64 Reade St.

The firm of A. H. & E. W. Abbe, dealers in Hardware, New Britain, Conn., have made a handsome gift to the Young Men's Temperance Society of that city. The society's new building is nearing completion, and the contract with the builder says that all Hardware used in the building shall be paid for by the society. The firm of Abbe Brothers' has just presented the society, through the contractor, with all the Hardware necessary to equip the new building.

The Manufacturers Association of Kings and Queens Counties, banqueted in the Pouch Mansion, Brooklyn, on the evening of February 18th. Some two hundred guests were present. H. B. Haigh, president of the Association presided, and speeches were made by Hon. Jos. C. Hendrix, John H. De Forest, D.D., T. B. McLeod, D.D., and others.

Superintendent F. E. Lodetti, of the New York Tin Foil & Bottle Cap Co., Kingston, N. Y., has been granted a patent for a magazine for repeating firearms. Twelve cartridges can be inserted at once, instead of inserting individual cartridges, as by the ordinary method. The action is described as decidedly simple and no more cumbersome than the ordinary repeating firearms.

Does any reader of HARDWARE use an old-fashioned quill pen? Do you know of any one who uses them? Where are they made, and to what extent? Information upon these points will fill the aching void in one inquiring soul.

The store and stock belonging to W. Henry Hutchinson, a hardware merchant, Lynn, Mass., were completely destroyed by fire on February 13th. The stock was valued at $40,000 and the store at $10,000; insured for $30,000. Several firemen met death in fighting the flames, and the total loss to property will exceed $100,000.

At a business meeting of the stockholders of the Morris Hardware Co., Youngstown, Ohio, held on February 11th, the following officers and directors were elected: H. M. Garlick, president; W. J. Hitchcock, vice-president; W. J. Whiteworth, secretary and treasurer, and J. H. Morris, general manager. Directors: H. M. Garlick, W. J. Hitchcock, J. H. Morris, W. J. Whitworth, Hugh B. Wick, L. E. Cochran and J. L. Botsford.

Oliver Brothers, who were located so long at No. 118 Chambers Street, New York, have removed to No. 33 Chambers Street, where they have leased one-half of the first loft. Their quarters are commodious and attractive. The space has been divided into pleasant offices and a shipping room.

Herr Treitl, a Vienna Hardware merchant, who died recently at the age of ninety-one, left 800,000 florins of his fortune to the Vienna Academy of Science for the promotion of scientific research. He left a quarter of a million florins besides to charitable institutions.

William W. Supplee, president of the National Hardware Association recently formed at Cleveland, Ohio, is in Cleveland at present, attending a meeting of the executive committee of that association.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores

Aiken, S. C.—Clark O. Allen.
Aurora, Ill.—Leonard Moss.
Baker City, Ore.—D. A. Vance.
Barre, Mass.—C. P. Allen & Co.
Chatham, N. Y.—W. W. Gray.
Constantia, N. Y.—Clayton Winn.
Gainesville, Tex.—Schopmeyer & Schade.
Mars Hill, Me.—George Houghton.
Pioneer, Ohio.—The Pioneer Hardware Co.
Steubenville, Ohio.—E. R. Forbes.

Record of Changes.

Argentine, Kan.—W. F. Lucas will continue the Hardware business which was formerly conducted by Millard & Lucas.

Beaver, Pa.—George Q. Wolfe has disposed of his Hardware store to J. K. Simpson, of Verona, and will quit the business.

Bowesmont, N. D.—James Thomson & Son, Hardware and lumber, succeeded by Thomson Bros.

Cheboygan, Wis.—J. M. Darling has purchased Henry Muth's stock of Hardware, worth $3800. A large new stock will be put in, and a general Hardware business conducted.

Chicago, Ill.—Harry F. Scharbach, Hardware and stoves, reported sold out.

Colesburgh, Iowa.—Reinhart Thompson, stoves, style changed to Thompson & Smith.

Davis, Ill.—Mr. Granville, of Stockton, Ill., has purchased the Hardware store of Fred Kloster, and is now in possession.

Exira, Iowa.—D. E. Shauger has bought out the Hardware stock of J. G. Gates, and will continue the business, considerably enlarging the stock.

Gentry, Ark.—Parke & Woodworth, Hardware, have dissolved. The business will be carried on by J. E. Woodworth.

Gloversville, N. Y.—E. L. Durkee has purchased the Hardware establishment of J. P. Heacock & Co. on North Main Street. The business will be continued under the name of E. L. Durkee & Co.

Gower, Mo.—H. J. Myers & Co., Hardware, sold out to Osborn & Carter.

Granada, Minn.—Bondrye & Co., Hardware, reported as having been succeeded by F. R. Field.

Greenville, Ohio.—R. L. Smith has purchased the Hardware stock of C. J. Moore, deceased, and has opened his store in the Allen block.

Halifax, N. S.—The Hardware business of A. M. Bell and the P. Walsh Co. have been merged into one, and pending the completion of leases, will be carried on as at present.

Hope, Ark.—K. G. McRae, the prominent Hardware merchant, has sold his interest in the Wilson-McRae Hardware Co. to John P. Duffie, surviving partner.

Houghton, Mich.—The Carlton Hardware Co., of Red Jacket, have bought out the Hardware stock of Gilbert & Lang, and will place Ed. T. Emmons in charge.

Independence, Iowa.—R. R. Plane & Co., Hardware, succeeded by I. C. Plane.

Kellogg, Minn.—Joseph and John D. Bricher have purchased their brother's stock of Hardware and machinery, and will continue the business under the firm name of Bricher Bros.

Leigh, Neb.—Hans T. Peterson, Hardware and furniture, reported sold out.

Littleton, N. H.—Smith & Burnham have sold their stock of Hardware and tin business to Geo. Whittiker and Frank L. Dunlap.

Lyons, N. Y.—J. C. Myers, Hardware, announces his retirement from business. Chas. A. Noble will continue it.

Madison, Minn.—John L. Halverson, Hardware, succeeded by H. M. Hagestead.

Mayfield, Ky.—Lockridge & Wilson, Hardware, succeeded by W. S. Lockridge.

Mexia, Tex.—Adamson & Hancock, Hardware, succeeded by B. J. Hancock.

Nashua, N. H.—H. N. Crooks, Hardware, sold out.

Newberry, S. C.—Peoples & Johnson, Hardware, agricultural implements, etc., succeeded by William Johnson.

Plainfield, N. J.—Karl Zimmerman, Hardware, succeeded by F. S. Rose.

San Bernardino, Cal.—Geo. M. Cooley announces his temporary retirement from business. He has leased his store for two years to his brother, Frank L. Cooley, and Frank Keller, who have been connected with the house for eight years.

Shelby, Tex.—Voelkel & Schultz, Hardware, etc., succeed Ernest Voelkel.

Snyder, Tex.—B. Blankenship, Hardware, succeeded by Wasson, Smith & Co.

Tiffin, Ohio.—The firm of C. C. Park & Son, dealers in Hardware, which has been in existence for eight years, has dissolved by the retirement of the senior member, and the business will henceforth be conducted by H. G. Park and J. C. Park under the firm name Park Brothers.

Tioga, Pa.—William Kimball has purchased the Hardware store of Jacob Schieffelin, recently deceased.

Tuscumbia, Ala.—Stephenson & Raiford, Hardware, sold out to Conklin & Halsey.

Webster City, Iowa.—W. D. Rust has sold his interest in the Rust & Young Hardware store, to his partner.

Improvements and Removals

Americus, Ga.—H. J. Fite & Co., Hardware merchants, have removed to larger quarters on Cotton Street.

Binghamton, N. Y.—James E. Davis, the Main Street Hardware dealer, has rented one of the fine stores in the new brick block on Main Street, and will shortly remove his present stock from his present quarters into the new and more commodious store.

Danville, Ill.—J. R. Essex has removed his stock of Hardware from East Main Street to the south room of the new McFerren, Gregg & Platt building, on North Vermilion Street.

David City, Neb.—Fred Scott has moved his Hardware store to the north side of the square.

Edwards, N. Y.—Donaldson & Bancroft, Hardware merchants, have moved into their new store in Union block.

Freeport, Ill.—John P. Coffey, the Hardwareman, is adding new shelving in his store.

Greensburg, Pa.—C. C. Hileman, the West Otterman Street merchant, will, in the spring, occupy the Turney building on Main Street, with a Hardware store. A new front will be put into the building, and the interior will be thoroughly remodeled and improved.

Houston, Tex.—Joseph F. Meyer is adding two more stories to his Hardware establishment on Franklin Street.

Hyde Square, Mass.—Geo. A. Cowden has moved his Hardware store directly opposite his old location on Boylston Street.

Kennard, Ind.—Showalter & Bouslog contemplate erecting a Hardware store this spring.

Mazon, Ill.—Stevens & Stiffler have leased and moved their Hardware stock into the storeroom under the opera house.

Mitchell, S. Dak.—W. J. Healey is making extensive changes and improvements as to the interior of his Hardware store.

Savannah, Mo.—The Hardware firm of Somerville & Sumers have moved into the Beilman building.

Victor, Col.—The Tomkins Hardware Co. is preparing to move its stock here from Cripple Creek.

York, Neb.—J. V. Hyder is moving his Hardware store into the room formerly occupied by W. R. Furman in the Clark building.

Business Embarrassments.

Chicago, Ill.—William Auer, a retail dealer in Hardware at No. 4536 State Street, has made an assignment to William Leoff.

Memphis, Tenn.—Craig & Co., dealers in Hardware, seeds and agricultural implements, have made a partial assignment. The assets are worth $100,000. The liabilities are $65,000.

North East, Pa.—Bingham & Carpenter, Hardware dealers, have assigned.

Parkersburg, W. Va.—C. J. Bosberry & Son, Hardware, assigned. Liabilities, $15,000; assets, $10,000.

Watertown, Wis.—The Hardware business of E. A. Heck has been closed on a chattel mortgage for $800.

Westtown, N. Y.—George W. Houston, Hardware dealer, has assigned.

Burglaries in Hardware Stores.

Corsicana, Tex.—C. L. Fewel, revolvers.
Crab Orchard, Neb.—Connell Bros., $300.

Fires in Hardware Stores.

Brookfield, Mo.—The store of the Doggett Hardware Co. has been burned. Loss, $20,000; insurance, $13,700.

Davenport, Iowa.—The building occupied by McKinley & Cavin, Hardware dealers, has been burned. Loss, about $6000; partially insured.

Kaukauna, Wis.—Haas & Merbode, damaged by fire, at a loss of $4000; insured.

Leipsic, Ohio.—W. A. Kober's Hardware store has been burned. Loss, $3000.

Nelsonville, Ohio.—The Hardware store of Warren & Thompson has been destroyed by fire. Loss, $8000; insurance, $6000.

Piqua, Ohio.—The Hardware store of Edward Racine has been destroyed by fire.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Asheville, N. C.—Brown Northrup Co., Hardware, will probably add a bicycle department, and will consider propositions from bicycle manufacturers, looking to accepting agency.

Cameron, Mo.—Harper & Munsell, Hardware, etc., new store opened. Will add bicycles.

Chattanooga, Tenn.—F. H. Woodworth & Co., Hardware, have added bicycles, and contemplate putting in a line of sporting goods. They invite correspondence with the trade.

Chicago, Ill.—Tire & Wheel Co., incorporated by Michael J. Sullivan, John C. Calais and Thurman D. Ellsbury, to manufacture tires and wheels. Capital stock, $25,000.

Denver, Col.—The telegraph companies of Denver are preparing to mount a corps of messenger boys on bicycles.

East Hampton, Conn.—The Climax Mfg. Co. are putting on the market improved spring wire bicycle saddles, which they claim "will stand more mileage and keep in better shape than other forms of saddles."

Fayetteville, N. C. — Huske Hardware House, Hardware, etc., will take up bicycles. Correspondence invited with manufacturers of bicycles and bicycle sundries.

Gastonia, N. C.—Long Bros., sewing machines, etc., will take up bicycles, and invite correspondence with manufacturers of bicycles and bicycle sundries.

Grand Rapids, Mich.— The Cycloid Bicycle Co. has been incorporated with George C. Fitch as president; Frank H. Simons, vice-president; Claude D. Freeman, secretary and treasurer, to manufacture bicycles for the trade. Capital stock, $20,000, of which $13,500 has been subscribed. The company have leased a three-story building at No. 488 South Division Street, which will be equipped as a factory.

Ionia, Mich.—J. E. Just, bicycles, opened a new store on February 15th. The actual management of the business will be in the hands of A. F. Clark, and a repair business will be done. The concern proposes not to sell bicycles as agents, but to buy them outright.

Lexington, N. C.—Redwine & Co., Hardware, will take up bicycles, and invite correspondence with manufacturers of bicycles and bicycle sundries.

New York, N. Y.— The Lenox Wheelmen have begun the publication of a monthly paper called *Club Gossip*. The first number is neat and newsy.

Pittsburg, Pa.—The Carnegie Iron & Steel Co. will commence the manufacture of nickel-steel for bicycles. The secretary of the company, Mr. Lovejoy, who is an enthusiastic cycler, is reported to be much interested in the outcome of certain experiments now being made.

Springfield, Mass.—M. D. Stebbins & Co., bicycles and sporting goods, new store opened. This firm will represent the Spalding Bicycle and sporting goods.

Syracuse, N. Y.—The Barnes Bicycle Co., recently reported incorporated, are getting their factory building in condition, and will commence manufacturing March 20th, employing about eighty men at first. Arthur H. Peck will be general superintendent.

Toledo, Ohio.—Al. Peter will commence the manufacture of bicycles; $20,000 worth of machinery has been purchased for this purpose, and the new plant will be run in connection with a sewing machine factory, of the Union Mfg. Co. Two hundred men are to be employed.

Washington, D. C.— Harry Jones, bicycles, will open new store corner Ninth and H Streets, and will handle the Crescent bicycle, manufactured by the Western Wheel Works.

Washington, D. C.—The Cyclone Combination Cycle Co., new office opened at No. 610 F Street, G. F. Smith and Paul Von Boeckman in charge.

Changes and Removals.

Lincoln, Neb. — Geo. A. Cramer, bicycles, etc., succeeded by Lincoln Cycle Co.

Philadelphia, Pa.—John T. Bailey & Co., sporting goods department, sold out to the Spaldings, and the stock will be transferred to the Chestnut Street store. Their cycling business will be continued, and they will carry a wheel made for themselves and a line of medium grade bicycles.

Washington, D. C.—Wm. T. Robertson & Co., No. 429 Tenth Street, announce the sale of the retail portion of their bicycle business to C. L. Palmer & Co., who have a store adjoining, at No. 431, which firm was recently reported in these columns.

Recent Fires.

Chicago, Ill.—Sieg & Walpole Mfg. Co., bicycles, damaged by water; fully insured.

Oswego, N. Y.—Oswego Bicycle factory, destroyed by fire. Total loss, $30,000,

Miscellaneous.

Boston, Mass.—The John P. Lovell Arms Co. find business prosperous for '95. Their factory at Fitchburg is being run fourteen hours a day, in order to meet the demand for the Lovell Diamond.

Boston, Mass.—The Waltham Mfg. Co., who began to make bicycles last season, are extending their business considerably for the coming year. V. Dugmore, an Englishman by birth, who has been doing business in Boston for a number of years, will sail for England shortly with twenty machines, and introduce them to the English trade. He will locate in London.

Brooklyn, N. Y.—Metcalf & Wallace, at No. 1196 Broadway, are offering half interest for sale in patent automatic bicycle, and bicycle alarm business.

Brooklyn, N. Y.—W. O. Tate, president of the Montauk Wheelmen, has taken the Humber agency, and after March 1st, will exhibit models of the American Humber at his office, corner of Flatbush Avenue and Prospect Place, Brooklyn.

Brooklyn, N. Y.—Before long our police force will be furnished with bicycles. During the coming riding season policemen in uniform will be mounted on cycles to guard the Prospect Park-Coney Island cycle path, and to keep horsemen from doing injury thereon and intruding on the rights of wheelmen.

Buffalo, N. Y.—The proprietors of the Globe Cycle Works will inaugurate an open twenty-five-mile road race, about a week after the Martin race, which takes place Decoration Day.

Chicago, Ill.—A Chicago alderman has introduced a resolution directing the corporation counsel to prepare an ordinance requiring that all bicycles carry a numbered license tag, and exacting a tax or licensing fee of $2 on wheels in use in the city.

Cincinnati, Ohio.—A new retailing company, the Norwood Bicycle Co., has been formed in this city by M. Levi, F. Gewert and Theo. Bruckner, for the purpose of handling the business of the Norwood Bicycle, made by the H. F. Schleuter Cycle Mfg. Co. The new company will handle the Norwood exclusively. The Pickering Hardware Co. will handle wheels at retail this season. It is their initial venture. They will sell the Columbia.

Hartford, Conn.—The League Cycle Co. make a statement of affairs, showing liabilities of $85,040.32, and assets of $24,906. The largest creditors are Billings & Spencer, of Hartford, $3500; Manhattan Rubber Co., $3000; Hugo Bitzmann, Philadelphia, Pa., $1120.

Jersey City, N. J.—The proposed wheel path from Jersey City to Newark, along the plank road, would prove very popular. It is said that it would cost less than the Coney Island path, and the wheelmen of that section say they stand ready to raise the money as soon as plans and estimates for the path are completed.

Kalamazoo, Mich.—The Kalamazoo Cycle Co. report business good, additional men having recently been employed, and the force is to be increased again shortly.

New York City, N. Y.—Harlem has a new cycling academy, W. S. Maltby, proprietor. It is on the first floor of a large building on 125th Street, near Seventh Avenue.

New York City, N. Y. — The Standard Watch Mfg. Co. intend to introduce their standard cyclometer into France. An instrument that will chronicle the distance covered in kilometres is being constructed, and several thousand of them will soon be ready for shipment.

Philadelphia, Pa.—D. J. Hoopes, bicycles, at No. 1217 Filbert Street, has accepted the agency for the Keating bicycles.

Quincy, Mass.—Quincy Cycle Co., who have begun to manufacture bicycles this season, have placed upon the market seven styles, varying in weight from 12 to 25 pounds. The weight of the ladies' wheel is 20 pounds. One of the features of their wheels is an adjustable handle bar.

Worcester, Mass.—Ramsdell & Rawson, No. 24 Pleasant Street, are making a wheel called the "Bay State," in three styles: Roadster, 21 pounds; racer, 16 pounds, and a ladies' wheel, 21 pounds.

HARDWARE DEALERS SHOULD HANDLE

HELICAL PREMIERS, 1895.

American-made throughout. All constructed of our famous Helical Tubing.
Up to date in every particular. Lightest and Strongest.

All One Price, $100.

Roadster

28-inch wheels; 9½-inch head; 2 -inch diagonal; 43½-inch wheel base; swaged spokes; 24 and 32; wood rims; dust proof bearings; dtachable sprockets; T saddle post; gear 64, 68 or 72 as desired; 18-inch handle bar, raised or dropped; tread, 5½ inches. Weight, 18 to 20 lbs. **$100.** Brake and guards fitted if desired.

Racer

26-inch wheels, other details as above, lightest tires and saddle. Weight, 16 lbs. **$100.**

☞ **It was on a Helical Premier Racer that Wheeler beat Zimmerman two straight races. VERB SAP!**

Ladies'

26-inch wheels, double, drop-frame of Helical Tube. Weight, complete with chain and wheel guards brake and foot rests, 20 lbs. **$100.**

By the use of Helical Tubing we build a drop-frame that is as stiff and strong as a diamond. Ladies who wish to ride on equal terms with gentlemen, but who object to "bloomers" will do well to note this fact in choosing their 1895 mount.

Here's the Proof.

We claim that our Helical Tube is far stronger than weldless tube and hence more desirable for the frames of bicycles. Business claims, however, have not always been substantiated and as some of our competitors (all of whom are confined to the use of ordinary tubing) have made misstatements about Helical Tube, we have submitted to the highest recognized authority, the Government of the United States, bicycle frames and tubes constructed of Helical and the best grades of weldless for test. A copy of the official report will be found in our reading columns, page 55.

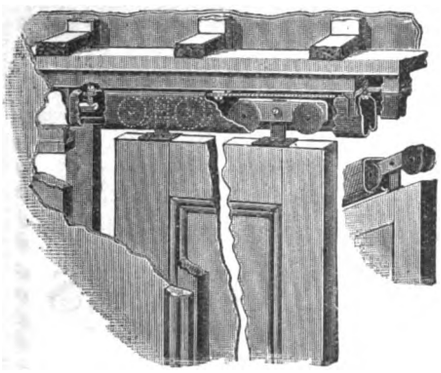
The Conroy patented New Automatic Refrigerator Door Fastener, with lock and key.

THIS FASTENER is the most complete one ever invented. The door will push to more easily with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order. By lifting the handle quarter circle the door will open, and if it sticks it will release it. It has a new and improved lock, absolutely secure. Made for flush or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental.

MANUFACTURED BY



P. J. CONROY,

PHILADELPHIA PA.

Manufacturer of Refrigerator and Ice House Fasteners Hinges and Faucets.

Dull-season advertising must be considered in two ways: As advertising and insurance — insurance of business, insurance against loss of trade. Such insurance should be placed on the same business principles that dictate the placing of fire and life insurance. Pick out the strongest companies — the best papers.

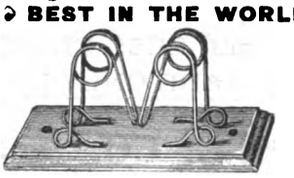
An Advertisement



If you have a sign over your door, you are an advertiser. The sign is intended to advertise your business to passers-by. An advertisement in a reliable Trade paper is only so many thousand signs spread over a great many square miles.

You can't carry everybody to your sign, but HARDWARE can carry your sign to everybody.

TO KEEP A BROOM

Use the **COMMON SENSE BROOM HOLDER.** It keeps a broom dry, keeps it in shape, keeps it from rotting. **Holds a Broom either end up.**

BEST IN THE WORLD.

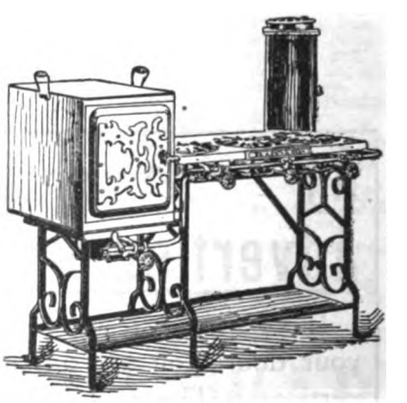
The Columbia TACK PULLERS.

No. 2, ¼ size.

TAKING UP CARPETS is hard enough work under the best conditions, and no Hardware Dealer can afford to supply his customers with any appliance that is not a help. These goods received the Highest Awards at Chicago and San Francisco---gold medals for merit---are strong, durable and efficient. The jaws are fine steel, properly tempered, firmly set in selected wood handles, enameled. They are made to "pull" and they do it. No. 1 costs $1 a doz. net. No. 2 $1.50 a doz. net; less in gross lots. Your Jobber may have them. If not address us.



No. 1, ¼ size.

The American Specialty Co., Hartford, Conn.

Facts of Interest to the Public.

Our PROCESS for 1895, is the MOST PERFECT WORKING and MOST DURABLE PROCESS EVER PLACED ON THE MARKET, and HAS NO EQUAL.

In calling attention to the "NEW GEM" we offer the trade a stove FOR the PEOPLE and for the TIMES, CONVENIENT IN SIZE, with the same FLAME as the PROCESS, and will do the same amount of work with LESS FLUID. The original cost is only about ONE HALF that of the regular high stoves, and is MADE ONLY BY US. For further particulars address

No Disagreeable Odor. No Ashes. Light and Heat in Abundance.

No. 327. No. 3 Lift Burner. Nickel Finish.
Height, 33½ inches. Spread of Base, 13½ inches.

THE MILLER OIL HEATERS.

Just the Thing for All Time and Every Day Use. For Spring, Summer, Autumn and Winter.

They are an Assured Success, from the fact that the Lamps used are "The Miller Lamps." THE LATEST AND BEST.

IN THESE HEATERS YOU HAVE A HAPPY COMBINATION: The Best Light. The Best Parlor Heater. The Best Cook Stove.

They are Clean and Odorless. Require no more care than an ordinary lamp. Cylinders of Russia Iron, with Removable Nickel Tops, or with Combination Heating Drum and Grate for Cooking. The No. 3 BURNERS have a FLAME OF 15 SOLID INCHES. "MILLER" HEATERS have outside SCREW ADJUSTMENT for regulating the Wick and PLUNGE MOVEMENT FOR EXTINGUISHING; each one is supplied with an extra Flame Spreader so that Lamp can be used for ILLUMINATING when not wanted as a Heater. All of the Best Material and Workmanship.

They will heat a large room perfectly. A tea kettle of water heated in a few minutes by removing canopy.

Perfectly Safe. They Cannot Explode. Oil Never Gets Hot in the "Miller" Heater. A Good Companion for a Cosy Nook. A Comfort on a Chilly Morning.

READY TO LIGHT, WITHOUT REMOVING CHIMNEY.

A MOST IMPORTANT FEATURE.

☞All the weight of the Cylinder rests solidly on the FOUNT and not on the BURNER in these Heaters.

In IMITATIONS of these Heaters the Cylinder is supported on the BURNER, a CHEAP and WEAK CONTRIVANCE, which makes it necessary to REMOVE THE CYLINDER for lighting and which renders it impossible or very dangerous to use the Heater for cooking purposes.

Send for circular showing Heaters with ovens for cooking. We have 12 varieties.

These Lamps hold One Gallon of Oil. Will Burn 12 hours. Easily Lighted by Lifting Top of Burner.

——MANUFACTURED BY——

THE trade-mark most familiar to the sportsmen of the United States is the **"U. M. C."** of the Union Metallic Cartridge Co., of Bridgeport, Conn. It stands for the highest excellence of sporting ammunition for Rifle, Shotgun and Revolver. The favorite paper shot shells bearing

the U. M. C. stamp are the "Trap," "Smokeless," "Walsrode," "Black Club," and "New Club." In your shooting, as in everything else, use the best. To make sure of the best ammunition, always ask your dealer for U. M. C. goods.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

THE SCHULTZE SMOKELESS GUN POWDER CO. LTD.

OF

LONDON, ENGLAND,

BEG TO ANNOUNCE THAT THEY HAVE PLACED ON THE

American Market

Their First Shipment of

HARD GRAIN SMOKELESS SCHULTZE GUN POWDER

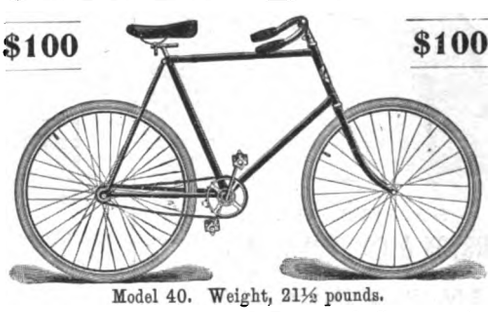
Which has been specially regulated in strength and moisture for the American climate

In the manufacture of their **Hard Grain** powder they have embodied all the advantages that their long experience together with the latest modern improvements in powder making has shown to be the very best.

HARD GRAIN SMOKELESS SCHULTZE POWDER retains all the good qualities which have made Smokeless Schultze Powder famous all over the world, while its hard flinty grain and specially regulated moisture makes loading so easy that any amateur can now do so successfully.

Variations in pressure on wads, or atmospheric conditions do not affect the shooting and loads may be varied as much as with black powder.

Hard Grain Smokeless Schultze is the most modern, the best of all smokeless powders, and excels any other Nitro powder in velocity, penetration, cleanliness, regularity and closeness of pattern.



Address all dealers, or the U.S. Agents

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

Sole Manufacturers,

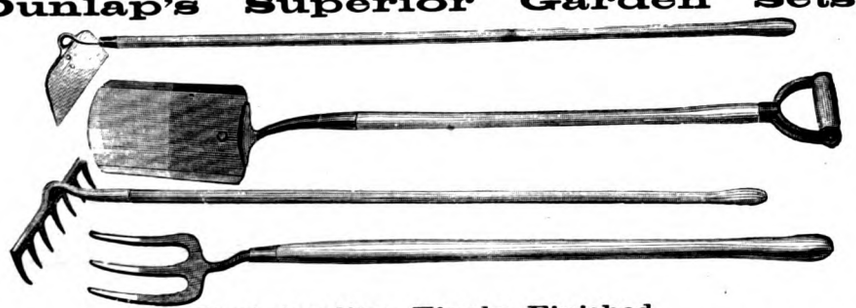
S. F. HEATH CYCLE CO.,

Minneapolis, Minn.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK



Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

A Perfect Shelf Bracket

—MADE OF—

WROUGHT STEEL.

Light! Strong! Elegant!

PATENTED

As a result of long and careful study and much experimenting we are able to offer the trade a

STEEL SHELF BRACKET

which is far superior to anything of the kind heretofore produced, and which we believe to be a

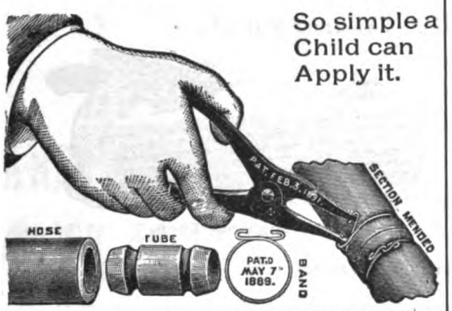
PERFECT ARTICLE!

We base our faith in these assertions on the following points of

SUPERIORITY:

1.—The use of the **arched** or **angle** forms of steel in the wall and shelf plates, which gives **much more strength** with less metal than if made flat.

2.—The **Corrugation** of the brace, which renders it secure against buckling or bending sideways under the severest strain.



The application of these principles makes a **Light, but very Strong Bracket.**

CLASSIFIED INDEX TO ADVERTISERS..... 87
ALPHABETICAL INDEX TO ADVERTISERS..... 90

We are compelled, by sad experience, to urge all parties who send HARDWARE electrotypes or cuts of any character for illustration, either in our reading or advertising columns, to be very careful in regard to the wrapping and tying of the same. Hardly a day passes without the loss of some cut of this character, which we know has been started in this direction, but becomes lost in the mails, through insecurity of wrapping. There is constantly on exhibition in the New York post-office a miscellaneous lot of articles of this character, for which no owner can be found, and for which somebody is perhaps anxiously waiting. A strong manila envelope with a clasp at the end, such as can be purchased in almost any stationery store, is by far the best medium by which cuts of this character can be sent. By paying attention to this suggestion, and seeing that the cuts are securely wrapped, no matter in what covering they may be sent, our friends will confer a great favor upon HARDWARE, and save incidental loss and annoyance to themselves.

In Massachusetts drummers are offering a "dropped" German pocket knife made entirely of metal, for twenty-five cents per dozen. Cheapness is now the by-word of all classes of commercial travelers in that section. As a rule, however, the articles are poor in quality and if bought at all by the consumer ought to be done so by the bushel, as they wear out quickly or come to pieces suddenly. New York department furnishing stores are sending out large quantities of catalogues of cheap goods to the Eastern small dealer, but the carelessness in filling orders is such that a duplicate is seldom given. Only a fraction of the order is sent at first, the rest to follow, and thus double freight charged, etc. are incurred. The goods also are of inferior quality.

There seems to be a paralysis of reason among certain classes in New England. One manufactory in Rhode Island which on account of dearth of orders has been shut down for some time, has caused some solicitude among the employes, and it has been suggested that the taxes on that property be advanced to a point that will impel the owners to start up on full time. Such agitation is not of a character to induce the enterprising manufacturer, a new comer, to locate new industries in the East while the South is enumerating its advantages in the way of contiguous coal, cheap labor and generally no taxes, to all with enterprise and capital.

The Business Man Shall Lead Them.

The members of the New York Stock Exchange sent up a mighty cheer when the clock was on the stroke of 12 of Monday, March 4th, in sharp punctuation of the fact that at that hour the late but not lamented Congress passed into the shades of history. Certain state legislatures of the West have passed resolutions of congratulation, that the possibilities for mischief by the departed national legislature, were at an end. The people everywhere heaved a sigh of relief; and no doubt even President Cleveland felt ten years younger, when he really knew that this Congress was no longer—to borrow his own phrase—"on his hands."

And why this general joy? The history of the two years past is the answer. Beyond that statement little should be said;—when death enters the household into which mourning does not also come, it is not wise to enter too closely into details. The body that promised so much for good and performed so little, has gone the way of all unfaithful things, and the less said concerning it, the better. It is wiser to face the more cheerful future. Our government is now in a position when a minimum of evil from those having it in charge, may be looked for. With the presidency and cabinet in the hands of one political party, and the Senate and House in those of another, the object of the Constitution seems to have been attained—the check of the one upon the other, and no excess of partisan legislation or policy possible. The two great questions of the moment—our national finances and the tariff—may perhaps be now so handled as the business interests of the country shall direct; there is even a chance that the business man rather than the professional politician shall have the direction of affairs. If this shall prove

Digitized by Google

to be so, we shall be upon the edge of the millenium, when Democrat and Republican shall lay down side by side, and the business man shall lead them.

Russell & Erwin Annual Meeting.

At a meeting of the Russell & Erwin Mfg. Co., held Feb. 27th, the following officers and directors were elected:

President: Henry E. Russell.
Treasurer: George J. Laighton.
Assistant Treasurer: T. S. Bishop.
Secretary: Theo. E. Smith.
Agent: William G. Smythe.
Directors: H. E. Russell, W. G. Smythe, J. A. Pickett, G. J. Laighton, T. S. Bishop, Theo. E. Smith, G. B. Germond.

Mr. Russell was chosen to the presidency to fill the vacancy caused by the death of Mahlon J. Woodruff. At the meeting of the stockholders the following resolutions were adopted:

Whereas, Mahlon J. Woodruff, the president of this company, died at his residence in New York on the twenty-first day of February, 1895, in the fifty-ninth year of his age: therefore, be it

Resolved, That the stockholders of the company, in their annual meeting assembled, hereby express their high appreciation of his successful cooperation in the management of its affairs extending over many years of service, and place upon their record this tribute to his integrity and devotion to every trust with which he has been connected.

At a meeting of the directors the following resolutions were adopted:

Whereas, M. J. Woodruff, president of this corporation, died at his home in New York City on the 21st day of February, 1895, at the age of 58 years; and

Whereas, Mr. Woodruff has been continuously in the service of the corporation since 1856 and has been for eight years its treasurer and for two years its president, and that some expression by his associate directors of the value of his services and character may have place in the records of the corporation; therefore be it

Resolved, That in his death the corporation loses a wise supporter and counselor, and his virtues had so won our esteem that we feel the loss of a personal friend.

Resolved, That these resolutions be inserted upon the records of this board and that a duly attested copy be presented to his family.

Another Big Boston Banquet.

The New England Iron & Hardware Association make announcement that the annual banquet of the Association will be given at the Exchange Club, Batterymarch and Milk Streets, Boston, on Tuesday, March 19th. The price of tickets has been fixed at $5 each, and they may be obtained from the secretary, Frederic H. Butts, No. 500 Atlantic Avenue, Boston, or through any member of the Association. "Applications for tickets must be made before March 15th, and it is hoped that all members of each firm and as many friends as possible will attend. Those who attended the last annual dinner will recall that occasion with pleasure, and it is expected that the 1895 dinner will be even more delightful. The committee promise their best efforts and earnestly request the enthusiastic support of every member of the Association. A reception will be held at 5 P.M. and dinner will be served at 6 P.M. Covers will be laid for one hundred, and an elaborate menu has been arranged by the club chef, and an orchestra will be in attendance." Among the speakers already announced are Col. Henry A. Thomas, private secretary to the Governor of Massachusetts; Judge Asa French, Boston; Major Edward Buford, Nashville, Tenn.; Rev. A. A. Berle; Capt. John Bigelow, U. S. A., Boston: R. R. Williams, and Webster R. Walkley, of New York. The entertainment committee consist of Charles Clarke Adams, Charles H. Bolles and Albert M. Wiley. The reception committee: Joseph K. Whipple, Leon C. Carter, Frederic A. Walker, Roland H. Boutwell and Dudley H. Bradlee.

Hardware Club Notes.

The annual meeting of the Hardware Club of New York will be held on Saturday, March 16th, at the club rooms, in the Postal Telegraph building. A number of proposed amendments to the constitution are to be voted upon, and five governors are to be elected. The committee appointed for the nomination of gentlemen to fill the vacancies, have unanimously recommended that those whose terms have expired shall be elected to succeed themselves, as the following report will show·

NEW YORK, February 23, 1895.

To the Board of Governors of the Hardware Club: Gentlemen: The committee chosen to nominate five members for election to your Board, report that they have selected the following named gentlemen:

ALFRED D. CLINCH,
CHARLES DALY,
BRACE HAYDEN,
MORTIMER C. OGDEN,
WEBSTER R. WALKLEY.

Respectfully yours.

Frank H. Thompson, Geo. B. Germond, Geo. Munson, Geo. A, Graham, James D. Foot, Committee.

The following gentlemen were unanimously elected members of the Hardware Club, at a meeting of the board of governors, held on March 7th:

Thomas F. Byrne, No. 93 Nassau Street.
Henry Drisler, Jr., Franklin Square.
Wm. H. McDonough, No. 38 Park Row.
Blinn Yates; Lyman D. Morse Advertising Agency, Potter Building.
James Rodgers; Harper Bros., No. 329 Pearl Street.
George L. Bosworth, Holyoke, Mass.
Edward H. Cole; Eaton, Cole & Burham Co., No. 61 Beekman Street.
Edward F. Cole; Eaton, Cole & Burham Co., No. 61 Beekman Street.
William H. Douglas; Eaton, Cole & Burham Co., No. 61 Beekman Street.
Charles E. Aaron, No. 8 Ferry Street.
Frederic W. Benham; Shelton Co,, Derby, Conn.
E. D. Forest Shelton; Shelton Co., No. 280 Broadway.
Willis B. Marvin; Herring-Hall-Marvin Safe Co., No. 365 Broadway.
Hon. Horace Russell, No. 280 Broadway.
A. A. Mills, Pittsfield, Mass.
Robert Noyes Fairbanks, No. 311 Broadway.
William D. Peck, No. 257 Broadway.

Elsewhere, the American Indicator Co., Lawrence, Mass., call attention to their Little Gem Cyclometer, which they describe as follows: "An attractive and neat celluloid dial, double brass telescope cases nickeled, bright steel fastenings and as handsome an instrument as there is on the market to-day. Its spoke connection is different from any other and is mechanically superior to any other cyclometer made. The design of the whole is very attractive and pleasing. We wish to call your attention for a moment to the size, 1½ inches diameter. The desire of the cyclist is to have everything connected with his wheel as small and compact as possible. Instead of attaching his wheel to a cyclometer, he wants to attach the cyclometer to his wheel, and we have aimed to meet that demand. To our customers who sold so many of our last year's model for $2, we would say, don't fail to see this year's for $1.25. It beats the band."

Bigger & Bingham, Washington, Pa., a young and enterprising firm, are having a fair share of trade. They carry a full line of Hardware, paints, oils, glass and house-furnishing goods. They are "hustlers," and will win their share of business.

Digitized by Google

Mahlon J. Woodruff.

The death of Mahlon J. Woodruff, president of the Russell & Erwin Mfg. Co., did not come as a surprise to the members of the great trade in which he held so prominent a place, as announcement had been made from time to time of his serious condition, and the probability that no favorable result could be looked for. This fact in no sense lessens the very general sorrow which is felt by the many personal and business friends that Mr. Woodruff has made in his long and successful career. His death occurred on Thursday, February 21st, at No. 20 East Eightieth Street, New York, as announced in our issue of February 25th. We take occasion at the present moment to pay to his memory such tribute as neither time nor space permitted in the previous issue. Mr. Woodruff at the time of his death had not yet reached his sixtieth year, having been born on July 7, 1836, at Sherman, Chautauqua County, N. Y. While he was still a youth his father and family moved to Geneva, Ohio, where he received his education in the well-kept schools of that time and neighborhood. As an aid to the furtherance of his ambition, he engaged for a time in teaching school, and soon after attaining his majority, came eastward in search of a location and position in which he could make the best use of the natural powers which were within him. He went to New Britain, Conn., where he secured the position of bookkeeper with the Russell & Erwin Mfg. Co. His industry, ability, and the enthusiasm which he devoted to the work in hand, soon marked him for promotion, and from that time forward his growth in responsibility and influence was a matter of course. In 1874 he became the general manager of the company's house in this city, which position he held until his death. On the death of Cornelius B. Erwin, in 1885, he became the treasurer of the company, and on the death of Henry E. Russell, in 1893, he was elected to the presidency.

MAHLON J. WOODRUFF.

While a resident of New Britain, as in after years, Mr. Woodruff gave the best that was within him to the service of the company of which he had become a part. Nothing was permitted to stand in the way of the interests of the company. On coming to New York he found himself in a new and wider field of usefulness, as previous to that time he had been connected only with the manufacturing department, while in the new position his attention was given to the marketing of the company's products. How well he fulfilled those duties his twenty years' service in this city shows, He was, in the broadest sense, a business man of the advanced type; was greatly interested in every question which pertained to the development of the manufacturing interests of America, and was an earnest advocate of protection for American manufacturers. He had great natural strength of character, while a fine physique permitted him to accomplish a large amount of work, and to bear the strain of close application to business. His judgment was well balanced, he had the courage of his convictions, and his decision of character was a prominent feature of his make-up. He was reserved towards strangers, but those who met him in the intimacy of personal friendship, found in him a pleasant companion, whose cheerfulness was only equaled by his generosity and kindness of heart. He was a member of the Hardware Club of New York and of the Ohio Society, and was interested in the Menantic Steamship Co. of England; but none of these interests were permitted for a moment to stand in the way of his entire devotion to the great company of which he was so important a part. In 1865 Mr. Woodruff was married to Miss Geneva Wright, of Connecticut. who survives him. Two children are the fruit of their union, John S. Woodruff, now a member of the bar, and Mrs. Arthur F. Hogan. The funeral of Mr. Woodruff was held at his late residence on the afternoon of February 24th, and was largely attended by his friends in the Hardware trade, among whom were representatives of the Ohio Society and the Hardware Club. The body was then conveyed to the family burying ground in New Britain. It is needless to say that the sympathy of the entire trade is with his afflicted family, and his business associates, in this their great loss.

A Fisherman's Equipment Guide.

Edw. K. Tryon, Jr. & Co., Nos. 10 and 12 North Sixth Street, Philadelphia, Pa., have issued a most complete and comprehensive catalogue and price list of their well known Fishing Tackle Specialties—it might well be called "the fisherman's equipment guide." The list includes: tarpon hooks, split bamboo rods, split and glued bamboo rods, steel rods, special wood rods, lancewood and greenheart rods, special trunk rods, reels of all sizes and descriptions, lines of all qualities, hooks innumerable, minnow gangs, flies to tempt the unwary fish, spoon baits, spoon hooks, floats, cut leaders, nets, including inland seines, minnow seines, fyke nets, set nets, dip nets, landing nets, etc., etc., net frames, sinkers, rod mountings, rod cases, tips, joints, and wood for rods, bait pails and traps, fly and tackle books, mackintosh wading stockings and pants, bait boxes, baskets, gaffs, spears, etc., etc. Fishermen should examine this useful book before making purchases.

Alonzo T. Young has opened an office and salesroom at No. 19 Pearl Street, Boston, where he will represent several manufacturers of standard specialties in the Hardware line, the list including the Penn. Hardware Co., Reading, Pa.; Bomer Bros., Brooklyn, N. Y.; Standard Mfg. Co., the Multi-Stroke Bell Co., and Bennett Mfg. Co. Mr. Young for many years represented the Yale & Towne Mfg. Co. in Boston, and is well and favorably known to the trade.

On January 1, 1895, W. W. Ferry became a member of the firm of C. W. Dunlap, No. 88 Chambers Street, New York. He was with Mr. Dunlap from 1879 to 1888, and for six years past was the New England manager of the St. Louis Stamping Co., with headquarters in Boston.

George W. Hays & Co., Washington, Pa., report business improving, with good outlook for spring trade. They handle a full line of general, fancy and builders' Hardware, house-furnishing goods, and paints, oils and glass, and deserve the success they are having.

Cycle Board of Trade Meeting.

At the meeting of the Board of Trade of Cycle Manufacturers, held in New York, February 27th, a great deal of business was accomplished. It was decided to hold two shows, both of them in January, one in the East and one in the West. This plan meets with the endorsement of the manufacturers generally. Permanent offices have been engaged in New York. Ernest R. Frank was appointed assistant secretary. He will be at the Board of Trade offices at all times in order to carry on the routine business of the office. The following resolution was adopted:

We, the undersigned, active and associate members of the National Board of Trade of Cycle Manufacturers, do hereby mutually agree to and with each other, that no firm, corporation or agent controlled by any of us at any time, and neither of us individually, shall apply for rent or equip any space, location or exhibit any bicycles or parts of articles to be used therewith, or in any way patronize or take any part in any national, sectional or local cycle show, anywhere within the United States, at any time between January 25, 1895, and May 1, 1896, which shall not have been approved by and given under the auspices or sanction of the Board of Directors of the said National Board of Trade of Cycle Manufacturers. In witness whereof we have hereunto set our hands this 25th day of January, 1895.

Pope Mfg. Co., Gormully & Jeffery Mfg. Co., E. C. Stearns & Co., A. G. Spalding & Bros., Western Wheel Works, John P. Lovell Arms Co., H. A. Lozier & Co., McKee & Harrington, Keating Wheel Co., Eagle Bicycle Mfg. Co., Grand Rapids Cycle Co., Sterling Cycle Works, Warwick Cycle Co., Liberty Cycle Co., Humber & Co., America, L't'd, Indiana Bicycle Co., Eclipse Bicycle Co., Garford Mfg. Co., Peerless Mfg. Co., Union Cycle Mfg. Co., Hill Cycle Mfg. Co., Hartford Rubber Works Co., Geo. N. Pierce Co., Monarch Cycle Co., Buffalo Cycle Co., Pratt & Whitney Co., American Dunlop Tire Co., John S. Leng's Son & Co., Bridgeport Gun Implement Co., Brown Bros. Mfg. Co., Armstrong Cork Co., H. L. Young, I. A. Weston, Black Mfg. Co., James Cycle Importing Co., E. J. Lobdell, Cullman Wheel Co., Empire Bicycle Mfg. Co., Anglo-American Iron & Metal Co., Remington Arms Co., Bicycle Chain Lightning Co., R. H. Wolff & Co., Ltd., A. M. Sheffey & Co., the George Pearce Co., Queen City Cycle Co., Eugene Arinstein, St. Louis Ref. & W. G. Co., Schoverling, Daly & Gales, Hunt Mfg. Co., Cushman & Denison, Dauntless Bicycle Co., Strubey & Foote, W. W. Whitten Cycle Mfg. Co., Newton Rubber Works, Hoffman Bicycle Co., Starr Cycle Co., Demorest Mfg. Co., H. G. Shepard & Sons, Acme Mfg. Co., Rockford Tool & Sundry Mfg. Co., The Yost Mfg. Co., United States Tire Co., Speirs Mfg. Co., Elkhart Cycle Co., Bridgeport Brass Co., Excelsior Needle Co., Gendron Iron Wheel Co., Central Cycle Mfg. Co., the Braddock Hose Supporter Co., the Gilbert & Chester Co., Butler & Ward, the Wilcox & Howe Co., E. B. Preston & Co., Simonds Rolling Machine Co., Century Cycle Mfg. Co., Lindsay Bros., Elmore Mfg., Co., the Mechanical Rubber Co., George Barnard & Co., Capitol Mfg. Co., the Garvin Machine Co., J. H. Williams & Co., Premier Cycle Mfg. Co., Edwin Oliver & Co., Burtis & Zimmerman, Marion Cycle Co., Fox Machine Co., Telegram Cycle Mfg. Co.

Letters were read from Chicago, Pittsburg, Baltimore, Washington, Buffalo and Cleveland, asking that one of the national cycle shows be held in their city the coming year. The whole matter was referred to the Executive Committee, which consists of A. G. Spalding, R. Philip Gormully, George Pope, R. L. Coleman, Jos. McKee, W. F. Wilson and W. A. Redding. They were instructed to confer with the recently appointed committee of the League of American Wheelmen, and a meeting will be arranged for an early date.

President A. G. Spalding, W. J. Bruff, New York City; R. Philip Gormully, Chicago; Joseph McKee, New York City; E. C. Stearns, Syracuse; C. Dickerson, Chicago; George Pope, Boston; W. A. Redding, New York City; George H. Day, Hartford; F. K. Stimpson, Chicago, and Secretary A. Kennedy-Child, Hartford, were present.

The Roller Skate Again.

The unusual facilities for skating during the past winter, have developed in both old and young a great desire for this method of healthful outdoor recreation, and now that warmer days are here, and the ice is disappearing, the skaters, and the children especially, have turned unanimously to that other form of healthful amusement—roller skating. The extent to which this amusement is practiced by the young people from fifteen years and under, need not be dwelt upon for anybody who has occasion to pass along any well-laid pavement in New York City or elsewhere during these days. There are, also, indications at hand that roller skating is on the increase, and although not a craze, bids fair eventually to become one of the standard amusements of the year. It certainly is a healthful and innocent amusement either for old or young. Dealers who are at all interested in keeping up with the times would do well to keep an eye upon this branch of the business, and be ready to meet demands which are certain to come. The Samuel Winslow Skate Mfg. Co., who are the pioneers in this line of manufacture, and who have certainly done as much for the skate industry of America as any organization existing, elsewhere announce that they are ready to take care of trade of this character. Any who desire to learn their prices and other information in regard to the present output and plans for the future, will do well to address the company at their headquarters in Worcester, Mass.

Coal-Drug.

The United States Coal-Drug Co., No. 34 India Street, Boston, are placing upon the market a Coal-Drug, which they claim is a scientific chemical compound which secures the full caloric or heat value of any coal; that a liberal quantity of coal treated with the drug, will yield a greater and more constant heat, and burn longer than the same quantity untreated. They also claim that it is "the Housewife's Friend," because it "kindles the morning fire quickly and so soon generates a cooking heat. Treated coal will ignite with one-third less wood than if untreated; makes a strong and steady heat for laundry work, is entirely safe to use." They claim it to be the coal consumers' auxiliary, because it "promotes and quickens combustion, consumes the smoke or free carbon and noxious gases, generates more steam from the same quantity of coal, keeps boilers, flues and grate bars clean, requires no alteration in plant, produces higher temperature, makes twenty per cent. less ashes, increases the horse power of boilers, makes steam quickly, displaces blowers, makes the low grades of coal as useful as the higher grades, saves labor for engineer and fireman; makes an all-around saving where coal is used, of from 10 to 20 per cent.; is inexpensive, and will be sold and delivered in any quantity from one pound to a ton, with full directions for use." This is used at present very extensively throughout Canada.

Schoverling, Daly & Gales, No. 302 Broadway, New York, have recently remodeled their store front, and have now one of the most attractive places on that portion of Broadway. They have had two large show windows put in, and six feet to the rear of this is a partition of oak and glass, the upper portion of which is permanent, and the lower having sliding panels, which gives them a place for the exhibit of goods first-class in every respect, well lighted and dust-proof. Fifteen electric lamps furnish sufficient i ght for each window.

Porter to Partnership.—VIII.

I spent two weeks in New York, and they were two very busy weeks. From eight o'clock in the morning till four in the evening I bought and bargained, and in the evening I saw what was to be safely seen of New York life. My friend Fisher finished his business two days before I was through, but he waited for me to go home with him. I doubt if I was any happier when starting from home than I was when I bought my ticket back again.

Looking back at that ride, one of the pleasantest incidents remaining in my memory is that of meeting with an elderly woman and offering her half of my seat. She appreciated the little attention, and we were soon in pleasant chat, and when she reached her station I helped her out and felt as if we had long been friends. When she bade me "good by" she added a "God bless you!" that may have been merely a habit with her, that had no special prayer or meaning to it, but it gladdened my heart as if I were sure her words had some power to bring me good. Many of our old customs have been swept aside so that it is no longer fashionable to pay attention to any but young and pretty women, but I find it impossible for me to keep from showing respect to the women who have passed into the beauty of middle life and who have "mother" written on their faces.

As we neared our destination I saw by Fisher's actions that he had something on his mind, and wondered what it was. At last he sat down beside me and I saw it was coming.

"Marks, I shpose shtore selling pays, eh?"

"Yes, selling goods pays; Mr. Ely has got rich at it."

"Yas, das what I dinks. Good profeet, eh, in all dose tings?"

"Some things pay well, and others sell for cost, but the business averages up a good, fair profit."

"So I dinks. Now, Marks, shpose I shtarts out shtore in Yarmantown, will he pay?"

I was in somewhat of a dilemma here; Fisher expected an honest answer, yet I had to think of Mr. Ely's interest, and it certainly was not to his interest to have Fisher open a store in Germantown. I wanted to dodge an answer,

"Unless you keep everything," I said, "it would not pay. If your customers had to come to our place for one thing they would buy everything there. And our town pays a good price for eggs and butter, and this would entice trade to come there."

"Das ish all right; I would geep eferydings; croceries, poots, eferydings; say, Marks, how you like to come down to Yarmantown with me, eh?"

"I have to stay with Mr. Ely till spring," I replied, "and he can afford to pay me more than you could, Mr. Fisher."

"I will pay you nodings; I will gif you one-half de profeets."

"But I have no money."

"Das ish all right, Marks; we will find dat money; I got some money my own self; de money ish all right."

No boy ever had such offer made to him without being proud of it and considerably elated. To be partner in a store was a position I had only had very vague dreams of occupying. But I knew Fisher meant business, and the responsibility of having to decide such a question made me nervous.

"I don't know what to say to you, Fisher; I am not at all sure that I could shoulder the entire management of a store and do it successfully. Let me have a little time to think it over and I will then give you an answer. And you had better enquire around and satisfy yourself that it is wise to make such an investment. If the business should ever be started the money would all have to come from your pocket; if we made a failure of it, I have no money to lose."

"Das ish all right, Marks; dake your dime. Bimeby you find out; you yust dells me; if you say 'yah,' we will shtart de shtore, und, py jingo! we will make him lively. I gan sell myself; I knows everybody, und I sprachen Deutch like dunder."

We left it that way, and were soon at home. Home never looked so pleasant, and there was medicine in the sight of a familiar face. Mr. Ely met me as if I was his son, and was very free in his praises of goods bought according to bills already at hand. The next day I buckled to work again and found that my short experience among the salesmen East had been of benefit to me. I had laid to heart their uniform politeness, their seeming personal interest in the man to whom they were selling, and the general air about them of friendliness and good will. Perhaps it is because familiarity breeds contempt that so many of our retail clerks meet their customers with a slight nod and a manner that says, "Buy what you want and clear out," but I have yet to see a place or position, whether in the largest jobbing house or the smallest retail store, where a kind interest in one's customer does not pay, and pay largely.

As the goods I bought began to come in, we were kept very busy, and Mr. Ely universally commended my purchases. I was somewhat surprised to see the amount of goods I bought as they were unpacked. When you look at a sample and order a few dozen of a thing, it does not look large, but when the dozens are piled on your counter you are apt to wonder what you could have been thinking of. I found I had laid in a much larger stock in the notion line than I had intended to and much more than we had ever bought at any one time before. But Mr. Ely found no fault, and I made up my mind I would make a special push on those goods and that I would make them go if work could do it.

All these days I said nothing to anyone about Fisher's offer, but I determined to seek counsel. Mr. May had always taken such a kindly interest in me from the time of finding his wife's money that I determined to speak with him. Unlike most lawyers, he had excellent business instinct, and would have made an extra good merchant. He heard me through, saying little, and then questioned about the goods the people down in Germantown bought. Said he:

"If I were you I would talk the matter over with Mr. Ely; I am not sure but that a store would pay well with Fisher's influence to help you, yet you might be giving up a better thing by taking that. Ely is a square man and will give you good advice."

I thanked him and determined to open the matter with Mr. Ely the next day.

Cigar store and other figures used for show or advertising purposes are made in a small way only in this country. There are only three firms in New York City that manufacture them. Metal figures complete, with whatever printing that is ordered on them, and in ordinary designs and shapes, can be bought for from twenty to fifty dollars, but a seven-foot Indian with paint and feathers and in artistic design is worth one hundred dollars. When the figures are made of metal they are first moulded in clay. They are then cast in plaster, and from the plaster are cast in sections in the metal. In addition to the New York firms making these metal figures, there is a factory in Chicago, one in Detroit, another in San Francisco and two in Philadelphia. There is a good export trade of these figures to Australia and New Zealand.

It is understood that a large cordage manufactory will be built in New England and be placed under the management of Mr. Parsons, a member of the new syndicate.

Kilmer's Adjustable Lawn Fence.

The Kilmer Mfg. Co., Newburgh, N. Y., are placing on the market a lawn fencing as shown in Fig. 1. It is composed of strips of steel about one and a quarter inches wide, as shown in Fig. 2. perforated and corrugated so as to present an attractive appearance. The strips or pickets are bent over double at the top and bottom, forming an open loop about an inch in diameter. The strips are bound together by annealed steel wire, twisted between the strips, separating them a distance of 3½ inches. The strands of wire are from four to six in number, depending upon the height of the fence, making, it is said, the fence unusually strong. The fencing is so made as to entirely overcome the effects of contraction and expansion, the twist between the upright pickets being right and left hand, and by this construction the twist itself acts as a spring continually drawing the fence tight and keeping it strained up to the proper tension. If the fence becomes loose from accident it may be easily tightened by putting the wrench, shown in Fig. 3, over the centre loop of the wires, and twisting them up a turn or two. When erecting the fence over hilly and uneven ground, the wrench may be used for twisting the wires, enabling the fence to be shortened either at the top or bottom, so that the fence may be erected evenly and uniformly. If the fencing is not drawn tight when put up or stapled it can be given the desired tension by adjusting the twist. The fencing is covered with metallic paint and is furnished in heights from 2 to 4½ feet, put up in coils ready for erecting. The standard roll contains about one hundred and fifty feet, but shorter or longer lengths will be furnished as desired. The fence is intended to be erected with wooden posts, but the company furnish the post shown in Fig. 4, if desired. The post is driven into the ground about eighteen inches, and an anchor is then slipped over the post and is driven down even with the surface of the ground. The anchor is made of three wings having sharp cutting edges and, combined with the sharp point of its centre, enables it to be easily driven into the hardest ground without the necessity of cutting the earth. The manufacturers claim that the construction of the anchor is such that the post holds equally well without regard to the direction from which the strain comes, as it is resisted by two of the wings out of the three. Prices, etc., will be sent upon application.

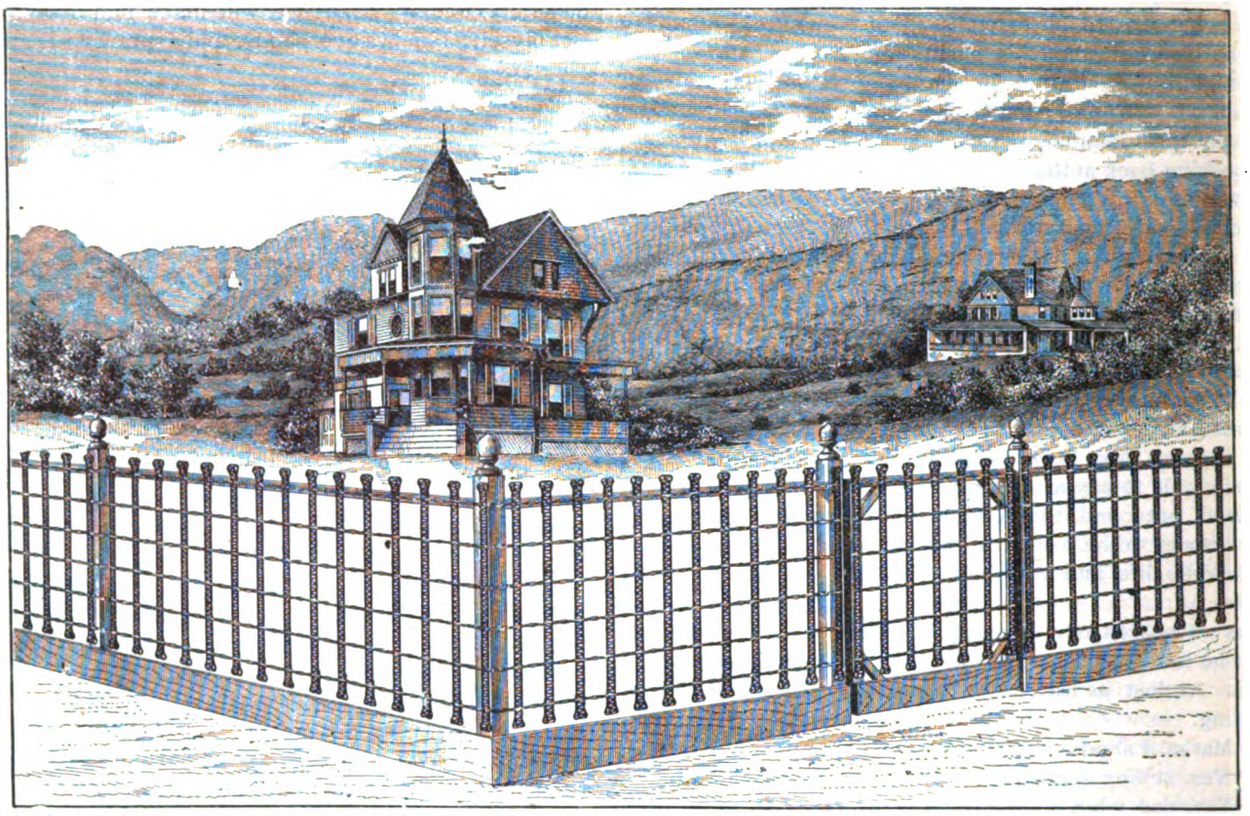

FIG. 1.—KILMER'S ADJUSTABLE LAWN FENCE.

FIG. 3.—WRENCH FOR TIGHTENING FENCE.

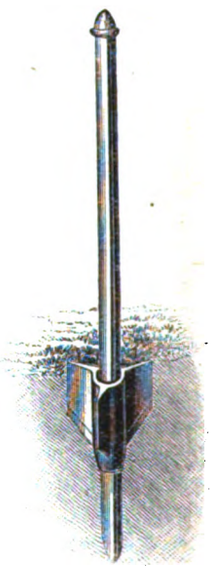

FIG. 4.—KILMER FENCE POST.

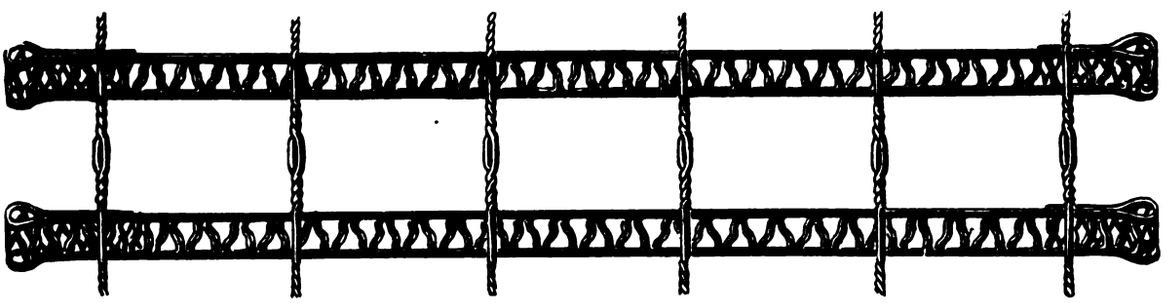

FIG. 2.—THE KILMER FENCE IN DETAIL.

The Yale & Towne Mfg. Co., Makers of Chain Pulley Blocks.

Understanding that some confusion has arisen concerning the recent sale by the Yale & Towne Mfg. Co., of a certain part of its business, we are authorized to state that the sale in question related solely to the business of its crane department, and did not include the company's business in chain blocks, orders for which latter should therefore continue to be addressed to any of the company's offices, as heretofore. The company state that the line of chain tackle blocks now made by them includes the original Yale-Weston Differential Pulley Block, undoubtedly the simplest and cheapest device possible for its intended uses, the Yale-Weston Triplex Spur Gear Block, introduced some five years ago, and which Prof. Thurston, after testing in comparison with all other blocks in the market, endorsed as "the best designed and most perfect block ever made, possessing an efficiency of nearly 80 per cent., or approximately three times that of any competitor," and the Yale Duplex Screw Block, recently introduced, intermediate in characteristics and price between the other two, and "having a better efficiency than any other screw block in the market." The characteristics of each of these three types of blocks are clearly illustrated and described in a pamphlet issued by the company and furnished on application.

Glidden Varnish Co. M. P. Special Coach.

The Glidden Varnish Co., Cleveland, Ohio, are introducing to the trade their M. P. Special Coach, put up only in one and five gallon sealed cans, and advertising the price at which it is to be sold as follows: 5-gallon sealed cans at $1.25 per gallon; 1-gallon sealed cans at $1.40 per gallon. It can be rubbed with either water or oil and pumice-stone, or left in the gloss finish, and is also susceptible to a good polish, and it is claimed can be exposed to the weather from four to six months without cracking, spotting or turning white. Considering that it is not sold for outside purposes, this fact demonstrates that a varnish that will stand four to six months outside, will stand a life-time inside and make a very elastic and durable finish. It is adapted for the cheapest as well as the finest work. The advantage the painter has in buying varnish put up in 5-gallon sealed cans is, that he is not troubled with leakage. His stock is easily accounted for. The convenience of distributing it for different jobs, his protection against cheaper substitutes, and the uniformity of the goods, as there is no evaporation when kept in sealed cans, are obvious advantages.

Partrick & Carter Sample Board.

Partrick & Carter Co., of Philadelphia, have prepared a very handsome Sample Board of some of their house goods specialties, designed especially for small dealers and those who do not as yet carry a stock of such supplies. Everything is connected and in complete working order for practical exhibition. The Board is made of hard wood, with the dealer's name and address in gilt letters. Their advertisement on page 9 of this issue shows an illustration of this new Sample Board, which will be boxed and shipped complete with battery, on receipt of price.

The Crawford Wheel & Gear Co.

On January 17th, articles of incorporation were granted to the Crawford Wheel & Gear Co., of Hagerstown, Md.: authorized capital, $100,000; incorporators, William H. Crawford, Robert S. Crawford, Geo. D. Crawford, Charles T. McCue, Charles H. Carlile, all of Hagerstown, and Lionel B. Whymper, of Brooklyn, N. Y. The company have just completed a factory and will manufacture ball-bearing axles, rubber-tired wheels, a new tubular running gear and a new ball-bearing fifth wheel, absolutely weather-proof. The new running gear is less than one-fourth the width of the present gear, and cannot possibly work loose. The president, R. S. Crawford, is also president of the Crawford Mfg. Co., bicycle manufacturers, of Hagerstown. While attending the New York Cycle Show, Mr. Crawford had one of their improved pneumatic-tired, ball-bearing wagons with him, which he showed to some of the most prominent carriage builders of the metropolis, finding everywhere a most favorable verdict on the new and patented features, and taking a number of orders. Charles T. McCue will be the manager of the new company, and L. B. Whymper will be the New York representative, at No. 72 Reade Street.

The various forms of cutters which have been so common in English and Continental kitchens are tardily becoming more general in American households. There is the cutlet cutter, an utensil very useful in shaping lobsters, salmon, the dainty sandwich when it is in the work of the long experienced cook, and so on. Then there are vegetable cutters, which in the hands of the chef will vary consomme to a great number of combinations, and renders most palatable a common soup. There is also the border mold, which is mostly made in France, and is quite expensive. A young man with tact that way can fashion this mold himself, sewing the parts, which are made of stiff cardboard, together, thus forming the shape of the mold perfectly. Two inches high and two inches wide are the proper dimensions for a border mold. Of course, the model made in this way is to be given to the tinsmith, who will reproduce the counterfeit into a mold of the proper metal. This sort of mold can be utilized for the cooking of rice, aspic jelly, curries, blanquettes of veal and stews. These are some of the molds and cutters becoming gradually known in this country, those having a wide use not being mentioned here.

No one is more particular in the choice of Hardware for his use than the carpet upholsterer. The teeth of his carpet stretcher are of finely tempered steel, well pointed, and the handle or push strong and stout, made of well seasoned oak or other wood, the utmost care being taken to have it of the proper length so that the knee against which the stretcher rests can be used freely. The hammer is well fashioned, the face being small in diameter, the length being otherwise. The tack used is readily manipulated in the mouth by the tongue, so that the head is presented, the professional carpet layer carrying this article nowhere else, and thus the awkward methods of the past generation have silently given away to what is now almost a pastime—"The laying down of a carpet!"

O. J. Faxon & Co., Boston, manufacturers of the Puritan Bicycle, report business as being very good: so good in fact that they have called in their travelling men, as they are now sold far ahead. A visit to their retail department Nos. 3, 5 and 7 Appleton Street, Boston, would lead one to imagine that it was the middle of spring, so great is the number of actual and intending purchases. The Tandem and Two Speed shown at the recent cycle show are meeting with the greatest of success.

The Broad Gauge Iron Stall Works, No. 53 Elm Street, Boston, are having great success with Worthly's "Slow Feed" Manger. They have lately put two hundred of their "Slow Feed" oat mangers in a stable in Chicago.

Charles Lawton, cutlery expert, who for about twenty years has been in the service of Hibbard, Spencer, Bartlett & Co., Chicago, has severed his connection with that company. He is reticent about his future plans.

Shone's Automatic Mud Guard.

The Hall-Shone Co., Rochester, N. Y., are putting on the market an Automatic Mud Guard, illustrations of which here appear. Fig. 1 shows the Guard closed. Fig. 2 shows it open. The makers state that "the principal feature of this Guard is that it is always on the wheel, and when not wanted for use it can be easily and quickly rolled up out of the way into a compact form, by touching the catches attached to the lower end of the swinging arm. This Guard can be fastened to any wheel, and is the only one that rolls up." The following are the directions for attaching it: "Back Guard—Screw the back clamp containing the roller guard to the upper end of rear fork. Be sure and get on even so it will roll up straight. Then screw the clamp attached to the swinging arm to the lower end of rear forks. Front Guard—Attach the parts with the small hooks to the back clamp of roller, then run under shaft and hook on steering post. This strip, if not wanted for use, can be stripped from the wheel in an instant by simply unhooking." The Guard retails for $3 per set. Liberal discount to the trade.

FIG. 1.—AUTOMATIC MUD GUARD CLOSED.

A Glimpse at Sheffield.

The oldest firm in Sheffield, England, engaged in the cutlery manufacture began business nearly one hundred and seventy-five years ago, the workshops being in the rear of the dwellings of its two partners. Although they made at that time only the plainest sort of goods, the principle they adopted of using nothing but the best quality of steel has given them a reputation on six continents. The amount of work turned out now would have been considered fabulous twenty-five years ago. There were a few years ago twelve tons of goods in weight shipped annually to the United States. To the American the "horn room" is an interesting one, although not a pleasant one in which to remain. Twenty-five tons of elephant tusks are here worked into handles each year. In sawing these tusks the air is filled with a white spray of dust from the saws, and are not especially redolent with the odor of the Indies. The best quality is African, the second East Indian, and each tusk contains eight different qualities, the yellow part near the centre being the most valuable. Every bit is utilized, the sawyer being paid according to the economy he practises. The outside of stag horn is also used at the rate of four hundred pounds per week for pocket knives, the inside being utilized for the stiffening of cloth and as a fertilizer.

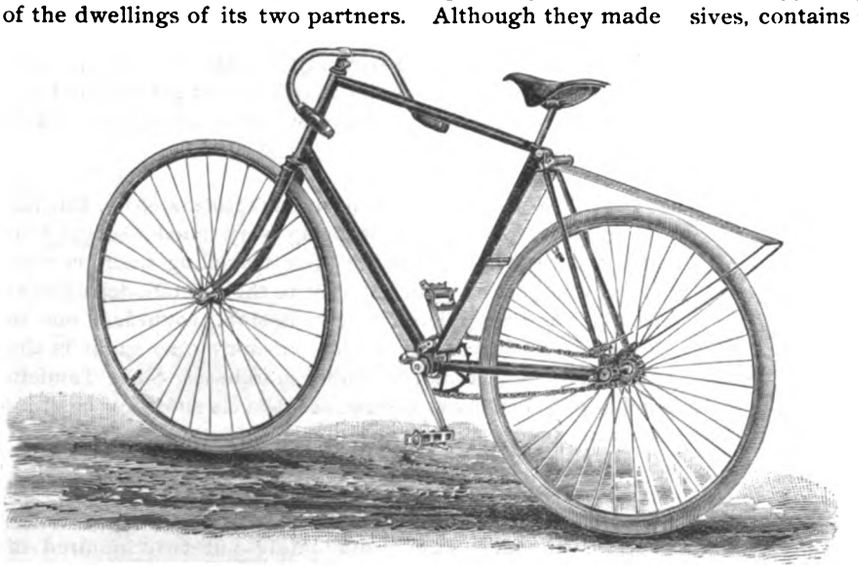

FIG. 2.—AUTOMATIC MUD GUARD OPEN.

The remainder of the routine in the making of a knife is an old story well told often, and will not be narrated here. The city itself is a busy one, begrimed with smoke and soot, and this is the rule with English manufacturing places. Like the remainder of them, it is set in a charming bit of country which the traveler never fails to note and appreciate.

South African Saltpetre.

Extensive deposits of saltpetre have been discovered in Cape Colony, South Africa, which promise to be of great value and usefulness in many industries, chief among which are the gunpowder, metallurgical and pharmaceutical, as well as in the curing and packing of beef. Hitherto the chief supply of this substance has come from Chile, but what is obtained there costs eighty dollars per ton, and has to undergo afterwards an expensive chemical operation to render it fit for practical use. The deposits found in South Africa are reported to be the true potassium nitrate.

Saltpetre is soluble in water and that found in Chile contains salts of sodium, which is an absorbent of moisture. That in Chile has numerous sulphates, and so much earth and organic matter that after it reaches its destination only five per cent. of saltpetre can be obtained that is fit for use. As "Nigger" powder, one of the most inferior of explosives, contains sixty per cent. of saltpetre, it can readily be seen that the cost of this ingredient is a chief factor.

The climate of South Africa is very dry, and this is believed to account for the rich quality of the find.

The plains of India contain saltpetre, but for some reason it is not an article of commerce.

There are a great many traveling men in New England at the present time, and novelties and combinations are being offered at absurdly low prices. For instance, a kit of gardening tools, consisting of a fairly good hoe made of galvanized iron, a rake and the other tools, are sold at seventy-five cents per dozen kits, and retail at ten or fifteen cents per kit. These tools are used to a considerable extent by ladies and children in horticultural work, but when heavy work is required it will be found that the best is the cheapest in the end.

Mr. Sharpless, of the Biddle Hardware Co., Philadelphia, has been very ill with pneumonia, but is now able to be out.

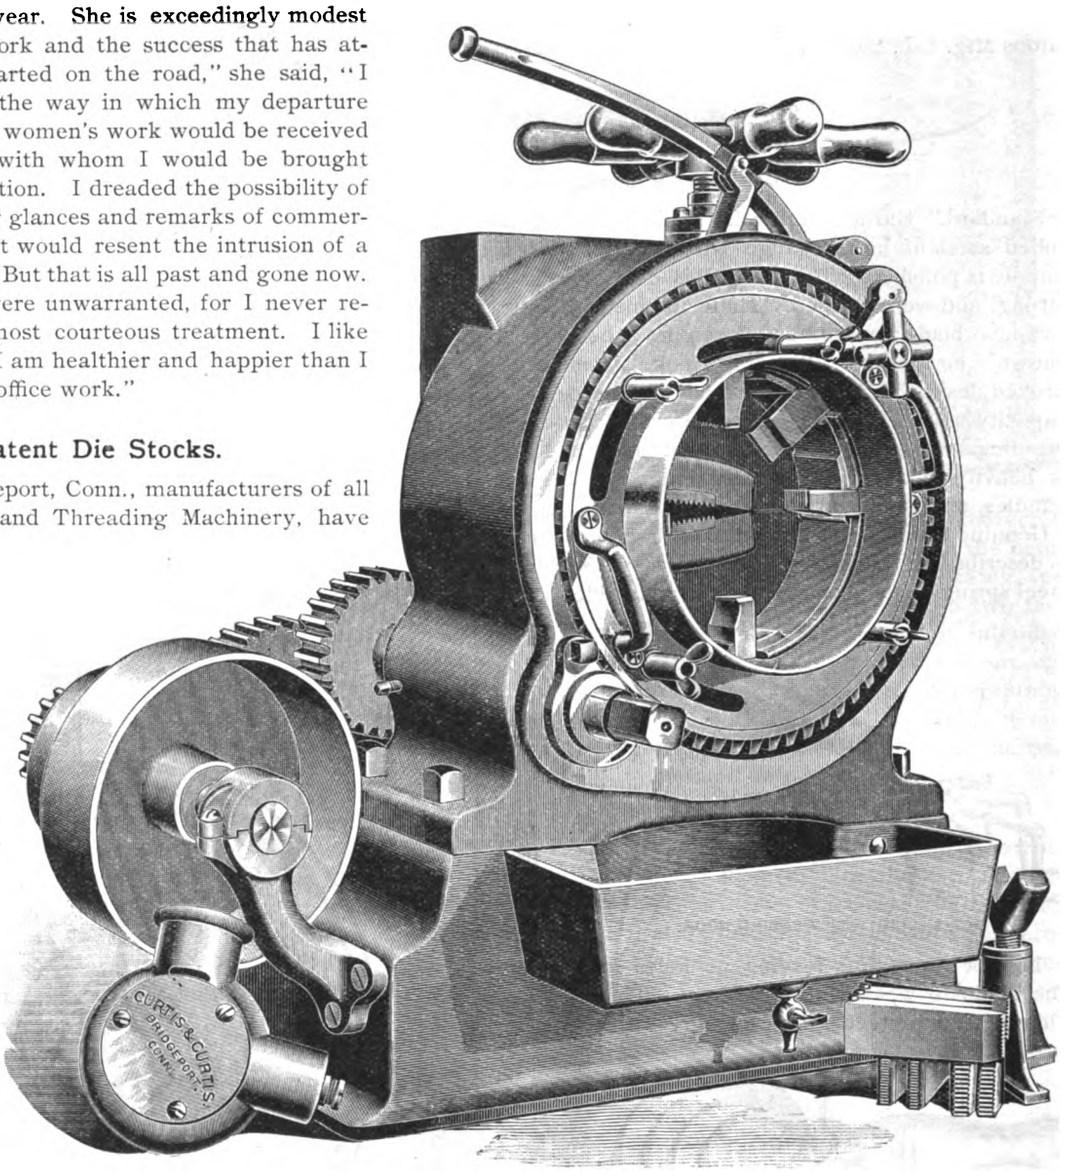
"A Twentieth Century Girl."

The sphere of woman's usefulness is constantly widening. We have had many instances of women becoming learned doctors and famous lawyers, but until lately we have seldom heard of a successful woman commercial traveler. Miss Ella Stewart, a modest, attractive and winsome young lady of Cleveland, Ohio, has been on the road for the past five years, and her efforts have been attended with success.



She is at present representing the Rome Mfg. Co., Rome, N. Y., the products of which concern include a large variety of Hardware specialties of copper material. Her territory includes the States of New York and Pennsylvania and a portion of Ohio. Miss Stewart has been employed by the company for about a year. She is exceedingly modest about speaking of her work and the success that has attended it. "Before I started on the road," she said, "I felt very sensitive about the way in which my departure from the beaten track of women's work would be received by the commercial men with whom I would be brought more or less into competition. I dreaded the possibility of encountering the sneering glances and remarks of commercial men, whom I thought would resent the intrusion of a woman into their ranks. But that is all past and gone now. I found that my fears were unwarranted, for I never received anything but the most courteous treatment. I like my work, and I feel that I am healthier and happier than I would be if tied down to office work."

Forbes' Patent Die Stocks.

Curtis & Curtis, Bridgeport, Conn., manufacturers of all classes of Pipe Cutting and Threading Machinery, have just brought out for their spring trade a new development of their well-known Forbes' Patent Die Stock, which we herewith illustrate. It has a number of new features, which are considered very valuable. It is known as the No. 3 F, Hand or Power Machine, and it both cuts off and threads all sizes of wrought iron pipe from one inch to six inch right hand inclusive. When this same machine is supplied with both right and left hand dies, it is then called a No. 3 G Power Machine, and when made without the power base and gearing for hand power only, it is then called a No. 3 F or 3 G hand. It is intended to stand on the end of a bench, when used by power, but when it is desired to use the machine on outside work, it can be disconnected from its base and carried to the place where the work is to be done, like any other tool, and the work done on the spot, thus saving the delay and expense of carting the pipe to the shop. As a strong boy can with ease thread or cut off six-inch pipe on this machine, the helper does this part of the work while the journeyman puts it up, thus making a great saving, which will be appreciated especially on contract work. In this machine the power is derived from a very powerful train of triple spur gearing which gives ample power for even the toughest pipe. The vise for holding the pipe is self-centering and is adjustable to and wear. The dies are adjustable to any variation of the fittings, and when the thread is cut draw back out of the way and the pipe taken out without running back. Nipples as short as seven inches can be made without a nipple holder, and with the aid of the Curtis Nipple Holder, manufactured by this firm, short or close nipples can be made. The following table carries its own explanation:

Number.	Range.	W'gt-Power.	Price, Hand or Power.	Price, Hand only.
3 F Power.	1-6 R. H.	515 lbs.	$250.00	$190.00
3 G Power.	1-6 R.&L.	520 lbs.	285.00	235.00

The Whitman & Barnes Mfg. Co., with headquarters at Akron, Ohio, have not built up their great business by accident, but through a very shrewd idea as to how a business of that character should be conducted. The managers have a very pronounced idea in favor of good trade literature. It is, therefore, a compliment to HARDWARE of no small character, when the fact is mentioned that it is read quite frequently at the noon meeting of the heads of departments, which is held each day after lunch, when matters of general interest are brought up, or read and discussed. In a recent letter from the company concerning this course of action they state that they "have found several good items of interest, especially the one that was published some time ago regarding the advice of an old merchant to young clerks, which is certainly very good."

FORBES PATENT DIE STOCK.

J. P. Kenworthy, who is so well known to the Hardware trade of New York, has formed a connection with C. T. Knobel & Co., No. 530 Hudson Street, New York, manufacturers of choice brands of cigars.

NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

The Gibbs New Specialties.

We are permitted to herewith illustrate still others of the seasonable specialties being placed upon the market by the Gibbs Mfg. Co., Canton, Ohio. In Fig. 1 may be seen their

FIG. 1.—"STANDARD" GARDEN TROWEL.

"Standard" Garden Trowel. It is made of fine cold rolled steel of heavy gauge with sharpened edge. The handle is polished. The Trowel is described as stiff and strong, and well finished. Made in one size only with a five-inch blade; packed one dozen in a box. In Fig. 2 is shown their "Active" Weeding Hook. It made of an improved design with a wide spread of fingers, that greater capacity may be given. It is described as excellent for weeding or loosening the soil around plants and vegetables; is heavily tinned; has refined malleable iron enameled handles, and is packed one dozen in a box. Fig. 3 is the "Genuine Spring" Curry Comb, with patent knocker. It is described as follows by the makers: "The fine tempered steel spring blade is clamped in the malleable shank without

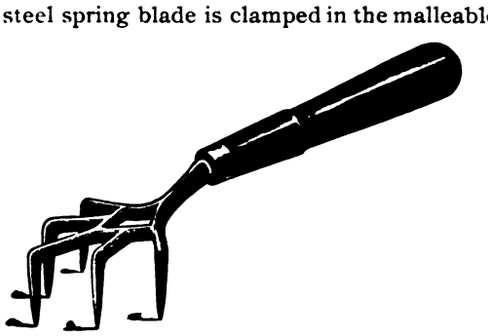

FIG. 2.—"ACTIVE" WEEDING HOOK.

a bolt or rivet, thus leaving no holes in the blade to weaken its efficiency. This clamp is guaranteed secure and gives the

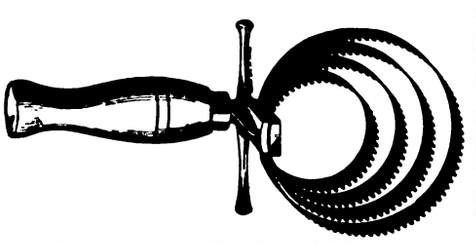

FIG. 3.—"GENUINE" SPRING CURRY COMB.

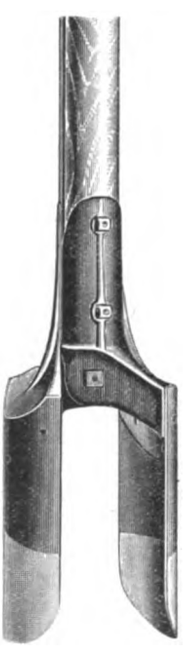

FIG. 4.—"CANTON" POST HOLE DIGGER.

comb greater flexibility and strength. The knocker gives a peculiar motion to the blades that instantly throws out the dirt and hair, while it at the same time protects the blade from injury when pounded on direct, especially in cold weather. Has greater flexibility, consequently easier on the horse, fitting every curve or uneven place." In Fig. 4 is found the "Canton" Post-Hole Digger. The manufacturers say that it is cheap in price, but not in materials; that it has split handles opening past each other, instead of apart, bringing strain on thick way of handle; shanks in round form to fit handles, enables them always to be kept tight in case of shrinkage; shoulder on castings to take the jar instead of on the bolts; steel joint bolt with jam nut to prevent loosening; oiled handles; full warranted; length of steel blade, 9 inches; whole length, 5 feet; weight, nine pounds each. Fig. 5 is of their "Quick-Cut" Can Opener. It is

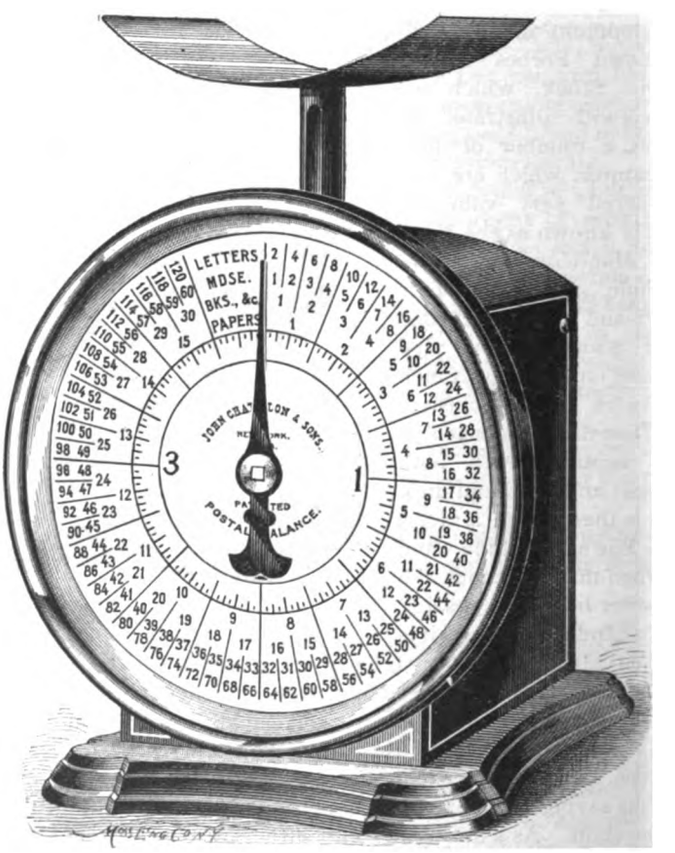

FIG. 5.—"QUICK CUT" CAN OPENER.

heavily nickel-plated; fine steel blade case hardened and tempered; packed in fine display boxes, one dozen each, to be placed on counter for quick sales. "Will open any shaped can, on top or side, and works equally well right or left hand. Cuts smooth and close up to the edge, turning the edge out so that the contents may be easily removed without being torn or disfigured."

New Favorite Postal Balance.

John Chatillon & Sons, Nos. 85–93 Cliff Street, New York, are putting on the market a New Favorite Postal Balance. The body is made of sheet steel, in gold and other colors or japanned. The dial is white, distinctly marked with large black figures. The outer row of figures is for first-

class matter indicated in cents. The remaining rows are for merchandise, books, papers, etc. The inner circle gives the actual capacity of the scale, 4 pounds, by half ounces.

Philadelphia Lawn Sprinkler.

The Philadelphia Lawn Mower Co., Philadelphia, Pa., are offering the Philadelphia Lawn Sprinkler which here appears. The Sprinkler is made of brass and consists of a

Digitized by Google

cone shaped nozzle with a nipple screwed in its center Figs. 1 and 2. Screwed to the nipple is a perforated disk forming the discharge end. Fig. 3 shows the sprinkler in operation. The perforated nozzle separates the water into solid streams, which as they strike the upper cone,

FIG. 1.

FIG. 2.

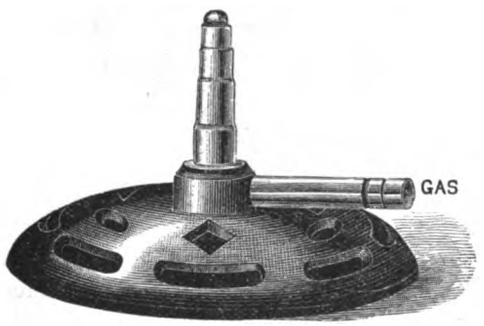

FIG. 3.

are converted into spray, while the water which passes through the nipple forms a center spray as it passes through the finer holes of the upper cone. By raising or lowering the cone the space to be sprinkled may be regulated.

Combination Gas Stove Stand and Drop Light.

Joseph H. Seed, Nos. 21 and 23 Centre Street, New York, is manufacturing a Gas Stove Stand and Drop Light com-

bined. This little article is described as being "a useful device for holding the Vesuvius Gas Stove when it is not desirable to use the ordinary gas bracket; can be connected by rubber tubing to gas supply and placed in any position, and is also used as drop light for reading, sewing, etc." Price, 25 cents each.

New Can Openers.

The Brown & Dowd Mfg. Co., Meriden, Conn., have recently introduced the "Queen," a new Can Opener and the

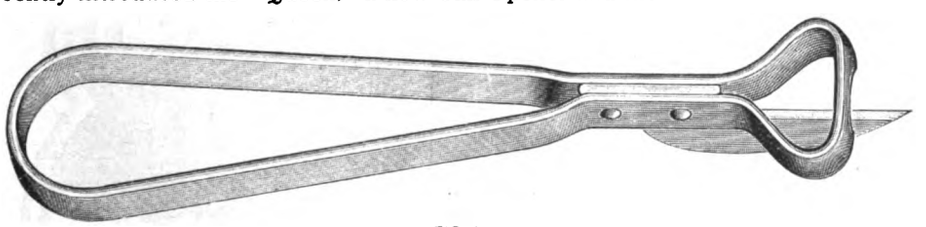

FIG. 1.

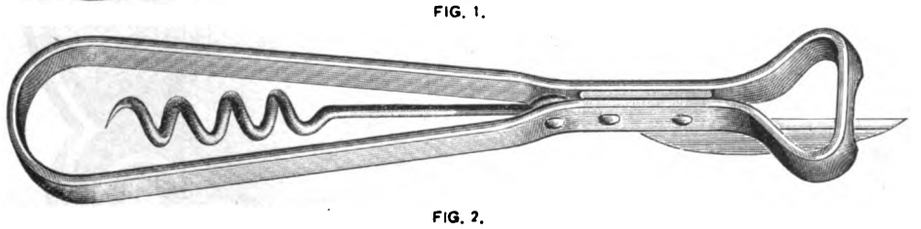

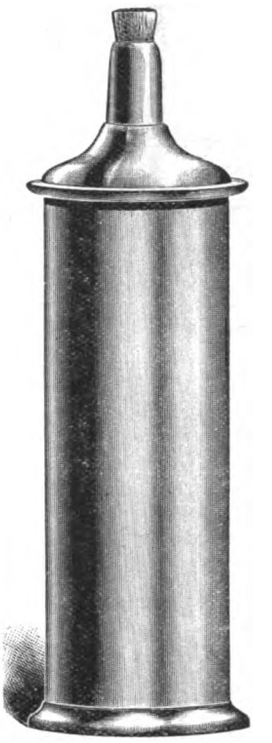

FIG. 2.

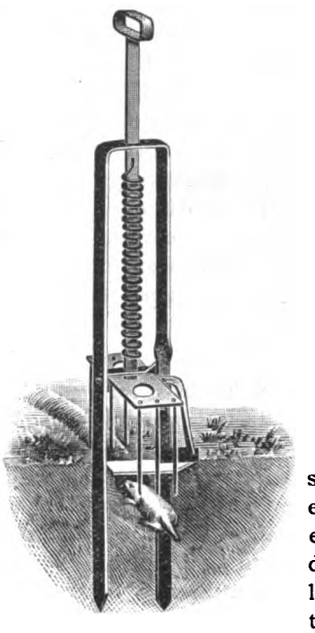
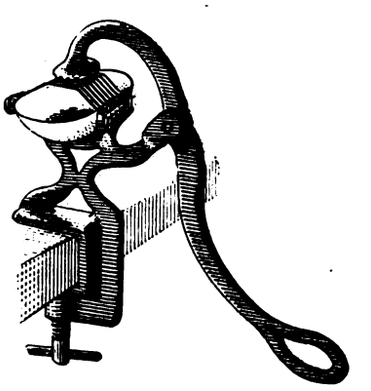
"King," a combination Can Opener and Corkscrew, illustrations of which are here shown. The manufacturers state that these tools are made from a single piece of steel, to which a blade of tempered cast steel is firmly riveted. The corkscrew when not in use may be closed into the handle, and does not in any way interfere with the use of the can opener.



Handy Pocket Torch.

The Kendrick Valve & Washer Co., Syracuse, N. Y., are manufacturing the Plumber's and Steamfitter's Handy Pocket Torch, illustration of which is shown here. This torch is designed, the makers say, "to do away with the candle. It will burn gasoline or kerosene. To fill the torch unscrew the bottom and put in enough oil to thoroughly saturate the cotton."

The Reddick Mole Trap.

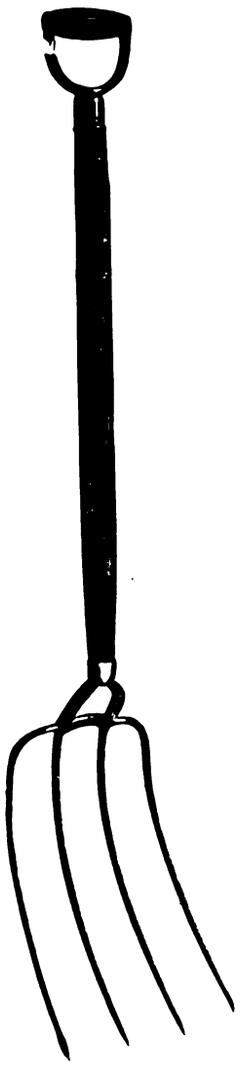


The Michigan Wire Shovel Co., of Niles, Mich., are putting on the market the Reddick Mole Trap. This trap has been cheapened and

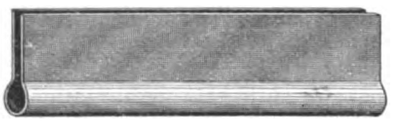
simplified. It is constructed entirely of metal and the makers say that it is strong and durable. The trap is two feet long over all, and is intended to be set over a mole run and to be sprung by the animal passing beneath. When sprung the six sharp spear tines shown in the illustration are forcibly driven down and prove most effectively destructive. The trigger is easily operated and extremely sensitive.

Magic Raisin Seeder.

J. H. Bullard, Springfield, Mass., is putting on the market the Magic Raisin Seeder. This little machine can be fastened to a shelf or table by means of a clamp. When using the seeder "put the raisins in boiling water for two or three minutes, until they are soft; then place them one at a time on the wire bed lengthwise with the wires and press



sharply down on the lever until the seeds are forced through the wire bed."

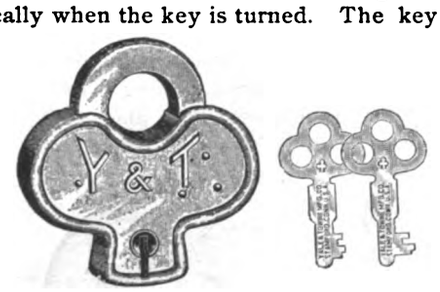


Phippen's Saw Joiner.

The Phippen Co., Salem, Mass, are putting on the market the Phippen's Saw Joiner. The makers state that this "joiner is made of spring brass 1-16 inch thick, 4 inches long, and 1 inch deep. Any ordinary sized three-cornered

Digitized by Google

or round file can be used by being put in at the large end and slightly pressed, it being firmly held by the spring in the middle. It is extremely cheap and simple; being made wholly of



one piece, there are no parts to break or lose. It is very compact, durable and effective."

The Victor Braced Shank Fork.

The Iowa Farming Tool Co., Fort Madison, Iowa, are manufacturing forks with braced shanks, illustration of which appears herewith. The makers explain that "the two braces stiffen the fork, increasing its capacity thereby. A shank of extra strength is formed where the two braces unite, and the forks hang correctly and can be more easily used than a bent handle fork, because the bend occurs in the brace near the load on the tines."

Yale & Towne New Padlock.

The illustration herewith shown represents a new Padlock recently put on the market by the Yale & Towne Mfg. Co. It will be seen at a glance that the well-known trefoil trade mark of the company has been utilized to form the exterior design of the lock, the case of which is made in both steel and brass, the catalogue numbers being respectively KI and KAI. The steel case lock is also furnished in the Bower-Barff finish, in which case the trade number is KF1. Its dimensions are 2¼ inches by 1¾ inches. In all cases the shackle is of bronze, self-locking, and flies open automatically when the key is turned. The key is of flat

steel, as shown. The form of case affords ample room for an excellent construction of the internal mechanism, all of which is of substantial but simple character and made entirely of wrought material.

The Easy Pants Hanger.

The Ideal Machine Works, Hartford, Conn., are putting

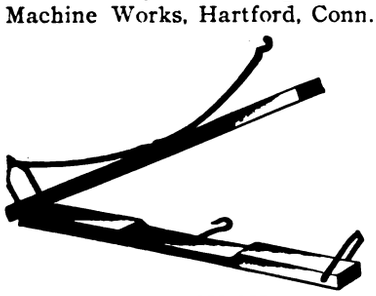


FIG. 1.—HANGER OPEN.

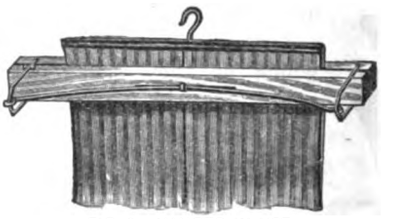
on the market the Pants Hanger, illustration of which appears here. When in use the trousers are folded with the four seams together, and the bottoms placed in the hanger. The two parts of the hanger are held in position by slipping the hook over the spring. The trousers can



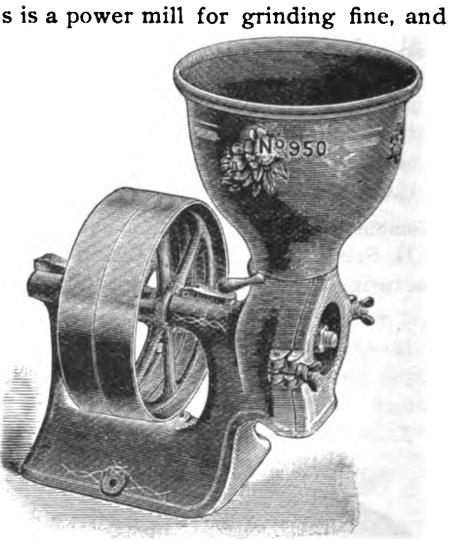


FIG. 2.—HANGER IN USE.

then be suspended in any convenient place by the screw-hook. It is stated that the hangers do not fray, mark or stretch the bottoms of the trousers; prevent bagging and can be adjusted in five seconds.

Enterprise Power Mill No. 350.

The Enterprise Mfg. Co. of Pa., Philadelphia, Pa., are offering the trade the Mill, the illustration of which appears here. This is a power mill for grinding fine, and is con-

structed in a similar manner to the company's No. 450 mill but is more powerful and has three times its capacity. Price, etc., will be sent upon application.

Ideal No. 4 Hold Back Spring Hinge.

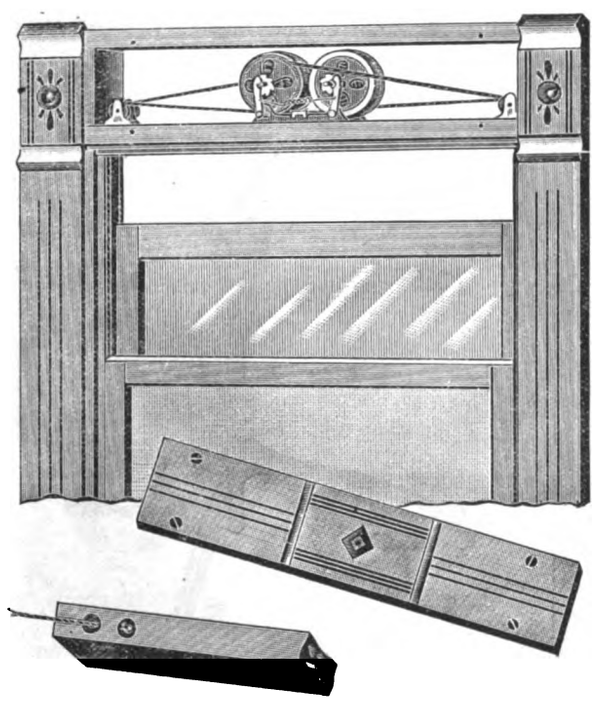
The Stover Mfg. Co., Freeport, Ill., are offering the trade the Ideal No. 4 Hold Back Spring Hinge. The makers

claim that these hinges are of original and artistic designs, and "the most active, energetic spring hinge ever pro-

Digitized by Google

duced." Made in all finishes of both iron and bronze metal.

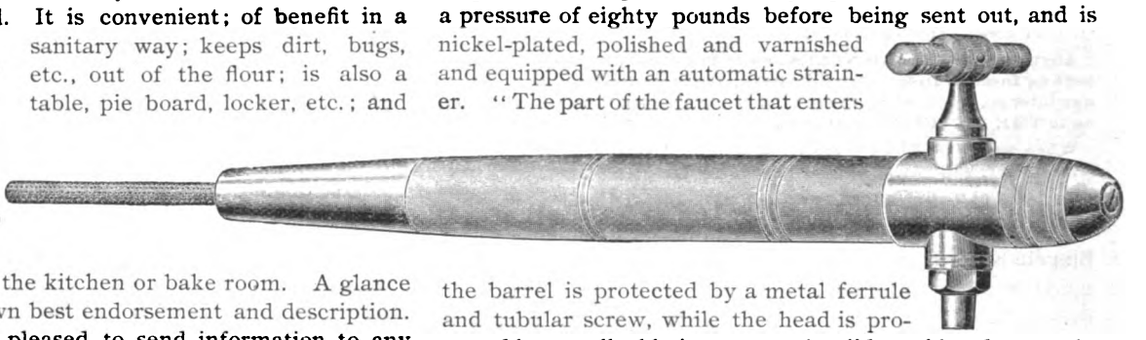
A Kitchen Cabinet.



The handy and attractive Kitchen Cabinet here shown is being placed upon the market by the Comstock & Coonse Co., Indianapolis, Ind. It is convenient; of benefit in a sanitary way; keeps dirt, bugs, etc., out of the flour; is also a table, pie board, locker, etc.; and

forms an ornament to the kitchen or bake room. A glance at the Cabinet is its own best endorsement and description. The company will be pleased to send information to any who may be interested; not only touching this article, but also their wood pumps, carts, wagons, buggies, surreys, etc.

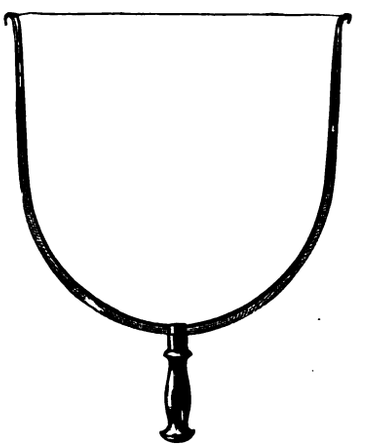
Security Sash Balance.



The Security Sash Balance here shown is being successfully placed upon the market by the Richmond Safety Gate Co., Richmond Ind. The manufacturers are very emphatic in their statements as to its value and adaptability to the purpose for which it was designed. They explain that it "differs from others in that it exactly balances the sash at any point, and works without a friction screw. It will successfully balance a sash of any weight from 5 to 25 pounds, and by a slight variation from 1 to 100 pounds, and can be made strong or weak by use of a key. The Security Sash Balance Works so easily and balances a sash of any weight so perfectly, that it can be raised or lowered with the strength of No. 50 cotton thread. It requires no space between the window frame and studding, thus allowing the plastering to be joined closely to the window frame and the frame nailed firmly to the studding. It has another advantage in that it can be easily attached to windows

which were never hung on weights. This balance can also be used on twin windows with only ⅞-inch between them. It is free from noise, there being no confusion of weights. It is placed on the center of the window head, and when the window is finished it is entirely enclosed. The Security Balance is simple, durable and efficient, and one of the cheapest balances on the market, and will last a life-time." The Richmond Safety Gate Co. will furnish prices and full information to the trade.

Wood and Metal Faucet.



The illustration here given shows a Wood and Metal Faucet manufactured by Knapp's Faucet Co., Syracuse, N. Y. The makers state that this faucet is made of hard maple, and is impervious to any liquor. It is tested under a pressure of eighty pounds before being sent out, and is nickel-plated, polished and varnished and equipped with an automatic strainer. "The part of the faucet that enters

the barrel is protected by a metal ferrule and tubular screw, while the head is protected by a malleable iron cap. A solid steel band strengthens the key way, and the key is ground in a metal bushing to form a permanently tight and easily working joint. The key is wood lined to prevent corrosion, and is so constructed as to throw the stream to a point."

Boston Butter and Cheese Cutter.

The Boston Cold Storage Butter and Cheese Cutter here shown, is described as "a new and valuable implement for wiring butter and cheese." The bow is described as "made of the best spring steel, tinned or nickeled, with piano wire

cutters, maple or rosewood handle, and will last for years." It is manufactured by E. G. Bennett, No. 65 Sudbury Street, Boston, who will be pleased to send further particulars to any who are interested.

The average Hardware salesman never does anything by halves. There comes from Hagerstown, Md., a dispatch to a Baltimore exchange, which shows how John D. Curley, a traveling Hardware salesman of the city last named, astonished the natives down in that section of the country. Matched against one opponent, Mr. Curley commenced at two o'clock in the afternoon and played eighty-nine games of pool, and then wound up with forty-four games of bagatelle against another opponent, the games not ending until six o'clock in the morning, there having been no intermission for either eating or drinking.

Elsewhere in this issue the McKinney Mfg. Co., Allegheny, Pa., whose steel hinges and butts are known to the trade everywhere, present an illustrated description of their Steel Barn-Door Track, which the manufacturers say can be used in connection with any standard hangers. Those interested should write to the McKinney Mfg. Co. for prices, etc.

At the recent annual meeting of the Chattanooga Hardware Co., Chattanooga, Tenn., the following officers were elected to serve for the ensuing year: President, A. M. Johnson; vice-president, J. W. Johnson; secretary, Douglass Everett; treasurer, John L. Davies.

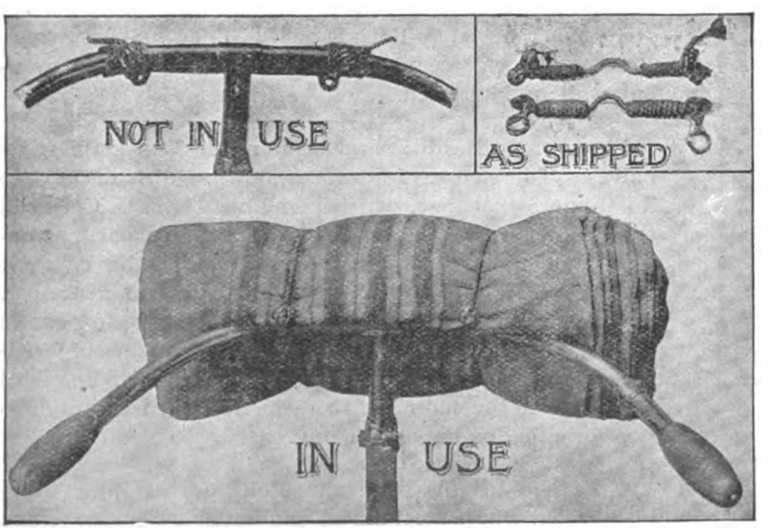
ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, whic hwill appear immediately.

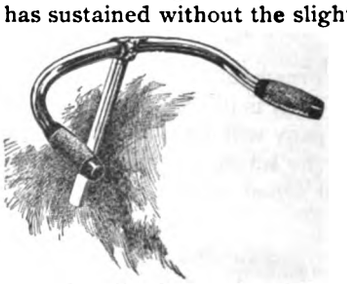
Devore's Bicycle Screwdriver.



L. M. Devore & Co., Freeport, Ill., are introducing a new Bicycle Screwdriver, which can also be used for a variety

of other work. As is seen by the illustration, this screwdriver is made in one continuous piece. It is made of finely tempered, high grade steel, and it is impossible for it to come loose from the handle. It is flat and takes up but little room in a tool bag, and can readily be carried in the pocket or hung up, and will not roll. They are made in several sizes.

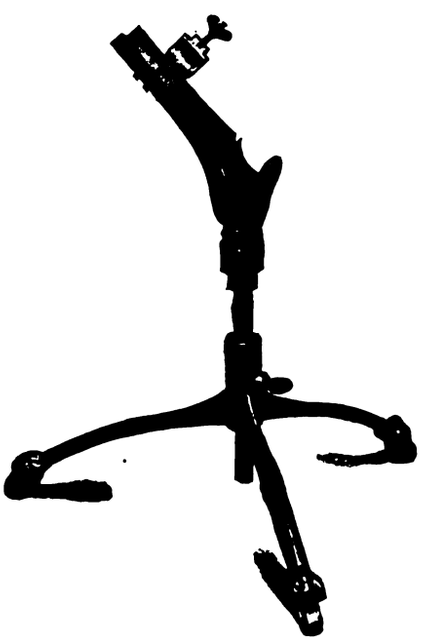
Holdfast Luggage Carrier.



The Tie Co., Unadilla, N. Y., are successfully placing upon the market the Holdfast Luggage Carrier, an article sure to prove a boon to the great army of bicyclers. It weighs but a little over an ounce; can always be left on the bicycle by winding the braid closely around the handle bar, and tying the ends with Holdfast. "Can be applied in one-fourth of the time needed for a strap and buckle carrier." The braid is very large and solid, and is guaranteed to hold as great a weight as can be held by a 1½-inch strap. The cuts here shown carry their own explanations. The company further say: "The nickel-plated stay should go on front side of post with the eyes down. Wrap braid once around handle bar, putting end of braid through the eye. Tie one end of carrier to bar to hold it in place. Then

apply to luggage on the other end. Then remove the first end and apply that to luggage. Retail at 25 cents each. Postpaid, $2 per dozen. Single one, by mail 17 cents. We make the above with a solid silk braid, extra heavy Holdfasts, price, 75 cents each, $6 per dozen. One mailed 50 cents."

The New Columbia Adjustable Handle-Bar.

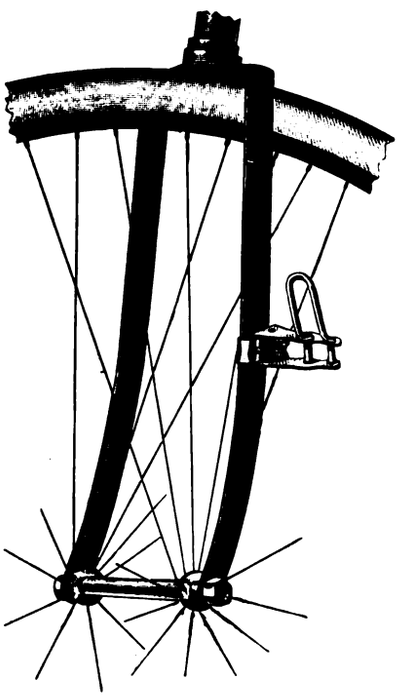


One of the features of the Columbia for 1895, manufactured by the Pope Mfg. Co., Hartford, Conn., is the Adjustable Handle-Bar. It is made of twenty gauge, nickel-steel tubing in one piece, thus obviating the difficulties found with many of the adjustable bars, which require that two pieces be in perfect relation before the adjustment can be tightened. The head clamp is a steel forging, thoroughly secure and safe, and this with the bar and shaft is spring tempered, rendering the whole rigid and marvelously strong. An idea of the strength may be had from the fact that the bar has sustained without the slightest in-

jury the test of an upward pull of 350 pounds, which exceeds the utmost strain that can be exerted by any rider by nearly 150 pounds. The adjustment is particularly fine, and very positive. It is also entirely distinct from the regular binding collar that holds the shaft. By the mere turning of the screw the bar may be quickly and easily set at any desired angle to the upright, or reversed. The bar is untapered, gracefully curved and so formed at the ends that the handles are in a good position for the hands regardless of the angle at which the bar may be placed.

The Brooklyn Bicycle Stand.

The Brooklyn Bicycle Stand, put on the market by the Bridgeport Gun Implement Co., No. 313½ Broadway, New York, and illustrated here, is described as follows: "The Brooklyn Stand for Safety Bicycles as perfected and improved is now without an equal. It consists of a tripod on casters bearing an upright arm into which the crank-shaft bracket and lower tube of the bicycle fit; an adjustable



clamp fitting over the front tube and tightened by a single turn of a thumb-nut holds the bicycle firmly in place. The upright can be raised or lowered in the tripod, thus lifting the machine clear of the floor so that both wheels can be revolved as in cleaning, or both wheels can rest on the floor, or one on the floor and the other in the air. As the Stand is on casters, it can be rolled about as easily as the wheel itself. The Stand is most excellent for house use, holding the bicycle firmly so that it does not mar walls or

Digitized by Google

furniture; the casters enable the machine to be removed easily from one room to another and will prevent muddy wheels from touching the carpet; the wheels being free from the floor, the rider can comfortably seat himself on a chair and clean the entire machine without shifting his position. For use in a store or exhibition it is especially well adapted, as the bicycle can be quickly moved to any part of the store or exhibition booth. The wheels can be revolved, showing the working of the chain, sprockets, etc. The Stand occupies less width of space than the handlebar."

Fork Lamp Bracket.

The Bridgeport Gun Implement Co., No. 313½ Broadway, New York, are offering the trade a Fork Lamp Bracket. This bracket has been specially designed for quick attachment to the fork of a bicycle, being lined with chamois to prevent any scratching incidental to frequent attachment to a machine. It is made in the form of a steel

wire loop, with spring steel collar and adjustable thumbscrew and weighs 1½ ounces. These brackets will fit any size fork. Price 50 cents each. Liberal discount to dealers.

Bicycle Bells.

N. N. Hill Brass Co., East Hampton, Conn., have added to their line of Bicycle Bells those shown in the illustrations given. The bell shown in Fig. 1 is 2¼ inches in diameter, single stroke, full nickel-plated. Fig. 2 is 2⅛ inches

FIG. 1.

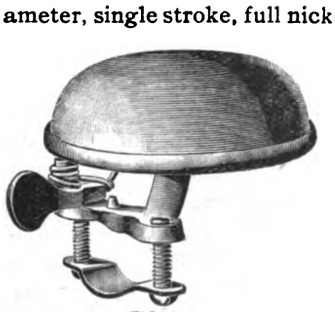


FIG. 2.

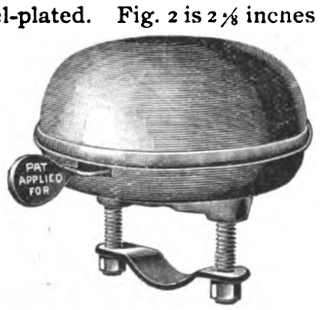

FIG. 3

in diameter, single stroke, full nickel-plated. The one shown in Fig. 3 is the same size and finish, weighing 4¼ ounces and having an electric stroke. The manufacturers state that these bells will give entire satisfaction and are cast from pure bell metal.

Wolff Duplex Cycle.

R. H. Wolff & Co., New York, are introduciug their Duplex Cycle, illustration of which appears here. The makers state that the machine "can be ridden by two ladies or two gentlemen, or by a lady and gentleman. The construction is such as to allow the propelling and steering to be done by either one or both riders, thereby allowing them to work or rest alternately. The frames are specially designed of seamless cold drawn steel tubing, three 26-inch wheels, wood rims, self-lubricating tubular crank shaft and hubs, eccentric chain adjustment, Humber pattern, block chain 5-16 inches. It is geared to 59, 63 or 68 inches, with cranks having a 6½-inch throw. The machine is provided with upturned handle bars, lantern bracket, detachable

mud guard and dress guard, Sager saddles, rubber or rat-trap pedals, and weighs 42 pounds."

The Lariat Mfg. Co., No. 405 Atlantic Avenue, Boston, have purchased from the Stropine Co. their entire plant, book accounts and trade mark. In the future Stropine will be manufactured and sold by them, and to them all orders should be sent.

The tenpenny nail falleth in the highway, and maketh a loud noise, and is known among men; but the carpet tack standeth on its head in the silent spaces of the night, and getteth in its fine work upon the soles of the just and unjust.

Digitized by Google

A New Brand of Garden Hose.

The New Jersey Car Spring & Rubber Co., Jersey City, N. J., makers of high grade vulcanized rubber goods, are out with a new brand of Garden Hose for the coming season styled the "New Method." It is offered the trade after much experimenting on the part of the manufacturers, the results showing it to be a hose well adapted to all gardening and hydrant purposes, and one worthy the confidence and patronage of dealers generally. The company place the utmost confidence "in the excellence of material used, its perfected construction, the correctness of principle involved, its phenomenal strength and the reasonable price at which it is placed upon the market." The "New Method" is manufactured in four and five ply, and of a special high grade of duck. It is warranted to withstand a pressure of 500 pounds.

The complete line of garden hose offered by the New Jersey Car Spring & Rubber Co., for the season of 1895, includes besides this new brand, nine regular grades, as follows: "X X Special." This brand is a very finely made high grade hose, of great strength but very light. This is on account of its purity. "Special." Also a high grade of hose, but made very thick and heavy and especially designed for florists' use about greenhouses, etc. "Extra Para." A very popular brand, of high grade, manufactured from the finest quality of Para rubber and suitable for high pressure and hard usage. "Emerald." A fine high grade hose for high pressure, and which has been thoroughly tested and experimented with and has shown exceptional wearing qualities. This hose is very attractive in appearance, the covers being a bright green in color, and showy. Though a comparatively new hose, it is very popular with dealers. Other brands are the "Pearl," "Red Jacket," "Reliable," "Hudson" and "Staple." These are the cheaper grades, but well and carefully made, every one giving, it is said, entirely satisfactory results in the service for which intended.

There are besides two brands of Cotton Garden Hose, which are worthy of special notice, viz.: "Gulf Stream" and "Staple." "The fabric of each of these brands is made from carefully selected long fibre cotton, heavily and closely woven. The rubber lining is of the best quality and made under the well-known 'precaution' plan followed by the New Jersey Car Spring & Rubber Co., in the manufacture of all their hose linings. This consists in running the tube in three or more plies so that in case of any defect or imperfection in one layer, it is remedied by the other plies. If so desired all hose will be armored to prevent abrasion or other injury which might otherwise occur in situations where subjected to rough usage or careless handling.". Brass nozzles, couplings, sprinklers and other necessary fittings are also carried in stock by the company, and may be procured at short notice. The entire line of such goods is of the latest and most approved design and of superior finish and appearance. The extensive works of the New Jersey Car Spring & Rubber Co., also the principal office and salesrooms, are located at the corner of Wayne and Brunswick Streets and Railroad Avenue, Jersey City, N. J., under the management of J. J. Voorhees, secretary and treasurer. Here those desiring further particulars, samples, prices, etc., should address their communications, which will receive prompt and careful attention.

Hardware for the Florist.

The demand of the florist and the gardener upon the Hardware retail dealer is quite extensive and of considerable profit. Among other articles needed are bellows for applying sulphur, insect powder, etc., to plants; bouquet wire, caterpillar brushes, dibbers for transplanting cabbage and cauliflower plants, etc., strawberry forks, fumigators made of heavy galvanized iron, garden lines which will not kink, reels for same, rubber hose, nozzles, couplings, menders, plyers, etc.; powder bulbs, budding, pruning, grafting, chisel and asparagus knives; lawn sprinklers and mowers; plant sprinklers, wire and plant stands, powder duster, pumps, roffia, a material for tying, as it is very soft, pliable and strong; pruning saws, scythe stones, flower, grape or vine and pruning scissors; grass, border, hedge and pruning shears; brass garden and greenhouse syringes; tinfoil, thermometers, tree scrapers, twine, caterpillar torch made of asbestos and saturated with petroleum; tomato supports, trowels, weeders and watering pots; all of which seem indispensable in these latter days of the nineteenth century.

American Screw Co.'s New List.

Under date of March 1st, 1895, the American Screw Co., Providence, R. I., announce the following price list:

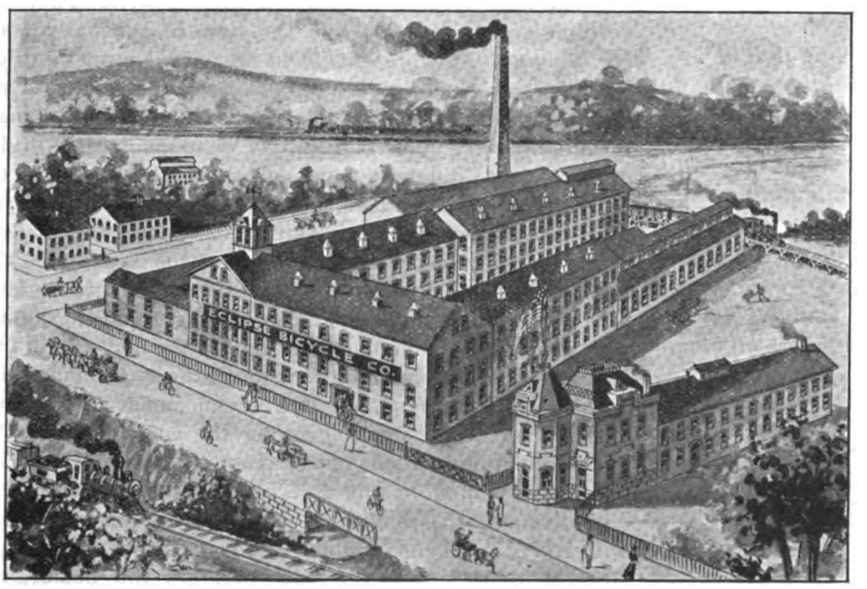
SPECIAL NOTICE.

Changes have been made in the following Lists and Tables since the issue of our 1892 catalogue; the revisions now in force bear the dates here specified:

Page.	Item	Date.
18	Iron Machine Screws	Aug. 1, 1894.
19	Brass Machine Screws	Aug. 1, 1894.
34	Iron Rivets in Bulk	Nov. 1, 1894.
35	Thousand Rivets	Nov. 1, 1894.
36	Block and Carriage Rivets and Burrs	Nov. 1, 1894.
37	Hame, Coopers', and Trunk Rivets, and Belt Rivets and Burrs	Nov. 1, 1894.



Printed Sheets, for insertion in the catalogue, will be furnished upon application.

The cold snaps of last month were very profitable to the plumbers in New England as well as elsewhere. In Fall River, Mass. there were at one time three hundred meters frozen. These meters cost to repair ten dollars each. In one instance the pipe leading into the house froze several feet into the ground caused by a contiguous sewer emptying its contents in such a manner as to continuously envelope the leading pipe. This accident entailed several days labor, much annoyance, and naturally an unusual expense.

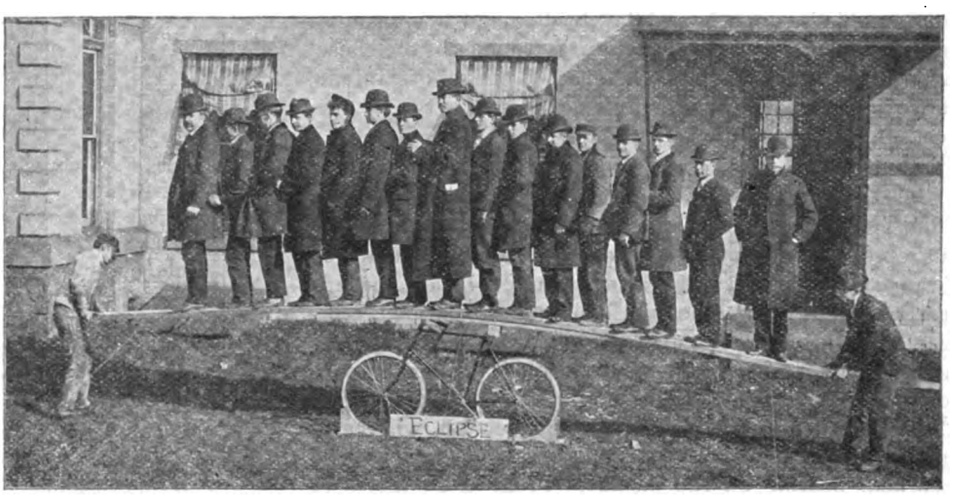
Output and Works of the Eclipse Bicycle Co.

The Eclipse Bicycle Co., Beaver Falls, Pa., have taken a decided stand for 1895 and will hereafter produce only four styles of cycles beside their tandem, making only the very highest class of goods that can be turned out. The Eclipse Co. have heretofore made thousands of bicycles under special brands for the largest jobbers in the country, but this year have given up this trade, and will devote their energies to pushing the sale of their own Eclipse brand of cycles which have been greatly improved for 1895 and have jumped into great popularity. This company have one of the largest bicycle plants in the country, and rank foremost among strictly high grade manufacturers in the quantity of their output. The Eclipse Co. commenced to manufacture bicycles in Indianapolis, Ind., but in 1892 moved their plant to Beaver Falls, Pa., occupying the building formerly used by the Beaver Falls Cutlery Co. These buildings were enlarged and interiors remodeled, and this factory that once held five hundred Chinamen, trying to make knives, now employs nearly that number of skilled mechanics, who, with the aid of modern machinery, are turning out a line of most beautiful and artistic cycles.



The Eclipse Bicycle Co. have a large foreign trade, being represented by P. Mott & Co., in Paris, who are agents for France, and Hammacher & Delius, in Hamburg, who control the rest of the European countries. They also have agents in other foreign countries and have a branch house in Hamilton, Canada. The Eclipse bicycle became well known in Canada in 1894. The Simmons Hardware Co., of St. Louis, are distributing agents for the west and south, while the Bindley Hardware Co., of Pittsburgh, control a block of territory in southeastern Ohio and western Pennsylvania. The balance of the territory in the United States is worked direct from the factory.

We publish in this issue a cut of the Eclipse factory, and also a half tone, taken from a photograph, of one of the most remarkable tests to which a bicycle has ever been subjected. This picture shows a twenty-four pound Eclipse Roadster bicycle, which was taken at random from stock, supporting sixteen men and a heavy plank, the aggregate weight of the men and plank being 2448 pounds. The plank was steadied by wire guys which ran over the plank and were fastened to pegs in the ground. Not an ounce of weight was taken off the plank in any way. It will be observed in the photograph that cleats were used to keep the bicycle from rolling forward or backward. The bicycle stood the test without developing any weakness whatever, and doubtless would have stood the weight of several more men. The same experiment was tried on an Eclipse Racer which sustained the weight of thirteen men, a half tone of which is shown in the Eclipse catalogue, a neatly gotten up and business-like book that is described elsewhere in this issue, and will be mailed to any Hardware dealer on receipt of his address.

The Eclipse Bicycle Co. have some very attractive advertising matter, among which is a very neat hanger, in the center of which is a beautiful engraving of the sixteen men on a bicycle. This is surrounded by cuts of their 1895 cycles, and an engraving showing an equally severe test of their cycles, of an entirely different character. The Eclipse Bicycle Co. are making a special bid for the Hardware trade, believing that Hardwaremen can handle a line of strictly high grade and artistic goods that will meet the requirements of fastidious riders, as well as to confine themselves to a medium grade line only. We understand that although their goods are of the very highest class, that their prices are reasonable and it would pay dealers to investigate this line.

Edward Atkinson is displaying his new cooking stoves to the public in New England, by means of his lectures on cooking. The stove has glass front and sides, and with thermometers the heat can be nicely regulated and the cooking be at the command of the cook. The oven thermometer is now being manufactured in the West, and agents and others are selling them at two dollars each, which includes the labor in adjusting it. These thermometers register about two hundred and eighty degrees, and thus closely crowd the pyrometer. Naturally they are nicely made, and accurately graduated.

The Puget Sound Wire Nail & Steel Co.'s plant at Everett, Wash., have resumed operations, for an extended run. A five thousand keg order has been received from San Francisco.

The Great Sportsman's Exposition.

As the time draws near for the Sportsman's Exposition, to be held at the Madison Square Garden, May 13th to 18th, inclusive, interest grows apace. The officers and various committees are working hard and earnestly to make the exposition a huge success. Forty-eight out of the one hundred and twenty-five exhibition spaces have this early been engaged by the following firms:

Name.	Space.
Schoverling, Daly & Gales,	57, 58, 59
Winchester Repeating Arms Co.,	75
Hermann Boker & Co.,	61
Wiebusch & Hilger,	63
Von Lengerke & Detmold,	77
Colt Patent Fire Arms Co.,	60
Remington Arms Co.,	110, 111, 112
Hunter Arms Co.,	72
Lefever Arms Co. & Wm. Lyman,	93
Forehand Arms Co.,	106
Union Metallic Cartridge Co.,	89, 90, 91, 92
United States Cartridge Co.,	45, 46, 47, 48

American Field,	78, 79
Freed Optical Co.,	13
Spratt's Patent, American, L't'd,	113
Cushman & Denison,	101
A. G. Spalding & Bro.,	113, 114, 115, 116, 117, 118, 119, 120
Maine Central R. R.,	85
Shooting and Fishing,	109
"Hardware" Publishing Co.,	14

It behooves all lovers of any branch of the numerous sports, and also those who wish to keep conversant with the modern march of improvement in sporting appliances, to visit the show, not once, but as many times as possible. The vast scope and variety of the exhibit will make it absolutely impossible for one to see and appreciate more than a small portion in one visit. The exhibit will include firearms of every description, both ancient and modern; ammunition, sporting sundries and appliances, fishing tackle, boats, canoes, etc., camping outfits and utensils, athletic goods, lawn tennis, field games, etc.; zoology, taxidermy and taxidermist's supplies; kennel supplies; cameras and photographist's supplies; saddles, bridles and horse equipments; sportsmen's art and literature, trophies of the chase and a loan exhibit. The two last named classes of exhibits will cover a vast field, and will no doubt prove two of the most interesting features of the show.

TROPHIES OF THE CHASE.—CLASS N.

"This class will consist of collections of typical examples of our large game, both native and foreign. These exhibits will represent largely the historical and educational features of the exposition, and will include mounted heads and entire specimens of buffalo, musk ox, moose, caribou, reindeer, Virginia and black tail deer, mountain sheep, antelope, mountain goat, European stag, roebuck, chamois, wild boars, black, brown, grizzly and polar bears, etc., etc. The committee of measurements and records will carefully measure each specimen, and all reliable data will be recorded, bearing on the display. From these tables of comparative measurements, the committee will decide what specimens are worthy of being known as the 'Kings of Record.' This work will be of exceeding scientific value. Exceptionally large specimens are desired. Private persons and museums will contribute from their collections. The management wishes to emphasize the importance and value of universal co-operation and the necessity of the best trophies being in the collection. A neat monograph of this exhibit will be published, with full descriptive text and effective illustrations. By this means, a valuable contribution to the history of our North American and European game animals will be secured. Specimens showing abnormal growths of horns and antlers, also skins showing albinoism and melanism are desirable."

LOAN EXHIBIT.—CLASS O.

"The Loan Exhibit will include various styles of hunting costume accoutrements, from the time of the early trappers' day up to the present. Old firearms, Kentucky rifles, flint-lock guns, punt guns and ducking cannons, in contrast with the modern breech-loading guns, rifles and trappings. Spears, arrows and other primitive weapons, various styles of foot gear, different kinds of snow shoes and sleds. Primitive saddles, bridles, spurs, lassoes and whips. Originals and models of canoes, skiffs, boats and other sailing craft. Fishing hooks and harpoons of the natives, tackle, nets, spears and devices of the Indian for capturing fish and other aquatic animals. Also photographs, engravings and paintings of animals, hunting scenes and camp life. In fact, everything within the realm of the sportsman which will illustrate the evolution and advancement in fire-arms and implements for hunting during the early centuries, up to the scientific methods of the chase of modern times. All collections loaned for this object will be carefully received and arranged in systematic order and properly labeled with the name of the exhibitor. The purpose of the Exposition is to present to the manufacturers, the dealer, the sportsman and all who are, and may become, interested in field sports and games, every feature which will lead to the extension of the trade, the education of sportsmen and everything tending to elevate and improve the interests of the sportsmen's fraternity. Extra attractions, such as promenade concerts, afternoon and evening, contests of skill of an interesting nature, the methods of manufacturing guns, shot and shells, etc., etc., will be illustrated when practicable. It is intended to have represented with skins, skeletons and mounted specimens (single and in groups), every animal, considered worthy of the sportsman's chase, including mammals, birds and fish. Picturesque groups of natural mounting, representing camp life and hunting scenes of different nations, will add to the charm of the display, and will prove an attractive and instructive feature of the Exposition."

The following list gives the names of the officers and executive board of the Sportsmen's Exposition Association:

Charles Tatham, - - - President.

VICE-PRESIDENTS.

Charles Daly,	George B. Grinnell,
Wm. J. Bruff,	Marcellus Hartley,
J. Walter Spalding,	John S. Wise,
Dr. N. Rowe,	John H. Hall,
Charles F. Wiebusch,	Harry Palmer,
T. W. Bryant,	A. W. Money,
J. Seaver Page,	Wm. Hart,
Wm. Lyman,	A. C. Gould,
Jacob H. Studer,	Eugene Du Pont,
Gen. D. H. Bruce,	Charles W. Mowrey,
Eugene G. Blackford,	Leslie C. Bruce.

Frederic S. Webster, Secretary, 106 East 23rd Street.

J. A. H. Dressel, Treasurer.

EXECUTIVE BOARD.

Charles Tatham,	Charles Daly,
J. Von Lengerke,	Jacob H. Studer,
J. Walter Spalding,	T. W. Franklin,
J. A. H. Dressel,	P. G. Sanford,

Frederic S. Webster.

Some of the special features of the Exposition will be five cycloramic groups, representing hunting scenes, camp life and sportsmen. There will also be three log cabins, one an exact reproduction of a Maine hunter's cabin. It will be built of logs hewn in the Maine forests, and will be constructed by a Maine woodsman. Another cabin will show

Digitized by Google

Western life, and the third will be filled with specimens, skins, antlers, etc., of animals, the trophies of the chase of a single individual. The Maine Central Railroad company will publish a newspaper, entitled *The Log Cabin*, with a guaranteed circulation of 25,000. It will be distributed at the Exposition.

At a meeting of the Exposition Association held on Tuesday afternoon, March 5th, Harry Palmer was made assistant secretary. He was also engaged to travel for the Association and solicit subscriptions, and given charge of the catalogue. Frank W. Sanger, manager of Madison Square Garden, was instructed to make arrangements for music. No exhibition spaces were assigned, but many applications for same are under consideration.

Placed A New Bicycle Lamp Agency.

F. J. Miller, of Birmingham, England, was here recently in the interest of H. Miller & Co., of which firm he is a member, to place the agency in this country for the sale of the Bicycle Lamps made by that company. He settled upon A. M. Sheffey & Co., No. 92 Reade Street, New York, as being best fitted for the work of distributing the product, and placed the entire control in their hands. Coupling the fame of the Miller lamps with the popularity in the cycling trade of Scheffey & Co. was sure to make it a go, and it has been a go. We learn that the Reade Street people have sent three or four additional orders to Europe already for more stock, and the season in fact is just opening. Scheffey & Co. have issued a special lamp catalogue, which can be had for the asking. HARDWARE readers will remember A. M. Scheffey & Co. as makers of the Wynnewood Bicycles, which sell at $80, $60, $50 and $40.

George L. Pease, formerly vice-president of the National Shoe & Leather Bank, and a prominent member of the New York Hardware Club, was stricken with apoplexy on the morning of February 24th, at his home in Brooklyn, and died on the morning of February 25th. Mr. Pease was a member of the Boorum & Pease Co., manufacturers of blank books, and although not connected with the Hardware trade, was well known and most highly esteemed by that trade, and his loss was one which came with saddening effect upon a great many members of the club who were in the habit of meeting Mr. Pease quite often at the noon hour.

W. T. Norton has resigned his position of general sales agent of the American Axe & Tool Co., It is understood that he contemplates returning to Cleveland, where for twenty years he was a member of the Powell Tool Co., which became a part of the American Axe & Tool Co. some years since. He came to New York in 1890, where he has made many friends, who will greatly regret his return to his former home. It is not known what business connections he will form, although safe to assume that he will eventually be found somewhere in the ranks of the manufacturers of that busy city.

At the annual meeting of the stockholders of the Corbin Cabinet Lock Co., New Britain, Conn., the following directors and officers were elected: Directors: Philip and Andrew Corbin, Charles Miller, J. H. Spring, Charles Peck, John B. Talcott and Darius Miller. P. Corbin was elected president and treasurer; Andrew Corbin, vice-president, and George W. Corbin, secretary.

D. M. Thomas, who was well known in stove manufacturing circles, died at his home, No. 134 Fort Greene Place, Brooklyn, N. Y., February 21st. Mr. Thomas was successively president and secretary of the National Association of Stove Manufacturers of the United States. The latter position he held at the time of his death.

Yale & Towne Mfg. Co.'s New Line.

The Yale & Towne Mfg. Co., Stamford, Conn. and New York, have issued an attractive and interesting pamphlet bearing the title, "Wrought Hardware." It is, as the mame implies, illustrative of the new line of Wrought Hardware which the company are just placing upon the market, and of which the examples in this pamphlet are merely a partial and preliminary series.

While this new line of wrought work is not materially different from others on the market, as to the work in plain bronze and steel, except that even in these it is up to their best standard of workmanship and finish, and therefore superior to the average grades heretofore made, the facts are entirely different in the case of the ornamented designs. Although only one ornamentation is shown in this preliminary edition, others are under active preparation, and all of them will embody the same high character of design and execution. Heretofore, stamped Hardware has been treated with scant courtesy as to the character and dignity of ornamentation applied to it. The examples of this new work now submitted, demonstrate that it is possible to produce decorated wrought Hardware of an artistic and inherently attractive character, which will compare most favorably with the best examples of cast work. This departure is new and important, and the success they have achieved is notable.

An examination of the illustrations in this pamphlet will give a good idea of the above points, although an inspection of the work itself is necessary to arrive at a full appreciation of its character and artistic qualities. Finally, and by no means least, is the fact that they are enabled to offer this work at prices which will make it cheap in cost while the reverse in quality: in other words, at prices which are surprisingly attractive to buyers.

Horse Clipping Machines.

The spring season has arrived for clipping horses, and parties looking for machines of well-tried merit and popularity are requested to consult the advertisement of the Gillette Clipping Machine Co., No. 201 East Twenty-third Street, New York, on another page. They manufacture, it is said, "the only absolutely flexible shaft; also make the widest and most rapid cutters on the market. The machine is the simplest made, having the fewest parts, therefore the least liable to get out of order." On account of rapidly increasing business, their facilities for manufacture have been doubled for the coming season. Grinding of cutters is one of the special branches in their works, all grinding and repairs being finished and returned on the day received. No delays. All customers are requested to send in knives for repairs at once, and be ready for clipping early in the season. These machines are largely exported to other countries, and receive the highest praise from every source. Send for new catalogue and price list.

John B. Dupont, West Somerville, Mass., died at the Massachusetts General Hospital, February 19, 1895. He was born in Bristol, Vt., in 1853, and went with his parents at an early age to Canada. Learning the plumbers' trade, he went to Boston, and ten years ago established himself in the plumbing and Hardware business in West Somerville, Mass. He was a club man, belonging to the Fremont in Boston; Lafayette, Cambridge, Old Powder House, West Somerville; St. Jean Baptiste Societe, Boston, as well as many other clubs and organizations.

The plant and property of the United Brass Co., Lorain, Ohio, was sold by the sheriff, February 23rd, for $141,100. The works were built by the late Russell Penfield in 1881, the plant costing $100,000. Mr. Penfield sunk his entire fortune in the enterprise and died a poor man.

RECENT TRADE PUBLICATIONS.

The Remington Arms Co., New York, manufacturers of firearms, bicycles, sewing machines, etc., have issued a handsome illustrated catalogue of the Remington bicycles manufactured by them. It is printed very artistically, with a handsome cover, with embossed gilt lettering. Full illustrations and descriptions may be found of the Remington Road Racer, Light Roadster, Woman's Safety Racer, Boys' Wheel, Girls' Wheel, the parts of the Remington wheels and their specialties, the Palmer tire, Dunlop tire, etc. A number of pages are devoted to the prices of the Remington bicycle parts. In a note of introduction presenting this catalogue the company say: "Nowadays the cycle catalogue which is not an art souvenir, and which does not contain page after page of variety reading, is doubtless somewhat of a novelty; but, as the building of a reliable wheel depends upon neither, we have no apology to offer in arranging this, our fourth catalogue, in such a way as to enable its readers to quickly obtain a few necessary and important points before proceeding to a description of the mechanical features of our wheel. When a manufacturer claims to produce an absolutely reliable and standard article, there should be proper grounds justifying the position taken—a mere assertion is not sufficient to the buyer who seeks full value for his investment. Justifiable reputation for high grade work is not obtainable in a few brief months. It is our fortunate privilege to have been prominent and conspicuous as manufacturers of world-renowned products since 1816, when the great Remington factories were first established—products (and who has not heard of them?) that now enjoy a universal reputation for unapproached excellence and absolute reliability. We have always made, and shall continue to make, but one quality, viz.: the best that abundant capital, the finest material obtainable, the most skilled workmanship, and unsurpassed facilities are capable of producing. No other combination of circumstances could have brought about the uninterrupted success thus far achieved by us. You can obtain a guaranteed result in the purchase of a Remington bicycle. Our 1895 model wheels embody the latest and most important improvements, several of which are exclusively Remington, adapted to the manufacture of a light, strong, and thoroughly high grade wheel. We have no hesitation in recommending the Remington to either the experienced and intelligent buyer, or the novice, as a strictly reliable bicycle of the very highest merit and mechanical perfection."

Sickels, Sweet & Lyon, wholesale dealers in Hardware, cutlery, farm and garden tools, No. 35 Barclay Street and No. 40 Park Place, New York, have issued the spring edition of their 1895 catalogue. It is a very large and comprehensive work, containing more than 150 pages, and filled with illustrations and descriptions of the immense lines of goods which they handle. This catalogue is not intended to represent their full line, but is issued every spring, and a supplement in the fall, more especially to call attention to Seasonable Goods, their specialties, and lines for which they are New York agents. The work is printed in colors, and contains a copious index, which makes it very convenient for parties desiring to investigate any line of seasonable spring goods. It is, of course, impossible to attempt any enumeration of these. In addition to their own line of goods, they announce that they will be pleased to buy for their customers any goods that can be purchased in this, the greatest market in the country, an advantage to the dealers in that their purchases may be condensed and shipment made of various items in one bulk, thus saving expense and trouble. They announce that in addition to their own large line of goods manufactured especially for them and those for which they are New York agents, they sell at manufacturers' prices various productions of the following companies: Sargent & Co., Russell & Erwin Mfg. Co., Withington & Cooley Mfg. Co., Stanley Works, Stanley Rule & Level Co., White Mountain Ice Cream Freezer Co., Bradley & Smith, North Bros. Mfg. Co. Lightning and Gem Freezers; Peck, Stow & Wilcox Co., Atha Tool Co., American Axe & Tool Co.; Hartman Mfg. Co.; Plumb, Burdict & Barnard; Winsted Edge Tool Co., Oliver Ames & Sons Corporation, Lalance & Grosjean Mfg. Co., St. Louis Stamping Co., Shelton Co., Van Wagoner & Williams Hardware Co., Central Stamping Co., Iron Clad Mfg. Co., Nicholson File Co.; Landers, Frary & Clark; Henry Disston & Sons, National Saw Co., Enterprise Mfg. Co., and the importations of Herman Boker & Co., Wiebusch & Hilger, Charles J. Healy. Dealers who are interested in spring goods, as all are, will do well to investigate this catalogue, which will be sent on application.

The Eclipse Bicycle Co., Beaver Falls, Pa., have issued one of the handsomest catalogues of the season, presenting to the trade their well-known Eclipse Bicycles. This is printed in colors, and gives a description and illustration not only of their wheels, but of the various parts, also a great deal of other matter of interest to the purchasers of bicycles. The frontispiece consists of a view of their great works at Beaver Falls, Pa., containing over 100,000 square feet of floor space, with departments systematically arranged, and filled with machinery of the finest make. An unique picture is that where sixteen men whose weight aggregate 2448 pounds are standing upon a plank laid across an Eclipse Bicycle, the weight of which is but 25 pounds, the full weight of which rests on the bicycle. Concerning their plans for 1895, the company say: "Proud of the achievements of its past history, unequaled, we believe, in the experience of any other Bicycle manufacturers, the Eclipse enters its fifth season, backed by the same progressive spirit that has brought it to its present enviable position among leading Bicycles, and with ambition to add sufficiently to its merit and reputation, to make it, before the close of 1895, in every respect and without any question, the first and best of all wheels. Since the season of '90–'91, which saw the advent of the arched frame nickel-plated Eclipse, at which people laughed at first, only to praise finally for its wonderful durability, the Eclipse has experienced a veritable evolution, resulting in the beautiful, light and strong machine which has won such golden opinions during the season of 1894. From the first wheel to the Eclipse Racer of '94 was indeed a phenomenal progress: for the unequaled record of Road Races won on the Eclipse, and of prizes taken on the track in 1894 has convinced the public beyond all questioning that the '94 Eclipse was all that the makers claimed for it. For 1895, we offer you in the Eclipse, a Bicycle containing every point of excellence which our own experience and an observation keenly alert for improvement in any direction has suggested and proved to be desirable. In pattern, in material, in workmanship, in running qualities and durability, we are determined it shall leave nothing to be desired, while in its new features we are sure it will show a progress which will be a revelation. We have added new and improved machinery and otherwise increased our facilities, and shall largely increase our output this season. Our line for 1895 comprises four wheels: the Eclipse Roadster, the Eclipse Special, the Eclipse Track Racer, the Ladies' Eclipse. The distinctive

Digitized by Google

features of this admirable quartette are set forth in this our 1895 Catalogue, which we submit as interesting and valuable, we believe, to old friends—inviting and convincing, we trust, to new ones."

Singer & Co., Nos. 6–8 Berkeley Street and No. 2 Warren Avenue, Boston, have issued a catalogue for 1895 of their Bicycles and Tricycles. These goods are well illustrated, and in a note the company say: "Our Cycles have been in the American market since 1876. In that year they were handled by T. W. Lawton, of Baltimore, Md., and were exhibited at the Centennial Exposition at Philadelphia. May 28, 1877, was the date of the arrival of the first bicycle at the port of Boston; it was a Singer Royal Challenge, imported for his own use by A. D. Chandler, of Boston. This wheel is now owned, and has been frequently exhibited, by the Pope Mfg. Co. The latter firm was the first Boston house to handle Singer goods; later, Stoddard, Lovering & Co. took our agency; they were succeeded by W. B. Everett & Co., and they in turn by the present American branch of Singer & Co., at Nos. 6 and 8 Berkeley Street, Boston. Singer wheels and high grade wheels are synonymous terms, and the reputation we have attained we expect to maintain, simply by continuing to supply cycles that will be satisfactory to the purchaser and a credit to ourselves."

The Franklin Brass & Bronze Co., No. 111 Chambers Street, New York, with factory at Derby, Conn., have issued a handsome illustrated catalogue of their brass and bronze Hardware. This is printed upon very heavy paper, thoroughly illustrated, containing near 100 pages. It is, of course, impossible to enumerate the lines of goods they handle, but one can find here almost everything known under the name of brass and bronze Hardware. Among these may be mentioned box hinges, flap hinges, strap hinges, refrigerator hinges, fancy hinges of various kinds, wrought brass hinges, water closet seat hinges, window screen hinges, desk hinges, shutter-butts, cabinet hinges, escutcheons, name-plates, hinge hasps and bolts, box corners, brackets, corner bolts, hook lifts, pulls and a large line of cast brass goods. They further announce that all hinges manufactured by them have brass pins. The work is very comprehensive and seasonable and should be thoroughly examined to be appreciated.

Patterson, Gottfried & Hunter, dealers in machinery metals, tools, Hardware and supplies, Nos. 146–150 Centre Street, New York, are sending their friends a unique little leaflet, upon the outside of which appears the representation of an oyster shell, upon which may be found this legend: "Perhaps there is a pearl in this oyster." On opening this one finds the following: "Not a pearl, but a gem in its way. The Standard Twist Drill." Accompanying this is a little drill made of the finest material and perfectly finished, which is suitable for a desk ornament or a watch charm, and will stand as a very good representation of the fine line of goods made by the Standard Tool Co., manufacturers of twist drills, Cleveland, Ohio.

The Comstock & Coonse Co., Nos. 193–199 South Meridian Street, Indianapolis, Ind., have issued a descriptive price list of their Wood, Chain and Wooden Force Pumps. They give descriptions and prices of a number of articles of interest to the Hardware trade, among which may be found their wood pumps, rubber bucket chains, pumps, hose, hose-pipe couplings, clamps and points, the Coonse force pump, pitcher-spout pumps, drive-well pumps, points, cylinders, locks, plumbers' sinks, etc. A great deal of interesting information in regard to sizes, measurements, etc., is found in tables contained in this work. The manufacturers will be pleased to send the same upon application.

The Samuel I. Goodall Co., Philadelphia, have issued a catalogue and price list of the Bailey pattern iron and wood adjustable planes, try-squares, bevels, hack saws, braces, etc. These goods are well illustrated. They explain that their planes are made from the very best material, by skilled workmen, with improved machinery and nicely finished. Each plane is carefully tested before leaving the factory.

The Cleveland Stamping & Tool Co., Cleveland, have issued a supplementary catalogue and price list of their "Solid Steel" seamless hollow-ware.

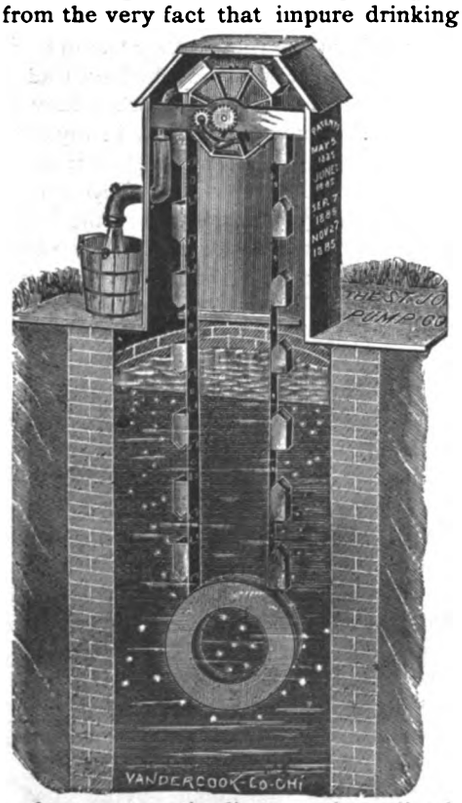
A Retailer on Department Stores.

EDITOR HARDWARE: It may be, as you say in a recent editorial, that the department stores of the large cities can teach a lesson to the old-fashioned Hardware dealers in regard to the more rapid movement of mixed assortments of goods, and the ratio which the percentage of profits should bear to the gross sales. But there is a great difference between the two conditions of trade. One can deal in job lots, remainders of stock, and a bric-a-brac assortment of anything that will sell, having some things one week at 98 cents and the very next week putting the price of the same goods at $1.98, even if they sell none at the increased price—and maybe when they make such a radical change they have few left to sell—they advertise the fact that the public must always watch their advertising columns for real bargains.

If a customer buys something in this way and finds he is "stuck," he swallows the error himself, and concludes it was worth all he paid for it, and lets it go. Then on such goods that are sold only in season, like skates, fly screens, lawn mowers, etc., they start the season at a good profit and finish it up to close out the stock at no profit at all.

No Hardware dealer could do business in any such irregular, spasmodic fashion like this, or they would have no regular trade at all. I have customers who have traded with me for twenty-five years and over, and when they want anything in my line they expect to find it in my stock, buy it as cheap as anywhere else in town, and no time is lost, and we are both satisfied; if anything is defective about it, they bring it back promptly, and I see that the manufacturer makes it good to me, as I have to do to my customers. No job lots are touched in any way, nor second quality of goods of any kind, for I find that people soon forget they bought at a second quality price, when the articles turn out to be of no value whatever. All these trashy things are bought by somebody to take the place of a better article, and if they only get in the hands of some one who never had anything of the kind before, it turns out better after all for legitimate trade. The sale of such things as clothes wringers, carpet sweepers, egg beaters, Potts sad-irons and a lot of other things is started this way by people who have been wringing clothes by hand, beating eggs with a spoon, and ironing clothes with grandmother's old flat iron heirlooms up to the time of celebrating their silver wedding. When I find my customer compares my prices with those of "Yorkville Brothers," "R. H. Crazy & Co." and "Abraham & Jack Straws," I tell them I don't know what kind of goods *they* sell; I only know *my* goods can't be sold at any such prices.

They can do as they like about buying good goods in Newburgh, or wait until they can get "stuck" in New York if they want to. No law prevents it; and I generally get them back next time. Pardon my taking up so much of your time, but I am very much interested in everything in HARDWARE, and that editorial inspired my "talkee talkee." J. V. C.



Newburgh, N. Y., March 4, 1895.

A three story brick addition to the Cleveland Machine Screw Co. has been just completed. The new building is 43 feet by 203 feet and cost $25,000.

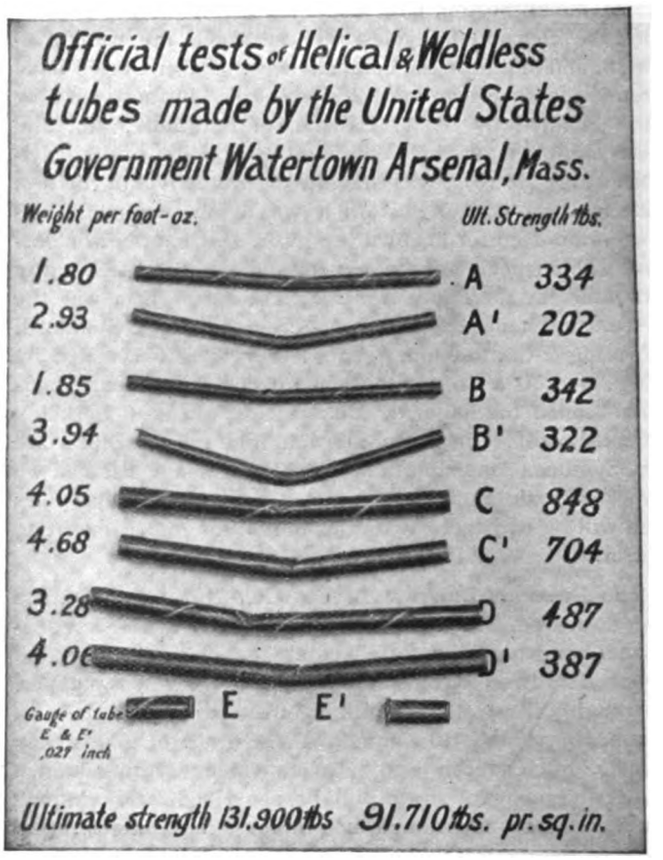
Perfection Water Elevator and Purifier.

The St. Joseph Pump Co., St. Joseph, Mo., have successfully turned their attention not only to the elevation of water from the well, but also to the sanitary correction of evils that the water may contain. In their Perfection Water Elevator and Purifier, which is here shown in operation, they have great reason to feel that their point has been most successfully attained. The principle upon which it works is thus described: "Every bucket descends full of air and ascends full of water. For every gallon of water drawn a gallon of air (the vital element) is circulated through the water, from the bottom to the top. This not only thoroughly agitates, ventilates and purifies the water, but it forces a large surplus of oxygen from the air into the water, and this surplus of oxygen is sufficient to consume all impurities or organic matter in the foulest water. It is an admitted fact by thousands using them, that this purifier is the only pump invented that will destroy wiggles, water bugs, water lice and make foul or stagnant well or cistern water pure and sweet, removing all color, bad taste and smell. After a few days' use the old flatness and insipidity is replaced by a sparkle like that of a mountain spring. In short, it will make bad water good and good water better." They further show that their Water Elevator and Purifier is endorsed by men eminent in sanitary science and medicine, and add: "All scientific writers, health boards and the medical world are agreed that we get our oxygen, nitrogen and hydrogen from air and water; they say: breathe pure air, drink pure water and bathe in pure water, giving as their reasons that malaria is taken into the system in three ways, namely, drank, inhaled and absorbed when bathing. The object of the medical world and health boards is to guard against contagious diseases, and prolong the human life, and from the very fact that impure drinking water is



the cause of more zymotic diseases than all others combined, they so earnestly endorse the Perfection Purifying Pump. Secure and place one on your well or cistern, and the water contained therein is positively guaranteed to become as pure as water can be made (by ordinary usage) within ten days' time. Over one million Purifying Pumps are now in general use throughout the United States and foreign countries; 2500 Perfections sold in the city of Cincinnati alone last season. Many cities use it exclusively."

HARDWARE costs only One Dollar a year.

The Premier Cycle Tests Illustrated

The following unique illustration carries its own explanation. It shows the report of mechanical tests made with the United States testing machine (capacity, 800,000 pounds) at the Watertown Arsenal, Massachusetts, on January 16,

1895, for the Premier Cycle Mfg. Co., New York. The report upon these tests in detail was as follows:

TESTS BY COMPRESSION—BICYCLE FRAMES AND TUBING.

Test No.	Description.	Weight.	Ultimate Strength.
8,042	Weldless Frame.	5 lbs. 14¼ oz.	264 lbs.
8,041	Helical Frame	5 lbs. 5¾ oz.	448 lbs.

(Compressed lateral strain as in case of collision.)

Test No.	Description.	Weight per ft. ozs.	Thickness. Inches.	Exterior Diameter, Inches.	Ultimate Strength. Pounds.
8,049	Weldless Tube.	2.93	.038	.625	202
8,050	"	3.94	.043	.636	322
8,051	"	4.68	.030	1.000	704
8,052	"	4.06	.027	1.000	387
8,045	Helical Tube.	1.80	.015	.630	334
8,046	"	1.85	.016	.640	342
8,047	"	4.05	.026	1.000	848
8,048	"	3.28	.020	.980	487

(Transverse test—tube supported at ends 12 inches apart—loaded at the middle.)

No. of test.	Description.	Weight. per ft. ozs.	Thickness	Diameter.	—Ult strength, lbs.— Total Load.	Per sq.in.
8,054	Weldless Tube.	4.03	.027	1.00	3,760	91,710
8,053	Helical Tube.	4.19	.027	1.01	5,540	131,900

(Compression tests—load applied parallel to axis of tubes.)

Correct, J. E. HOWARD.

J. M. REILLY,
Major Ordnance Dept., U. S. A., Commanding.

A New Partnership.

J. R. Linn, who for thirteen years has been with Jos. Rodgers & Sons' American agents, Alfred Field & Co., has formed a partnership with D. B. McIlwaine, to deal in cutlery and Hardware specialties, at No. 122 Chambers Street, New York. The new firm will be known under the name of McIlwaine & Linn, and are the sole agents for the following concerns: Singleton & Priestman, Maleham & Yeomans, and Ward & Payne. While with the Jos. Rodgers & Sons' agents, Mr. Linn represented them to the large trade in the East, South and West. All business entrusted to the new firm will receive prompt and careful attention.

Work has been resumed at the plant of the Lakeside Nail Co., at Hammond, Ind., with a full force of men. Orders have been booked sufficient to keep the plant in operation for an indefinite time.

The Humber and 1895.

Humber & Co., No. 318 Broadway, New York, have issued the following manifesto, which carries its own explanation in full:

SALVE.

In February, 1869, twenty-six years ago, Thomas Humber started to build bicycles, and he has been building bicycles ever since; therefore it is that the Humber Co. is the oldest bicycle manufacturing concern in the world. The Humber Co., American, Ltd., was organized for the purpose of supplying American riders with the most famous bicycles on the face of the earth, the Beeston-Humber, built on American lines, at American weights, by American workmen, using American machinery in an American factory, and managed by American brains, and we assure our friends that the bicycles we offer will be Beeston-Humbers in all that the name suggests, namely: perfection of material, workmanship, design, finish, ease of running and certainty of guarantee. We point with pride to the marvelous success and reputation of the Humber Co., and invite attention to our age and experience. We have capital sufficient, facilities second to none, and we offer the American public the best product of English engineering skill, backed by American inventive genius and energy. A fame such as imparts a peculiar meaning of quality to a name is earned by nothing save merit. It cannot be gained in any brief period of time, and cannot be retained except by maintaining the merit on which it is based.

The reputation of Humber & Co. for producing cycles of distinctive excellence and reliability has been world-wide for nearly three decades. It has been jealously guarded. At Westboro, Mass., Humber & Co., American, Ltd., have established a factory and have equipped it with the latest improved machinery, and there, as at Beeston, England, Humber Cycles will be made of only one quality, and that "Humber quality."

That the Humber is the standard which is imitated by all makers, may be easily proven. It is only necessary to examine the catalogue of other makers when the numerous allusions to "Humber pattern frames," "Humber pattern chains" and "Humber pattern bearings" will settle the question beyond the peradventure of a doubt. And this is one of the reasons why the fame of Humbers does not depend on such advertising. It rests on the "word of mouth" reports of Humber riders and experienced mechanics, who, after inspection, doff their caps to the genius of handicraft made manifest. While the expressions "high grade," "best" and "finest" have been handled by many makers until they are pitiably cheap and empty sounding, the name Humber has remained unique as applying to a quality with which none other is ever compared, a quality in describing which adjectives are not employed. It is simply "Humber quality."

We shall shortly issue a comprehensive catalogue in which we shall illustrate and describe Humber styles for 1895, and in connection therewith we wish to call attention to the fact that in making new models for each succeeding year, manufacturers usually take the models of the current year and after conning them over point by point, set to work to make their improvements. So, the study and improvement of 1894 models yields 1895 models. The American models of Humber Cycles were not designed till after all other makers, both European and American, had completed their patterns for 1895, and American Beeston-Humbers embody more improvements than any other cycles made in this or any other country. They are practically 1896 models, and in submitting our first American catalogue, we do it with the gratification of knowing that, in addition to putting on the market bicycles which are the standard of excellence in all parts of the world, we are offering also bicycles that are one year ahead of all others in improvements.

We also have no hesitancy in stating that Humbers cannot be built for less than the price we have established, and we most emphatically promise full value delivered. Every part of an American Humber Bicycle can be duplicated in case of need, and there will be little need. Every Humber turned out by us will be guaranteed, and we are ready to fill orders promptly and satisfactorily.

We are here for business, and await the pleasure of the American public, to whom we promise prompt and courteous attention.

Address all mail and applications for territory to No. 318 Broadway, New York, N. Y.

HUMBER & CO., AMERICA, LTD.

New Metallic Warp Tape.

The Lufkin Rule Co., Saginaw, Mich., who are always in the van of events in the measuring line, have at the numerous requests from patrons, just placed upon the market a Metallic Warp Tape of their own make, and which we are certain will interest the trade. A very good idea of this new article may be obtained from the illustration here given. It is described as first-class in every respect, and "the equal in all respects, of any in the market." The company add that "it certainly will compare favorably with our well known line of Steel Tapes, which rank among

the very best." The tape is five-eighths of an inch wide, made of best woven linen, with metallic warp. Hard leather cases, folding handles, with brass trimmings. The sizes and prices are here given in full:

MARKED ONE SIDE ONLY.

TAPES ONLY, WITHOUT CASES.

Length,	25ft.	33ft.	40ft.	50ft.	66ft.	75ft.	100ft.
Marked one side, per dozen,	$ 9.60	12.00	14.40	16.80	19.20	21.60	31.20
Marked both sides, per dozen,	$10.80	13.20	15.60	18.00	21.60	25.20	22.80

Tapes marked on back in feet instead of links when wanted, at same price. Packed one-half dozen in a box.

The company further announce that they "are in a position now to furnish a full line of Steel and Metallic Warp Measuring Tapes, and it is not necessary for any dealer to buy foreign goods, when he can get as good, or better, from home manufacturers."

Some evenings since, the members of the St. John Iron & Hardware Association of St. John, N. B., were entertained at dinner by the president, W. H. Thorne. A very fine banquet was served, after which a number of speeches were made by leading members of the trade.

Coldwell's Imperial Lawn Settee.

Thomas Coldwell, president of the Coldwell Lawn Mower Co., Newburgh, N. Y., is always busy in devising some new invention for the good of mankind. His latest in this line, which has just been placed upon the market, has a two-fold object: It gives comfort to the users, and enables the Hardwareman to add Lawn Settees to his stock. The new points for the comfort of men are readily seen from a glance at the accompanying illustration. The awning, which always accompanies the Settee, can be used in the various shapes here shown, and its advantages are obvious without explanation. The great point, however, about this Settee that will interest is the fact that an article has at last been made that can be shipped and stored in compact form, and put together or taken apart by anyone in one minute's time, without the use of a single screw or bolt. In description of this new article and its uses, the Newburgh *Register* says: "Thomas Coldwell and William H. Coldwell to-day received word from their Washington agent to the effect that a patent had been granted on their new Lawn Settee and Canopy. The fact that the application has been less than a month in going through, shows there was but little trouble in securing it, consequently very few articles combined the features used. The ordinary lawn settee is an unwieldy, heavy affair, and the awning is usually a separate and distinct article. The Coldwell Settee is solid, substantial, light and convenient. It is made of frame, slats and iron, with an adjustable canopy or awning attachment. There isn't a screw, nail nor bolt used in putting it together, it can be taken apart and packed in compact form for shipment to seaside or mountain. The advance orders before the article is placed on the market are already in excess of the stock manufactured and three times as great as it was thought the sales would be for the entire first year. The beauty of this Settee, combined with its cheapness and convenience in handling, is certain to make it a quick seller." In detailed explanation, the company say: "This Settee is made to meet the demand for a cheap and durable Settee for the lawn, croquet ground and tennis court. It is so constructed that it can be taken apart or set up in a minute, without the use of a single screw or bolt. Hence is very convenient for either storing or shipping. It is light and can be easily moved about. The parts are interchangeable, and when put together it is perfectly rigid. The Adjustable Canopy is a new and novel device, and can be instantly changed and locked in any position to shield from the sun. The frame is made of hard wood and steel. The whole structure is made of the best material. The iron work is japanned in black, and will not be affected by the weather. The wood work is painted red, and it will be an ornament to any lawn. Sold with or without the canopy." Price: 4-foot Settee and Canopy, $8; 4-foot Settee separate, $4; 6-foot Settee and Canopy, $12; 6-foot Settee separate, $6.

Orders for a great many of these Settees have already been received from the Hardware trade. The Coldwell Lawn Mower Co. will be pleased to send discounts, etc., to any who are interested.

"Hop's" Corner.

In an old copy of the New York *Herald* dated May 7, 1842, I came across the following advertisement:

CHEAP HARDWARE STORE.

The subscriber is now opening his spring supply of

HARDWARE AND CUTLERY,

received per late arrival from Birmingham and Sheffield. Together with a general assortment of Domestic Goods which he is prepared to offer at the very

LOWEST CASH PRICES.

The attention of Country Merchants, Builders, Cabinet Makers, etc. is solicited to an examination of his stock and prices, and he is confident they will find it to their interest to favor him with a call.

ALFRED F. LAGRAVE,
210 Greenwich, cor. Barclay, New York.

A regular supply of FALL RIVER CUT NAILS and Cooper's Glue. Also a complete assortment of Mechanics' Tools, James' Screws, etc.

When the writer lived at No. 83 Barclay Street, in 1848, Mr. Lagrave had the above store and it was the most pretentious on the street. Almost everything kept in a Hardware stock was imported. Files, horse-shoe nails, screws, cast butts, padlocks, etc., and many of these goods were fearful and wonderful to behold, but they were "English, you know."

Many a store in the Hardware business, and possibly any other business, has among its corps of "workers," some flippant "fresh" specimen of a clerk, who, while the head of the firm is around, seems to be the quintessence of industry and application, and when not followed up too closely makes an ordinary customer believe he "owns the whole bakery" by the cavalier manner in which he replies to any out-of-the-way questions for information; or goes through the form of entering a small order. He is always sedulously careful to quit work promptly on the hour for closing, and ditto as to going to lunch; but is not so methodical or careful as to getting to work in the morning or returning from lunch at noon. He usually has an engagement when asked to stay until nine in the evening, even with a liberal allowance of supper money, and time enough to eat the meal. He sometimes wonders why he does not progress faster in the scale of emolument, and yet he could lay his hand upon his heart and frankly confess he never to his recollection saved the house he represents a single cent by any economy in methods, any force of character in handling trade, or any knowledge of human nature in the treatment of customers, repelling more by a lack of finesse, than he gains by any painstaking endeavor to please. Why is such a specimen kept on hand any how, even if his pay is nominal?

A clerk should himself enthuse over his line of work, and actually feel an interest in his vocation, and necessarily show some love for the consequent labor inseparably connected with a successful prosecution of his employment. If he doesn't do this, how can he expect to enthuse a customer as to the merits of the article he desires to sell? He should acquaint himself with the weak points of his competitor's specialty, and know the special features which make his own in his eyes surpass the other in selling points. Then, with push and perseverence he may accomplish the desired result.

Review of the Markets.

Financial: The slight change made by the issue of bonds on the New York market has passed away. The supply of money is not so large as it was some time ago, but there is enough for all demands. Commercial paper brings 3@4 per cent. Time money is 2@3½ per cent. for short and 3½@5 per cent. for long dates. Call money is 1½ @ 2 per cent.

Hardware: There is no doubt that the market shows signs of steady improvement. Many manufacturers state that their sales are a good deal in advance of the sales for the corresponding months of 1894. Most orders are by mail. Trade will assuredly be better when the fruits of the traveler's efforts have time to be more generally felt.

In Boston the Pig Iron market has been dull of late, a state of affairs ascribed to the peculiar inclemency of the weather this year. Stocks are very low, but prices do not respond. Old iron is quiet with but few buyers. The bar mills in New England are ignoring the middle men, and placing their large orders direct. There has been much cutting in the prices of Swedish iron, that on the market being quoted at $50 for bars. Some good plums in structural iron have fallen into the hands of the large concerns of the country. Nine hundred tons of steel for the Devonshire building has been let to the Norton Iron Works, and the iron for the large Tremont building goes to Carnegie & Co. There are other large contracts yet to be made, and reports from other cities report that a large building of tall houses will be built here this spring.

Clapp & Co., bankers and brokers, New York, in their latest weekly letter speak as follows: "Straws.—The output of steel rails in 1894 is reported as 1,014,034 tons, or about 10% less that the previous year. Of Bessemer steel ingots 3,579,101 gross tons, or about 12% more than in 1893. Birmingham, Ala., claims cost of making iron is $6.50 per ton. 36,897 patents were applied for in the United States in 1894, and 20,803 were granted. Patent office earnings were $87,392 more than the expense account. Out of 12,690,152 families in the United States in 1890 about 47.80% own their own homes, and about 5,500,000 or 6,000,000 occupy farm homes. About ¼ of all our exports come from the farmers. Pennsylvania claims her railroads represent one-fifth of the capitalization of the United States system, or about $2,000,000,000. Great Britain sent the United States 326,879 tons tin plate in 1894 against 255,583 tons in 1893, and 325,145 tons in 1891."

Cut Nails: The tone of the Cut Nail market shows improvement, and the prices that are ruling now will be held firm. The trade is expected to pick up even more as it feels the added stimulus of the spring business. There have been more building permits granted in New York this early in the year than for a long time past, and this must necessarily help the trade. Two large concerns are idle, one in the hands of a receiver, the other destroyed by fire, which causes a shortage in the market and gives the other mills more work. The cut nail manufacturers have no organization, and it is consequently harder to maintain prices. The ruling prices are: for car-load lots at mill, 75 cents; car-load lots on dock, 80 to 85 cents; small lots at store, 90 cents to $1.00.

Wire Nails: There is a large demand for wire nails, and a better one is expected. Two large wire nail factories are idle and not expected to resume for some time. This creates a shortage of from 100,000 to 150,000 kegs per month, and as a natural result the other mills have a chance to make up the deficiency. Ninety cents is the price on carload lots at mill, and 92½ to 95 cents for large lots f.o.b. Prices are firm.

Cutlery: There is a fair trade in domestic cutlery, especially so in the West. Numerous orders are on the books for future delivery. The import trade is still dull.

Nuts and Bolts: A meeting of nut and bolt manufacturers to decide the discounts on the list of February 14th, was held in Cleveland, February 20th. An agreement was reached. A series of discounts were applied without regard to quantity. Most of the large manufacturers were represented. The following discounts have been adopted by the New York dealers:

Common Carriage Bolts	70 and 10%
Machine Bolts	75%
Coach and Lag Screws	80 and 10%
Bolt Ends	80%

Locks: Nothing new can be said about locks. Trade is very dull.

Skates: Roller skates have the call, now that winter is almost over. The roller skating craze seems to have taken a new lease on life. Sales are large. One large firm alone are 20,000 pairs behind on their orders.

Blocks: The block trade is in a somewhat demoralized condition, owing to the keen rivalry existing between some of the manufacturers. Prices are not fixed.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Copper.	
Lake, ingot ₩ ℔	10½
Arizona & Baltimore Cast'g	10½
Ansonia "A" Casting	10¼

Do. 20x28	9.10
D. R. D. grade, 14x20	4¼
Do. 20x28	8½

White Lead: The movement in this line has been rather limited in prompt delivery, but for forward there has been considerable done in lead in oil at prices agreed upon by the various corroders at their meeting held in December last. English lead in oil, while not active, is selling fairly well at 6½@7 cents for "old brands," as to quantity. Other makes, however, are procurable at 5½@5¾ cents, as to make and quantity.

Red Lead: Affairs have been quiet, only small jobbing orders being received to meet current wants, but few inquiries are being made for future shipments of German, for which they are quoting 4¾@5 cents, as to make, quantity and date of delivery. Store parcels are held at 4⅞@5¼ cents, as to the size of the order. Domestic is meeting with the usual demand incident to this period of the year, at prices ranging from 4½@4¾ cents, as to quantity, less the usual discount.

Litharge: The usual jobbing demand of the season prevails from the glass trade, but beyond this there is very little interest shown in this article. Values remain steady at 4¼@4⅜ cents, as to section and quantity, less the usual discount.

Zinc: Values remain unchanged for jobbing parcels at 3¾@4 cents, as to quality and quantity. German is dull at 4½ cents, nominally, while French is meeting with the usual seasonable demand at 5¼ cents, and upwards, as to the size of the order.

Linseed Oil: There has been no change in market conditions, and unless there is a considerable improvement in the consuming demand there is no likelihood of a change.

Window Glass: The market is yet unsettled. Prices favor the buyer. Locally, discounts of 85 and 10 to 85 and 20 per cent. from the old list, are quoted on American sheet by second hands.

Plate Glass: Trade is slow and prices more or less nominal, the quoted discounts are 70 per cent. on sizes 5 feet or over, and 75 per cent. on smaller plates.

WITH APOLOGIES TO CHAS. KINGSLEY

(And the Reader.)

Three Drummers went drumming into the West,
(Out into the West as the sun went down,)
Each drummed for the firm which paid him best,
(And their names were Robinson, Jones and Brown.)
Now Robinson drummed for the Smashem Bros.,
And Jones quoted prices on Lumber,
But Brown he knew
A thing or two,
And drummed like fun for the Humber (American).

Three buyers sat each in his easy chair
(With a smile on his face as the sun went down,)
For each had been drummed by the Debonair
(By the festive Robinson, Jones and Brown.)
But Robinson drumming failed to win,
Though fibs he told without number,
And Jones the sinner
Thought he was the winner,
Till Brown sold each Buyer the Humber (American).

Send for Catalogue and learn how he did it.

Humber & Co., America, Ltd., 318 Broadway, New York.

THE PHILADELPHIA TRADE.

The spring opens amid profound congratulations from all parts of the country that Congress has adjourned, and that once more the country is free to breathe.

The exhibition we have had of meddlesome incompetency ought to be enough for a generation, and if the Anarchist's prayer is that he may be saved from law-making legislators, we have a more hearty sympathy for Anarchists than ever before.

Now we hope that business will show signs of improvement; already it is beginning to take a more healthful look, although the depressing weather so far has retarded actual business improvement. Mail orders are once more making their appearance, which is as healthful a sign as crocuses in spring, and salesmen are finding more heart for their work.

Prices still lack firmness, although the dry bones are beginning to shake, and efforts are being made for higher prices, which are bound to come with the first improvement of business. Screws seem to occupy the first place in the minds of the public, owing to the unfortunate and unnecessary fight now being carried on by the manufacturers; the war is getting so hot, that it bids fair to be a short and merry one, when prices will be advanced to paying figures.

Wire Nails are being quoted at higher figures, and manufacturers refer to the shortage of 150,000 kegs per month as evidence that prices will be higher by April 1st. Raw material has also advanced, and we know of a case this week where a Wire Nail manufacturer bought 50 tons of Spelter at an advance of 50 cents a ton over his last purchase; of course, one swallow does not make a summer, but all these signs are healthful, and we trust with the darkey "Ther's a good time a-comin." BIDDLE HARDWARE CO.

THE GRAPHITE TRADE.

It would doubtless surprise many of your readers to learn of the numberless industries dependent in a greater or less degree upon Graphite in its various forms, as perfected by

BICYCLE LAMPS AT POPULAR PRICES.

Circle.—Glass, 2¼ inch; Oil capacity, 9 hours; Self-adjusting Socket; Rubber Joints; Detachable Oil Tanks. Weight, 8½ oz. **Price, Enameled, $1.00.**

Cyclight.—No. 57, L. Lens, 2¼ in., Enameled. **Price, $1.60.**
No. 57, Plain Glass, 2¼ in., Enameled. **Price, $1.10.**
Wick, ¾ in.; Oil capacity, 7 hours; Weight, 12 oz.

Jupiter.—No. 57, D. Lens, 2¼ inches, Enameled. **Price, $2.00.**
Wick, ¾ inch; Oil capacity, 9 hours; Weight, 12 oz.

The Milo at $3.00; Bell Rock, No. 0, at $4.00; Bell Rock, No. 43, at $5.00, and Lito, at $6.00, complete the line. They are made by H. MILLER & CO., of England, who are the largest cycle lamp makers in the world. Send for special lamp catalogue.

A. M. SCHEFFEY & CO., - Sole U. S. Agents, - 92 Reade Street, New York.

Digitized by Google

this company. Shot polishing, powder glazing, hat making, smelting and assaying, steel casting, electrical devices, foundries, type-setting machinery, electrotyping, lace making, rubber manufacturing, the lubrication of heavy machinery and bearings, preserving wire ropes and cables, iron work, wood work and roofing, stock for stationers, Hardware dealers, painters, lumbermen and general stores.

The list is a long one, and is only touched upon to give a general idea of the sensitiveness of the Graphite industry to the rise and depression of the business of the country. Sales for February show a widespread improvement in nearly every mentioned business, and naturally to our advantage. Leaders are Crucibles, Pencils and Stove Polish.

If office work is any indication of better times, we have not for years had the mass of correspondence and detail work now overflowing us. Collections are easy. March should be what the boys call "a corker."

JOSEPH DIXON CRUCIBLE CO.

THE ST. LOUIS TRADE.

With the opening of spring in the West business in Hardware is now looking better and bids fair to equal if not surpass the trade for the same month of 1894. The volume of business is greater during the last two weeks, although the values are less. St. Louis is shipping as much Hardware, if not more, than any city in the West. There is nothing new to report in the way of advances on Iron goods with the exception of the revised list on Carriage Bolts, Lag Screws and Machine Bolts, which list has generally been adopted by all jobbers, both in general and heavy Hardware. Building Hardware is now in active demand, and specifications for future building are extremely active. While we do not look for any boom, we think there will be an increasing demand for goods.

A. F. SHAPLEIGH HARDWARE CO.

Two electrical men hailing respectively from New York and Providence, R. I., have opened large ware rooms in Boston, Mass., for the exposition of electrical devices for regulating heat of furnaces. Mark off the desired range of temperature and apply the device to the dampers, then go away assured that you will not catch cold, or be gradually toasted, two extremes quite common in our day.

A trip of inspection was made February 23rd through the works of the National Rubber Co., at Bristol, R. I., by Joseph Banigan, president of the United States Rubber Co., and Samuel P. Colt, a prominent stockholder and official of the former company. They were accompanied by the master mechanic of the United States Co.

The Buckeye Churn Co., Sidney, Ohio, announce that the Buckeye Churn "is the best and the easiest churn on the market to work; churns by concussion, the only principle for granular butter, open air vent, allowing escape of gas and ventilation without stopping to pull a cork." Catalogue and prices will be furnished.

The new Hardware store of D. B. Baker, Washington, Pa., is a model one, containing a first-class line of fancy, general and builders' Hardware, house-furnishing goods, stoves, harness and farm implements. Mr. Baker is a clever gentleman, good business man, and well merits success.

Large quantities of swamp maple, birch and other sorts of wood grown in southeastern Massachusetts, are burned into charcoal and sold to jewelers and manufacturers of light metal work. Three cords of wood make one hundred bushels of charcoal.

Mrs. Newbride—in Hardware store—"My husband told me to price your lawn mowers, but lawn seems so cheap and common; haven't you got anything in silk or satin?"

GOOD VARNISH costs money.

Campbell's "Safety Cement."

The Hugh Campbell Co., No. 45 Union Street, Boston, Mass., are putting up a Rubber Cement for the bicycle and Hardware trade for which they claim the following points: "Easy to apply; quick to dry; sure to mend; can be depended upon to do the most difficult rubber tire repairing; is also adapted for repairing hot water bottles, rubber syringes, rubber coats, boots, etc. The Cement, together with materials for mending, is put up in neat and attractive show boxes; the first Cement for the bicycle and Hardware trade ever displayed in this manner. The trade will find it a ready seller."

At the annual meeting of the Marshall-Wells Hardware Co., Duluth, Minn., the following officers were elected: President, A. M. Marshall; vice-president, Benj. E. Wells; secretary, F. W. Parsons; treasurer, A. H. Comstock; manager, Thomas McNaught. The annual reports were received and the showing proved satisfactory.

On Hudson Street there is a little shop the proprietor of which is either a merry wag or a person who has perpetrated a little joke without being aware. He has a card in the show window on which is written: "Lamps, Lamp Burners and Other Light Hardware."—*Mail and Express.*

Galvanized Before and After Weaving.

The Gilbert & Bennett Mfg., New York, Chicago and Georgetown, Conn., are sending their friends neat little cards bearing samples of Netting, one of which shows it galvanized before weaving, and the other galvanized after weaving. In explanation of the sample first named they say: "This piece of Netting, galvanized before weaving, was made at a Chicago factory. It was exposed in the atmosphere in Lawrence, Kan., about two years." Of the second they say: "This piece of Netting, galvanized after weaving, was made by Gilbert, Bennett & Co. It was constantly exposed to the atmosphere in Redding, Conn., over twenty-five years. All the wire in the piece was as well protected as this sample. These samples show the relative durability in any section of the country. All 'G. & B.' Netting galvanized after weaving is galvanized by the same process as was employed in coating the lower sample." It will be remembered that Gilbert, Bennett & Co., now the Gilbert & Bennett Mfg. Co., were the first manufacturers of Wire Netting in this country; they embarked in this line back in the sixties and soon realized the importance of offering a durable fabric in order to make any progress with the business. In those days the comparison between the cost of wood slats and wire netting was invariably considered. "Almost everyone scoffed at the idea that wire netting would become a regular article of merchandise with the Hardware trade, as the greater cost would deter the public from generally using it; in fact, as the demand was so limited it was a number of years before any other concern entered the field as manufacturers. To offset the lesser cost of wood, Gilbert, Bennett & Co. undertook to make a fabric of proportionately greater durability, so that in the end they could offer a fencing that would not only be better in every way, but would prove more economical. Galvanized wire was at first used and did not prove more durable than at the present time. Afterwards they accomplished the end desired by perfecting a process for galvanizing the fabric, which deposited a heavy coating of zinc on the wires after they were twisted, and at the same time did not detract from the original strength. This process is exclusively used by the company to-day. The sample shown was taken from a piece of netting made soon after the firm commenced manufacturing netting by this process and demonstrates its superiority and the extraordinary durability of the goods. Probably if the public had not discovered from experience that 'G. & B.' poultry netting was so much more durable and consequently economical than wood, the consumption would not have increased to such an extent. There are several hundred bales made now to one, twenty or twenty-five years ago." The company say: "One reason for the greater durability of netting galvanized after weaving is found in the fact that the amount of zinc applied is so much greater, namely, 17½ per cent., while that on the wire galvanized before weaving is only 3 per cent. Also by galvanizing after weaving the wires are soldered, which increases the strength of the fabric. Anyone not familiar with the two kinds can readily conclude whether netting is galvanized before or after weaving by noticing whether or not the wires are bound together with zinc where twisted."

Edward G. Shepard, builders' and general Hardware, has removed to No. 107 Chambers Street and No. 91 Reade Street, New York.

Dover, Del.—T. K. Jones & Bro., manufacturers of and dealers in Hardware, stoves, mechanics' tools, etc., have this seasoa added bicycles to their line of goods.

Elberton, Pa.—Bewley Hardware Co., contemplating opening a bicycle department, and would accept agency for a medium priced wheel. Correspondence with manufacturers of wheels and sundries invited.

Reidsville, N. C.—Denny Bros., Hardware, etc., will handle bicycles. Propositions from manufacturers are solicited.

Eureka Springs, Ark.—J. W. Newthorp, Hardware, bicycles, etc., new store opened. Correspondence invited with manufacturers of bicycle sundries.

Fort Gaines, Ga.—A. S. Brown, Hardware, will take up bicycles. Correspondence with manufacturers of wheels and sundries solicited.

Fulton, N. Y.—C. B. Rice & Co., bicycle manufacturers of Oswego, N. Y., reported to be considering the advisability of establishing a bicycle factory in Fulton. The firm report orders booked amounting to $20,000, and say they must have additional facilities.

Glens Falls, N. Y.—A. A. Budd & Sons have reopened their bicycle store with a stock of one hundred wheels.

Grand Rapids, Mich.—The Cyclone Cycle Co. has been incorporated by George C. Fitch, Ensley Martin, J. C. Simons and others. Capital stock $25,000.

Hagerstown, Md.—Railway Cycle Mfg. Co. has been incorporated by Charles H. Hartley and others. Capital stock $5000.

Indianapolis, Ind.—C. E. Johnson, who recently invented a keyless, chainless bicycle lock, is reported to be organizing a company for the purpose of manufacturing the same. He may be addressed care of Western Union Telegraph Co.

Indianapolis, Ind.—The Hay & Willits Mfg. Co., C. C. Tuttle, formerly captain of the Zig Zag Cycle Club, has taken charge of the retail department. The firm is interested in the forwarding of a local cycle show during the month of March.

Jacksonville, Ill.—John W. Hall & Son, carriages and farm machinery, have entered the bicycle business, and will carry the Rambler, Stearns, Victor and Waverley, besides a line of cheaper grades. The firm will also handle sundries, and will conduct a repairing department. Irving Woods will have charge of the firm's entire bicycle business.

Lumberton, N. C.—W. W. McDiarmid, will accept agency for good bicycle. Correspondence with manufacturers invited.

Martinsville, Ind.—W. N. Olney & Co., Hardware, new store opened. Will take up bicycles.

Mooresville, N. C.—R. H. Tomlinson, Hardware, etc., is investigating with a view of adding bicycles. Invites correspondence with manufacturers.

New Bedford, Mass.—Hoyle & Smith have opened new bicycle store in the Emerson building, on Union Street.

New York, N. Y.—L. C. Jandorf & Co. have opened a new uptown bicycle emporium, at Nos. 1799 and 1711 Broadway, corner 54th Street. A formal opening of the place was recently celebrated, and a crowd of old customers was present. The firm will keep in stock wheels intended only for the fine trade, including Warwicks, Peerless Triangles and Linwoods.

New York, N. Y.—The Ringlette Bicycle Alarm Co., incorporated by Thomas G. Medinger of New York City, Henry E. Murphy, Wm. J. Hogan and Wm. Force of Brooklyn, and James H. Beatty of Hackensack, N. J. Capital stock $30,000.

Southville, Mass.—M. R. Clark, bicycles, is erecting a new building and will do a repair business.

Winston, N. C.—Wall & Huske, Hardware, are preparing to handle bicycles. Want prices and particulars from manufacturers of bicycles and bicycle sundries.

Syracuse, N. Y.—The Cullman Tubular Hub Co. have incorporated, with Otto Cullman, Harris S. Van Wagenen and Alfred Wilkinson as directors, to manufacture bicycles, wheels, etc. Capital stock $25,000, divided into 250 shares.

Syracuse, N. Y.—C. Edward Wood has severed his connection with the firm of W. H. Wood & Son, and will go into the bicycle business. Correspondence with manufacturers of bicycles and bicycle sundries invited.

Washington, D. C.—The Cyclone Combination Cycle Co., new office opened at 610 F Street, G. F. Smith and Paul Von Boeckman in charge.

Washington, D. C.—The Enterprise Cycle Co., new firm, commenced business at No. 908 New York Avenue. The firm is composed of G. W. Ribble and L. K. Miller, formerly with F. S. Cahill & Co. They will carry the Syracuse wheel.

Westboro, Mass.—Humber & Co., the English corporation which recently acquired control of the Westboro Cycle Co.'s plant, and which it is said have a capital of $375,000 have made extensive additions to the plant, and work has been resumed.

Westboro, Mass.—Humber & Co., bicycle manufacturers, general offices and headquarters established at No. 318 Broadway, New York City, with Elliott Burris as general manager.

New Goods and Improvements.

New York, N. Y.—The Bridgeport Gun Implement Co., No. 313½ Broadway, are introducing a new bicycle stand.

Unadilla, N. Y.—The Unadilla Tie Co. are introducing an improved bicycle luggage carrier.

Worcester, Mass.—J. J. Warren Co. are putting on the market a new leather tool bag for bicycles.

Changes and Removals.

Berryville, Ark.—W. R. Hamilton & Co., Hardware, bicycles, etc., have succeeded W. R. Hamilton.

Farmersburg, Ind.—James Branson, Hardware, bicycles, etc., has been succeeded by Branson & Renshaw.

Grand Rapids, Mich.—Cycloid Wheel Co., manufacturers of bicycles, reported as having gone out of business.

Philadelphia, Pa.—Kennedy & Curtis, sporting goods, succeeded by Geo. S. Kennedy.

Miscellaneous.

Newark, N. J.—S. Rose, Nos. 13 and 15 Franklin Street, is offering for sale a plant for the manufacture of bicycle sundries. Also a large stock of goods made up ready for market. The reason assigned for selling is sickness, and the price offered is $1200. The enterprise is protected by patented machinery and tools, all of which are reported to be new, and in good condition.

When selecting a bicycle to represent during the coming season, consider ultimate results.

The "DORSETT" is here to stay. It represents every feature of the best wheels on the market with added points of novelty and merit that are bound to make it a "seller."

Interchangeable methods of cycle propulsion presented in the simplest and most efficient mechanical constructions, and perfectly independent of one another.

With the principles exhibited in a practical manner, and construction "special" in every part, the "DORSETT" represents the highest perfection in the art of bicycle making.

Send for catalogue which tells you all about details.

PLACE

THE MATTER

CLEARLY.

To make a man realize an idea as you realize it, is what is necessary to make him understand his needs. Advertisements should aim to place a matter so clearly before the public that they see it as clearly as the advertiser does.

A Good Article Will Always Sell

THE above fact has been thoroughly demonstrated by the large sales on the "Perfection Elevator and Purifying Pump" in the last eighteen months, when every other business almost has been at a standstill.

The prospects for a booming trade on the **"Perfection"** for the coming season were never better.

"The proof of the pudding is the eating." Our proof of the "Perfection" is the orders we now have on our books for Spring delivery. Dealers place your orders at once for shipment in the next ninety days, to avoid delay in getting your orders filled promptly, and sell the best pump in the world. If you don't believe it, write us for our illustrated catalogue and book on pure water, which contains hundreds of testimonials from the best dealers in the United States.

We have made another improvement in our D. G. Fixture, as well as our new combination spout and receiver of cast iron. Our guarantee to purify the foulest well or cistern in ten days use, always stands good.

We are also manufacturing a new irrigation pump with capacity of one hundred to two thousand gallons per minute. Address us for prices. Mention this paper.

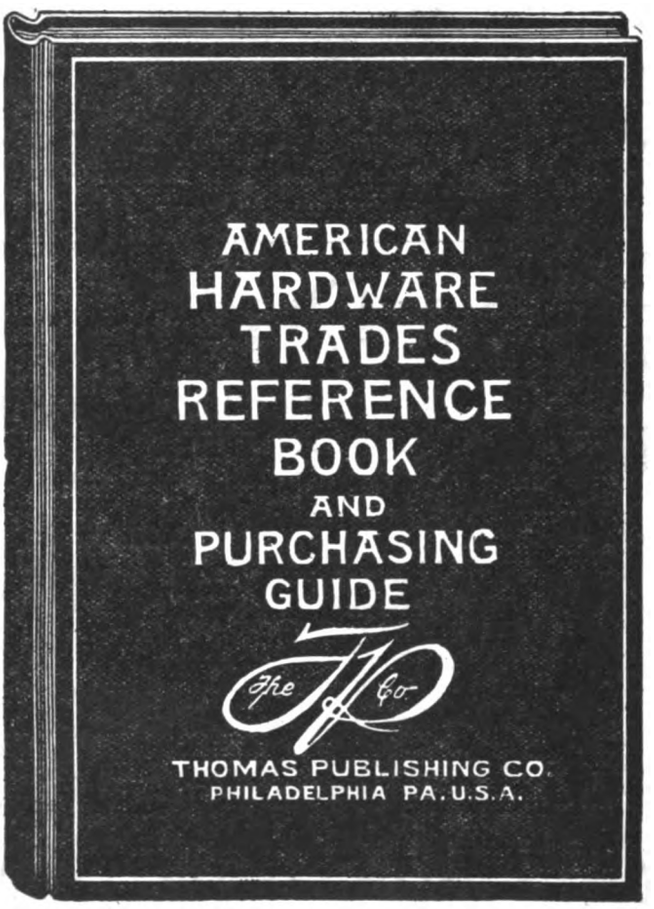
Every Dealer can save a hundred times its cost by using it.



REFERENCE BOOK

FOR HARDWARE DEALERS.

To enable them to purchase to the BEST advantage.

The Names of all the Manufacturers, over 15,000, with the Financial Rating of each, including all in the U. S. & Canada of

HARDWARE of all kinds, **IRON & STEEL** of every kind, **TOOLS** of all kinds, **HOUSE-FURNISHING GOODS** of every description, **STOVES, RANGES, HEATERS,** and all kinds of

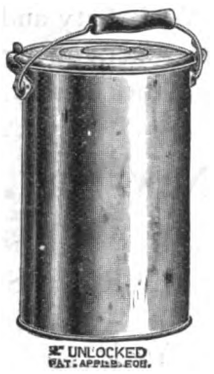
COOKING APPARATUS, and **UTENSILS, AGRICULTURAL IMPLEMENTS, MACHINES** and **TOOLS,** of every Description, and all other articles handled by the trade.

Cloth Bound, six times size of cut.

THE USE OF THE BOOK.

THE book is minutely classified by an alphabetically arranged index, naming every article handled by these trades. For instance: If you wish to find all the manufacturers of wire fence, you turn to "Wire Fence" in the alphabetical index and it will show you all the manufacturers of wire fence in the United States and Canada, arranged alphabetically by States, and the amount of capital invested by each in the business, showing which is the largest, etc. If you desire to know who makes the "Eureka" brand of fencing, you can find it in the same way. The same applies to every article and every special kind or brand of article handled by these trades.

A subscription to the book includes the free use of our library of Directories, Reference Books, Catalogues, etc., for any information desired.



For Sale by the Hardware Publishing Co., 148 Chambers St., New York.

Price $5.00, Express prepaid to any part of the U. S.

Also, Directories of Hardware Implements and Sporting Goods Dealers of the U. S. and Canada, with ratings.

BOSTON RAISIN SEEDER.

THE ONLY PERFECT RAISIN SEEDER.

The objection to the Seeders upon the market has been, they either took too much of the pulp or did not seed the raisin thoroughly. In placing this Seeder on the market we have obviated these defects, and have produced one that is perfect in every respect and which, with a little practice, will seed a pound of raisins in ten minutes.

Retail price 25 cents. Special price to the trade.

Manufactured by

Geo. H. Mason & Co., 152 Blackstone St., Boston, Mass.

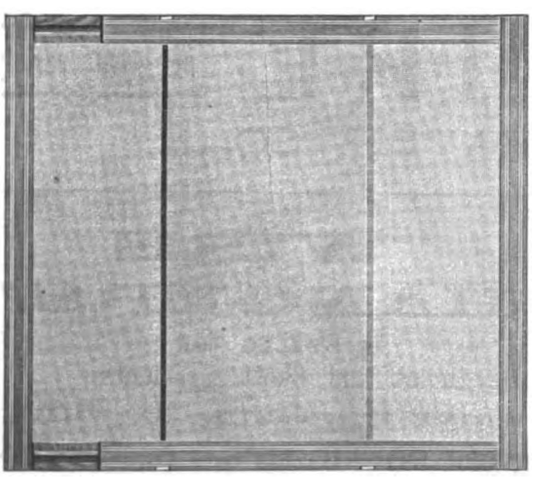
Facts of Interest to the Public.

Our PROCESS for 1895, is the MOST PERFECT WORKING and MOST DURABLE PROCESS EVER PLACED ON THE MARKET, and HAS NO EQUAL.

In calling attention to the

"NEW GEM"



we offer the trade a stove FOR the PEOPLE and for the TIMES, CONVENIENT IN SIZE, with the same FLAME as the PROCESS, and will do the same amount of work with LESS FLUID. The original cost is only about ONE HALF that of the regular high stoves, and is MADE ONLY BY US. For further particulars address

THE DANGLER STOVE & MFG. CO., - CLEVELAND, OHIO.

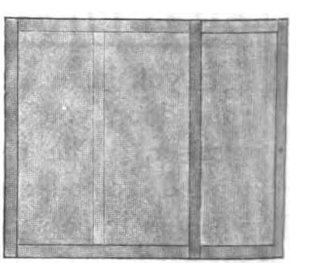
PHILLIPS' AIR STRAINERS

THE FLYER.

Are Reliable!

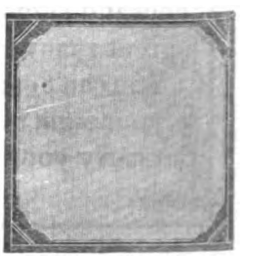


CLEAN CUT, HANDSOME SALABLE PATTERNS IN DOORS AND WINDOW SCREENS.

BONANZA.

Nice wholesome goods, well made from good materials.

Retailers of Phillips' Screens will be furnished with large cloth signs reading: "HEADQUARTERS FOR FLY SCREENS! Wire Stock, Spring Hinges, and Screw Hardware, etc."



EXTENSION.

If your jobber tells you something else is just as good as "THE PHILLIPS," ask him why he bought the "substitute." If he tells you the truth, he will say (in most cases): "Why, our folks could buy the other screen (which is just as good) for half a cent apiece cheaper." This brings out two more questions:

"Why did the other fellow offer his screen half a cent less than Phillips?" and "Does half a cent cut any figure unless you are *certain* the other goods are equally salable?"

The jobbers who handle Phillips' goods are those who make a specialty of handling first-class goods in other lines.

SCREEN FRAMES.

Write for picture and description of "New Northwest Window Screen Frames."

The A. J. PHILLIPS CO., FENTON, MICH.

THE MILLER OIL HEATERS.

Just the Thing for All Time and Every Day Use. For Spring, Summer, Autumn and Winter.

No Disagreeable Odor. No Ashes. Light and Heat in Abundance.

No. 327. No. 3 Lift Burner.

Height, 23½ inches. Spread of Base, 12½ inches. Nickel Finish.

They are an Assured Success, from the fact that the Lamps used are "The Miller Lamps." THE LATEST AND BEST.

IN THESE HEATERS YOU HAVE A HAPPY COMBINATION: The Best Light. The Best Parlor Heater. The Best Cook Stove.

They are Clean and Odorless. Require no more care than an ordinary lamp. Cylinders of Russia Iron, with Removable Nickel Tops, or with Combination Heating Drum and Grate for Cooking. The No. 3 BURNERS have a FLAME OF 15 SOLID INCHES. "MILLER" HEATERS have outside SCREW ADJUSTMENT for regulating the Wick and PLUNGE MOVEMENT FOR EXTINGUISHING; each one is supplied with an extra Flame Spreader so that Lamp can be used for ILLUMINATING when not wanted as a Heater. All of the Best Material and Workmanship.

They will heat a large room perfectly. A tea kettle of water heated in a few minutes by removing canopy.

Perfectly Safe. They Cannot Explode. Oil Never Gets Hot in the "Miller" Heater. A Good Companion for a Cosy Nook. A Comfort on a Chilly Morning.

READY TO LIGHT, WITHOUT REMOVING CHIMNEY.

A MOST IMPORTANT FEATURE.

☞ All the weight of the Cylinder rests solidly on the FOUNT and not on the BURNER in these Heaters.

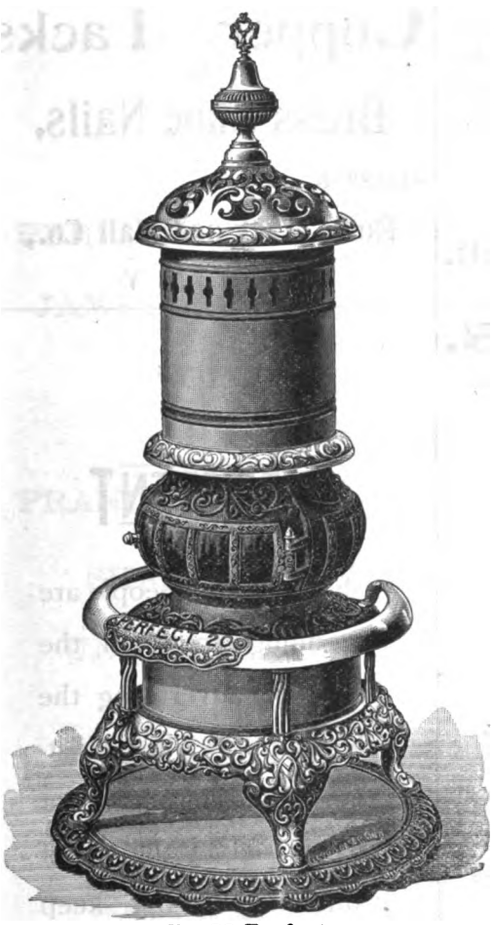
In IMITATIONS of these Heaters the Cylinder is supported on the BURNER, a CHEAP and WEAK CONTRIVANCE, which makes it necessary to REMOVE THE CYLINDER for lighting and which renders it impossible or very dangerous to use the Heater for cooking purposes.

Send for circular showing Heaters with ovens for cooking. We have 12 varieties.

These Lamps hold One Gallon of Oil. Will Burn 12 hours. Easily Lighted by Lifting Top of Burner.

MANUFACTURED BY

EDWARD MILLER & CO., MERIDEN, CONN., United States of America.



NEW YORK STORE: 10 & 12 College Place and 66 Park Place. BOSTON STORE: 63 Pearl Street. CHICAGO STORE: Rooms 808 and 809 Masonic Temple.

No. 328. No. 3 Lift Burner.

Height, 32 inches. Spread of Feet, 11¾ inches. Russia Iron with Nickel Lamp and Trimmings.

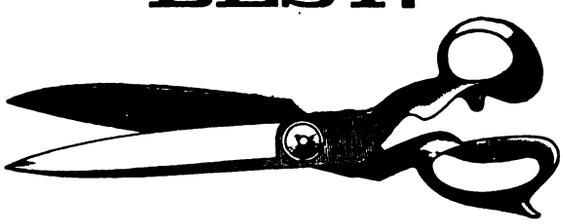
The Conroy patented New Automatic Refrigerator Door Fastener, with lock and key.

THIS FASTENER is the most complete one ever invented. The door will push to more easily with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order. By lifting the handle quarter circle the door will open, and if it sticks it will release it. It has a new and improved lock, absolutely secure. Made for flush or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental. MANUFACTURED BY

P. J. CONROY,
PHILADELPHIA PA.



Manufacturer of **Refrigerator and Ice House Fasteners Hinges and Faucets.**

THE HANDY STOVE POLISHING MITTEN.

The above illustration will give a fair idea of its appearance. It will easily fit the hand, has a waterproof back, and the whole front is made of durable and soft sheepskin, tanned with the wool on. By using the Stove Polishing Mitten, blacking a stove ceases to be dirty and disagreeable, it will make a stove shine like a mirror. The Mitten is also useful for polishing household furniture. It cannot scratch the most delicate material or varnish, while the finest possible polish can be rendered.

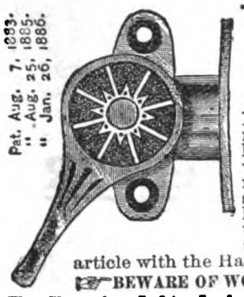
The Polishing Mitten can be put to many uses. Sells to almost every person you meet, always gives satisfaction. Among the uses which it may be put are:

Polishing Stoves, Ranges, etc., it has no equal.
Cleaning and Shining Windows, Show Cases, and other Glassware, the Mitten is highly satisfactory.
Polishing Nickel-Plated Ware, such as Bicycles, Machinery, etc., the Mitten is becoming more popular daily.
Polishing Boots and Shoes, the Mitten is as much superior to a brush as a brush is to a stick. Where once used it is "a joy forever."
Cleansing and Polishing Furniture, use the Mitten and Dauber. The results are always pleasing.
Polishing Brassware, Tinware, etc., the Mitten serves the purpose better than anything else.

Manufactured expressly for the trade. They sell fast wherever introduced to HARDWARE DEALERS.
We will quote you low prices and only ask a trial order. 2 kinds of mitten and dauber made, both kinds samples 30c. to Dealers.

HANDY STOVE MITTEN MANUFACTURING CO., 122 Pearl Street Boston, Mass.

NATIONAL LEAD COMPANY,



No. 1 Broadway, New York.

THE CHAMPION SIDE SASH LOCK

Has by its unequaled merits gained the public favor. It is a safe ventilator and prevents rattling. Is neat, cheap, simple and durable. It has been in extensive use for over eight years, and has become a staple article with the Hardware trade.

☞BEWARE OF WORTHLESS IMITATIONS.

The Champion Safety Lock Co., Cleveland, O.

PATENT PERFECTION PADLOCK.

Eight Tumblers. Key Turning Both Ways.

Size ¾ inch to 2½ inches, the larger sizes of cast bronze. Defies competition for quality and price. No steel or iron used, cannot rust, and cannot be picked. Also, ½ and ⅝ inch Padlocks, opened with a common pin, in brass and nickel, for cats and small dogs. The best Railroad Switch and Car Lock in the world. Adopted by the United States Treasury for bonded warehouses.

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded **ORANGE RIFLE EXTRA.**

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

LAFLIN & RAND POWDER CO., - **29 Murray Street, New York City.**

THE SCHULTZE SMOKELESS GUN POWDER CO. LTD.

OF

LONDON, ENGLAND,

BEG TO ANNOUNCE THAT THEY HAVE PLACED ON THE

American Market

Their First Shipment of

HARD GRAIN SMOKELESS SCHULTZE GUN POWDER

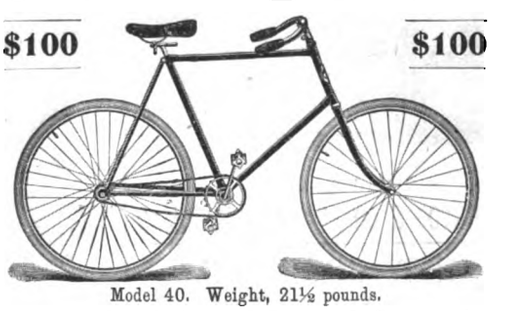
Which has been specially regulated in strength and moisture for the American climate.

In the manufacture of their **Hard Grain** powder they have embodied all the advantages that their long experience together with the latest modern improvements in powder making has shown to be **the very best.**

HARD GRAIN SMOKELESS SCHULTZE POWDER retains all the good qualities which have made **Smokeless Schultze Powder** famous all over the world, while its **hard flinty grain** and specially regulated moisture makes loading so easy that any amateur can now do so successfully

Variations in pressure on wads, or atmospheric conditions do not affect the shooting and loads may be varied as much as with black powder.

Hard Grain Smokeless Schultze is the most modern, the best of all smokeless powders, and excels any other Nitro powder in velocity, penetration, cleanliness, regularity and closeness of pattern.



Address all dealers, or the U. S. Agents

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

BABBITT METAL.

We make Babbitt and Anti-Friction Metals by standard formulas, and never vary the formula to fit the price. The result is that our Metals are always the same uniform high quality, and we hold our trade.

Save fuel, machinery, time and annoyance by using Babbitt or Anti-Friction Metal that is adapted to the particular Journal in which it is to be used. Friction means loss of power.

Get our pamphlet on Anti-Friction Metals.

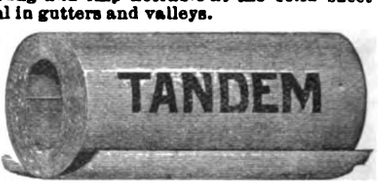
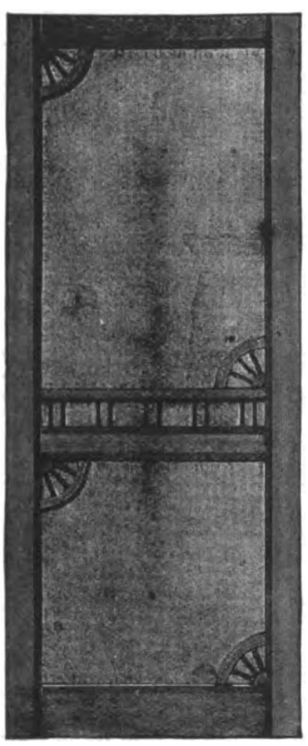
Continuous Roofing Tin.

CONSIDER EVERYTHING and see if you don't find it cheaper and better to use "TANDEM" than to use any other equal grade of roofing.



It is easier to lay than ordinary roofing and it makes a better roof.

Our "TANDEM" is made in sheets 20 and 28 inches wide and 96 inches long. The seams are locked together, end to end, making a straight continuous course containing 100 square feet. The seams are soaked on both sides during the coating process, and are as strong and impenetrable as the solid sheet Such courses are particularly useful in gutters and valleys.



It is ready to use the moment you unroll it. No re squaring, no trouble, no lost time, no waste tin. Every inch of it goes directly on the roof in absolutely straight courses.

It affords a saving of labor and solder. A square of it will cover more roof than a square of 20x28 loose sheets. These are the reasons why every roofer should use it.

There are other points worth considering: (1) While all the plates are full weight (I C thickness), the shipping weight of a square of "TANDEM" is less than that the same quantity of 20x28 sheets. (2) We can ship direct to where the goods are to be used. If you're working away from home this saves freight charges double handling, and time. If you care to know more about "TANDEM" CONTINUOUS ROOFING TIN write us. Prompt shipments can now be made.

A Good Article Will Always Sell

THE above fact has been thoroughly demonstrated by the large sales on the "Perfection Elevator and Purifying Pump" in the last eighteen months, when every other business almost has been at a standstill.

The prospects for a booming trade on the **"Perfection"** for the coming season were never better.

"The proof of the pudding is the eating." Our proof of the "Perfection" is the orders we now have on our books for Spring delivery. Dealers place your orders at once for shipment in the next ninety days, to avoid delay in getting your orders filled promptly, and sell the best pump in the world. If you don't believe it, write us for our illustrated catalogue and book on pure water, which contains hundreds of testimonials from the best dealers in the United States.

We have made another improvement in our D. G. Fixture, as well as our new combination spout and receiver of cast iron. Our guarantee to purify the foulest well or cistern in ten days use, always stands good.

We are also manufacturing a new irrigation pump with capacity of one hundred to two thousand gallons per minute. Address us for prices. Mention this paper.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE

AMERICAN WICK

Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

OHIO "WATER TIGHT"

STEEL MORTAR and BRICK HODS

OHIO "Water Tight" Steel Hods are from 25 to 50 per cent. lighter when in use than the common wooden Hod.

Ohio "Water Tight" Steel Hod bodies are positively Water Tight. These bodies are the only ones made, folded from a single piece of sheet steel without cutting the metal, are reinforced on the edges and at the dumping point By our special devised machinery we are enabled to furnish the strongest, lightest, most durable and only double end mortar and brick hods offered to the trade.

Our improved Malleable Iron Fork and Wooden Shoulder Saddle make it easier for the user to carry, or to attach a piece of cloth, should he so desire, to the under side of the saddle than the old style.

With our improved one piece Malleable Iron Fork and socket for holding the hardwood handle and taking up the shrinkage, a broken handle can be readily replaced, and hods shipped knocked down.

HARDWAREMEN'S EXCHANGE..... 90
CLASSIFIED INDEX TO ADVERTISERS..... 91
ALPHABETICAL INDEX TO ADVERTISERS..... 94

With this issue, HARDWARE completes its fifth year of service in the interests of the great trade it has the honor to represent. This fact will be commemorated in our Fifth Anniversary Number of April 10th, which will be both in circulation and size, the largest issue HARDWARE has yet had the pleasure of laying before the trade. It is needless to say anything here in regard to the success which has crowned these five years, as HARDWARE in each issue speaks for itself, and further evidence of that success will be shown in the birthday number above referred to.

A cheap and ingenious method of telephoning has been discovered in Victoria, Australia, namely, the ordinary wire fence. The rust which forms on the wire acts as an insulator, and protects it from the moisture. The long distance microphone transmitters, and dynamo call bells and receivers are used. This system has been operated perfectly over an intervening distance of twenty-eight miles.

As will be seen by the full presentation of the matter elsewhere, the Sportsmen's Exposition, which is to be held in the Madison Square Garden, New York, in the month of May, will be one of the greatest and most interesting exhibits of the kind ever shown in this or any other country. It will be an affair which will of itself prove a liberal education in the line of sporting goods, trophies of the chase, methods, appliances, etc., and the occasion is one that should excite the interested attention, not only of manufacturers and dealers in these lines, but of the general public as well.

The annual banquet of the New England Iron & Hardware Association welds another link in that strong chain of fraternity which is gradually binding the whole Hardware trade of this country into one compact mass of brotherhood. Through these Associations, and the annual gatherings which are becoming so frequent, the members of this trade are brought into close companionship, and the benefits are inestimable. The pathway over many difficult places is made easier and plainer by their mutual influence, while healthful competition is in nowise injured or retarded by their operation. Some entertaining things were said at this recent gathering in Boston, as will be seen by our full report in this issue.

The Voice of a Southern Hardwareman.

At the annual dinner of the New England Iron and Hardware Association, a full report of which may be found elsewhere in this issue, Major Edward Buford, of Nashville, advanced some sentiments which attracted marked attention when uttered, and will receive even greater attention when laid before that larger audience which publication permits.

He spoke as a business man of the South to the business men of the whole country. He also spoke as an ex-Confederate soldier to those who had once been his foes, but to whom he had been drawn in close personal relations, during the third of a century that has passed since he took up arms in a cause which he then believed to be right, and for which he has now no apologies to offer. His declarations were cheered to the echo by that great and solid body of New England business men, and the expressions of good will he uttered were by them reciprocated.

The speech of Major Buford should be read in full, by every business man who has the good of his country at heart. It shows that the New South is ready to keep step to the music of the Union. He declares that Secession is a word lost forever from the vocabulary of the South; and in place of the States Rights that once ran so rampant in that section, he demands greater power for the General Government, an increase of the Army, and the power to use that Army whenever riot or disorder shall prevail,—and it was a significant thing when the business men of New England applauded that sentiment.

In his own person, the speaker illustrates the fact that while the politician too often finds his interest in stirring up strife between the North and South, the business man finds his interest in another direction. For twenty years he has been coming to the North for the purchase of goods, and in every trip he has learned much and taught a great deal; has broadened his own views and those of the persons he has met; has found

that the Northerner is not a bad fellow after all, and proved that the Southerner is no worse. This is the true means of knowledge, and the true pathway to a perpetual friendship that shall prove a blessing to every section of the country which its touch broadens and brightens.

A Swindling Operation.

The Yale & Towne Mfg. Co., Stamford, Conn., seem to be paying the penalty of success and greatness, as some sharpers are alleged to have taken advantage of their position and the character of their goods, to perpetrate a swindle which is described in the following manner: They call upon a Hardware house doing a retail business, and state that the company would be glad to present the dealer with a new key-sign in return for an order, stating that this order can be made upon his jobber. Having secured a card from the retailer, the impostor then goes to the jobber, getting in exchange for the retailer's card, which is previously secured, a genuine order from the jobber on Yale & Towne. This order is made to read "Deliver to Bearer," and in this way he secures the goods, which is the last heard of them. The company inform us that they already have had three separate cases of this sort. It would be well for all parties to be upon their guard, and to watch this little operation.

The increase in the business of the Plume & Atwood Mfg. Co., No. 18 Murray Street, New York, and the need of more room to show the large line of lamps, and other metal goods handled by the company, necessitate larger quarters. On May 1st or thereabouts the company will remove to No. 29 Murray Street, on the northeast corner of Murray and Church Streets. The removal will allow of increased facilities in both display and stock rooms. They will occupy the street floor and basement.

The Ideal Mfg. Co., New Haven, Conn., announce that they have purchased the sole right to manufacture the implement known as the Spangler Crimper, and request that hereafter all dealers who order this article may address the manufactory or their jobbers, under the name of the Spangler Ideal Closer. They add that these goods will continue to be made of first-class material, and workmanship fully guaranteed.

William H. Coldwell, a member of the Coldwell Lawn Mower Co., and son of President Coldwell, of that company, has been appointed by the mayor of Newburgh, N. Y., alderman-at-large of that enterprising and busy city. Mr. Coldwell has been "at large" among the lawn mower buyers of this country quite extensively for some years past, and now has the honor of adding "Alderman" to his name.

Frank J. Oliver, of Oliver Bros., No. 33 Chambers Street, New York, has just returned from an extended trip West. He says that the Pacific Coast States are to have a new railroad, which will terminate in San Francisco. It is expected to develop the inland trade of this entire region and restore to San Francisco her lost commercial supremacy.

The St. Louis Refrigerator & Wooden Gutter Co., St. Louis, Mo., began some ten days ago to run their factory on double time, and expect to keep this up for three or four months. This is a substantial evidence that the Lu-minum Bicycle has found that favor in the market which its high qualities make a foregone conclusion.

"How shall we treat the travelling salesman?" asks an exchange. Just ask him up with the rest.

New York Hardware Club Notes.

The annual meeting of the New York Hardware Club was held at the Club rooms at one o'clock, on Saturday, March 16th. There was a large attendance, and not only interest but pleasure was exhibited by the members of the Club over the fine showing made in the annual reports of the president, secretary and house committee. William H. Williams, president of the Club, presided, and J. L. Varick attended to his duties as secretary. In a brief opening statement, President Williams explained the condition of the Club in minute degree, and his statements were followed by those of Treasurer Keating, which showed that the Club is in all respects in a most excellent condition.

The annual election of five governors was then taken up, and the chairman appointed as tellers, Archibald Paull Mitchell and Charles F. Clark. The five governors who had been renominated to succeed themselves for the term of three years, were unanimously elected, as follows: Alfred D. Clinch, Charles Daly, Brace Hayden, Mortimer C. Ogden and Webster R. Walkley.

A number of amendments to the constitution and by-laws which had been proposed by the board of governors were then taken up. Discussion upon the various points was participated in by various members, and favorable action was taken on the majority. That proposing to increase the admission fee for resident members to $100, and $50 for non-resident members, was voted down.

The board of governors met on Friday, March 22nd, and in accordance with the requirements of the constitution, proceeded to elect officers for the coming year. The present staff were unanimously elected for the coming year as follows:

President: William H. Williams.
Vice-President: R. H. Swayze.
Treasurer: Thomas F. Keating.
Secretary: John L. Varick.

The committees for the coming year were appointed by President Williams as follows:

ADMISSIONS.

Peter McCartee, Chairman.
Alfred D. Clinch, Robert H. Swayze,
Charles Daly, Edward C. Van Glahn.

FINANCE.

Webster R. Walkley, Chairman.
Brace Hayden, Mortimer C. Ogden.

HOUSE.

Eugene Bissell, Chairman.
Peter McCartee, Arthur G. Sherman,
Brace Hayden, Edward C. Van Glahn,
John L. Varick.

LIBRARY.

A. D. Clinch, Chairman.
James H. Kennedy, Richard R. Williams.

The following gentlemen have been unanimously elected to membership since our last report:

George Poggenburg, No. 43 Warren Street.
Lemuel E. Quigg, Editor New York *Press*.
Charles A. Miller, No. 149 Broadway.
Henry W. Sackett, Tribune Building.
Ronald Taylor, No. 15 State Street.
John I. Cole, No. 271 Broadway.
H. F. Hutchinson, No. 4 Park Place.
Walter B. Cowperthwait, No. 195 Park Row.
William Morse, No. 114 Duane Street.
John M. Peters, No. 23 Vandewater Street.
Lyman D. Morse, No. 38 Park Row.
Frank L. Babbott, No. 316 Broadway.
Robert Davidson, No. 234 Broadway.

Sportsmen's Exposition Association.

The demand throughout the country for information concerning the Exposition to be given by the Sportsmen's Exposition Association, at the Madison Square Garden, New York, on May 13 to 18, 1895, has forced upon the management the necessity of issuing a regular weekly bulletin containing the information necessary to keep the public advised of the exhibition, and to guide the manufacturers, artists and private individuals who desire to make exhibits either for business purposes in the manufacturing department, or for educational exhibition of private collections of objects of historical interest in the Loan and Trophy Department. The haste of some of the manufacturers to be identified with the Exposition is quite marked. When the Exposition was first planned, a number of the manufacturers were quite indifferent to the affair but are now hurrying in earnest, and showing increased confidence in the advantages to be derived from being conspicuously represented, and are now among the most enthusiastic promoters.

A brief glance at the prospectus issued a short time since and published in HARDWARE, heretofore, will outline the extensive character of the Exposition. There are, up to this hour, thirty-four leading firms who have taken spaces. Some of the exhibits will cover 520 square feet of floor space, in which will be introduced many novel features. For months past some of the manufacturers have been busy preparing their elaborate exhibits, and have made importations from foreign countries, in order to enable them to prepare entirely new material for this occasion. The marvellous beauty of the firearms and weapons to be shown will be imposing and a revelation to the profession as well as to the novice. Both barrel and blade will show the skill of the designer and engraver. Art in firearms will here be demonstrated. The mechanism and devices invented for rapid firing and safe control of the modern firearms will be an Exposition alone.

The exhibits of the ammunition makers will show the master hand of the chemist and subtle power and strength of the explosive agents of the hour, which seem to be unlimited. Exhibits showing the power of the powders and the skill of the marksman will be illustrated by targets and diagrams. These displays will be gotten up by the most important manufacturers of this country. Gun implements showing inventions of unique and practical character will attract the visitor and not only interest the dealer, but the consumer.

Those who will attend the Exposition will not be able to move very far among the mass of exhibits, before finding near at hand the sailing craft of the primitive hunter, as well as that of the modern Nimrod. The dug-out of old, the bark canoe of the Indian, the sober boiling launch, the shining sails of the phantoms of the sea, those shafts of the silent waters which almost defy Father Time, all will be there, side by side, a record of the crafty savage and of intelligent man.

The comprehensiveness of the other classes of the Exposition is quite as complete.

The following firms have been assigned space since our recent publication:

Recreation, Geo. O. Shields, publisher.
William Lyman.
Iver Johnson's Arms & Cycle Co,
Parker Brothers.
Sporting Goods Dealer.
T. W. Fraine.
Hazard Powder Co.
The Webster Studio.

Every week now adds to the number of exhibitors. The choice spaces are being rapidly allotted and now number upwards of 75, leaving but a limited number at the command of the Association. A day's delay may find some very important exhibitor without space. The Association will arrange for reduced traveling rates from all points in the United States. The rates will be low, and will offer every inducement to attend the Exposition.

The importance of the Exposition as a means of extending the public interest of the manufacturer and the dealer cannot be overestimated. Every step towards the education of the public tends to broaden the knowledge of the novice and quietly enlist new disciples into the ever increasing and changing ranks of the sportsman, as the old followers drop off and the new step in.

The Sportsmen's Exposition will not be a commonplace affair. The strong list of exhibitors certainly is a guarantee that success is sure to crown the efforts of the promoters of the enterprise.

"Hop's" Corner

It's amusing to read in the papers of a proprietor of a hotel objecting to the presence of "Drummers" when the better part of his patronage comes from country merchants, brought there by the good words of endorsement used by the very men whose presence in large numbers this specimen of ingratitude objects to.

It's another case of "kicking over the ladder" by which he mounted, only he's kicking it over before he's half way up, and the boys may grease the remaining rounds.

One cannot imagine the old Metropolitan or Earle's Hotel, or the original Grand Central putting on any "lugs" of this kind; and yet I've seen hundred of drummers nightly throng the corridors and lobbies of these several hotels, amusing their guests and frequently dining with them, spending good money at the several bars—and when "the boys" didn't get princely salaries either — leaving their cards by the score to be sent up to rooms of their guests, and all of these industrious workers were treated with respect and consideration by the proprietor and his minions, knowing it was to their efforts a good portion of his fame as a boniface was due.

Why, it used to be a part of a day's regular routine, for the salesmen of the hundreds of jobbing houses, now so few in the city, to stop in the hotels on their way home, commencing usually with the Merchant's and the Western in Cortlandt street, then the Astor and Earle's, finishing up on the others above mentioned. They saw who were in town, and got their plans of campaign ready to bring their guns to bear on the heavy buyers, who later thronged the various stores; and we enjoyed doing all this, even if it proved hard work, which it undoubtedly was.

Death of John P. Rogers.

John Prentice Rogers, senior member of the firm of John P. Rogers & Co., commission merchants, Boston, died at his home, No. 246 Newbury street, on March 13th. Mr. Rogers was one of Boston's oldest Hardware merchants, and one of the first in the Hardware exporting trade of that city. He was born in Plymouth, N. H., in 1820. In 1848 he went to Boston and opened a Hardware store, and from then till 1863 was engaged in the general Hardware business. In that year the house, of which he was senior partner at the time of his death, was formed. He was married fifty years ago to Miss Maria Woodman of Plymouth, N. H. Four children survive him. His sons are Harry A. Rogers, of Rogers, Newman & Tolman, bankers, and William S. Rogers, a lawyer.

It is said that steel is the strongest metal used in the manufacture of furnaces or heaters for hot-water systems. It has the strength to resist shock from any cause, is light and durable, and not liable to crack from the ordinary changes of temperature to which heating apparatus in a private house is subjected.

He Dwells Upon Details.

The voice from the Corner Desk of the W. Bingham Co., Cleveland, is heard this month in the following strain:

It would seem that the reconstruction of methods that is taking place in the Hardware trade will call for a greater attention to detail, and to a closer watch of the odds and ends of business. Goods are bought in smaller quantities and oftener, necessitating a closer watch upon stocks and a greater amount of clerical work in caring for accounts, increased correspondence, and a general multiplication of the small things that make up the drudgery of mercantile affairs. The objection that I can see to such a state of things is the increased amount of labor and the withdrawal of attention from the more productive features of business, but there are some compensating advantages. Business will be done on a safer basis, with fewer overstocks, and with less seasonable goods carried over, and in course of time stores will be cleaner of dead stock; then the two per cent. cash discount will be more generally taken, since the investment in stock is reduced and bills are smaller and more easily met. Again, there is a greater likelihood that superfluities will be lopped off—outgrown methods, or lines of goods that have been carried merely as a matter of habit after the active demand for them has ceased.

Another advantage in many stores will be the necessity of introducing some system to take care of the increased work, to replace the "by guess and by gosh" methods that too often prevail, for the time is rapidly coming when without close attention to minor details the Hardware merchant will find himself at sea. The man who has not a natural liking for red tape (and who has?) will not relish the introduction of it into his business, but when he gets to working by system and feels the satisfaction of knowing "where he is at" on some points, he will want to try it further, and when he gets where he can point to any detail of his business and know just what any line or department nets him in dollars and cents, just so soon is he in a state of business health. I thoroughly believe in system, and think that if there is any part of his business that is run on a haphazard plan, or that is in the charge of employees, without his oversight, it is the merchant's first duty to get that particular thing under his own particular thumb, so that he knows beyond a shade of doubt just the state of affairs. A business without a system is like a locomotive with the throttle locked wide open and its progress governed only by the amount of steam in the boiler—dangerous to ride behind and pretty sure to come to grief in some measure.

In no place will system be so effective as in your selling. Have you several clerks? Keep account of the gross sales of each and let them know you are making comparisons. Do you allow a variation in prices to different customers? Figure the profits on each salesman's sales—and upon any customer's purchases where you have an idea that his custom is bought at a sacrifice of profit. Do you know the possibilities for business that your field contains, and the part of it you are getting? If the character of your trade permits, go over the ground carefully and keep tab of who buys and who does not, and make a systematic effort to gain the trade you are losing. Look over your ledgers occasionally, and you will find the names of customers whose purchases have ceased, and perhaps whom you hadn't missed. Spend a rainy day in looking over your old records, uncollected accounts, stock sheets and other data of business past and you will get valuable hints for the future. Some one says that in every to-day is contained yesterday and to-morrow; that the hopes for to-morrow fire the present action and the experiences of yesterday form its guide; and it is system that gives the hope for to-morrow definite shape by showing where the present falls short of what can be done and records the experiences of yesterday for comparison and direction to-day.

H. A. Lozier & Co.'s New Factory.

Ohio pluck and industry seem proverbial. Scarcely a month ago the blackened ruins were the only marks of where the immense bicycle factory of H. A. Lozier & Co., Toledo, Ohio, once stood. To-day a larger and better equipped building marks the site. It seems to have sprung up like a mushroom, in single night. An account of the difficulties met and overcome in the construction of the new factory would make a long story. Sufficient to say that by tireless energy and by the offer of exceptional wages Mr. Lozier was able to accomplish this wonder in the building line. The main buildings of the Lozier factory are 600x40; 60 x 30 and 40 x 30 feet. Six hundred men are now employed, and the works are running day and night. The capacity of the new factory is 100 wheels a day. The dynamos used to run the big engines are said to be the largest in the United States.

The New 25-20 Marlin Cartridges.

The 25-20 Marlin Cartridge which is a recent addition to the repeating rifle cartridges, is now being brought out by the U. M. C. Co., loaded with smokeless powders. The result is that the velocity has been increased about 125 feet per second. The bullet will, of course, hold up better at longer range, for a cartridge loaded with nitro powder will shoot about six inches higher at 100 yards than a cartridge loaded with black powder. At 200 yards nitro powder cartridges will shoot about twelve inches higher than the black. The accuracy of this cartridge loaded with smokeless powder is called wonderful. At 100 yards ten shots have been grouped in a circle two inches in diameter; at 200 yards ten shots have been grouped in a four-inch circle. These cartridges will be ready for the trade shortly, and we are sure will prove very popular.

A valued correspondent, who is very well known in the manufacturing world, writes HARDWARE in the following pessimistic strain: "We do not know that we want any more business at the ruling starvation prices, that have been brought about by unnecessary cutting by those who happened to carry over small stocks last season. We hope the time will come when manufacturers will stop cutting each other, and be content with a little less business, and when the American public will be willing to pay a living price for staple articles, economizing if necessary on 'notions,' for which they pay exorbitant prices, many of which are sold in foreign markets at less than one-half the price charged in the home market."

The National Saw Co., Newark, N. J., are manufacturing for this season's trade large numbers of their Universal Corn Hook, an article which has demonstrated its usefulness by the great demand which it has created. It is strong and serviceable. The blade is painted green, and the hooks are put up in one dozen in paper packages. Their Corn Knives are also timely articles for the attention of the Hardwareman. Among them are the celebrated Acorn, Ajax, Eagle, Clipper, Russell and Usual. The company will be pleased to furnish information as to prices, etc., upon any of these articles, and all inquiries should be addressed to the National Saw Co., Newark, N. J.

C. W. Dunlap & Co., No. 88 Chambers Street, New York, have made the Avery Stamping Co., of Cleveland, Ohio, their Western agents. They will carry a full line of the garden tools, housekeeping Hardware, etc., manufactured by Dunlap & Co. All orders from trade located in the West should be addressed to the Western agents, and they will be promptly and satisfactorily filled.

HARDWARE costs only One Dollar a year.

Porter to Partnership.—IX.

When one has something very important on his mind how he dislikes to open up the subject to the party most interested. I had said to myself that the first thing I did in the morning would be to mention to Mr. Ely about Fisher's offer to go into business, but when the morning came I found numberless excuses ready-made to put off the discussion from time to time, till it was evening before I was able to open the subject with him.

"So Fisher thinks of opening a store in Germantown, does he?" said Mr. Ely, when I finished my story.

"Yes, sir."

"Do you think a store would pay there?"

"I did not think so at first, but the more I have looked into the matter the better prospect I see of success."

"Have you any figures?"

"Yes; there are now at the settlement something like one hundred and twenty families in all; there are sixty families of farmers at that end of the county who would find it more convenient to go to Germantown than to come here, and I think their trade could be secured; but with the trade of one hundred and fifty families we ought to sell at least two thousand dollars a month, and at the figure goods are sold here, this would be a gross profit of four hundred dollars a month, or about five thousand a year."

"How much capital do you figure will be necessary?"

"I think four thousand dollars would be stock enough to start with."

"Has Fisher that much loose?"

"He said he would raise whatever was needed."

"Very well; supposing you send word to Fisher to come up here and I will then make you both a proposition."

Fisher came up the next day, and after some preliminary conversation, Mr. Ely came to the business we had on hand.

"Mr. Fisher, Mark tells me you had some notion of opening a store down at Germantown?"

"Yas, das ish so."

"Have you estimated what amount would be necessary to stock up a store like that?"

"Oh, lots of dings, I suppose."

"I mean the amount of money?"

"Monish? Oh, das ish all right; I finds him."

"Mark says it will take four thousand dollars."

"Four tousand! Creat shiminy, ish dat so?"

"It will take fully that; my stock here will inventory eleven thousand, but is very full just now. If you open such a store as you ought to have there, you will need at least five thousand dollars' worth of goods."

"Five tousand? You push him up; pimby you say ten tousand."

"No; I began here with twenty-two hundred dollars, but I could have made more money if I had had a better stock; and competition was nothing to speak of."

I looked at Fisher to see what he was going to say about the capital; I had looked the matter over pretty thoroughly and was satisfied that a store in the settlement with Fisher's influence to back it, would do a good and profitable business.

"You tinks four tousand tollar, eh, Marks?" he asked turning to me.

"Yes, I think that would be enough."

"Four tousand! das ish a pig bile of monish, but I dinks I find him."

My face cleared up.

"Well, Fisher," said Mr. Ely, "I sent for you to make a proposition, but before I make it I would like to know if you could raise eight thousand dollars?"

"Eight tousand! My cootness, I never saw dat mooch monish."

"You couldn't raise that much?"

"I not say dat; maype."

"Very well, then I will make a proposition. My brother-in-law is attorney for the new railroad through this country and tells me it will come through Germantown."

"I know dat," said Fisher.

"You know it, how?"

"I gif dose mens mit de shains two tousand tollars to goom dat way."

"You bribed the surveyors, eh?"

"No, for I not gif dem dat monish dill the roat is goom."

"Well, it seems you know all about it. Of course, with a station there and railroad communication, a store will soon be started by someone if you do not start one."

"No, Pewhy; I own all dat land und will not sell him."

"Well, what I want to say is this: I am ready to sell you and Mark an interest in this store here, and then build a store in Germantown; I will manage the business here, Mark and you can run the Germantown store; we will put all the profits together and divide according to capital."

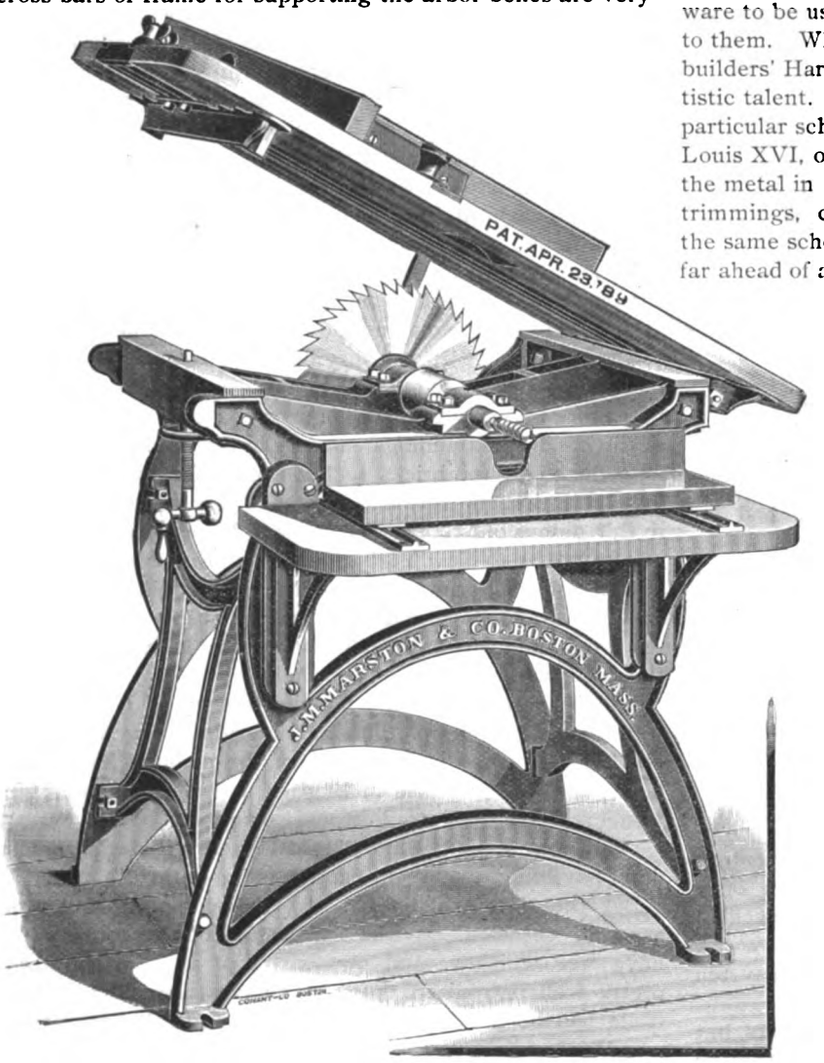
After some talk both Fisher and myself were glad to agree to go in with Mr. Ely in this way, and this was the beginning of the firm of Ely, Fisher & Rowland. The papers were drawn up, Mr. Ely to have one-half the profits because of his experience and capital, Fisher and I to have one-fourth each, and I to be charged ten per cent. interest for one-fourth of the capital.

My standing in the community immediately seemed to be advanced. As a clerk I was of no particular account, but as a young merchant my advice was of value and my society desirable. It was very flattering to a young fellow, but I was too busy to enjoy it to any great extent. Putting up a store in a new country is not much like erecting one of the handsome buildings one sees in the city. There was no cellar to dig, no bricks to lay except for the chimney. The main timbers were laid on sawed logs set on end, and in thirty days our room was ready to be occupied. Someone had to go to New York again; Mr. Ely could not get away, Fisher was not posted, so the choice fell on me. It was like an old story, and I pushed my business through in one week, and was back at Germantown in time to open the goods and put them on the shelves.

I don't know which was happier, Fisher or I, when we were ready to open up. The next morning we would throw our doors open. That section of the country had been flooded with hand-bills in English and German, and we wondered how much trade would come to us.

"Never you mind, Marks," said Fisher, "if de Yarmans don't pay lifely, I sent 'em pack to old goonthry."

But the Germans bought lively; our spring day was a grand occasion. It was the custom of the country to have free whiskey, and our barrel of that article was pretty well patronized, but our shelves also showed that trade had been good. I dreamt that night that my name was Vanderbilt.



Builders' Exhibit in Buffalo.

At the request of the Buffalo Chapter of Architects and the Builders' Exchange, the Builders' Exchange Association have decided to open a permanent exhibit of builders' supplies and material, and for that purpose have set apart the corner ground floor in their fireproof building. This building is centrally located, and for the past two years has been and is now the building centre of Buffalo. The standing of the Buffalo Builders' Exchange is sufficient guarantee that all who place exhibits will receive fair treatment. It is the intention to open the exhibit about May 1st. The cost of floor or platform space is $5 per square foot per annum; for wall space, $2.50 per square foot. For the purpose of exhibiting models or small articles, a table is provided with shelves or steps one foot wide, where all exhibits can be readily seen; on this table the charge is $10 per square foot per annum; all exhibits to be in charge of a superintendent, under the direction of the board of trustees.

Marston's Power Circular Saw.

The firm of J. M. Marston & Co., No. 251 Ruggles Street, Boston, Mass., well known as the manufacturers of high grade hand and foot-power machines, have lately added a small Power Circular Saw to their line, which is designed for woodworkers not having a constant use for a large or heavy saw bench, but who have sufficient work for a smaller size which will not occupy too large a space; and the price of which will be low and yet afford an accurate, well made machine, capable of sawing three or four inches in thickness if necessary. The frame is very strong and well braced, and 2 feet 8 inches high. The top measures 28 x 38 inches and has center part of table made of iron in which are planed the grooves for the cutting off gauges, two of which are furnished with each machine. The cross-bars of frame for supporting the arbor boxes are very

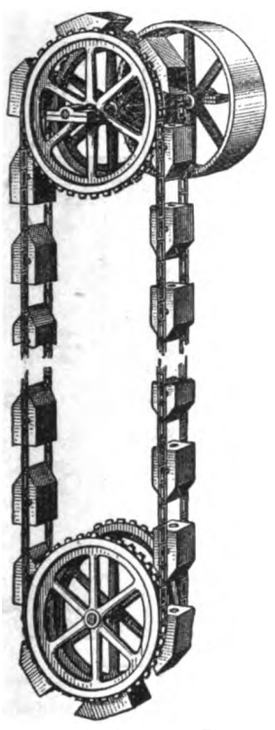
strong and rigid. The arbor is one inch in diameter and the caps are strong and securely bolted. The iron top has mouth pieces which can be easily removed for use of Huther Bros.' Adjustable Grooving Saws, for which Messrs. Marston & Co. are agents. Boring table and counter shaft are also furnished when desired. The makers inform us that "the machines already sold are giving the greatest satisfaction, and we know they are the best made saw benches on the market and are sold at a less price than any other."

Builders' Hardware Expert.

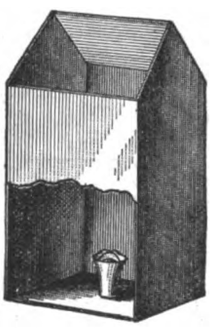
The office of builders' Hardware expert is an entirely new one in the Hardware trade, and George J. Wells occupies perhaps the unique position of being the only one of his kind in the United States. There are only six in the rest of the civilized world—three in France, two in England and one in Germany. It may be truthfully said that these gentlemen have a monopoly in their business. In the specifications of nearly any large building, the particular make of Hardware that the owner or architect desires to have used, is named therein. It is the duty of the builders' Hardware expert to see that the contractor follows out the agreement to the letter. Specifications frequently call for solid bronze door trimmings, which include door knobs, hinges, bolts and escutcheons. Sometimes the contractor, being naturally anxious to save what he can, substitutes imitation bronze trimmings, which none but an expert could tell from the solid ones. This is just where the expert steps in, and guards against such fraudulent schemes being carried out. He must also see that the sash weight and cords are of the proper weight and size, and act as a general superintendent. He acts under written authority from the owner or architect, and his word is law. He will sometimes assist in writing the parts of specifications that refer to the Hardware to be used, so that the contractor must rigidly adhere to them. When a fine residence is being constructed, the builders' Hardware expert has a chance to display his artistic talent. The decorations are probably to be of some particular school of design, such as Louis XIII, Louis XIV, Louis XVI, or Empire. It is then his duty to see that all the metal in the room, including door trimmings, window trimmings, chandeliers, radiators, andirons, etc., are of the same school of design. Mr. Wells says that France is far ahead of any other country in the designs used for ornamental Hardware. He has had fourteen years' experience, and finds the business a good one.

Philadelphia Hardware Association.

The eleventh annual meeting of the Philadelphia Hardware Association was held some evenings since at their rooms, No. 1219 Chestnut Street, under the auspices of Aaron I. Sanson, Jr., president. There was a large attendance due to the election of officers for the ensuing year, and other special business, among which was the endeavor to devise some means to prevent stealing from stores by the use of bogus orders, of which there has been considerable recently, and also to have the retail stores close their places of business during June, July and August every evening at 7 o'clock, or failing in that, at least three evenings a week. There were several new members elected and a large number of applications for membership. The reports of the several committees show the association to be in a growing and prosperous condition. After the regular order of business the election resulted in the choice of the following officesr: President, Joseph H. Darnell; vice-president, James C. Young; secretary, T. B. Hendrickson; treasurer, E. H. Shannon; trustees, Aaron I. Sanson, Jr., L. C. Glading, H. C. Seeger.



A large blow pipe, in the Standard Axe & Tool Co.'s Works, Ridgway, Pa., was completely demolished by an explosion caused by a current of gas. When the works were stopped at the dinner hour, a stream of gas from one of the fires filled the large blow pipe which supplied blast for the whole shop. When the fan started up the gas was driven back toward the fire and ignited, causing the explosion. No one was injured.



Work in the La Belle Mill Nail Works, Wheeling, W. Va., appears to be increasing. Last week the company received a large order and trade appears to be improving very much. Work on the new tin-plate mill is progressing very rapidly and in about one month it will be in working order.

New Perfection Irrigating Pump.

The St. Joseph Pump Co., St. Joseph, Mo., have had great success in the introduction of their New Perfection Irrigating Pump, which they have manufactured to meet a special demand for an article for irrigating purposes. It is especially adapted for the use of farmers, gardeners, stock and fruit raisers, and can be driven by horse, steam, wind or water power. It can be used in raising water from wells, rivers or canals, and is especially adapted where a large volume of water is required, and made with a capacity of from fifty to fifteen hundred gallons per minute. Its construction is clearly shown in the accompanying illustrations. In detailed description, the manufacturers say: "It is made of galvanized iron and folded together by double locked seam and having a ball valve or air vacuum in bottom which allows the air to escape as the cup fills with water, thus overcoming all air resistance. As the cup passes over to empty, the valve or ball drops into a basket which admits the air pressure to force the water causing it to empty rapidly. It has been thoroughly demonstrated that air resistance in a large volume of water is almost equal to

the weight of the water itself, and our machine saves almost one-half in power and machinery. Thus, practically speaking, with our pump all that has to be overcome in the way of resistance is the actual weight of water, which feature no other Irrigating Pump on the market possesses. We furnish when ordered, the pump exactly as represented in the accompanying illustration including top gearing, babited boxes, sprocket wheels and driving pulley keyed on to shafting. Chain and buckets and lower sprocket idlers keyed in position. The frame for machine to rest on can be constructed after the plan of a common grindstone frame, which must be built by the purchaser to suit the lay of ground. When heights of lifts are not given our quotation will be based on a twenty-foot raise to top of ground. In ordering, when they are to be used in wells, state the size and diameter of same, and state the amount of water you wish to raise, as it is necessary to make them especially for this purpose. We can fill any order promptly within a reasonable time. We carry in stock everything pertaining to this pump." They give sizes, prices, etc., as follows:

What the "Sure-Grip" is.

The Fulton Iron & Engine Works, Detroit, Mich., have made a great success with their Sure-Grip Steel Tackle Block, an illustration of which may be seen upon page 12 of this issue. They describe it as "absolutely reliable," and positive and certain in its action; "will hold load at any point without fastening the rope; the heavier the load the better the grip." In further description they say: "It is an invention resulting from a necessity long felt in our own shops for a machine in which rope is used to raise and lower quickly, and in which the height of hoist is not limited nor the efficiency of brake in the least questionable. Repeated tests and constant use have disclosed the valuable labor-saving qualities of our Sure-Grip block, and it is placed upon the market with the conviction that many others like ourselves cannot afford to be without it. Never gets out of order. The brake is simply a wedge that drops by gravity between the upper shieves, and is absolutely automatic in its action. The face of wedge is fluted in such a manner that the rope is not worn more than by an ordinary block. Can be worked at any angle. There is no back slip which greatly reduces the effort of lifting. It can be operated from any position. Accidents are avoided by the use of the Sure-Grip. The age of steel is here. This block is made of steel, the lightest and most durable of all materials obtainable for this purpose. They are universally admitted to be the greatest improvement ever made in tackle blocks. Half the cost of handling can easily be saved when these blocks are used in connection with an overhead track, for chucking work in machine shops, for handling bales of cotton, and other warehouse merchandise. They are the best and cheapest, because the same amount of money invested in ordinary tackle blocks will not begin to give the same amount of service. Original cost is really of no account when you stop to think that many loads are raised and lowered during a year, and if even a small saving is made each time the block soon pays for itself, and remember, the price of the Sure-Grip is practically nothing over the ordinary tackle block of the same quality. It is destined to grow more and more into favor because severe tests and practical use have shown it to be superior to all others." Prices, a table of tests, etc., will be sent upon application.

A Priceless Elephant's Tusk.

In the showroom of the factory of Jos. Rodgers & Sons, Sheffield, England, is a huge but perfect specimen of an elephant's tusk purchased more than a century ago, and used to advertise the quality of the ivory used in manufacturing the handles of Rodgers' knives. The price originally paid for the tusk was close upon $2000. Should anyone take the trouble to compute the compound interest on the cost of the tusk, it would be found that the tusk to-day represents a princely fortune.

Two men called at L. H. Kurtz's Hardware store on West Walnut Street, Des Moines, Iowa, some days ago, and finding Mr. Kurtz alone, one of them, upon a plea of examining a stove, went with him to the rear of the room, leaving the other standing near the door. Mr. Kurtz was detained with his supposed customer about five minutes, but did not effect a sale. After the men had gone it was discovered that a show case containing valuable cutlery had been robbed.

Ex-Postmaster Yerdon proposes to establish a tin pail factory, which will give employment to a large number of men, at Fort Plain, N. Y. A pail will be turned out complete in two minutes by the use of improved machinery.

No. 78 Deep Throat Power Press.

Up to a comparatively recent period the use of Deep Throat Punches was almost entirely limited to the punching and shearing required in bridge, railroad and structural iron work, which does not often call for the accuracy and adjustments needed in working blanking, perforating or forming dies on thin sheet metals. Within the last few years, however, much of what had previously been done by hand in the production of stoves, wrought iron ranges, zinc work, etc,, has been brought within the range of die operations, calling for a press which combines a deep throat with the necessary accuracy and adjustments.

The Bliss No. 78 Press (Fig. 1) shown herewith, made by the E. W. Bliss Co., Brooklyn, N. Y., is designed for this purpose. Its punch slide is guided and gibbed so as to secure accurate cutting, and is provided with an eccentric adjustment permitting to regulate with precision and ease the exact point to which the punch is to descend. The exact nature of this eccentric adjustment is shown in the second cut herewith (Fig. 2); it can be brought into any needed position by simply turning the pinion wrench shown after having loosened the clamp bolt. The pressure is in this manner always taken on solid metal instead of falling on screw threads. The action of the press is controlled by means of a treadle which operates an automatic clutch so as to insure the stopping of the slide at the highest point of the stroke. This machine is mostly made as a fly-wheel press, but for work requiring a slower and more powerful action it is provided with back gearing. It is also frequently furnished with stay rods so as to fit it for heavier work where a great depth of throat is not needed.

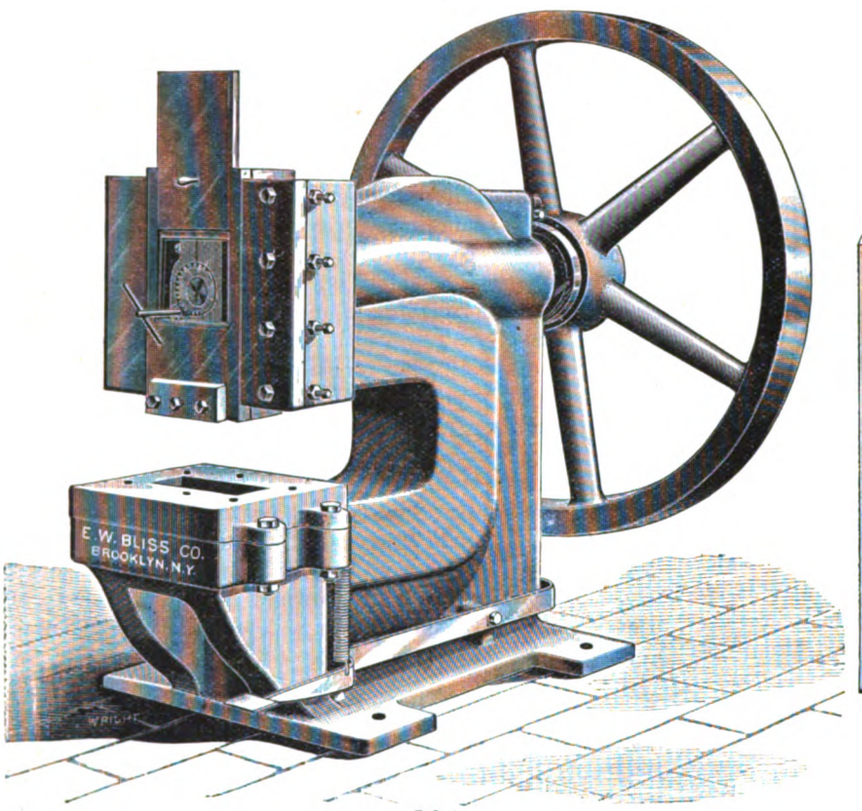

FIG. 1.

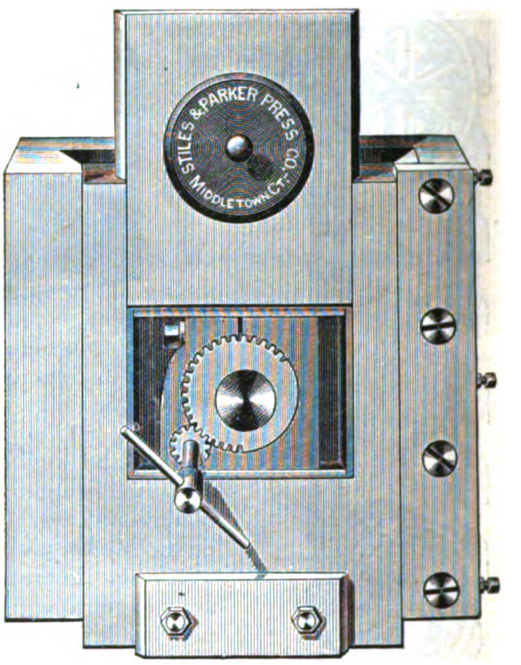

FIG. 2.

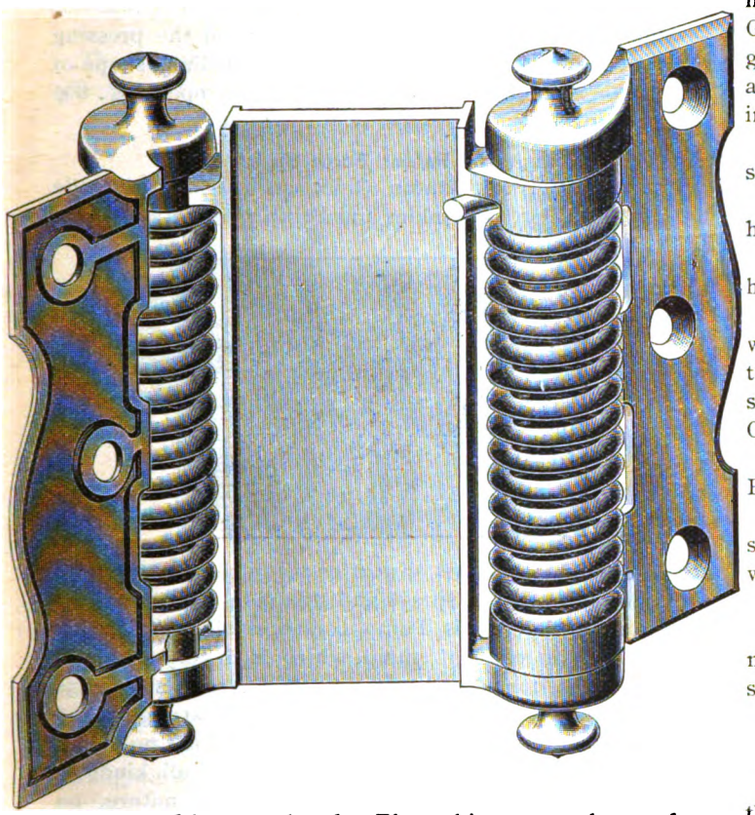
The principal dimensions are as follows:

Depth of throat	24 inches.
Distance from bed to top of throat	9¼ "
Motion of slide	1¼ "
Size of bed	16x16 "
Standard opening in bed	8½x8½ "
Diameter and face of fly-wheel	34x5 "
Weight of fly-wheel	900 pounds.
Speed " " "	90 revolutions.
The complete weight of press, approximately	5500 pounds.

Proper Lubricant for Cycle Chains.

It is conceded by all wheelmen that some lubricant is needed to prevent wear of chain and sprocket wheel; such a lubricant not only prevents wear but very largely increases speed and ease of driving. "Oil or grease, while useful for the moment, catches and holds dust and dirt. After much experimenting it has been found that graphite makes the most perfect lubricant, when the right kind is used and properly prepared. The word graphite, like the word charity, covers a multitude of sins. Under the name of graphite lubricant are found compounds of cheap blacklead, stove polish, foundry facings, soapstone, etc. Safety in buying, and the surety of getting the best graphite lubricant made, lie in purchasing of a firm of world-wide reputation and long experience. Such a firm is the Joseph Dixon Crucible Co., of Jersey City, N. J. They have mined and manipulated graphite for nearly seventy years, and when called upon by leading wheelmen to furnish a cycle lubricant that would meet the fullest requirements of the cycler, they first purchased samples of all the chain lubricants in the market and analyzed them, and then selected from their choicest stocks of graphite a brand of graphite of unequalled smoothness, and produced a stick, or solid lubricant, which will not gum or hold dirt and dust, but which will so thoroughly lubricate the chain and sprockets that the wear will be reduced to the slightest degree, and ease of riding and speed greatly increased."



It is learned by the Bureau of the American Republics that the Congress of the State of Nuevo-Leon, Mexico, has recently passed a law exempting from every tax all industrial enterprises locating in that State within the next two years having a capital exceeding $1000. This exemption is to last for six years, dating from the time when the above named capital shall be deposited.

F. I. Everett, who formerly represented the Huntington-Hopkins Co. in San Francisco, has engaged in the service of the Hibbard, Spencer, Bartlett Co., Chicago, and will represent them upon the road. In this case a good man and a good company have come together for their mutual benefit.

HARDWARE, published semi-monthly, with its first number of the year, January 10th, appeared in a new dress and new arrangement of make-up. The publication has entered upon its tenth volume, and has every appearance of being one of the *real* trade journals.—*The Trade Press.*

Columbia Double-Acting Spring Hinge.

The Van Wagoner & Williams Hardware Co., Cleveland, Ohio, and No. 14 Warren Street, New York, have introduced the Columbia Spring Hinge for screen doors, illustration of which is here shown. It is made of cast iron, in but one size, 3-inch, and is finished in japan mottled old copper and bronze-plated. These hinges can be used on either left or right hand doors as they are reversable. The steel wire coil springs are finished to correspond with the rest of the hinge. The hinges are neatly packed, four pairs in a box, and twenty-four pairs in a case, with the tension of the springs adjusted.

A New Version of the Hatchet.

Considerably over a century ago, there lived in Northern Virginia, not far from Washington, one Brown, who kept a general store, in which there was a small line of what would now be styled heavy Hardware.

As everything had to be imported in those days, and prices were high, there was no demand for ice cream freezers or egg beaters, and novelties or luxuries were unknown.

One lazy afternoon Brown was sitting in his store alone, meditating somewhat over the coming crops, the prospects of the trade for the season, and almost asleep, when he was awakened from his reverie by the happy shouts of a small boy, handsome and well dressed, who accosted him.

"Hulloa, Mr. Brown."

"Good afternoon, George," responded Brown, as he adjusted his single suspender; "What's the news over to the place?"

"Nothing much," replied George, "only everyone is busy and father said I could cut some wood for him, and so I come over to get a hatchet; have you any good ones?"

Brown quickly brought out half a dozen and George selected with assumed carefulness the last one, and said, "Mr. Brown, father will pay me for my work, and I will settle with you when he does."

"Give me half of what you get," said Brown, "bring back the hatchet and I will call it square."

"All right," was the response, and both sides seemed pleased with the bargain.

George then started for home blazing his way as he went. Taking his aim at a bush on the wayside he hit the garden wall, which being of stone, repelled the audacity of its assailant by placing two large gaps in the weapon. This made George careful, but as he reached home he saw his father's cherry tree and he belabored that to its ruin.

Sleeping all night with an easy conscience, he awoke the next morning to find his father in the hall awaiting him. George immediately divined a calamity, as he rapidly glanced at the bulging eyes and red face of his parent, who also had substituted a rod of birch that particular morning in place of his usual walking stick.

"George, who cut down that cherry tree?" asked the stern parent.

George was in a quandary. He needed a full hand, but he had only one small card, and he played it.

"I cannot tell a lie, father, I did it with my little hatchet."

"That's a good boy, my son, never tell a lie; I shall not whip you for telling the truth, but it was very wrong of you to cut the tree and I shall have to punish you for that," and suiting the action to the word, he applied the birch to George's back in good shape.

George was angry, but took the hatchet, trudged over to Brown's and said to him, "Here's your old meat axe."

"A nice looking affair you have made out of it; did you saw the wood after you had cut it? Well, give me half of what your father gave you," ejaculated Brown.

"Half of it!" shouted little Georgie, "I'll give you all."

And he swatted the portly Brown in the left eye and made a masterly retreat, beside which that of Long Island some years later was nowhere.

A New Idea in Paste.

Thomas' Snow Flake Paste in collapsible tubes is something new, and seems destined to make this paste popular and largely sought after, It is described as "a great convenience and there is no danger of it drying up." These tubes are packed one dozen in a handsome enamel paper box ready for the counter. The tubes are attractively labeled in white, red and gold. Of the paste itself little need be said, it merits being known by the trade. "For tissue paper work, scrap books, etc., the tube is invaluable, a slight pressure on the bottom being all that is necessary to force the paste to the opening in small or large quantities."

John J. Nealon, No. 71 Howard Street, is the selling agent. Mr. Nealon, in addition to the above, carries a large line of notions and small wares suitable to the Hardware trade. The stock of blacking brushes is one of the most complete on the market, ranging in price from $6 to $36 per gross net. Being manufacturers' agent, he is in position to fill orders with promptness and despatch and at exceptionally low prices.

China is patronizing America very largely for arms and ammunition. The Winchester Repeating Arms Co. are said to be sending that country a monthly consignment of 2,000,000 rounds of ammunition, and have also furnished 20,000 stand of arms.

NEW GOODS IN THE MARKET

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

Milling, Planing and Drilling Machine Vise.

The Massey Vise Co., Nos. 35 and 37 South Canal Street, Chicago, Ill., are putting on the market the Milling, Planing

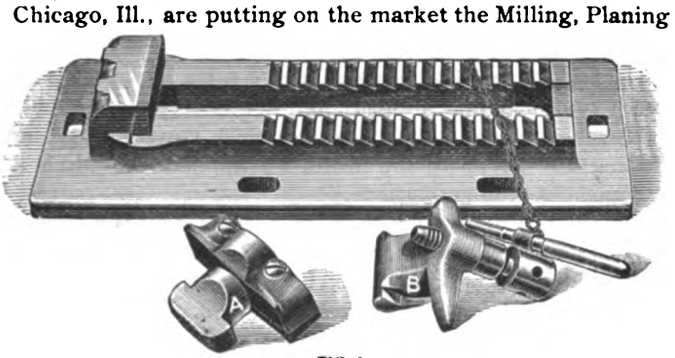


FIG. 1.

and Drilling Machine Vise, illustrated here. A, Fig. 1 is a loose, and B a grip plate. The jaw A is free to slide forward and backward on the longitudinal slot in the vise, as is also the grip-plate when inclined slightly forward, thereby disengaging the two teeth from those on the body of the vise. Fig. 2 shows a section of a part of the vise, showing that the rear faces of the steel jaw-plates C C are inclined, thus causing them it is stated, when an article is

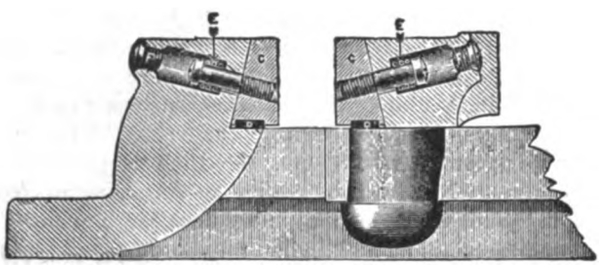

FIG. 2.

gripped in the vise, to slip downward for a short distance, carrying with them the object held. The pin-holes in the jaw are slotted to allow this motion. It is explained that the jaw-plates are raised again when the article held is released by springs operating in the recesses D D, as indicated at the bottom of each plate. The small cap screws are intended to keep water and dirt from entering the pin-holes. In Fig. 3 the appearance of the parts is shown when

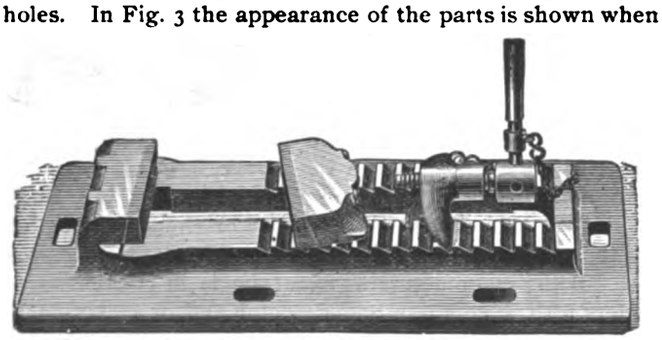

FIG. 3.

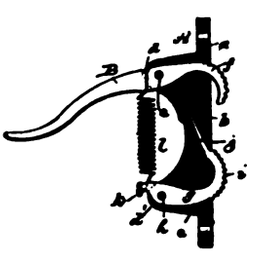
in position to hold taper work. In operation, the work is placed in the jaws, the loose jaw and grip-plate is moved up to it and the screw in the grip-plate is tightened against the loose jaw. The makers explain that the work will then be securely held and that at the same time it will be pushed down firmly and uniformly upon the surface of the vise, making it unnecessary to hammer the work down. The manufacturers claim that this vise embodies three features —quick and firm chucking swivel jaw, and the pressing down of the work on the bed plate by the inclined shape of the jaws. The vise comes in three sizes, to open 6¼, 8¼ and 10¼ inches.

Improved Patent Force Sprinkler.

The Star Mfg. Co., Canton, Ohio, are offering the trade an Improved Force Sprinkler and Pump as illustrated here-

with. Four attachments or nozzles accompany each pump providing for different sprays and streams. The manufacturers state that "this Pump combines all the features necessary to an efficient pump, which is a very essential feature to be considered. It throws a strong stream 50 feet or more. For washing windows or carriages, and showering lawns, gardens and greenhouses it has no equal. It is adapted to throwing liquid solutions of all kinds to destroy noxious insects and bugs of every nature, on plants, vines and trees. Should be kept in every house, store and factory in the country, as a protection against fires."



Professional and Sporting Scale.

The Gilfillan Scale & Hardware Co., No. 725 Old Colony Building, Chicago, Ill., are marketing the Professional and Sporting Scale, full-size illustration of which appears here. This scale has a weighing capacity of 10 pounds by ¼-pounds, and is so small that it can be easily carried in the pocket. Fishermen could use such an article frequently to establish the veracity of their statements. A 20-pound scale is also made. These scales are made of brass, highly finished in nickel.

The Clough Sash Holder.

The illustration shown here represents a Sash Holder manufactured by Joseph Clough and put on the market by the Sawyer Hardware & Supply Co., Pawtucket, R. I. The Holder is of iron, 4⅜ inches

long. It is intended to be mortised into the sash from the outside so that the cams press against the window frame. By raising the handle, which projects through the window frame into the room, the pressure exerted by the cams is released, and allows the sash to be raised or lowered. The maker states that but little time is required to put the

Digitized by Google

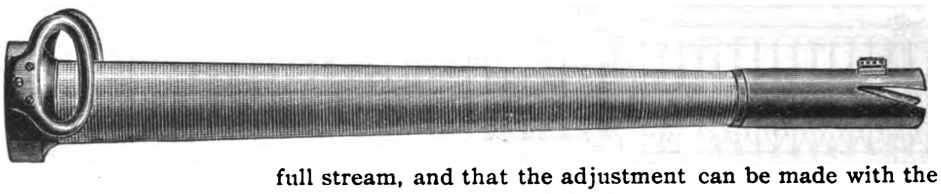
Holder into the sash, there being no plates to fasten to the frame. The device holds the sash at any point, and "the greater the force exerted to raise or lower the sash, the harder the cams will press into the window frame." The Holder can be used on either upper or lower sash, and may be used with or without weights.

Enterprise Raisin Seeder.

The Enterprise Mfg. Co. of Pa., Philadelphia, Pa., are offering to the trade a labor-saving device in the Enterprise

Raisin Seeder. It is stated that this seeder is simple, easily adjusted, does the work rapidly and effectually, seeding raisins wet or dry, better work being obtained if wet. The ordinary washing given by every good housekeeper makes the raisins sufficiently wet. Seeding raisins is very tedious work, but by the use of this Seeder, a pound can be seeded in less than five minutes, and with the hotel size still more rapidly. The raisins after washing are fed into the hopper, the revolving of the crank forcing the raisins to drop into a receptacle, while the seeds are discharged through a spout.

The Perfect Flower Support.



The Worcester Wire Co., Worcester, Mass., are putting on the market a Flower Support. The manufacturers state that the support is cheap and indestructible and will last for years. It is adjustable to different heights and is quickly placed in position and makes strings unnecessary. "Their use renders culture and spraying easier, tends to make the plants more floriferous and of symmetrical growth, prevents matting, that serious drawback to successful plant development, are insect proof, and when adjusted, give the plant a neat, tidy appearance and allow free circulation of light and air, thus tending to prevent plant rust.

Improved results in growth and blossom are certain from the use of these supports. They are made of galvanized wire and will not rust or break, and require but little room for storage when not in use. Their form of construction allows of a firm support in the soil, the small ring, five inches from base of standard, makes a foot piece to rest on top of the soil, keeping the support straight when in position. The holding or plant supporting rings are adjustable up and down the standard and can be opened to adjust around the stocks in preference to slipping over the tops of the plants. This is a valuable feature when it becomes necessary to set supports after the tops have grown large."

Neumeyer Nozzles.

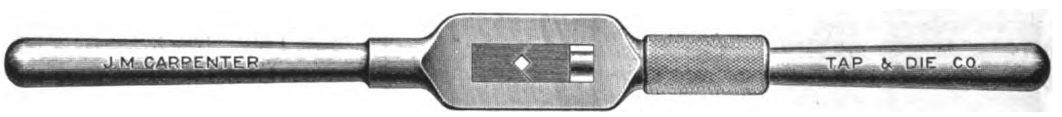
H. F. Neumeyer, Macungie, Pa., is offering the trade two new nozzles. "The spray nozzle has a small tube passing through its center, through which the water is forced. The outer end of the tube has a long bevel which is covered by a hinged plate, held in place against the tube by a spring, regulated by the set screw outside the nozzle. The set screw can be adjusted, it is stated, so that the nozzle will throw from the finest mist to any density of spray or to a

full stream, and that the adjustment can be made with the thumb and forefinger of the hand holding the nozzle. A fan-shaped spray is the one designed to be used regularly, and it is stated that when the nozzle is used to spray decoctions, it will not clog, as the plate covering the end of the tube will give automatically to let any lumps pass, and will again resume its normal position. The nozzle can be used

successfully as a lawn sprinkler and is exceedingly well adapted for washing wagons, windows, etc.; is made of brass, nickel-plated. The fire nozzle is constructed on the same principle, and throws a spray fan-shape or a 1-inch solid stream. The nozzle is made all of brass, rope wound and painted."

The Nichols Tap and Reamer Wrench.

The J. M. Carpenter Tap & Die Co., Pawtucket, R. I., are putting on the market a new Tap and Reamer Wrench. In Fig. 2 the knurled sleeve being broken away shows a right-hand thread on the outside of the neck of the stock and a left-hand thread on the handle. It is stated that the two threads are embraced by the corresponding interior threads of the sleeve, a right-hand turn of the sleeve closing the jaws and a left-hand turn opening them; the handle



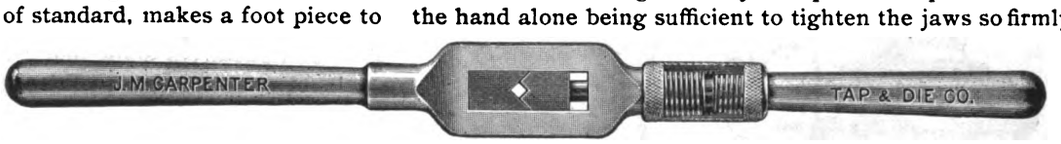


FIG. 1.

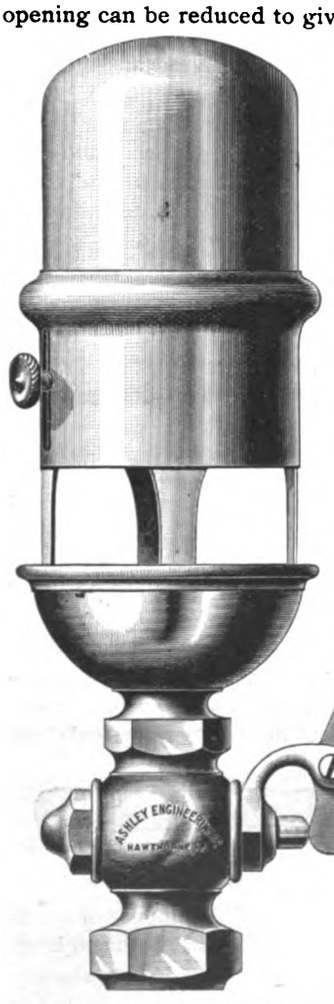
moving in and out without any rotary motion avoiding all tendency to unscrew while at work. It is further explained that the large diameters on which the threads are enabled to be cut by this design, allow of using threads coarse enough to produce quick movements of the jaw, while the angle of the threads is so small that sufficient power is obtained by the hand alone to get a strong enough grip to prevent all loosening while at work; that no pin, wire or other implement is needed to tighten its jaws upon the tap or reamer, the hand alone being sufficient to tighten the jaws so firmly

F G. 2.

that there is no loosening of its grip while tapping or reaming. This Wrench is of the best workmanship throughout, has hardened steel jaws, all the parts are made interchangeable, while the weakest point in similar wrenches is in this one greatly strengthened by the knurled sleeve. They are made in five sizes, taking taps from 0 to 1¼ inches diameter.

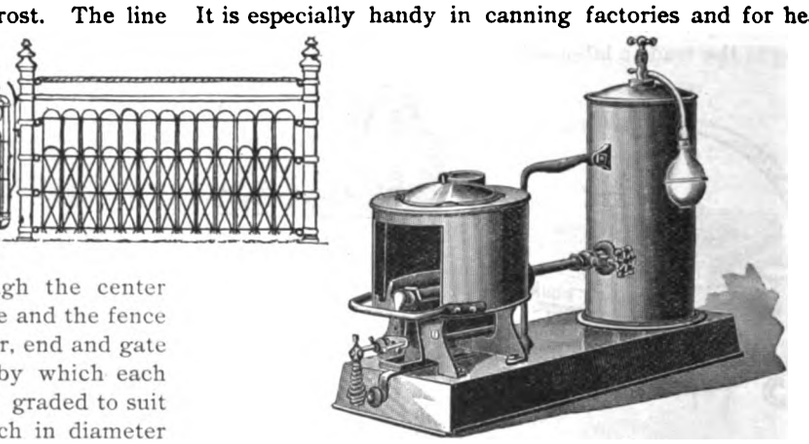
Digitized by Google

Ideal Lawn Fence.



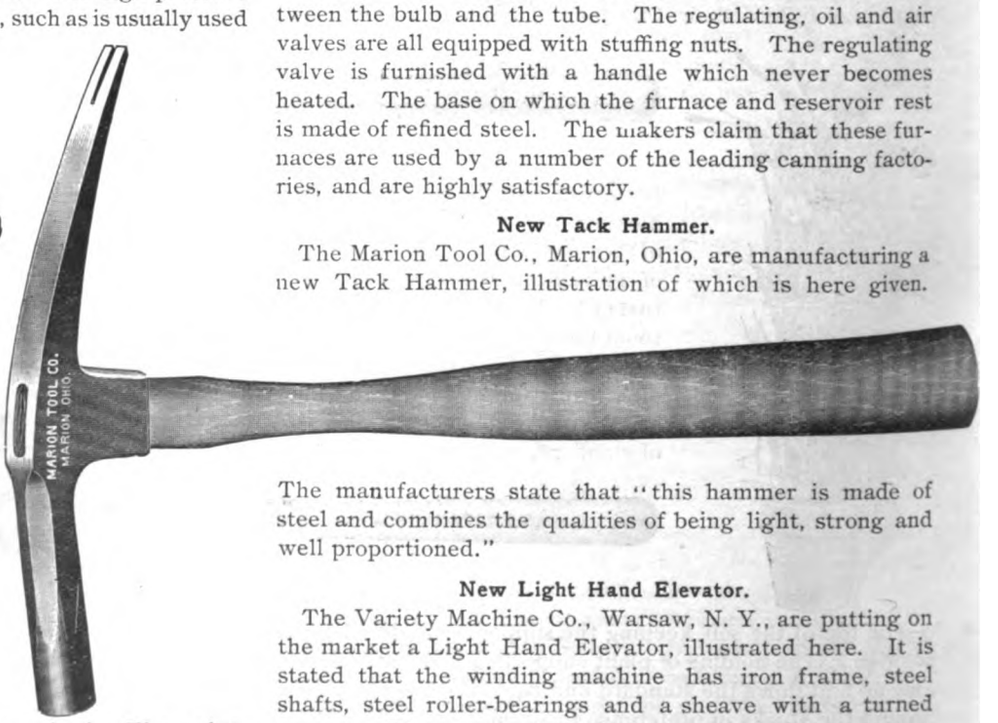
Ellis & Helfenberger, Indianapolis, Ind., are offering the trade the Ideal Lawn Fence. The fence is described as follows: "The picket is about one-fourth inch in diameter and of heavy twisted galvanized steel wire that will not rust, and close enough to turn small animals. The posts are of tubular steel and have a heavy spread base of cast iron to prevent their being lifted by the frost. The line

post is double and the picket passes through the center which brings the rail and picket in exact line and the fence appears the same on both sides. The corner, end and gate posts are provided with malleable ratchets by which each horizontal wire is tightened, and the fence graded to suit the ground. The rail is tubular steel 1⅜ inch in diameter and very stiff. It is continuous the entire length of each section of fence, and being firmly keyed to each post forms a perfect brace. The fence presents an attractive appearance and does not obscure the lawn."



Draw Bell Steam Whistle.

The Ashley Engineering Co., No. 136 Liberty Street, New York, are marketing a new steam whistle, in which the usual central stem which supports the bell is done away with, and the bell made to support itself, which it is said "does much better and more reliably than is usually done by the stem. The bell in this case is drawn out of sheet metal, openings formed in the lower part as shown, which opening can be reduced to give the desired tone by moving up or down an outer shell, which is held in place by the small screw shown, which passes through a slot in the outer shell and is tapped into a part of the bell, which is thickened for that purpose by soldering a piece to the inside of it. For high-pressure steam, such as is usually used in locomotives the outer shell is not required. The valve, shown, is separate from the whistle, the two being joined by a thread, which gives the advantage that the whistle can be used in connection with any kind of a valve desired, or may be screwed directly into the end of a pipe. These whistles are made in various sizes up to six inches."

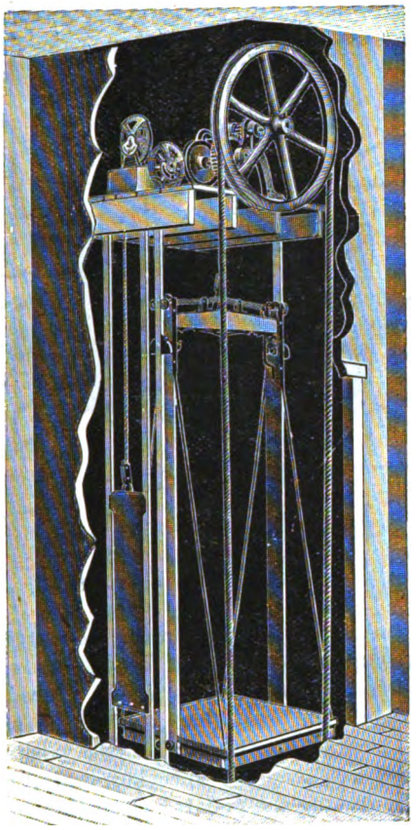


Canners' and Tinners' Furnace.

The Burgess Soldering Furnace Co., Columbus, Ohio, are offering the trade a new Combination Furnace, Gem No. 8. It is especially handy in canning factories and for heavy work. The aperture in the hood of furnace is large enough to accommodate two 3-inch capping irons, and can be made to accommodate one or more tinners' soldering coppers by removing the top cover. The plate on which the coppers rest is made of cast iron deflected with projections which form flues for conducting the heat under the same. The sides are also furnished with fine plates, which protect the bolts and conduct the heat from the front to the rear of the hood. The slotted burner is cylindrical and made of heavy cast iron, and shaped in such a manner that the solder cannot fall into the perforations. The heat is distributed the entire length of the iron, and the burner being recessed in front and rear, makes it durable. It is also provided with a sliding drip cup, the knob of which never heats. The plate on which the coppers rest is very close to the workman's bench, a great advantage to which attention is called. The reservoir shown is fireproof and pneumatic and cannot be filled while the burner is lighted, thus insuring safety. It is constructed of IXXXX tinned steel or copper, and holds two gallons of gasoline, a quantity which will last for several days. The rubber bulb used on this furnace is made of heavy black rubber, the valves of which are situated between the bulb and the tube. The regulating, oil and air valves are all equipped with stuffing nuts. The regulating valve is furnished with a handle which never becomes heated. The base on which the furnace and reservoir rest is made of refined steel. The makers claim that these furnaces are used by a number of the leading canning factories, and are highly satisfactory.

New Tack Hammer.

The Marion Tool Co., Marion, Ohio, are manufacturing a new Tack Hammer, illustration of which is here given.



The manufacturers state that "this hammer is made of steel and combines the qualities of being light, strong and well proportioned."

New Light Hand Elevator.

The Variety Machine Co., Warsaw, N. Y., are putting on the market a Light Hand Elevator, illustrated here. It is stated that the winding machine has iron frame, steel shafts, steel roller-bearings and a sheave with a turned groove. The gears are made from accurate iron patterns, while gears, sheave and rope-wheel are all keyed to their shafts, and with set-screws on keys, and furnished with

Digitized by Google

automatic clutch. The car is made of hard wood, regular freight elevator style, 6 feet high under beam, put together with bolts; fitted with automatic safety device, "3 roller" guides at top and bottom and both sides, with a steel clevis for the beam; finished in natural wood. The manufacturers claim that the automatic clutch will hold the load

or the counter weight, that neither can run down except when the operator pulls the hand rope, and that the parts are made of steel and bronze castings, and will never wear out. They further claim that the safety device has been thoroughly tested and never failed to stop the car instantly. The winding machine can be bolted to the ceiling or can be set on top of the joists. It is further stated that the elevator is quick-running and having a lifting capacity of 500 pounds. The elevator weighs, packed ready for shipping, 500 pounds.

T. I. C. Mop Wringer.

The Torrance Iron Co., Troy, N. Y., have lately introduced the Mop Wringer here illustrated. It is a malleable casting that is adapted for fastening to a pail with set

screws. In operation the mop is placed in the slot press and the swinging piece is swung around it. Then by twisting the mop to the right and upward, the water is effectually wrung out. During the operation the pail and wringer are held by placing the foot of the user on the foot piece which accompanies the wringer and which is screwed to the pail at the bottom.

The New Rochester Lamp.

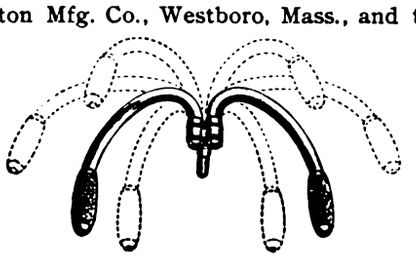
The Rochester Lamp Co., No. 42 Park Place, and No. 37 Barclay Street, New York, are introducing their No. 10 Mammoth Fount. This new lamp, it is stated, "has a screw wick lift, which can be operated from either the top or under side of the fount. It has a chimney lift, by which the lamp can be lighted without removing the chimney; is operated by a lever which never gets hot, and locks itself so that it stays up until the lever is reversed. The insignificant filling button is done away with and a larger feeder cap is used, by which the fount can be filled without the

use of a funnel. The gallery (or top part) is screwed in, and by carrying the perforated metal up close around the wick tube there is no dirt pocket and no possible chance of odors from refuse and wick clippings. The New Rochester Double Over-cone is used, which gives a double circular flame. The old reliable wick lift is used, whereby the draw-bar with sleeve and wick can be taken right out of lamp altogether. This lamp gives a light equal to 400 candle power, and is furnished in brass or nickel, is 10¼ inches high from bottom to top of burner, holds a full gallon of oil and will burn ten to twelve hours."

There has recently been added to the library of the New York Hardware Club a handsome filing case for the preservation of trade papers and other periodicals. It is of mahogany, in keeping with the finish and furniture of the room, is 5 feet in height, 3½ wide and has a depth of 17 inches. It contains forty-eight compartments, and over each is the name of the journal which is to occupy that portion, lettered in black on silver plates. This handsome addition to a very handsome room was designed and constructed under the direction of the chairman of the library committee, Alfred D. Clinch. It most admirably serves the purpose for which it is intended.

In the manufacture of linseed oil, the seeds are crushed between a number of revolving rollers, and ground to a fine meal under heavy edge stones, upon a stone bed.

ILLUSTRATED BICYCLE NOVELTIES.



MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Adjustable Handle Bar.

The Adjustable Handle Bar here shown is manufactured by the Ariston Mfg. Co., Westboro, Mass., and the Hoole

Machine & Engraving Works, No. 83 Reade Street, New York, are agents for New York, New Jersey and Connecticut. The advantages of this Bar are that the handle can be raised up and down without loosening in the steering head. In raising and lowering, the cork handles swing in a circle, and so retain their relative positions and the cork handles never get in a perpendicular position. The Bar is bent forward so as to be entirely out of the way of the rider's knee, and an elevation of eighteen inches can be had without an unsightly bar sticking out of the steering head. Correspondence from the Hardware trade is invited.

The Bi-Gear.

The Brown-Lipe Gear Co., Syracuse, N. Y., are introducing a new Changeable Gear which can be instantly increased or decreased at any speed. The gear is entirely contained in the hub of the rear wheel and adds only a pound in weight to any wheel. In Fig. 1 the gear is shown in high speed position, the sprocket wheel in clutch with the hub of the rear wheel, both revolving at the same speed. Fig. 2 shows the low gear position, a portion of the clutch flange being broken away to show the parts clearly. The manufacturers state that "the device proper consists

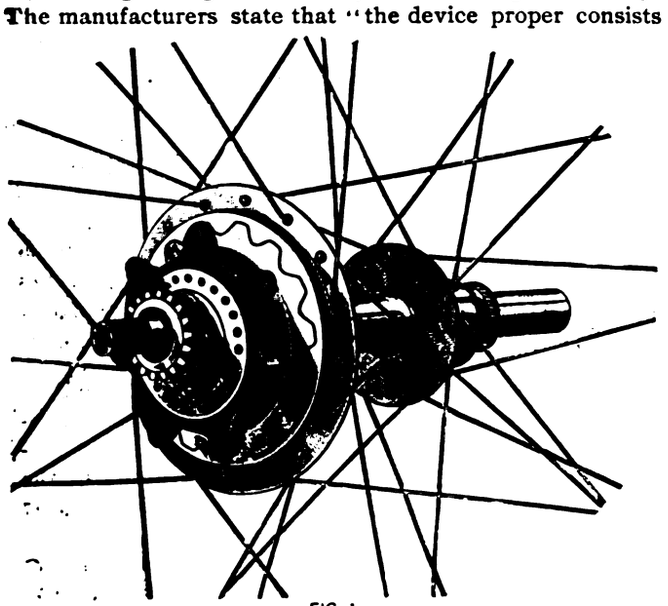


FIG. 1.

of an internal gear, built in the hub of the rear wheel. This hub also contains a clutch. The sprocket wheel is mounted on ball bearings independent from the wheel. The inner end of the sprocket projects into the hub of the wheel and is provided with a spur gear and also a set of clutch teeth. By means of an eccentric on the shaft, this sprocket may be brought into the gear of the wheel, in which case the low speed is obtained; or it may be thrown into clutch with the clutch teeth in the hub for the high speed. The switching from high to low gear is accom-

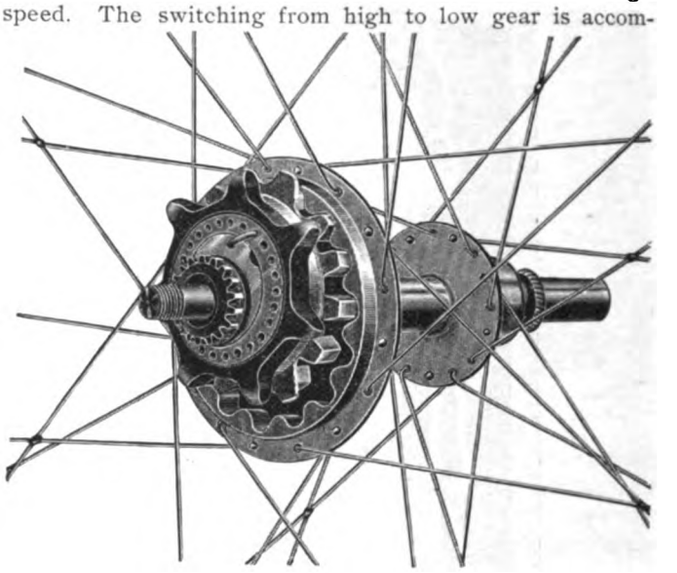

FIG. 2.

plished by means of a small rod extending from the sprocket wheel up to the frame in front of the rider. The ratio of speed is as 5 to 4; viz: a wheel geared to 70 for high speed would be geared to 56 for low speed. An intermediate position between the two positions of the sprocket wheel releases the sprocket entirely from the wheel, thereby freeing the pedals so that they may remain stationary if the rider wishes to coast."

The Morse Roller Joint Bicycle Chain.

The Morse Spring Co., Trumansburg, N. Y., are introducing a Roller Joint Bicycle Chain, as seen in the accompanying illustrations. Fig. 1 shows the Chain. Fig. 2 shows the construction of the Chain and an enlarged view of side link and roller joints. Fig. 3 shows the Chain dissected. This Chain is described as follows: "The roller joints in these Chains are actually perfect roller bearings, each of which consists of two rolling pins made of the finest tool steel, carefully hardened. These pins are arranged side by side in the cylindrical holes in the centre links of the chain, and are adapted to roll against each other as the joints are worked. The shorter of these pins is provided with a cylindrical rolling surface and is wholly contained within the centre links, but the longer pin extends through the side links and is provided with a plane rolling surface,

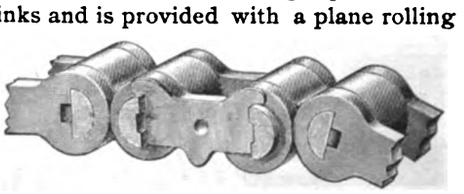

FIG. 1.

arranged perpendicular to the length of the side links. This perpendicular arrangement of the plane rolling surface is important, as it avoids all tendency to slipping or sliding between the rolling surfaces of the joint. This is easily seen to follow from the fact that the side links do not rest on the sprocket wheels, and therefore the force due to the tension of the chain always acts in the direction of their lengths and therefore perpendicular to these plane rolling surfaces. This form of roller bearing, consisting of a hardened cylindrical surface, rolling on a hardened plane surface, has a great advantage over a ball bearing, so far as its capacity to work under great pressure is concerned, for while the balls present a point only for a rolling surface, our bearing presents a line the full length of the cylindrical

Digitized by Google

rolling surface. Actual tests have proved that the roller joints in the five-sixteenth inch chain will stand a working pressure of over 900 pounds without showing any abrasion of the rolling surfaces. Since the maximum tension of the

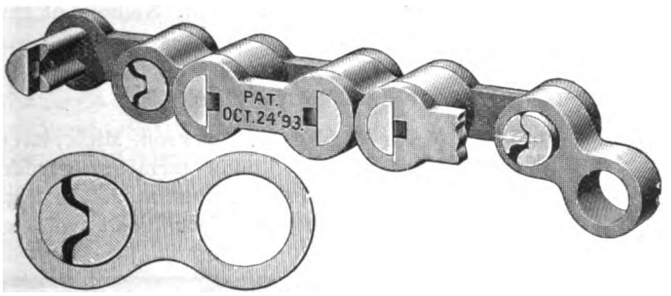

FIG. 2.

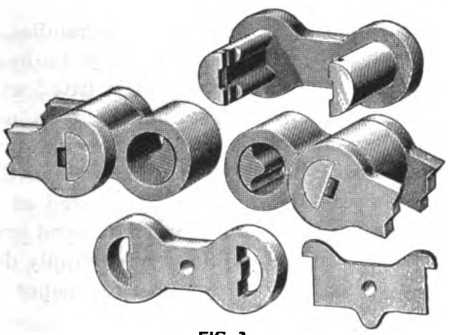
chain on a bicycle is rarely more than 600 pounds, this test proves the durability of these joints. These roller joints are frictionless, will not wear and need absolutely no lubrication of any kind. The side links are securely attached to the long rolling pins by having the ductile metal of which they are made, forced into niches provided in the ends of these pins. The centre links are hardened to prevent wear



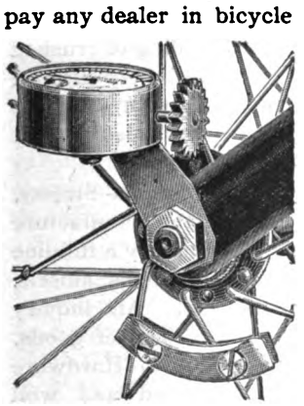


FIG. 3.

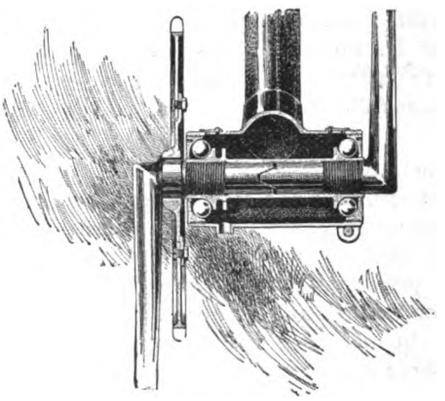
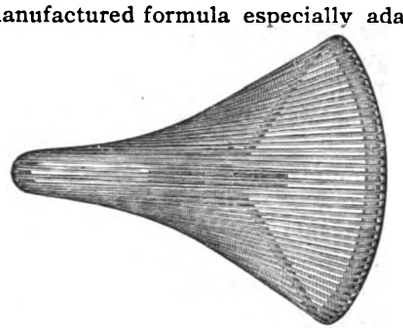
on the outside from contact with the sprocket wheels. The chains are made true as to pitch and will remain true. The chain is uncoupled by sliding out the spring clincher plate, then removing the side link back of it. The opposite side link, with seat pins attached, can then be easily removed, and the chain uncoupled."



The "Little Gem" Cyclometer.

The American Indicator Co., Lawrence, Mass., are successfully manufacturing the "Little Gem" Cyclometer here shown. They describe it as an instrument that it will pay any dealer in bicycle accessories to handle. Its special features of merit are its size, weight, price, and the small amount of power required for its operation. The makers guarantee that it will register correctly at any speed; will not rattle, and will stand considerable hard usage. They offer to repair it free at any time during the present year, if the postage is sent for its return, which is a very good guarantee of their faith in its good qualities. The price is but $1.25, with a discount to agents, and they will be pleased to send detailed information to any who may take an interest in the "Little Gem."

Columbia Crank Shaft.



The illustration which appears here represents the mechanism used by the Pope Mfg. Co., Hartford, Conn., in the construction of the crank shaft of their Columbia bicycles. The manufacturers explain that "the cranks and crank shaft are in two parts, each half of the shaft with the crank being forged in one piece. The cranks are of the very best hardened spring steel. The strength of the shaft and cranks is figured on a theoretical basis—the same as the strength of the crank for any engine is determined; and the cranks are then made to stand the requirements. The spider, or centre, of the sprocket is keyed and then brazed to the shaft, and the cranks and spider are afterward clock-spring tempered. The cranks and sprocket have stood without the slightest injury a test of 400 pounds applied to the

centre of the pedal in order to subject the whole to a combined twisting and bending strain. The shaft is joined by a V-joint combination within a sleeve. This sleeve is a forging, the ends of which form the cones of the bearings. To assemble this mechanism, the sleeve, balls and cases are put into the bracket and adjusted. A key, put through a hole in the bracket for this purpose, fits in a slot in a flange on the sleeve and holds it stationary. The cranks, held in proper relation with each other at the start, are screwed into the sleeve on right and left-handed threads, until the V-joint engages, the turning being in the forward direction. As will be noticed, this combination makes a secure engagement, and renders it impossible for the cranks to be in other than perfect alignment. In adjusting the bearings, the case on the sprocket side is held stationary by being screwed tight against a shoulder. The opposite case is secured in its adjustment by an improved binding bolt device. To allow of this adjustment, the barrel is made thinner, and not slotted, thus rendering these bearings absolutely dust-proof. The adjusting case is made extra heavy to permit of a secure clamping without warping it. The balls are three-eighth-inch in diameter, with ten on each side. Both the cases and cones at their working surfaces are spherical in form, which gives the balls a direct rolling action and the least number of points of contact. The width between the ball centres is three inches. The tread—the term generally accepted being from faces of the cranks at the shaft—is 5 7-16 inches on the regular wheels, and 5⅛ inches on the racer."

Spring Wire Saddle

The Spring Wire Saddle introduced by the Climax Mfg. Co., East Hampton, Conn., is a genuine novelty and a decided departure from the construction heretofore obtained in saddles. Instead of having a leather top it is made of fine springs of best quality spring steel made of two-ply wire, from the manufactured formula especially adapted to the

purpose; contains 18 per cent. sterling silver, the metal being noncorrosive and guaranteed against rust. This saddle "insures perfect circulation giving a perfectly dry and cool seat, the springs are very easy and elastic yet of sufficient rigidity, and they never sag."

New England Hardware Dealers' Association.

The adjourned annual meeting of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, on the evening of March 13th, President Thompson, of Lowell, Mass., presiding. The first business brought before the meeting was the election of the following new members: Thomas W. Brown, of Boston; Geo. J. Collins, firm of Brockway & Smith, Lynn, Mass., and Edgar H. Bowers, of Gallin, Orr & Co., Needham, Mass. The chairman then called for the secretary's report, which was as follows:

SECRETARY'S REPORT.

Since the last annual meeting there have been nine monthly meetings of the Association, with an average attendance of seventy; ten meetings of the executive committee, six of the pricing committee; one meeting of the executive, pricing and investigating committees combined, and one of the Boston members. The secretary has attended all the meetings, and is happy to state that the proceedings were of a very harmonious character, every member seeming eager to promote the general welfare of the Association. Twelve applicants have been admitted to membership, nine persons have withdrawn, and one, Mr. Henry O. Stratton, has died, leaving more members in the Association at the close of the year than there were at the beginning. When we consider the general depression of business, the reduction of prices, and the falling off of trade, requiring the practice of the strictest economy, I think it is a subject of congratulation that we find our Association in such a flourishing condition. There are doubtless many Hardwaremen in New England who are waiting for the times to improve before sending in their applications for membership. At the majority of our monthly meetings we have been entertained by speakers outside of the Association, as well as by musical performers, all of which contributions were highly appreciated. Commencing with our October gathering we have relied on our own members to entertain us in the discussion of the following subjects: "Is it for the best interests of the retail Hardware trade to send out drummers?" "The necessity of stopping the sale by jobbers and manufacturers direct to the consumers;" "The lien law for materials furnished in the erection, alteration, or repair of buildings;" "Does advertising pay the retail dealer?" It was interesting to hear the views expressed by the different members, and as a whole the discussions were well received and very instructive. Gentlemen of this Association, allow me to say in closing, that I know we have succeeded well thus far, but we want a larger membership; will you do your part to this end? If each of you will obtain a new member, it will increase our numbers to the extent to which we ought to attain. Respectfully yours,

JAMES A. FARLESS, Secretary.

The treasurer, D. Fletcher Barber, then submitted his report, showing that the Association financially was in a healthy condition.

The chairman then called for the report of the nominating committee, composed of the following members: George W. Burditt, John C. Holden, S. D. Balkam.

The following list was submitted for office for the ensuing year:

President: Hiram G. Janvrin, of M. C. Warren & Co., Boston.

First Vice-President: Thomas H. Baldwin, of Baldwin, Robbins & Co., Boston.

Second Vice-President: Edward A. Loomis, of Belcher & Loomis, Providence, R. I.

Third Vice-President, John B. Hunter, of John B. Hunter & Co., Boston.

Secretary: James A. Farless, of Boston.

Treasurer: James L. Work, of J. W. Vinal & Co., Boston.

Directors: Samuel H. Thompson, of Thompson Hardware Co., Lowell, Mass.; Frank R. Washburn, of Taunton, Mass.; Anthony S. Morss, Boston; Albert M. Gardner, of A. M. Gardner Hardware Co., Boston; John C. Holden, of Holden & Robinson, Hudson, Mass.; D. Fletcher Barber, of Chandler & Barber, Boston; Calvin M. Nichols, of the Hoyt Co., Dorchester, Mass.

Two New Potato Hooks.

The Withington & Cooley Mfg. Co., Jackson, Mich., have added to their great and famous line of farm and garden tools, the two new Potato Hooks here illustrated. In Fig. 1 may be seen their No. 10, which has four broad oval, ex-

FIG. 1.

tra heavy, eight-inch tines, with five-foot handles. In Fig. 2 may be seen their No. 11 Hook, which has a heavy goose neck, seven-inch wide oval tines, and is fitted with a 4½-foot handle. The makers describe them as useful and handsome implements, made of first-class materials, very strong, and especially popular with the trade in the South. They are finished in blue, and are both listed at the same price. The company will be pleased to send prices, etc., to any who may be interested, and also supply desired information as to the kinds they make for paper mills, and

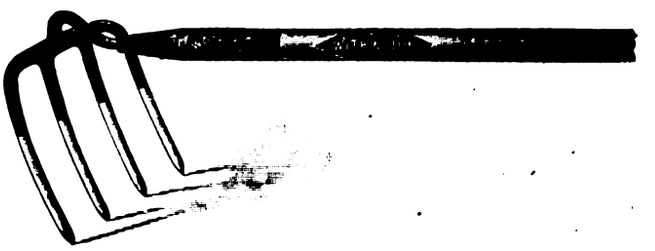

FIG. 2.

those for the foreign trade. They also have a line of clam hooks or diggers. In their line may be found eighteen varieties of Hooks, among which are mentioned weeding hooks, those for manure, hops, or the handling of crushed stone in road making. The company stand very high in their line of manufacture, and their goods go not only into all parts of America, but abroad in large quantities as well.

The L. & I. J. White Co., Perry and Columbia Streets, Buffalo, N. Y., are especially successful in the manufacture of Edge Tools and Machine Knives. They carry a full line of edge tools, coopers', carpenters', and ship tools, chisels, plane irons, draw shaves, cleavers, etc. An inquiry addressed to them regarding any of these lines of goods, will bring information of special benefit to Hardware dealers. The company are long established and well known, and stand very high in the estimation of the trade.

Alfred Field & Co., No. 93 Chambers Street, New York, desire to inform the trade that they have received their season's stock of the celebrated solid and riveted back Grass Hooks, riveted back Scythes and Straw Knives, made by W. K. & C. Peace of Sheffield, for whom they are agents, and will be glad to supply the trade with these superior goods at low prices. The bulk of the grass hooks sold are not tempered, and it should be noticed that these goods are properly tempered.

NEW ENGLAND IRON & HARDWARE BANQUET.

The Annual Banquet of the New England Iron & Hardware Association was given at the Exchange Club, in Boston, on the evening of March 19th, and it is needless to say that both as to attendance and the character of the entertainment offered, it was one of the most successful and thoroughly representative gatherings of the character ever held by any association in the country.

The arrangements were in the hands of efficient gentlemen who have had experience in this direction, and their efforts, both for the comfort and pleasure of their guests, were carried out with great success to the minutest particular. Those having the matter in charge in its various departments, and who constitute the officers and able committees of the Association, were as follows:

President: Edwin L. Haley.
Vice-President: Albert M. Wiley.
Treasurer: Charles H. Breck.
Secretary: Frederic H. Butts.

Directors: Charles H. Bolles, Joseph K. Whipple, Charles Clark Adams, William Chamberlain.

Committee on Banquet: Charles Clark Adams, Albert M. Wiley, Charles H. Bolles.

Reception Committee: Joseph K. Whipple, Leon C. Carter, Frederic A. Walker, Roland H. Boutwell, Dudley H. Bradlee.

A great many visitors, not only from points in Massachusetts outside of Boston, but also guests and visitors from other points in New England, New York and the South and West, were present. Many of these gentlemen were in Boston during the day preceding the banquet, and were entertained in a highly hospitable manner by their friends of the trade in that city. At five o'clock a reception was tendered the guests by the officers and the committees at the handsome club rooms of the Exchange Club, on Milk and Batterymarch Streets. An hour was spent in social converse and in listening to the music of a most excellent orchestra. At a few minutes after six o'clock, the gentlemen were escorted to the dining-room of the club on an upper floor, and the sight which presented itself on entering the club room, was very attractive in an artistic sense. The arrangement of the tables, with the location of the guests, may be discovered by a glance at the accompanying diagram. The tables were loaded with flowers, and the room was appropriately decorated with flags, etc. In the further end of the room the Boston Instrumental Club occupied an advantageous position, and from time to time during the evening rendered not only the music found in the following programme, but also interspersed "Dixie" and such patriotic airs as seemed to befit the occasion:

1. MARCH. St. Valentine's, - - - *Wiegand.*
2. OVERTURE. Mons. Choufleuri, - - - *Offenbach.*
3. WALTZ. Madeleine, - - - - *Waldteufel.*
4. SELECTION. Cavalleria Rusticana, - - *Mascagni.*
5. CAPRICE. The Butterfly, - - - - *Bendix.*
6. SELECTION. Robin Hood, - - - *De Koven.*
7. LA CINQUANTAINE, - - - - *Gabriel-Marie*
8. GAVOTTE. Margherita, - - - *Mascheroni.*
9. SELECTION. Rob Roy, - - - *De Koven.*
10. MUSICAL SCENES FROM SPAIN, - - - *Langey.*
11. SELECTION. Erminie, - - - *Jakabowski.*
12. GALOP. Impatience, - - - - *Wiegand.*

When the gentlemen had taken their seats, the president of the Association, E. L. Haley, of Edwin L. Haley & Co., called them to order, and grace was said by the Rev. A. A. Berle, pastor of the Brighton Congregational Church, of Boston. An hour and a half then passed very pleasantly in the discussion of the elaborate menu which follows:

MENU.

Oysters.

Soup. Haut Sauterne.
Cream of Chicken. Consomme.

Relishes. Pale Sherry.
Celery. Olives. Radishes. Salt Almonds.

Fish.
Bass—Sauce Diplomate.
Potatoes Hollandaise.

Roast.
Filet of Beef—Varsovienne.
Saddle of Lamb—Vefour.

Entrees. G.H. Mumm's Ex. Dry.
Chicken—a la Toulouse.
Timbales Chevreuse. Moet & Chandon.
Pate de Foie Gras in Jelly.

Sorbet Cardinal. Cigarettes.

Game.
Black Duck—Lettuce Salad.

Sweet. Pontet Canet.
Orange Fritters. Frozen Pudding.
Fruit Jelly. Cakes.

Cheese.
Brie. Roquefort.
Fruit. Coffee. Cigars.

At 8:20, President Haley arose and announced that the time had come for the intellectual portion of the evening's feast, and the character of the same may be gleaned from the following:

PROGRAMME OF SPEECHES, ETC.

GRACE, - - - - - Rev. Adolph A. Berle.

"Some hae meat and canna eat,
And some would eat that want it;
But we hae meat, and we can eat,
Sae let the Lord be thankit."—*Robert Burns.*

GREETING. - - Mr. Edwin L. Haley, President.

"May the coming hour o'erflow with joy,
And pleasure drown the brim."—*All's Well That Ends Well.*

TOASTS.

1. THE COMMONWEALTH. - - Col. Henry A. Thomas.

My country, my country! Oh! there is a charm
And a spell in the word that makes every heart warm."
Rufus Choate.

2. HARDWARE ASSOCIATIONS. - - Mr. Edward Buford

"A business with an income at its heels
Furnishes always oil for its own wheels."
—*William Cowper.*

3. ARBITRATION AND CONCILIATION. - Hon. Asa French

"The end crowns all,
And that old common arbitrator, Time, will one day end it."
—"*Troilus and Cressida.*"

4. THE GOOD TIME COMING. - - Mr. R. R. Williams.

"Put your trust in God,
But mind to keep your powder dry."—*Edward Hayes.*

5. THE ARMY AND THE PEOPLE. Capt. John Bigelow, Jr., U. S. A.

"And through the heat of conflict keeps the law
In calmness made, and sees what he foresaw."
—*William Wordsworth.*

6. A BRASS FOUNDRY IN THE WILDERNESS. Rev. Adolph A. Berle.

"When Aaron made the golden calf, he used the gold which the people gave gladly enough.

"The modern Hardware man still takes the gold, but the other fellow furnishes the calf."—"*Original Cylinder.*"

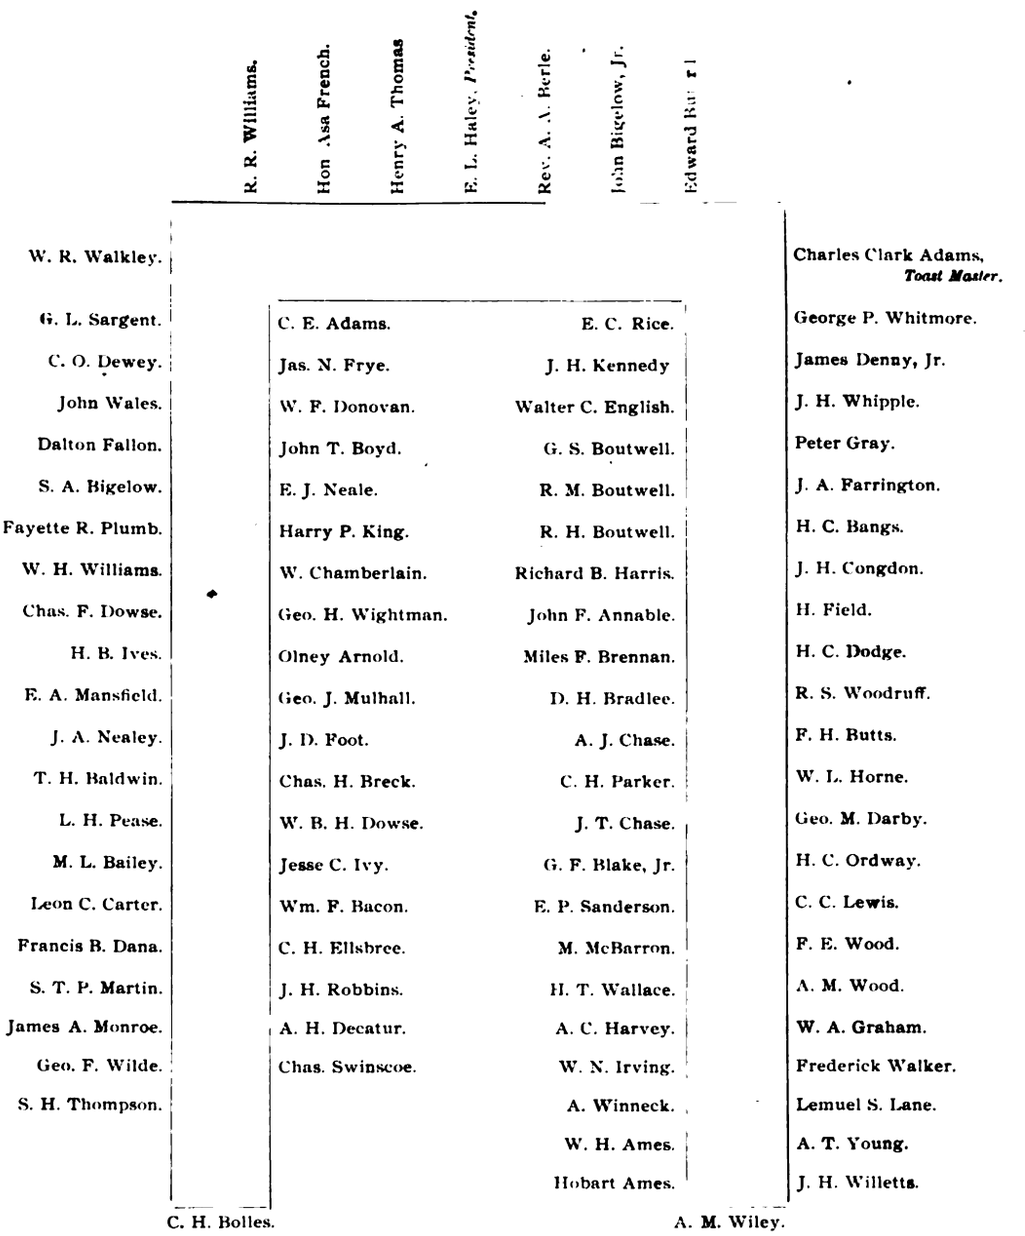
7. IRON IN THE BLOOD. - - Mr. Webster R. Walkley,

The brave man is not he who feels no fear,
But he whose noble soul its fear subdues.
And bravely dares the danger nature shrinks from."
—*Joanna Baillie.*

8. GOOD NIGHT.

"The bugles sound the swift recall,
Cling! Clang! Backward all,
Home, and good-night."
—*Edmund Clarence Stedman*

If you come in '96 you will never regret it.



Digitized by Google

At each plate was found not only a card containing the name of the guest who was to occupy the accompanying seat, but also a handsome little book, containing the names of the officers, menu, list of speakers, etc. The cover was handsomely embellished with the unique design shown in full elsewhere in this report.

Mr. Haley in his opening greeting to the members of the Association and their guests spoke as follows:

ADDRESS OF EDWIN L. HALEY, ESQ.

Gentlemen of the New England Iron & Hardware Asso-

ciation, and invited Guests: Another year has brought us round the social board, this being our second annual dinner, and first as a corporation, chartered and organized under the laws of the Commonwealth.

As we greet each other this evening I have no doubt the thoughts of many go back to those who were with us one year ago, who have passed over the river, and are now at rest from labor. I would certainly fall short of my duty if I did not call to your mind the genial and kindly spirit of Stratton; the sterling business qualities of Leeds; the social and always cordial greeting of Dana, who was cut off in comparative youth, and when such a field of usefulness was before him. Surely we cannot fathom God's ways, and must silently submit to acts of Divine Providence, knowing that in His own time all will be made plain.

During the month of July we were the guests of the Congdon & Carpenter Co. and the Perkins Horse Shoe Co. of Providence, R. I. None who were so fortunate at that time as to be under their charge, will ever forget their kindly treatment, and we are forced to admit that the State of Rhode Island, although small in area, is liberal and large in its hospitality. Again in the month of August we were invited to Portland, as the guest of the Hardware merchants. We were shown their beautiful city whose harbor is unexcelled, and through its natural advantages is destined to become one of the great outlets for the West and Northwest. We were royally entertained, and as an Association were convinced that the principles advocated by its celebrated reformer, Gen. Neal Dow, had the desired effect upon our members; and that the settling qualities, especially of "Apollinaris," far excelled our own Cochituate. Some of our members no doubt, have even forgotten its taste. (Laughter.)

I will not dwell longer upon the social side, but call your attention to our corporation and some of its advantages. I am not aware of such an organization existing elsewhere and doing its work upon the same plan as ours. The intent of our Association is to adjust any existing irregularities in the matter of prices, and to induce the manufacturer to co-operate with us, in order that a

Digitized by Google

fair return shall be afforded for the amount of capital invested.

Speaking from the side in which I am personally interested, unity and harmony has prevailed in our deliberations, and all has worked well. During the year the different houses represented have had good returns upon their sales, which more than repays them for the time and labor expended. Gentlemen representing light Hardware, it is for you to say what success has crowned your labors. Certainly you have had every opportunity and advantage given you to make your deliberations successful. Bear in mind, no one house can successfully control and gain supremacy over the small and less favored ones, and I would urge upon you, as an Association, the importance of harmony and unity of action, and to let your deliberations always be tempered with fairness, otherwise your coming together will result in no special good. Remember, prices once agreed upon and broken destroy the stability of values and sink them to a point where there is no money for anyone. I am of the opinion that our Association has attempted to carry too extended a list. It is better for you to operate well a few articles, than to strive to make an extended schedule and fail in the effort.

We labor under a number of disadvantages in having so many large cities, which have been made distributing points for the densely settled territory. I would, therefore,

PRESIDENT E. L. HALEY.

urge upon you in the coming year, to take such measures as will tend to induce the larger houses to join our Association, and maintain and profit by the prices which you may make from time to time; but just how this is to be brought about is for you to formulate and determine. I would suggest that New England have three Associations instead of two; their territorial limits defined by a joint convention, and the respective houses assigned to their proper organizations.

New England being unfavorably located in regard to the natural resources, I fear its future is not a brilliant one from a manufacturing standpoint, and I am reminded of the words of his honor the Lieutenant Governor, that the future must depend largely upon the finer and artistic grades of manufactured articles.

I cannot agree with the scholarly and brilliant ex-Governor who attributes the decay of the iron industry to tariff legislation. In my opinion, the decline of this particular branch in New England, is from natural causes. The tendency of to-day in our iron, cotton, leather, boot and shoe industries is to leave our borders and seek the home of the crude material which, with the inequality of our interstate commerce laws, works against all our manufacturers representing millions of capital.

The dockage facilities of the city of Boston are sufficient to handle all the business which now comes to this port, and ample for a rapid transshipment of a vastly increased commerce. Until the New York and New England Railroad Docks shall be transfigured from rotting disuse into a state of activity, the time will not be ripe for either the city of Boston or the State of Massachusetts to expend millions of dollars for improved docks. Rather let us try to induce our congressmen to secure for Boston more liberal appropriations to be expended for the improvement of our channel and harbor, and in making the entrance to Boston harbor as nearly equal to that of the port of New York as human ingenuity can contrive. As it is to-day, any of the large steamers or sailing vessels making Massachusetts Bay in a heavy storm are obliged to lay outside until good weather before entering.

Boston's future as a port for the transaction of foreign business depends entirely upon the activity of its citizens, and upon the growth of the territory east of Hartford and south of Montreal, as the Erie Canal will always land the greatest bulk at the lowest freight rates in the City of New York.

We are emerging from the gloom and darkness of national disaster and financial panic. Light is dawning upon thousands of factories and mines and business houses of the returning prosperity, and it behooves us as members of the New England Iron & Hardware Association, to stand in the light of the advancing beams, and to place our banner well in the forefront of the complete restoration of national and New England prosperity. (Applause.)

At the conclusion of Mr. Haley's address, which was listened to with close and interested attention, the active management of the evening was turned over to that gentleman who has so often shone with brilliant light in positions of this character—Charles Clark Adams, of Boston, who had been selected as toastmaster of the evening. Mr. Adams in assuming the responsible duties of this position made the following remarks:

TOASTMASTER ADAMS' ADDRESS.

Mr. President and Gentlemen: Allow me to congratulate you upon this delightful festival of the Iron and Hardware trade. Those who attended the dinner one year ago knew what to expect, and to those gentlemen who are with us to-night for the first time we extend a hearty welcome, and I sincerely wish that these meetings of our trade may result in warm friendships. Why should we insist upon meeting as competitors? I believe that as soon as the element of friendship shall be cultivated, many of the annoyances of competition will be dissipated, even as the dew disappears before the morning sun.

As my old friend Mr. Williams, President of the New York Hardware Club, so well quoted from Cicero two years ago: "Friendship is the only thing in the world concerning the usefulness of which all mankind is agreed." But my duties are not to make a speech. I thank you all heartily for this kind reception. It is an honor to serve such an association as this one in any capacity. (Applause.)

We have with us to-night several speakers, who are to address us upon their chosen topics; but I want to call your attention to the recent reports from the great commercial centers as to the state of business, which say substantially that all indications of the state of business are rather more favorable. Farm products are a little higher, railroad earnings a shade better, clearing house exchange a small percentage larger in comparison with two years ago, and most of the industries show a somewhat better front, although their gain is not large.

Surely, my friends, with the promise of brighter business, the vigorous pluck and energy of the American people will again lead us to the pleasant, bustling days of prosperity.

As toast-master, it has now become my pleasant duty to introduce to you the speakers of the evening. Indeed, I may act in the spirit of the fly who bit the elephant on the tail. When the fly was asked whether he expected to kill

Digitized by Google

the elephant he said: "No, but I notice I made him look around." And the kind friends must endure introduction from the toast-master before entering into the joys of after-dinner speaking before these hard-headed though kind-hearted Hardwaremen.

It is expected that the speeches will not exceed fifteen to twenty minutes in length, that all may listen to them, and

TOASTMASTER CHARLES C. ADAMS.

yet be permitted to reach home before the midnight deadbolts are thrown. (Laughter.)

At the conclusion of his address, Toastmaster Adams, in a few fitting words, introduced Col. Henry A. Thomas, private secretary to the Governor of Massachusetts, who spoke upon "The Commonwealth" in the following eloquent manner:

REMARKS OF COL. HENRY A. THOMAS.

Mr. President and Gentlemen of the Iron and Hardware Association: Knowing something of the character and objects of your organization, it gives me much pleasure to accept your hospitality on this occasion and speak to the toast: "The Commonwealth of Massachusetts." I take it that you do not expect me to discuss questions relating to the Iron and Hardware trade of New England, but the name of your organization is suggestive of New England character and New England history. It required an iron constitution and strong courage on the part of our ancestors to fight the obstacles surrounding them on every hand, and to push forward in the work of organizing and creating a great Republic.

We hear much said to-day about the narrow policy and stringent laws of the Pilgrims, but it must be acknowledged that they were sturdy men and had the good of the State and nation at heart, and surely the grand result shows that they builded wisely. Without their example and their noble work, New England would not be what it is to-day—the proudest collection of commonwealths in the United States or any part of the globe. Times have greatly changed, but in all the work of politics, of education and humanitarian efforts, the country is not going backward, but we must hesitate before departing too far from the paths trodden by those men of old. We all believe in the Commonwealth of Massachusetts and are always delighted to hear her praised. Her history and her resplendent record of noble deeds are known to the world.

She has been true to the principles laid down by the founders of the government—true to education, patriotism and humanity. It cannot be said of Massachusetts to-day that she ostracises any of her citizens because of color, sect or religion, and we say shame on any Southern State which refuses to recognize or entertain a member of the Massachusetts Legislature because he happens to have a skin darker than their own. And her face has always been toward the morning. (Applause).

When Wendell Phillips was making his first great speech in Fanueil Hall before an unruly mob in behalf of Garrison, there was a moment when his courage almost gave way before the hisses and opposition of his audience, but just at that moment a card was handed to him upon the platform from his wife, which contained two simple words: "Wendell, stick!" and, catching the inspiration of that thought, he had his hearers under perfect control until the end of the meeting, and was the next morning hailed as one of the foremost orators of the country. So I say to the men of this organization, stick to the objects which you have undertaken to accomplish, and ever be true to the interests of New England and her great industries. (Applause). Whatever tendency there may be at the present time of our cotton mills and other industries moving to the South it is only temporary, for the finer products of our mills and factories must always be furnished by the skilled labor of New England, which has already proved itself able to compete with people of any part of the world.

Standing upon the State House steps, we can refresh our minds with the history and deeds of Massachusetts men; we can behold Dorchester Heights, which was fortified by Washington to defend Boston against the attack of the British; we can see the steeple of the Old South Church pointing to heaven, telling the story of the patriots who from time to time have gathered within its walls; we can see historic Bunker Hill monument telling of the glorious fight made by our ancestors in the time of our nation's crisis, and inside the State House we can look upon the old

COL. HENRY A. THOMAS.

battle flags covered with the blood stains of heroes; and in all these pictures and events we acknowledge an inspiration that is bound to fortify us against any trials or crises which may arise in the future, and Massachusetts will always stand at the front. We believe in her sturdy character, and it is for the business men of Massachusetts to see that politics are kept clean, and that the men who properly represent your industries and the best interests of New England are

Digitized by Google

sent to Congress as your representatives, and see to it that in the caucuses and at the polls you are on hand to do your full duty as citizens of this great Republic.

Whatever our differences in politics, society or religious matters, we can stand together upon the rock of patriotism. The first duty of every American citizen is to his God, and the next, to his country. So long as we adhere to that doctrine, Massachusetts and the country are safe. We have admitted to our shores too many men not in sympathy with our institutions, who are liable to combine and menace the prosperity of the Republic. The time has come when a new policy should be inaugurated. And while we welcome men from all climes to the privileges of this free government, we must say to them at the outset: Subscribe to the Constitution of the United States, maintain the principles which have made us great as a nation, and swear allegiance to the Stars and Stripes. (Applause). And Massachusetts, as the bright particular star of the New England States, stands now, as she ever has, a Gibraltar of defense against the inroads of anarchy, corruption and misrule, while from the pinnacle of her fame she floats the white flag of freedom

MAJOR EDWARD BUFORD.

which invites the country to the full confirmation of the enlightened civilization which beckons to us from the future.

When the applause with which the conclusion of Col. Thomas' speech was received, had subsided, the toastmaster introduced Major Edward Buford, a member of the firm of Buford Bros., dealers in iron, steel and Hardware, of Nashville, Tenn., who had come from the South for the express purpose of attending this gathering, and to voice his views as to the present attitude of the South toward the North and the Union. As Mr. Adams himself had been a soldier upon the Union side, his introduction of Major Buford paved the way for the patriotic sentiments which the gentleman last named uttered in so emphatic a manner, and an audible smile went around the audience when the speaker referred to Major Buford as "the only private that was ever in the Confederate army." Major Buford's topic was "Hardware Associations," and he spoke as follows:

ADDRESS OF MAJOR EDWARD BUFORD.

Gentlemen of the New England Iron & Hardware Association: As the man said when he fell out of the balloon, when it comes to talking, I am not "in it," and for fear I shall have an attack of "stage fright," or, as it is known in the South, "buck ague," and forget what I want to say, I have committed some things to paper.

As you well know, the Hardwareman is not a talker. He will tell you a good story, "cut the pigeon wing" or "double shuffle," but if you stand him on his feet to talk, he is "as dumb as an oyster." There is not a Chauncey Depew in the whole fraternity. No! not one! It can never be said of him as the parrot said of himself, that he talks too much. You have all, no doubt, heard the anecdote, so I will not stop to tell it to you.

I am reminded to-night of the remark made by the man who had been knocked down by the town bully; picking himself up from the middle of the street, and brushing the dust from his clothes, he said to the crowd which had collected on the sidewalk: "Boys, fighting is agin my principles, but if anybody will lick this fellow for me, I will pay the fine." (Laughter.) I make the same offer to-night—if any gentleman in the room will do my talking, I will furnish the applause. (Laughter.) No response!

I have chosen to talk to you to-night about Hardware Associations, because I am an enthusiastic believer in the good which can be accomplished by working together in such organizations. In my opinion, trade associations furnish the only remedies which we can rely upon for the eradication of the pernicious practices which have attached themselves like barnacles to the Hardware business. Unless we make up our minds to work together, we can never hope again to realize profits commensurate with the detail and labor which devolves on those who are engaged in selling Hardware.

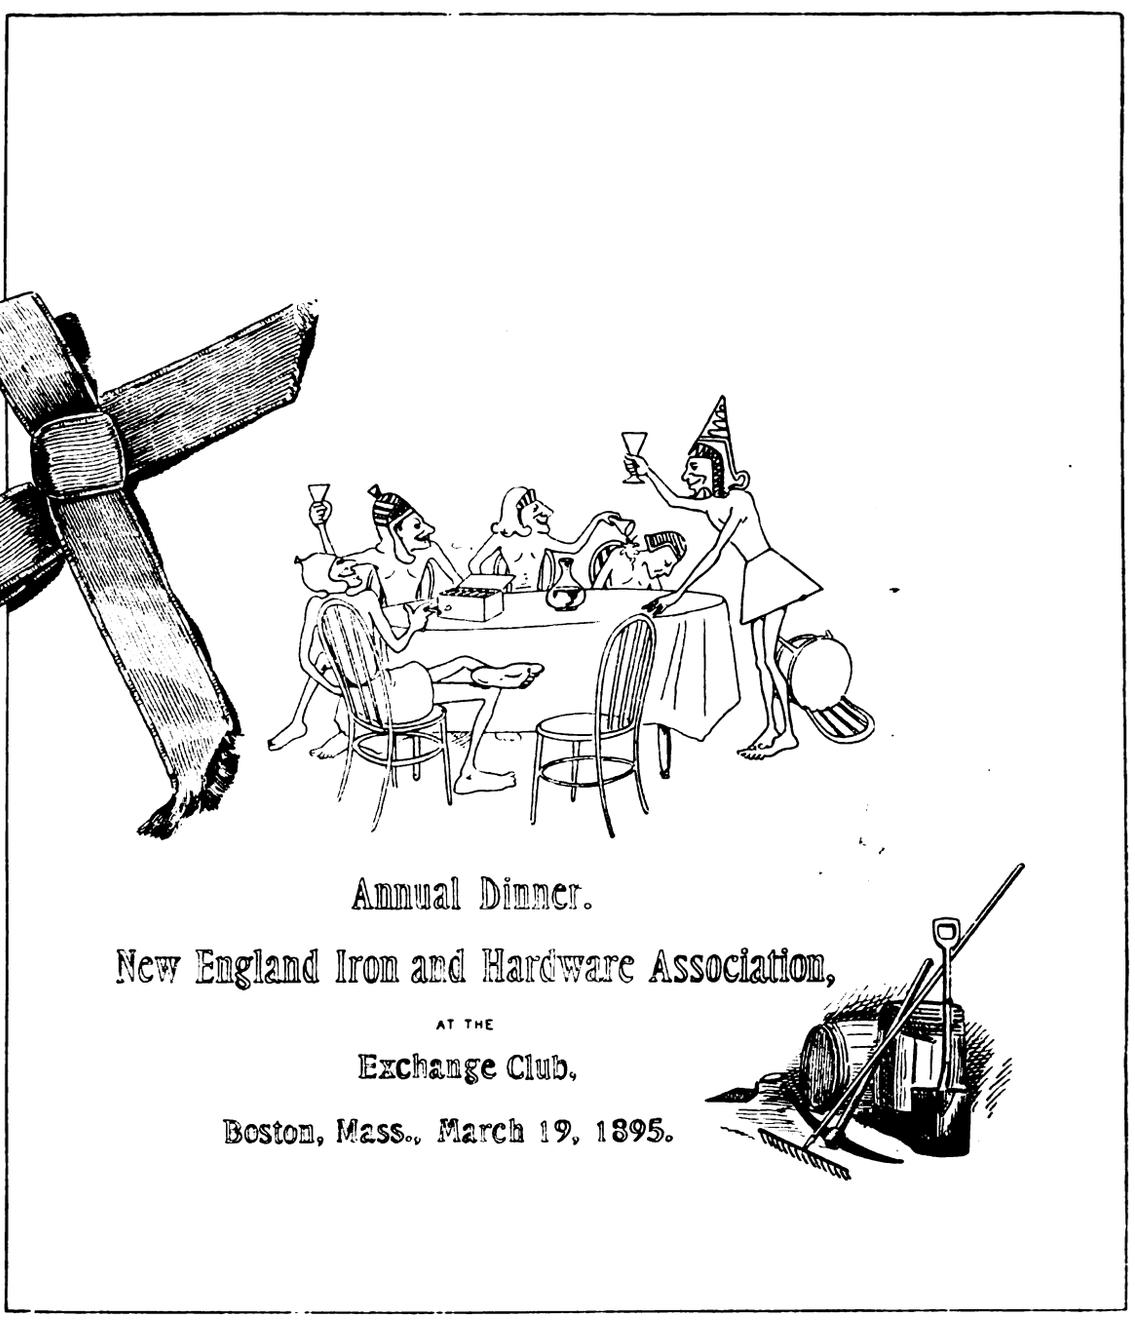
It may be that this subject does not appeal so directly to you as it does to us in the South, because being rich and prosperous, you are not compelled to chase the nimble penny as we have to do. In these days, the penny is the unit by which we measure our profit—a profit so small and illusive, that, like the "Irishman's flea," when we put our finger on it, it is not there.

Last June, when the Southern jobbers met at Richmond, Va., in making a report for the committee of which I was chairman, I offered some figures which were literally true and should convince even the most sceptical that our way out of the difficulties which beset us, lies through Hardware Associations.

At that time, our local Association had been working perfectly for more than a year. I had taken from the books of the six houses in Nashville the quantities of the following staples: Wire Nails, Burden's Shoes, Plain and Barbed Wire, which had been sold, and the average price during the previous twelve months. After going over the matter carefully, and making the most conservative calculation possible, I found that on those four staple articles we had cleared $35,000 or thereabout. These are, beyond question, four of the most staple articles sold by the Hardware dealers in the South. It was the opinion of the members of our Association that under ordinary conditions our combined profits would not have reached $5000. Some of the more conservative thought even this too high an estimate. It has always been a question in my mind whether or not we make any money on the four items mentioned. I feel certain we do not if we charge them with their legitimate proportion of the expenses of doing business.

The sum of $35,000 divided among six houses in proportion to sales would go very far towards paying house rents, taxes, insurance, and at least a part of the losses by bad debts. I think you will agree with me that this is a remarkably good showing on articles which usually net a loss.

By adding thirty or forty other staples, and forcing our men on the road to sell at our fixed prices, we found at the end of our fiscal year (after finishing our inventories) that the balances were on the comfortable side of the ledger, which would not have been the case if we had no Association.



Digitized by Google

I trust no one will ask me to-night if our local club is still in force; and if not, why not? If I should be asked the question, I would be compelled to answer in the negative, but I could give no good reason why the club fell into pieces, unless it be that a feeling of jealousy has grown up in our midst, caused by an impression on the part of some of the larger firms that at equal prices, the smaller houses were given a prominence before the trade to which they were not entitled.

I am frequently impressed that jealousy and personal spite are very potent factors in selling goods in these days. The desire to prevent a competitor from making a living profit on his goods seems to be as much desired as it used to be to make a handsome profit for oneself. This is a "dog in the manger" feeling against which every man who does a legitimate business should set his face. Personal spite is the result of unscrupulous competition, and unscrupulous competition comes from a selfish indifference to the rights of others. Local Associations should be encouraged, if for no other reason, because they will restore the good fellowship which once characterized the Hardware fraternity.

There is no reason why two Hardwaremen should meet on the street, and if they speak at all, look as if a bad taste had been left in their mouths. (Laughter.) In some places I could mention, the members of the different houses do not speak when they meet on the street. We have not carried it so far as this in Nashville, and while our Association was in force there was a marked improvement for the better. It reminded me of the good old times long ago, when there was a cordiality of manner, and a look in the eye that carried conviction that there was no malice. They say I am not "up to date" and call me "'way back Buford" (Laughter), but I sincerely wish that there were as many things to attach one to the business now as there have been in the past. Let us get back to those good old days as soon as possible.

The meeting of the local clubs furnishes an opportunity for interchange of thought and comparison of methods, which are frequently very beneficial. Then again, the members can charge each other with any sharp practices which may have been perpetrated, and can then and there lay the blame on the poor traveling men. The traveling man is an autocrat, but he is not to blame for many of the things with which he is charged. He, in most cases, merely reflects the demoralization which exists in the office of his

Digitized by Google

employers. Having been a traveling man myself, I am disposed to be very lenient towards his faults, but I must confess that some of them can find ways to make us swear enough in a week, to keep us on our knees for a month at least. (Laughter.)

If the dealers will meet together and be honest with each other, I have no fear for the result.

Manufacturers have not been blameless, and have added their full share to the demoralization by allowing jobbers to dictate prices and terms to them. They should have learned before now that no matter how low they may make prices, they cannot sell all the goods, and if they break a price, some other manufacturer will cut off another slice. Whenever they call a halt and stop cutting prices, the first step towards a better condition of things has been taken. I would not have you regard me as a pessimist, for indeed I am not one, but I have often despaired of ever seeing the Hardware business worth doing again. I have seen the time when, if I had an enemy and wished him harm, I would have procured for him an interest in the Hardware business.

VICE-PRESIDENT A. M. WILEY.

Nothing but a funeral or a sheriff sale would ever release him.

We of the South look to you for our methods in business, and we look to you to evolve some means by which we can get ourselves in position so we can enjoy the good time which is coming, about which Mr. Williams will tell us directly. Maybe you can tell us how we can sell goods at cost and make money. We have worked on the lesson diligently for more than two years, but I am afraid we will be like the horse which had been taught to live without eating—he died just as he had learned his lesson. But, gentlemen, this condition need not continue. The "light already begins to shine through the clouds," and if we will work together and forget our selfishness, everything will come out all right and we will again be proud of our chosen line. The main thing we will have to do will be to be sure and get first cost for our goods.

Before leaving home some of my friends said "don't talk of the war or politics in Boston," because the people there do not think as we do on these subjects, but a sentence in one of Adams' letters opens the way, and I shall disregard the advice. Because we differ in our opinions on any given subject, I see no reason why we should not discuss it dispassionately, and be as good friends after as before the discussion. (Applause.)

I want to say here, that I have never had any patience with many of the prejudices which were entertained in both sections of our country about the people in the other. My frequent visits North during the last twenty years, and a very pleasant business relation with many Eastern manufacturers and business firms, has taught me that there was never any foundation in fact for the old belief which was current in the South when I was a boy "that a certain man was as cold and selfish as a down East Yankee." Reserved and undemonstrative he may be, but I have always found that he has a heart as warm and generous as that which beats in the breast of any living man. (Applause.) If I had come to Boston, firm in my conviction that the old saying was true my reception here to-night would have obliterated it entirely.

The trouble between the North and South has always been that they see too little of each other. If we knew each other better we would like each other better. I have never known a Northern man who came South, unless he was a fanatic or a politician, who did not acknowledge that his prejudices had been removed, and the same thing is true of the Southern man who goes North.

It is of the war that I most want to talk to you to-night, to say to you that in meetings like this, you are doing a missionary work, which is far more effective than all the sermons that have been preached since the close of the war.

The people of the North have always misunderstood the position of the Confederate soldier toward the Union. I was a soldier in the Confederate Army from the day Mr. Lincoln's proclamation was issued calling for his quota of troops from Tennessee, until Gen. Johnston surrendered the remnant of his army at the close of the war at Salisbury, North Carolina.

This service taught me to respect the courage of the Northern soldiery, and I hope, and believe, that we taught them the same lesson. (Applause.)

When I laid down my musket and took up the duties of the citizen, I did so with the understanding that the past was buried, and I thank God that I brought home with me no bitterness—no desire for revenge. I number to-day as many friends among the men who wore the blue uniform as I do among those who wore the gray.

I am not here to-night to discuss the constitutionality of secession. I do not know—nor do I care now—what the merits of the question were. What interests me most is that the question is settled—settled forever, and the word "secession" has been abolished from our vocabulary. (Applause and cheers.) You do not rejoice more over the sentiment than we do, nor would you do more than we will (if it should ever be necessary again) to preserve the integrity of the Union. (Applause).

My State being one of the border States was opposed to secession, but when the war was declared we were forced to take one side or the other. Our friends and property were all in the South, and we did not hesitate to cast our lot with the people of the South. Our brother was in trouble, and we did not stop to ask who was in the right, but went to his aid, and in my opinion we would have been unworthy of the name of American if we had done otherwise. (Applause.)

I gave four of the best years of my young manhood to the cause, and I have never seen the time or place when it was necessary to blush for what I did during the war, or to apologize. We did then what we believed to be our duty, and we believe so yet. How well we did that duty, some of you can bear testimony. Call us rebels—traitors—if you will, but I maintain here to-night that no soldier ever offered up his life for his country who was actuated by higher or purer motives of patriotism, than were the sol-

Digitized by Google

diers from the section which I represent. No fanatic, no mercenary would have endured hardships and dangers for four long, bloody years without murmuring, as did the Confederate soldier. Now did any army ever endure such privation for so long a time? (Applause). This beautiful menu, ample and delicious as it is, has not afforded me half the satisfaction I have on more than one occasion enjoyed while eating an ear of raw corn snatched from the caisson of a passing battery of artillery. The true history of our difficulties has not yet been written, and I doubt if it ever is.

It may give you some idea of the inequality of the struggle when I tell you that if all the troops which were enrolled on each side during the war (2,700,000 on the Federal side and 600,000 on the Confederate side), had been drawn up in opposing lines of battle, there would have been enough of the Federals to have placed an army of 600,000 on all four sides of the Confederates, and still have left a reserve (300,000) half as strong as the whole army of the confederalty. Yet with this difference staring us in the face we struggled on through four long years.

You may differ with us on this question, but you cannot donbt our honesty of purpose as we offered up our lives as an evidence that we thought we were in the right. (Applause.)

Nor have we ever murmured at the result. We took our cause into aur own hands and lost, and have accepted the result in good faith. Secession is settled forever, and I declare here to-night that it is worth all the treasure of blood and money which it cost to set at rest a question which would have constantly arisen to vex us. (Applause.)

The greatest need of the country is a strong government. You cannot make it too strong for us in the South. There should be a standing army of at least 100,000 men, and it should be not only the privilege but the duty of the general government regardless of State rights to step in, no matter what the disturbance may be, riot, mob or strike (applause), and teach the lawless element that liberty does not mean license. In no other way can the demoralization produced by weak and unscrupulous officials be neutralized.

Looking back over the past thirty years of peace, I say as God is my Judge, that if I could by signing my name effect a separation of the two sections I would not do it. Standing in Boston, the "Cradle of Liberty" under the shadow of your glorious monument, I declare with pride that the soldiers from the section I represent concede to no people of the United States a greater love for the Union than we feel, and we will do as much to preserve it. Our forefathers fought side by side with yours in the war for independence, and left us an equal legacy in Bunker Hill and King's Mountain.

If the time should ever come when it would be necessary for the United States to call upon her sons to take up arms in her defence, you will see that we mean what we say. You will march to the tune of "Yankee Doodle" and we to that of "Dixie," but our aim will be the same—the maintenance of the rights and liberties of the American people as symbolized in our common flag. (Applause.)

This night will always remain with me as one of the pleasant memories of my life. I shall never cease to thank you, and to congratulate myself that I did not decline, as modesty prompted me to do. If, when the last roll has been called, and taps have been sounded, I should find the "Pearly Gates" closed to me, I shall not complain if I shall be allowed to sojourn in Boston. (Laughter.)

The next address was that of Hon. Asa French, of Boston, who was a member of the Alabama Claims Commission, and was therefore eminently fitted to speak upon the subject of "Arbitration and Conciliation." His address was as follows:

SPEECH OF HON. ASA FRENCH.

Mr. President and Gentlemen: Upon the receipt of your very complimentary invitation to be present on this interesting occasion, I was much embarrassed in finding any good reason for trespassing upon your hospitality. My profession, unfortunately, has not helped to familiarize me with Iron and Hardware to any great extent, and of course I cannot be expected to instruct experts upon those subjects. But upon the assurance of Col. Adams, the gentleman of your committee who conveyed the invitation, that any subject of remark however foreign to the trade, would be acceptable here, and that at any rate I was certain to have a good time, in regard to which I had no misgiving from the outset, I ventured to accept. Whether he intended that the assurance should be taken without qualification, or with reference to the possible condition of the members of the association present after such a banquet as has been spread before us, you can judge as well as I.

It occurs to me that there may be one bond of union between us, although a little remote. My first ancestor in this country settled in Braintree in 1634, and I now occupy a portion of the tract of land then granted to him, and

JUDGE ASA FRENCH.

which has remained in the family in direct line ever since, and I may fairly claim to be "to the manner born."

Now, within the limits of the present Braintree, in this State, originally including Quincy on the north, and Randolph and Holbrook on the south, was erected the first iron foundry in this country. The company was formed in England in 1642, and was called "The Company of Undertakers (rather a significant term, that,) of the Iron Works." It was the result of a careful search throughout Maine, New Hampshire and Massachusetts, by John Winthrop, jr., agent of the company, and afterwards governor of Connecticut, for the fittest place to establish the iron industry, and he finally gave the preference to Braintree. It is painful to record that for some years, at least, the undertaking did not prosper, and that one of the greatest troubles came from "unruly workmen," as they were styled. So history repeats itself, and in the disorderly conduct of the men at the first iron works in Braintree in 1647, may possibly be found the germ of the labor troubles two centuries and a half later.

I have not the time nor you the patience to go into details, but the fact can be demonstrated, and hence every iron and Hardware manufactory in the United States must trace its lineage back to that little iron foundry in Brain-

Digitized by Google

tree. And from this incident will you not permit me to claim a sort of kinship with the representatives of those trades who make up the membership of this association, and others of a kindred character?

But what, you will naturally ask, has all this to do with Arbitration," which is the subject set against my name among the topics assigned for different gentlemen to speak about.

It not infrequently happens in my profession that the arguments addressed to court or jury, in a given case, have very little or no application to the real question in issue, of which this preface of mine may be taken as an illustration. A suggestion was made that the fact of my connection with the Court of Alabama Claims, as one of its judges, beginning in the spring of 1882, and ending December 31, 1885, the adjudications of which, as you know, were the culmination of the second treaty of Washington, which provided for the settlement by arbitration of all questions of dispute between this country and Great Britain, and especially of those growing out of the attitude of England towards this country during the War of the Rebellion, might afford a suitable topic for my talk on this occasion. Not, however, after the example of the man who said that when he told a story he put it so far back that there was nobody old enough to contradict him. We are not dealing with ancient history, and yet it is thirty years since the close of our civil war, and more than twenty years since the Treaty of Washington was ratified, and it may well be that there are those present who, while they are familiar with the general events which occurred during one of the most important and trying periods in our national existence, are not conversant with their details, and do not know how narrowly we escaped from a war with the mother country, the consequences of which no one could have predicted. Next to the settlement of the Northeastern boundary question by Mr. Webster, then Secretary of State, and Lord Ashburton, under the First Treaty of Washington, signed August 9, 1842, and perhaps even paramount to that, this must ever stand in our history as one of the greatest triumphs of peace. My duties required of me a careful study of the events which led to this peaceable adjustment. Bear with me a few moments while I give a brief summary of them.

One of the first acts of the British Government, which was almost universally regarded here as unfriendly, was its early recognition of the Southern States as belligerents. Its inevitable result was claimed and proved, to be to encourage the Confederacy in their attempt to destroy the Union. This recognition was brought about by the concurrent action of Great Britain and Emperor Napoleon the Second. But so careful was the latter to prevent the building and fitting out of vessels within the territory of France to prey upon our commerce, that when the war ended we had no cause of complaint against that government for breach of its international duties towards our government. It was far otherwise in respect to England. The sympathies of the nobility and ruling classes of that country were, almost without exception, with the South. The Liberal party was then in power headed by Earl Russell, Lord Palmerston and Mr. Gladstone, all of whom in their public and private utterances, declared their belief that the North could not succeed. Thus encouraged, the Confederate Government established agencies in London and Liverpool, and began the work of building and fitting out cruisers, whose sole purpose was to destroy and drive from the seas our merchant vessels. In this they were assisted by ship builders in Liverpool and elsewhere within the British dominions, who resorted to every artifice and deceit to carry out their purposes—and with a government which showed itself only too ready to wink at such proceedings, the task was not difficult.

Under such favorable conditions there were built and fitted out in British ports, among a number of other vessels designed for depredations on the high seas, the notorious *Alabama*, commanded by Captain Semmes; the *Florida* and the *Shenandoah*, which sailed without molestation from those ports flying the British flag until their safety was assured, when the Confederate flag was substituted, and was thereafter used during their subsequent maurading careers, which continued to the close of the war. They captured a great number of American vessels, which, as there were no Confederate ports where they could be taken for adjudication, were destroyed, together with their cargoes, to an enormous value. Fortunately, the representative of our government at the Court of St. James during this period was Mr. Charles Francis Adams, who displayed ability, sagacity and courage under the trying circumstances of his position, such as entitle him to rank among the most conspicuous figures in the history of that memorable struggle. (Applause.) But his remonstrances, his presentation of evidence to show, while those ships were in process of construction, that they were designed for the Confederate service, made no impression whatever upon minds already closed to such appeals. At last he addressed a

SECRETARY F. H. BUTTS.

note to Earl Russell, in which, after arraigning the government for its past delinquencies in permitting the Confederacy to use the soil of England and her colonies as a base for sending out predatory expeditions against a power with which England was on friendly relations, and calling his special attention to two more vessels then nearly completed and intended for the same service as the *Alabama*, he used these words, worthy to stand by the side of the boldest revolutionary utterances of his great ancestor, John Adams:

"It would be superfluous in me to point out to your lordship that this is war. No matter what may be the theory adopted of neutrality in a struggle, when this process is carried on in the manner indicated, from the territory and with the aid of the subjects of a third party, that third party to all intents and purposes ceases to be neutral. . . . In my belief it is impossible that any nation, retaining a proper degree of self-respect, could tamely submit to a continuance of relations so utterly deficient in reciprocity. I have no idea that Great Britain would do so for a moment."

Bear in mind that this was addressed to the Secretary of

Digitized by Google

the Cabinet having charge of the foreign relations of the most powerful nation on the face of the globe, on the fifth of September, 1863, when gold was selling on Wall Street at 131, and before our armies had achieved any decisive victories. (Applause.)

It is gratifying to record that just three days after the date of this note, Mr. Adams received the following reply:

"Lord Russell presents his compliments to Mr. Adams, and has the honor to inform him that instructions have been issued which will prevent the departure of the two iron-clad vessels from Liverpool."

One good thing can always be said of our English cousins, they admire pluck even though it be directed against themselves.

But I am making a tiresome address out of what was originally intended to be only a brief talk, and must hasten on.

At the end of the war, the losses of our merchants from the depredations of the Confederate cruisers became the subject of a claim against Great Britain for failure to perform its international obligation towards this country.

TREASURER C. H. BRECK.

This resulted in the meeting of the Joint Commissioners, at Washington, out of which, as I have before said, came the second treaty of Washington, which provided for the settlement by arbitration of all matters in dispute between the two governments, and especially of the claims generally designated as the "Alabama Claims," so called from the principal Confederate cruiser of that name. The Board of Arbitration consisted of five members; one named by the United States, who was most fittingly selected, Mr. Charles Francis Adams; one by Great Britain, Lord Cockburn, its Lord Chief Justice, and one each by the King of Italy, the President of the Swiss Confederation and the Emperor of Brazil. They met at Geneva, and after considering the evidence and most exhaustive arguments on both sides, on the 14th of September, 1872, awarded by a vote of 4 to 1 (the British arbitrator dissenting), that Great Britain should pay to the United States the gross sum of $15,500,000 in gold coin, at Washington, within one year from the date of the award. This award was based upon losses accruing from the destruction of property belonging to our citizens, by the cruisers *Alabama*, *Florida* and *Shenandoah*. All other claims were either withdrawn by the United States from the consideration of the arbitrators, or were disallowed by that tribunal.

An interesting episode occurred in regard to the transfer of so large an amount of gold at one time from London to Washington. Its weight was over twenty-eight and a half tons. But that was a trifling obstacle. Anxiety was felt among bankers and others that it might affect, temporarily, the exchanges and other business relations between this country and Europe. The anticipated difficulty was obviated in a very simple manner. The government was at that time engaged in calling in for redemption its five-twenty six per cent. bonds of the loan of 1862, and issuing in their stead, five per cent. bonds of the funded loan under the Act of 1870. In June, 1873, the treasurer issued a call for $20,000,000 of the '62 loan, most of which was held in Europe, and special notice was given to the parties employed by Great Britain to effect the transfer of the Geneva fund, that they might deposit these called bonds and overdue coupons with the officers of the Treasury Department sent to London for that purpose, who would apply them to the payment of this sum due to the United States, giving certificates therefor from time to time as the bonds were surrendered. Before the amount became payable under the award, there had been deposited to its account in the treasury, or with its London agents, the whole $15,500,000, the certificates received therefor were all delivered up, and one coin certificate for the entire amount was issued, payable to the order of Messrs. Drexel, Morgan & Co., Morton, Bliss & Co. and Jay Cooke & Co., the agents of the British Government, who endorsed it to the joint order of the British Minister at Washington and the Acting Consul General at New York, and they in turn endorsed it to the order of the Secretary of State, Mr. Hamilton Fish, in full satisfaction of the Geneva Award. And so the whole matter was settled without the smallest financial perturbation. Mr. Fish subsequently endorsed this certificate to the Secretary of the Treasury, from whom he received a gold bond of the funded five per cent. loan for the same amount in trust to await the future disposition of Congress. The entire sum, with accrued interest, was subsequently distributed by the Court of Commissioners of Alabama Claims, not only among those who suffered direct losses by the cruisers named in the Geneva Award, but also to those whose property had been destroyed by other Confederate cruisers, and to the payers of advanced insurance premiums on account of war risks, the latter receiving a pro rata dividend amounting to something over thirty per cent.

Mr. President:

"Peace hath her victories
No less renown'd than war."

Underlying the bitter feeling which had been engendered in this country towards Great Britain by the acts to which I have referred, there was a strong desire that the disputed questions might be brought to a settlement without war, a feeling which was earnestly reciprocated on the part of the mother country, and out of it grew this peaceable adjustment. It was a victory which will stand in history by the side of that which had its consummation in the surrender at Appomattox. (Applause.)

REMARKS OF R. R. WILLIAMS.

The next speaker was R. R. Williams, Hardware editor of the *Iron Age*, New York. Because of the lateness of the hour, the speaker did not enter into a formal presentation of his views upon the subject assigned him, but in a semi-humorous and very pleasant manner, touched upon points called forth by speakers preceding him. He related several anecdotes of an interesting character, gave the Hardwaremen present some good advice on points connected with their trade, and in conclusion said: There was a time when the seas were dotted with the sails of our commerce. There were times when country came before party, and I believe we shall see them again. The financial question will be settled, and settled right. One of these days we

Digitized by Google

will have business men in Congress. (Applause.) Let us see to it that the right men are sent to Washington. The Republican party and the Democratic party ought to think more of the welfare of the country than of getting each other into the hole. We want to hasten the good times, correct bad practices, and let us all take a cheerful view of things. Put fear behind. Let us take the good that comes to us and make the most of it.

"The Army and the People" was the speech assigned Capt. John Bigelow, jr., of the United States Army, who handled his subject in the expressive and entertaining manner presented below:

CAPTAIN JOHN BIGELOW ON THE "ARMY."

Mr. President and Gentlemen: When invited to address you I could not but feel that this compliment was paid me as an officer of the army rather than as a private individual. I was especially pleased at the presumption it created in my mind that you are more or less interested in the army, and so, being allowed to choose my own subject, I allowed my professional self-esteem, together with my good will towards you, to make me responsible for the toast: "The Army and the People."

The army of the United States is unique in many respects, but in none is it so notable as in the degree of its isolation from the people. There is no other army of a great people that is so little seen, so little known, so little cared about by those who pay for its maintenance and depend on its efficiency as ours. The only other army that comes anywhere near it in these respects is the one to which we are indebted for the groundwork of our military institutions, and moreover for the first occasion to put them to a practical test—that of our mother country. The armies of the continent of Europe are made up of the people. The German army is closer to the German people and better known to it than is the militia, for instance, of Massachusetts to the people of Massachusetts.

The singular estrangement between our army and our people is attributable to a number of causes. There is, to begin with, the remoteness of many of our garrisons from the great centers of population. This is being remedied by the gradual consolidation of military commands at points on or near the railroads, accompanied to some extent by the recruiting of regiments from about these points. This local recruitment cannot fail to create an interest on the part of particular communities, not only in their respective regiments, but also in the army at large.

There is the traditional distrust of the army as a danger to liberty. The army, it is said, is lacking in sympathy with the people. The army has never shown a lack of sympathy with the people of the United States. It has indeed shown itself unsympathetic towards communities. It did not, for instance, respond sympathetically to the grievances of the Pittsburg or of the Chicago rioters.

The strong point of the regular army as a police force is its freedom from local interest or attachment, its readiness to shoot at one mob as soon as at another. And yet the regular soldier feels as warmly for the people as a whole as any militiaman feels toward the people of his State. It would be as hard to march the regular army against the people of this country as it would be to turn the militia of any town or village against the people of that community. (Applause.)

How, you may say, about those who went with the South in 1861? They were not the army. They were a small proportion of the officers, and, so far as I can learn, there was not a single enlisted man to follow their example, not a private or a corporal or a sergeant who did not stand by the flag of the people whom he had sworn to defend against all their enemies whomsoever. (Applause.)

People who suffer from lack of sympathy on the part of the army are a small portion of the people of the United States. This people of ours is not a union, or a brotherhood, or a petitioning army; not a company or other corporation; not the people of any class, order, or condition, or of any section, but all the people of the entire country. That is the people with which the army sympathizes, the people for which its heart beats, and the only one. (Applause.)

There is the popular unconcern as to our military establishment, due to the idea that we are safe against aggression. An attack upon our country does seem improbable, but, gentlemen, is it impossible? Granting that there is no single nation that would attempt it, is there no possible combination of nations that might? Can we afford to take any chances in the matter of our national honor, our national existence? You are thinking, I dare say, of our past successes of arms, of our peaceful foreign policy. Our military annals are a just source of pride to us, but they are also, it seems to me, a kind of misfortune. They are peculiarly fit to deceive a people as to its military strength. Our school histories should teach us that we were favored in our war of independence by a combination of political folly and military incapacity on the part of the enemy such as we can never hope to realize again; that the war of the rebellion would have been disastrous to us had the enemy been a military people. Our peaceful policy I regard as a invitation to attack, rather than a protection against it; our non-intervention as a forfeiture of friendship, rather than a bar to aggression. Far be it from me to depreciate our policy of abstaining from entangling alliances; but if we never help others, others will never help us. We must be prepared to take care of ourselves.

CAPTAIN JOHN BIGELOW.

Do you trust to the justice of your cause and say, There is a just God, who preserved us and made us a nation. It is precisely because God is just, that I say, do not leave it to him to fight your battles. If I believed that God would protect a nation from the consequences of a willful and deliberate neglect of the means of self-defence I could never believe in divine justice. Such intervention as Providence may have vouchsafed us in the past was due, not solely to the justice of our cause, but to that coupled with our faculty of relying upon ourselves. (Applause.) If our forefathers defended our country as the Chinese of to-day are defending theirs, God Almighty, I reverently believe, would not have raised a finger to help them. "God helps those who help themselves."

Digitized by Google

Philanthropists may tell me of the brotherhood of men, the citizenship of the world, and all that; they only make me think of Carthage and Poland and Hungary. I shall believe in a world citizenship when I find myself living in a world empire, a world nation. I wish that the parliament of man may be realized, and furthermore I believe that it will be; but I have no sympathy with those who are striving to convince the world that it is realized. All honor to those who are conscientiously working for its realization; let us encourage them and do what we can to assist them (applause); but let us not anticipate their success.

Great things are expected of arbitration, but the most earnest advocates of this remedy for war, recognize its uncertainty. They admit that questions may come up between nations which are not fit subjects for arbitration, which can be settled only with the sword. Again there is no effective sanction for the decrees of arbitration. There is no real assurance that the parties to a case will abide by the decision, that they will not go to war in spite of it. Arbitration that does not avert war is not my notion of arbitration. It ought, I think, to be given a different name.

REV. A. A. BERLE.

For nations to agree that they will submit their disputes to arbitration with the understanding that they may go to war afterwards, if they want to, is like two contending base ball clubs, who should agree upon an umpire with the understanding, that if they do not like his decisions, they may have a free fight. Arbitration reduces the frequency of war; it does not prevent it.

Our army then is a necessity, not only as a police force in time of peace, but also as a nucleus for a greater army in time of war. At present the army is appreciated as a guard for our frontier settlements and Indian reservations, and as a force that rioters respect. (Applause). It is well thought of as a source of Indian agents and of instructors at military colleges; it has even been looked upon as a pattern for a city police, and as a national school of forestry; but who thinks of it as a nursery of military talent and virtue for another grand army; as a leaven for a new rank and file; as a corps of organizers, instructors, and leaders for the youth of our land in a future war. Who concerns himself as to whether the army is so governed and administered as to realize these forms of utility?

Flings are made at the army on the score of conservatism, red tape, idleness, snobbishness, etc. There is much in the army that is not as it should be, but, gentlemen, you are masters of the army. If it is not good enough for you, why do you not make it better? Consider how much of your time and thought you devote to it, and then ask yourselves whether it is not on the whole as good an army as you deserve to have. (Applause.) If you thought about the army as much as the army thinks about you, you would have a vastly better army than you have. (Applause).

Many and many is the day that I have seen roll around at a frontier post, without a drill or any other military exercise, wishing that my company commander would give me something of the kind to do. I would wonder why the post commander did not require him to, but knowing the post commander, I perceived why; and wondered why the department commander did not require the post commander to have drills. I made a guess at that, and asked myself why the general commanding the army did not get after the department commander? My conclusion was that the general of the army did not have to. "Well," I said, "why in the world does not the Secretary of War stir him up?" On reflection, I replied: "Because the people do not care whether he does or not, and it will not do for the Secretary of War to be more military than the people."

Gentlemen, the army needs your attention. It is only human. As a company, as a post, needs the regular visitations of an inspector, the military service, as a whole, needs the occasional scrutiny and intelligent criticism of the people. I am in favor of a congressional committee on the conduct of military instruction. I believe that if we kept such a body at work in time of peace, our armies would need less sitting on in time of war. (Applause).

I have made you a jingo speech, and confirmed some of you, no doubt, in the belief that all soldiers are alarmists and grumblers, but I am not so conceited as to believe that my thoughts will influence yours. I am contented with having shown you how one of your military servants thinks and feels, and hope that I have said nothing that the army could not endure. At any rate, I know that I speak the sentiment of the army, when I thank you for the honor of being here as its representative, and being so patiently and attentively listened to.

Now is the time for me to sit down. I only want to say in conclusion: Look to the army; think of the army; think of it well; and, despite its faults, you will think well of it. (Applause).

Rev. Adolph A. Berle, pastor of the Brighton Congregational Church of Boston, had been assigned the toast, "A Brass Foundry in the Wilderness," but because of the lateness of the hour, he paid very little attention to his subject, and after a few minutes devoted to compliments and hits at the expense of the preceding speakers, he gave the Hardware men of this country some good advice in the following words:

ADDRESS OF REV. MR. BERLE.

Mr. Chairman and Gentlemen: One fact must have become indelibly impressed upon the minds of all here present this evening from the speeches which have been made already. That fact is that the interdependence of men engaged in similar lines of business is becoming increasingly apparent, and must have a growing influence upon the business thought and life of every man who expects to be successful and at the same time retain the regard and respect of his fellow man.

The commercial conditions of recent times have taught us with an emphasis too unmistakable to be lost sight of that, after all, the Golden Rule is also good business policy as well as good religion, and that with the rejoicing of one all rejoice, and with the suffering of one all suffer. More than ever before, men must know and appreciate and sympathize with the conditions under which their competitors do their business, and recognize the common difficulties

Digitized by Google

which they encounter and the common vicissitudes which overtake them under the same conditions.

Commercialism has in the present aspect of the case a grave danger lurking in it. That danger is the loss of the manhood and the high-hearted qualities of genial, kindly culture and friendliness which mark the genuine well-rounded and developed man. Cutting prices leads to cutting men, and sooner or later, according to the severity of the tasks imposed, the man is lost, and becomes merely one unit on the great commercial machine in which he has no part other than to engage in the fierce strife for the survival of the fittest and the destruction of the weakest.

In the midst of the struggle the finer senses remain uncultivated, the higher movements of intellect and reason become unknown, or at best only dimly apprehended, and the man becomes business first and last and only business. He represents his trade and that alone. Instead of controlling his vocation it controls him; and the man, the essentially free developing and growing man of culture, intelligent living and broad humanity, has been swallowed up and lost.

There is another phase of the commercial trend of our life which needs attention from every thoughtful Hardwareman. The latest reports from the commercial agencies show that the failures in business during the last four or five years were very largely from moral causes. It may fairly be claimed that more than one-half of all such failures are due from moral delinquencies of one kind or another. Add to this fact the enormous wastes by defalcation and the criminal malfeasance in office of public officials, we see a waste so enormous as actually to be an important factor in the business conditions of our country. What we need and must have is a thorough-going moral renovation of the commercial life, which shall bravely and fairly call things by their right names, and call a halt in this enormous waste of money and men. It was bad enough to see the large number of failures from lack of capital, disaster and incompetency, but it was and is depressing to see the increasing percentum of failures from dishonesty and kindred causes.

You gentlemen of this association, representing as you do intelligence to a superior degree, must be in the vanguard of this new movement for a purer commercial life and a larger manhood. It will take bravery and a high-hearted courage. You will be assailed and will be the target for many a reproach. But I cannot give you any more signal watchword for the battle for commercial honor and integrity than that which our own poet Lowell has written:

> "I honor the man who is willing to sink
> Half his present repute for the freedom to think;
> And when he has thought, be his cause strong or weak,
> Will risk t'other half for the freedom to speak;
> Not caring the vengeance the mob has in store,
> Be that mob the upper ten thousand or lower."

In you, therefore, gentlemen, I hail the coming new man of commerce, without fear and without reproach, of integrity, honor and purity. (Applause.)

"Iron in the Blood" was the topic assigned Webster R. Walkley, of New York. It is needless to tell those who know Mr. Walkley, that the address was eloquent, and full of evidences of close, patriotic thought. It was received with many marks of approval, and is here given in full, as follows:

ADDRESS OF HON. WEBSTER R. WALKLEY.

Mr. President and Gentlemen, Fellow Toilers in the World's Great Workshop: To dare to speak in cultured Boston, in the shadow of Bunker Hill, and at a dinner of the New England Hardware Association, tries one's soul. Here wit is sparkling and effervescent. Here brain is weightier than coin. Here worth and true merit are estimated at their real values. Here shoddy and sham are at a discount. Here the streets are narrow and crooked, but the men are broad and straight. Here character is builded upon solid foundations, and the hurricanes and cyclones of the passing years, yes, centuries, have failed to shake or overthrow the structure of manhood that bears illustrious names. Time brings decay; old buildings are moss-covered, their walls crumble and the very rooms once inhabited by the grace and beauty of living human forms, are now the dwelling-place of bats and owls. But Boston is ever young, It shows not the marks of time or decay. Names once honored are still revered. The virtues of your fathers are your virtues. The heroism that made possible Bunker Hill, that threw the tea into yonder Bay, that tore kingly charters into fragments and stamped royal edicts beneath its feet, is a living force to-day. It has not lost one jot or one tittle of its power. It is not an extinct flame. A breath of treason or disloyalty would kindle a mighty fire, which would sweep over the hills and through the valley of the Old Bay State, consuming and destroying every hand lifted against the liberties of the people.

I have always loved Massachusetts. Its history has been a delightful study, a thrilling romance of affection and patriotism. The courtship of Miles Standish, the burning of witches, the battlefields of the revolution, the founding of

HON. WEBSTER R. WALKLEY.

schools and colleges, the rugged men with consciences into which were burned the decrees of Calvin, with minds that compelled action and thought, with hearts impressed and impressionable, loving and lovable, with hands that dared to build and to tear down, to construct and to destroy, to do and to dare, to fight and to conquer, men who saw victory in defeat, and in the darkest night ever looked to the coming morning, are each and all themes of reflection and study.

I am New England born. "I love its rocks and templed hills." Two summers ago it was my privilege to accompany my aged mother to Boston. Though past the allotted years of three score and ten, she accounted it a great joy to visit this city. Having passed her life in an adjoining State in humble life, without opportunity to travel, Massachusetts and Boston were to her as distant as is Jerusalem from most of us. I recall her anxious inquiries, the pleasures of the hour, and what delight it gave me to show her yonder monument of granite, commemorating the noble deeds of noble men. We walked through the classic grounds of Cambridge and the shaded avenues of Mount Auburn. We sat beneath the old trees that adorn your historic Common.

These were days that will long live in memory, enchanted, red-letter days, perfumed with the aroma of delight-giving to another. The day of departure came. We were in a carriage to take us to the station, when she begged to be driven down to the wharves, that she might look out upon the Bay—Boston Bay. It was not her desire to look at the shipping. She cared nothing for the value of cargoes. She wished to form no estimate of our commercial relations with other nations, but simply to look out upon the Bay whose waters were rippling in the sunlight of that afternoon as they danced beneath the same sun more than a century ago, when brave men, by a single act, kindled the beacon fires of American liberty. How often have I heard her say since that hour how she wished she had taken home a bottle of water from Boston Bay. She would have prized it more than pilgrims do the waters of Jordan.

I pause, for I begin to touch my theme—the Mothers of Massachusetts, of New England, of the World. It may not be suggested by the chosen text placed above my name on the menu, but it is the inspiration of the hour, the inspiration of life, the noblest incentive to earnest action.

Life's days are battles; some do victories gain,
Others bite the dust and with heroes slain,
Know not the good they have wrought till Time ends all.
Then in the books we shall read, we find
Their lives were not for nought. Oft through defeat
Come surest victories. Hope fills the cup.
Success pours goblets full of ruby wine,
All joy that victories, not defeats, were thine.

They were heroes, and the sons of heroes. Iron was in their blood. Who? Men in all ages of the world who have dared to think and dared to do. They were heroines, and daughters of heroines. Iron was in their blood. Who? The mothers of brave men, who have fought the battles of Liberty since Time was born. Where? Everywhere, where freedom lives and breathes and has the breath of life.

My theme broadens. Yet the clock strikes the hour of near departure. Bostonians retire early. They love the beginning and the end. This is true, especially of dinners and speeches, if I am correctly informed.

They were heroes; iron was in their blood. Who? That adventurous crew who sailed from Holland more than two centuries ago in the *Mayflower*, but landed in a wintry storm—a hurricane—on yonder bleak and barren shore. From this spot we can almost see the gray rocks as they lift their heads, and defy the wildest ocean's storms, can almost see the white crested waves as they roll and surge upon the desolate shore. It is not a prophetic vision. Human eyes cannot discern the flint and the steel from which sparks shall be struck to enkindle the fires of patriotism and liberty. The keenest vision does not discover the germ of great States, a greater Nation, wide commerce and extended wealth. We cannot even review the history of this brave hearted crew. We cannot follow them in their trials, persecutions or sufferings. We cannot weigh or measure their piety or devotion. We know the result; we know that the influences of their lives and thought have permeated the whole land. We do know that the great tide of immigration that has been flowing to our shores for more than a century has not been sufficient to wipe out or destroy the influence of Puritanical New England. It is deep seated and deep rooted. It grows with our growth and increases with our strength. Why? Because iron was in their blood.

What makes men great? who weighs? what turns the scale?
Is't fortune's breath, or some more favoring gale?
Ay, deeds, heroic deeds, of heart or soul.
These make, create, intensify the whole.
What makes men brave? The soul within that burns,
A conscience clear, that lights, and warns and turns,
And gives us strength to know, to do, to dare,
To hope, to trust, to live the right to share.
What makes men brave? Their thoughts, their lives, their aims?
To love or truth what are a coward's claims?
What makes men great? The truth that lives within;
That grows and spreads and crushes out the sin.

Perhaps, Mr. President, the guests are wondering at my line of thought and are asking themselves the question: What has all this to do with Hardware? There are times when we should talk of our business and our business relations, our prices and trade. I have laid aside my tabulated statements, the figures that demonstrate the importance and position of the Industry which occupies the thought and time of most who are present. I do not care to give you the tons of iron ore that have been mined during the last year or during the last decade, nor the number of miles of railroads that have been constructed. In truth, I have tonight no taste for figures. They seem dry and cold and lifeless. I had rather touch live issues—burning questions; problems of the hour—to handle wires charged with electricity and throbbing with the thoughts of men; for man is more than his occupation, and from thought is evolved all industry. This is an hour when we can well afford to turn from our business to the consideration of questions which affect State, National and Municipal Government. I know that I am standing on historic ground; that the words of America's most eloquent orators have vibrated on the very air that surrounds me. I know that here Franklin was the playmate of lightning and the champion of Liberty. I know that here were marshalled forces in defense of the right and of the truth. I know that here have been gathered a host of men; stalwart men; men with Iron in their blood; men who knew the right, and knowing, dared maintain. My brief allusion to the Pilgrim Fathers was only to show a link in the chain of events. You know in what a forge and what a heat were welded other links. You know well of what material they were made. Time fails me to mention names that are as historic as your battle-fields, and more enduring than the granite that marks the spot where heroes lie. We pass over a century, each decade marked and impressed by the thought and deeds of men who drew their first breath on Massachusetts soil.

As in mountain ranges some snow-capped peak lifts its head to kiss the distant sky, and is viewed from many miles afar, so the sons of the Old Bay State have lifted their heads above their fellow men, conspicuous for the purity of their lives, their devotion to their country and their love of Liberty. If at times some man of thought has seemed to be in advance of his age and race, and for expressed opinions has received the taunts and jeers of the populace, and been forced to leave your soil, the seed of truth he planted generated and grew, and soon he was welcomed back 'mid the thundering of cannon and the plaudits of the people.

Men with Iron in their blood have made our history, have made the history of the world. They are of every race and of every clime. We pass over the War of the Great Rebellion, yet men like Paul had visions and were awakened to do God's will. Men with Iron in their blood made union and victory possible. They were the Lincolns, and Grants, and Shermans and Sheridans—and a host of others, with whom we have clasped hands in our day and generation. The spirit of the Puritan lives. His blood is in our veins. If he was born to deeds of heroism, so are we. We read of great men, we think of great men. We have prayed for opportunity, and lo! it is upon us.

Huge blocks of marble lie uncut
In ancient quarries near at hand,
From which some artist yet shall carve
A statue beautiful and grand
As Phidias wrought, or Angelo—
When Genius gave to art its life
And immortality, and made
The work of man almost divine.
God made the granite and the clay;
Has stored in mines not far away
The Iron and Gold. These wait command
Of brain and thought, a builder's hand.
Then temples rise, cathedrals vast
As pyramids of ages past.

My theme opens before me. I have read only the prelude. You see the hour forbids me to go on. I can only

Digitized by Google

allude to the thought that should have been the subject of these remarks—Our Modern Politics. Momentous issues confront us. The very principles that underlie republican government are in danger. Never in the history of our country has there been a greater need of men than at this hour. The question of municipal government is not a question for a single city; it affects the whole land; touches almost every citizen. Do not let us deceive ourselves. The issues at stake affect our lives; our properties; our homes. In no sense is it a party question. It is broader than party, and above party. Over-confident, intoxicated Republicanism may need only plasters and pills, and perhaps will recover soone: than diseased, crippled, and imbecile Democracy, which requires the skill and knife of a surgeon. It is a question of honest government, for honest men, by honest men. Is such a government possible in our greater cities? Can they be delivered from the rule and thraldom of designing men, whose statesmanship is measured by their success in obtaining or awarding office, and the distribution of patronage? Has the day come when men of thought with a high sense of duty and honor are to be thrust aside for some designing politician whose highest aim is personal promotion at any cost? The perpetuity of our free institutions depends upon a just government. The Devil of an insane desire for public plunder cannot be whipped around the stump of expediency or party policy, or party success. It is not a question of supremacy in art, science or commerce. It is not a question of territorial enlargement. It is not a question of wealth or adornment. The real factor in the problem is so to govern as to promote the highest welfare of all citizens. The poor as well as the rich. Our cities are the epitome of the wider world. The storerooms of our activities and industries; the thermometers that mark the rise and fall of public opinion. Here are the influences that mold and shape our national life and character. Interwoven with these questions are others of vital moment to the present generation. Such are the relations of labor to capital; the rights of trusts and corporations: the demands of the working classes; the control of legislatures by railroads; the municipal ownership of trolley lines and telephones, and other questions which your thoughts suggest.

It was a divine utterance that man should earn his bread by the sweat of his brow. Has the hour come when he must toil as others may direct? Is there some power higher than God's power? Has this divine right been taken from us? Has any order or organization a right to tell you or me that we shall not toil for our daily bread except under their prescribed rules? No! a thousand times, no! This divine right still exists. It is above all human orders. Interference with the law of Divine Right cannot, and will not be permitted. Men are free—human will is free. The doctrine of Arminius supplants the doctrine of Calvin.

What is the solution of these problems? How can municipal government—a question that has assumed such proportions within the last year or two—become a just and righteous government? A great tide of reform swept over our metropolitan cities last year. The people were aroused at the flagrant crimes committed under the very shadow of Justice. Law protected law-breakers. The people were robbed in the name of the law. The dominant party met its Waterloo. We await results. The great State of New York—the Empire State—seems to stand hesitating, halting—stunned, at the terrible catastrophe. The City of New York waits for legislative action. It would reap the harvest of its sowing.

Shall Municipal Government be divorced from the politics of parties? Shall it be constructed on strictly business principles? Shall it not be, as we have said, an honest government, by honest men, for honest men?

National issues are not less important. Here great questions are at stake. The representatives of the people seem to be unworthy of confidence, at least in their stature they do not measure up to the requirements of the times. On every hand men are needed with Iron in their blood.

On the frontier in the early days of our history a missionary martyr was burned at the stake. The Indians witnessed the cruel torture. They wondered at the calmness and fortitude of the dying man. They closely watched the expression of his face and the gleam of his eye. His calm resignation surprised them. At last, the charred body seemed to be without life, when the chiefs sprang forward and tore the heart from its body and drank its blood. When asked the reason, they replied that they might have the courage of the white man. If, in our day, there shall be a martyr of Truth or Liberty burned in the fires of Socialism or Anarchy, ten thousand times ten thousand young men will be ready to drink the blood of martyr spirits to make them brave, to defend the same Liberty for which yon sleeping patriots fought and died. We do not despair of the republic, for men, brave men, honest men, men with Iron in their blood, will arise to defend America and her Liberties. (Applause.)

It was well on the stroke of midnight when the exercises concluded. The gathering, taken as a whole, was one of the most entertaining and successful that has ever occurred in any department of trade, and the guests departed full of pleasure over the fact that it had been their pleasure upon this occasion, to spend an evening so delightfully with the iron men and Hardwaremen of New England.

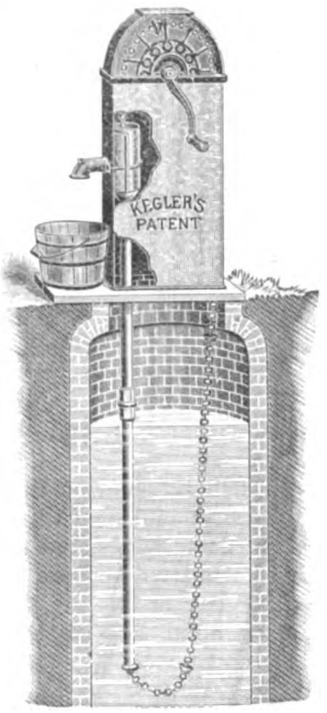
Howard Royer, of Pittsburg, announces that he has taken into partnership Ernest Luft and August Luft, and that the business will be continued under the name of Howard Royer & Co. They announce that after April 1st they will occupy the four-story brick building at No. 305 Smithfield Street, Pittsburg, and will carry a full line of Hardware, cutlery, bicycles, guns and sporting goods.

The hand-book published by the Builders' & Building Supply Dealers' Exchange at Rochester, N. Y., contains much information of great value to those interested in building—the owner, architect and constructor. The information includes the Lien Law, Factory Law of the State of New York and the Fire and Sanitary Ordinances of the City of Rochester.

Electricity has been recently applied to the sealing of cans of fruits and preserved meats. The process consists of the formation of a conductive layer on the lid of the can, when a metal coating is deposited by the usual methods of electro-plating. The same process has been applied to the sealing of bottles of beer, wine, etc.

At the annual meeting of the Fuller-Warren Stove Co., at Milwaukee, Wis.. the following named gentlemen were elected directors: Walter P. Warren and G. G. Wolf, Troy; H. A. Viets, John E. Hansen, William Plankinton, Francis Hinton, H. S. Haselton, George L. Graves and John Johnston, Milwaukee.

It may seem strange to see it announced that an effort will soon be made to introduce graphite paint into England, on an extensive scale. The value of graphite or plumbago, it seems, is not as well understood upon that side of the water as it is upon this.



Three tons of platinum are used each year in the United States, in the manufacture of incandescent electric lamps, and other purposes of like character. Fully a ton is also used each year in the manufacture of artificial teeth.

A fire was caused by the fusing of two electric light wires in the wire rope and cable factory of Washburn & Moen, Waukegan, Ill. Only slight damage was caused.

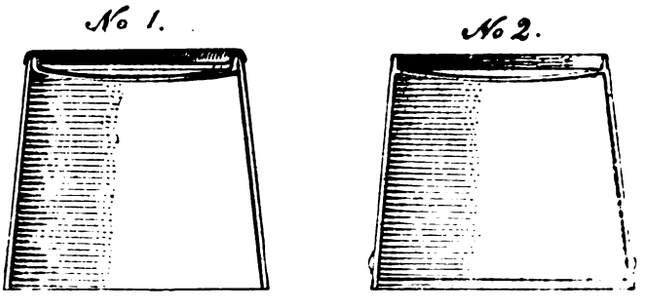
New Chain Pump.

The Bellevue Pump Co., Bellevue, Iowa, are the patentees and manufacturers of a new Chain Pump, the tubing and curb of which are made of galvanized sheet iron. They explain that "the tubing is very light, fifteen feet weighing only seven pounds, wet or dry, while the same number of feet of ordinary wooden tubing, saturated with water, will weigh over a hundred pounds. Besides being clean, durable and easily operated, it is non-freezing, as the upper sections are made tapering. The different sections are connected by couplings with a leather washer, making

them water-tight and easy to couple together." The accompanying cut shows the tubing attached to an iron curb; it can, however, be used just as well with a wood curb, as the company furnish for that purpose a block and clamp free with every reservoir section or top piece of tubing. The curb, as stated, is made of galvanized iron, excepting the two malleable rims, which constitute the frame. "It weighs ten pounds less than ordinary wooden curbs, and is, of course, more durable and neat in its appearance. For special circulars, etc., address the manufacturers."

The Indiana People on the Rush.



The Indiana Bicycle Co., Indianapolis, Ind., who have been delayed in getting wood rims fast enough to supply their wants, have now completed arrangements so that now there will be no further delay. A week ago last Thursday their assembling department was increased from the sixty machines per day they had been shipping to 107 machines shipped on that day. Friday they shipped 147 and Saturday 203 machines, and expect to reach 250 per day by the middle of this week. As this concern had nearly 14,000 Waverleys all completed ready for assembling, it is pretty safe to count on their trade being promptly supplied. They have recently added a single-tube tire as an option, and will supply it to all of their customers who prefer that style of tire.

Their plan of making the hose pipe is something entirely new, and permits of the tires being vulcanized in open steam instead of in a mould. This process, which has made Waverley tires famous in the past, will probably open a new field for the hose pipe. The company have just completed a new rubber plant, which began operation for the first time two weeks ago last Monday. It is in this new plant where the hose-pipe tires will be made.

The Indiana Co. are assuredly nothing if not progressive. With their immense capacity for building bicycles, two complete rubber plants, and their twenty-six retail branches, "what's to hinder" their cutting a very wide swath in the '95 trade?

Truss Bottom Pail.

The Standard Fiber Ware Co., Mankato, Minn., have just introduced a new Pail, illustration of which appears here. The makers explain that the new pail has been produced after numerous experiments by expert chemists and machinists, and will have the elasticity, strength and durability of the wound flax fiber pail, without its weak bottom, and without the tendency to soak up heavy, or break from brittleness connected with the moulded or seamless fiber pails, and has all the good qualities of those makes,

with none of their faults, and with greater capacity. No. 1 shows the initial position of side, bottom and steel band. No. 2 shows the finished pail after powerful steel rollers have compressed the bottom and side into one compact body and bound them together immovably by means of the steel band; while at top and bottom it is strenghened and protected by cold rolled steel bands. Price $3 per dozen. The Standard Fiber Wire Co. are leaders in their line, and when they give a guarantee it can be relied upon. They will be pleased to give further information upon application.

Notice to the Trade.

The Glidden Varnish Co., Cleveland, Ohio, make the following announcement:

Cleveland, Ohio, March 1, 1895.

You are hereby notified that Mr. Wm. H. Ennis is no longer associated with our company in any capacity, and you will please be governed accordingly.

Mr. E. E. Seavey is the authorized representative of our Boston Branch at No. 91 Union Street, Boston, Mass.

Yours very truly,

The Glidden Varnish Co.,
Cleveland, Ohio.

The Lariat Mfg. Co., No. 405 Atlantic Avenue, Boston, are just putting on the market on article for household and hotel use, which in its way is unique. It combines what they claim "is a perfect cleaner, especially for highly finished woodwork, with a germicide and disinfector." They take the position that the need in every house is something that will not only remove all dirt, but will also destroy all disease germs. They have the testimony of Professor Baird of the Massachusetts College of Pharmacy to the fact that Cleanio contains a good germicide.

S. Cheney & Son, Manlius, N. Y., call attention upon our outside front cover to-day, to their gray iron castings, cheap heating stoves, Diamond thimbles, etc. This company stand very high in their line of production, and a note addressed them will bring valuable information in the way of details, prices, etc.

David B. McIlwaine, of the well-known Hardware house of Greer & Laing, Wheeling, W. Va., has been in the city several days past, looking after his interests here and those of the house he represents.

Review of the Markets.

Money: It is an undoubted fact that money just at present is quite scarce in hands where it could be used to very good advantage upon the business affairs and prospects of the country. The hardening of the market in this respect, is by some said to be due to the fact that the cash is flowing outward from the banks into the hands of manufacturers and merchants, and in this respect would be regarded as marking a revival of business. There are some of a pessimistic nature who believe that this tightening is somewhat due to the fact that holders of money are becoming more cautious, and are laying aside funds for that rainy day which so many people are always expecting, and which, let us be thankful, so seldom comes. There are indications, however, from all directions that general business is greatly improving, and while we hear some manufacturers talking of hard times, we know of scores of others, especially manufacturers of seasonable goods, who are as busy as they possibly can be just now, and some of whom are behind in their orders. It seems almost providentially as though the bicycle industry had been especially created for America just at this time, for the purpose of keeping many men busy who would otherwise be idle. And certainly there is no manufacturer or jobber of wheels who does not just now have about all he can attend to. The decrease in the cost of production during the general hard times, which we hope have just ended, has had the effect of opening new markets, and reports come that such staples as cotton, wool, wheat and petroleum are in demand at advancing prices. The feeling abroad in regard to American securities has been improved of late. The dividends in the case of stock companies have been lessened somewhat by the withholding of 2 per cent. for payment of the Income Tax, and it is needless to say that among stockholders there is rather more than the usual share of grumbling, because of this special tax upon their holdings. Taken all in all, the situation presents a better and firmer view than it did a fortnight ago, and with good weather and the usual April settlements, business ought to be better from now on, and money a great deal easier to obtain.

Hardware: The Hardware market shows a slight, but continuous improvement. Trade is said to be ten per cent. better than last year, but there is no particular boom. Trade in the West seems to be considerably better than in the East. Activity in the building line is expected to favorably influence the volume of business, though the effect may not be felt immediately. The demand is principally for a miscellaneous assortment of goods. The stocks carried by both manufacturers and jobbers are small, and in some cases large orders have been delayed thereby. For shelf and heavy Hardware there is but a fair demand. Some houses complain of a lack of business, while others can with difficulty fill their orders. The satisfactory settlement of the much mooted currency question would no doubt help the market wonderfully. It seems to be the general opinion that under the influence of the balmy spring weather, there will be an increased demand for seasonable goods.

Cutlery: Strikes in Europe have had the effect of curtailing the importation of the cheap grades of foreign cutlery, which has rebounded to the advantage of the American manufacturers of this line of goods. Some houses have been working nights to fill their orders. The import trade is dull, and a competent authority on the subject says "that it is not expected to brighten up until fall." March is considered the best month for the spring trade, and up to date there has been but little trade.

Cut Nails: The cut nail market is firmer, and there is more movement of goods and increased inquiries. Car load lots on dock are quoted at 75 to 80 cents, according to assortment. Small lots out of store, 85 to 90 cents.

Wire Nails: The demand for wire nails still continues good, and prices remain about the same, carload lots at mill being quoted at 90 cents. Many new orders have been placed, and mills have enough to keep them busy for the next two months.

Tacks: The market is somewhat spasmodic. Business is liable to be good one day and bad the next. A new list has been under consideration for some time, but when it will be adopted, or what its possible effect on business, cannot be predicted with accuracy.

White Lead: The list price of white lead has been reduced 1 cent per pound on 1 to 5-pound packages by the National Lead Co. Aside from that there has been no marked change in the market. Prices are firm at 4½ cents less the usual discount.

Red Lead: For immediate delivery, a fairly good trade is being done. Domestic brands are selling at 4½@4¾ cents as to quantity, the usual discount deducted. German brands for future delivery are quoted at 4⅝@4⅞ cents.

Litharge: Owing to the resumption of operations on the part of the rubber makers, the distribution of litharge has been good. Quotations are firm at 4¼@4¾ cents.

Zinc: The grinders have made more frequent calls upon their regular contracts; this has helped the market. Prices for jobbing parcels have not changed, being 3¾@4¼ cents.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

THE PHILADELPHIA TRADE.

Although the 21st, according to the calendar, marked the beginning of spring, we are apparently as far away as ever; ice and snow are still to be seen whitening the land, and spring orders are naturally slow in consequence. So far it has been impossible to commence outdoor work, and until this can be done local trade for Implements and Tools will remain light. This state of things cannot last much longer, and the probabilities are that spring business will come all at once, and we have some hopes that April will see trade in better shape than April of last year.

Even with the cold weather, trade is holding its own, and in Bicycles is far ahead of any previons year. Orders are coming in faster than the goods can be supplied. It seems to be a Bicycle year; good makes are in demand, and the probabilities point to a short supply before the end of the season.

Hardware prices remain without any immediate changes, except there seems to be a tendency to advances in raw material. Solder and Shot have both advanced and seem to be on an upward turn. Steel Billets and Iron are reported firmer.

The manufacturers of Carriage Bolts, Lag Screws and Machine Bolts have made another advance of 5 per cent. and talk about going higher in the next thirty days. Wooden Planes have also advanced. Manufacturers are (as has been prophesied) quick to take advantage of any good excuse for lifting prices out of the depth in which they have been so long.

Wire Nails and Barbed Wire remain the same, although as manufacturers report this year a reduced production of

WITH APOLOGIES TO CHAS. KINGSLEY

(And the Reader.)

Three Drummers went drumming into the West,
(Out into the West as the sun went down,)
Each drummed for the firm which paid him best,
(And their names were Robinson, Jones and Brown.)
Now Robinson drummed for the Smashem Bros.,
And Jones quoted prices on Lumber,
But Brown he knew
A thing or two,
And drummed like fun for the Humber (American).

Three buyers sat each in his easy chair
(With a smile on his face as the sun went down,)
For each had been drummed by the Debonair
(By the festive Robinson, Jones and Brown.)
But Robinson drumming failed to win,
Though fibs he told without number,
And Jones the sinner
Thought he was the winner,
Till Brown sold each Buyer the Humber (American).

Send for Catalogue and learn how he did it.

Humber & Co., America, Ltd., 318 Broadway, New York.

150,000 kegs of Wire Nails per month, there is some talk of higher prices in this line.

Collections are somewhat slow. April 1st is general settling up time and country trade is probably holding off until that date.

BIDDLE HARDWARE CO.

THE DAVENPORT TRADE.

A larger number of building contracts have been let than usual, including several imposing business blocks and many elegant residences.

Wire nails are in good demand and prices remain firm.

Trade is improving in general Hardware; the indications are that this month sales will equal in amount those of March, 1894.

Collections are only fair.

George H. Sickels, one of the original organizers of this house, a brother of our president and a true friend of us all, died at his home in Albion, N. Y., on March 8, 1895.

SICKELS, PRESTON & NUTTING CO.

THE BALTIMORE TRADE.

It is pleasant to report a marked improvement in business during the past two weeks. Considerable activity has developed among the local retail Hardware houses, and under the pressure of immediate wants they have returned to their old allegiance to the jobbers in preference to suffering from delays in factory shipments. Those manufacturers who have been most conspicuous in "wild-cat" indiscriminate quotations have proven rather slow shippers, with a consequent result that they have greatly injured themselves in demoralizing the market prices. Promises unfulfilled never yield a large dividend.

There is much in the present demand for goods that gives promise of stability. Orders, while largely composed of seasonable goods, have such a fair proportion of shelf and staple Hardware and in quantities moderately large enough to indicate confidence in ruling prices. Prices are firm, notwithstanding the "hammering process" adopted by jobbers, manufacturers, agents and syndicate buyers. The action of the Baltimore Association in February, when they changed their list and discount, making a considerable advance, followed by a further advance on March 13th, indicates that, at least, one class of manufacturers are determined to return to a profitable basis. It is safe to say the present month has witnessed fewer declines than any other month during the past year. This in itself is hopeful.

Collections are fully up to expectations, and we look forward to a fairly active late spring trade.

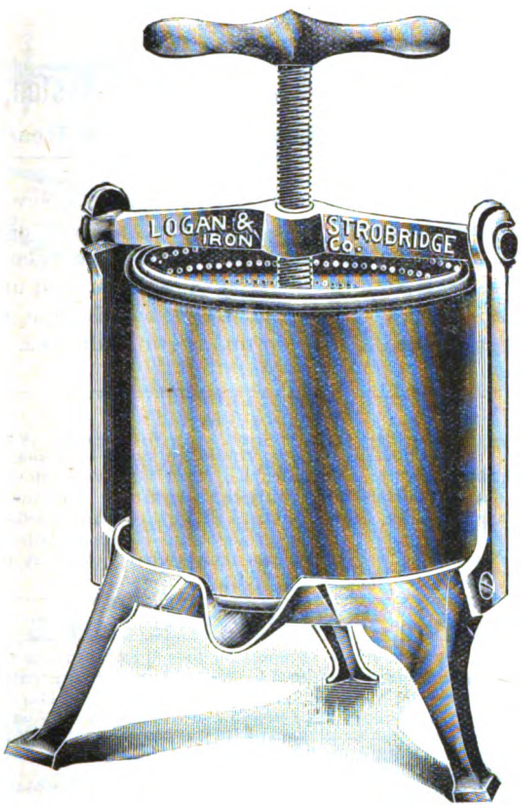
THE TABB & JENKINS HARDWARE CO.

THE AUSTRALIAN TRADE.

The past month has been devoid of any marked features. Trade movements have been fairly well sustained, but there is still room for a vast improvement. The harvest returns in the various Colonies show rather a low yield on the average, which, in conjunction with the low prices ruling, does not furnish food for encouragement. Add to this that wool, also, is suffering from a market depression, as well as such products as silver, tin, copper, mutton and tallow, and it will easily be seen that the general income has sustained severe curtailments.

On the other hand, the increased yield of gold and coal and the added production and export of butter, cheese, eggs, poultry, wine, frozen meat and live cattle give some cheering spots of brightness on the horizon. Attention is also being given to the increased output of timber from nearly all of the Colonies, principally for paving purposes, and the movement in this direction bids fair to assume decent proportions.

It is worthy of mention that the gold yields in 1894 were the largest recorded during the last twenty years. The total yield was 2,125,441 ounces, made up as follows: Victoria, 739,496 ounces; Queensland, 624,000 ounces; New



Digitized by Google

Zealand, 230,000 ounces; Western Australia, 224,000 ounces; New South Wales, 223,298 ounces; Tasmania, 48,803 ounces, and South Australia, 35,844 ounces. The outlook in this direction for 1895 is bright.. The export of salt from South Australia is annually increasing and the industry promises well for the future.

McLEAN BROS. & RIGG, LTD,

Brighton Fruit and Lard Press.

The Logan & Strobridge Iron Co., New Brighton, Pa., are placing upon the market a new article that is sure to command attention and win success. It is the Brighton patent Fruit and Lard Press, here shown, and is intended as a family press for making jellies, syrups, wines, etc. It

is described as simple, effective, and quick acting. The No. 1 here shown is tinned all over. In describing it the makers say that the "base is high enough to admit the pan under the spout. There are two cylinders, both detachable from the base. The outer one collects the juice and conveys it to the discharge spout. The inner or press cylinder is of perforated tin. A strainer bag fits on the press cylinder and can be used when needed. In operating, fruit is put in press cylinder and the screw plate forced down by hand as far as possible, then screw bar is attached to the side arms and pressure continued with the screw. To release, two turns of screw to left will disconnect the screw bar from the hooks and cylinder and all may be instantly removed. Price, $2.50 each. Half dozen in a case." The company will be pleased to correspond with all who are interested.

Underhill, Clinch & Co.'s New Connection.

Underhill, Clinch & Co., No. 94 Chambers Street, New York, have taken the exclusive agency for New York City and near-by trade, of the Norwalk Lock Co., of South Norwalk, Conn. They will carry a large stock of locks and builders' Hardware suitable for the trade, the line comprising such goods known as "Art Hardware," and from that down to the kind generally used in medium grade houses. They have private telephone connection with the factory over a private wire, making it possible for them to quickly learn any information desired; have now a stock on hand, and are ready to fill orders. The Norwalk Lock Co. were long known as manufacturers of the best grades of Hardware. They desire to enter this market, after which they have not particularly looked for some years. Underhill, Clinch & Co. having an established trade, covering New York City and adjacent territory, exactly supplied the opportunity desired by the Norwalk Lock Co., and with their goods, and the enterprise of Underhill, Clinch & Co., the line in the territory named will be actively pushed.

Clute Bros., a new Hardware firm, are just opening for business in Cohoes, N. Y. Their new store presents a very attractive appearance, the more especially as it has been thoroughly fitted up with Moore's Perfect Shelf Boxes.

The Oxford Iron & Nail Co. have closed their New York office at No. 83 Washington Street, and removed to Trenton, N. J. It is to be hoped that the temporary embarrassment which has overtaken them of late, may be soon removed.

On page 27 of this issue, under the title "A New Idea in Paste," the address of John J. Nealon is given as No. 71 Howard Street, New York. It should have been No. 71 Leonard Street, and the error was not discovered until that form was printed. Mr. Nealon's "new idea" is so good that he can afford to bear up under two addresses.

Situations Wanted

SITUATION wanted as clerk in Hardware store, by a man who has had sixteen years' experience in a retail Hardware, stove and tin store as clerk and tinner. Am thirty four years old. Can furnish good reference as to ability, honesty, etc. I desire a permanent situation; am willing to work; prefer position in a general Hardware stove and tin store. Please state wages you can afford to pay. Address G. H. S., Box 332, Madison, Lake County, Ohio.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Aberdeen, Miss.—W. A. McMillan & Son, Hardware, will take up bicycles. Propositions invited from manufacturers.

Alice, Tex.—L. G. Collins, Hardware and vehicles, will add bicycle department. Correspondence invited with manufacturers.

Alvin, Tex.—W. H. Nash & Co., Hardware, etc., will add bicycle department, and solicit propositions from manufacturers of bicycles and bicycle sundries.

Ashtabula, Ohio.—C. H. Schrivens, bicycles, opened a new store on Main Street.

Athens, Tenn.—Bayless & Moody, Hardware, etc., invite propositions of manufacturers of bicycles and bicycle sundries, looking to adding bicycle department to their business.

Atlanta, Ga.—The W. D. Gash Co., of Asheville, N. C., bicycles, etc., will open headquarters here, leaving D. S. Gudger in charge of the Asheville branch.

Auburn, N. Y.—Lawson & Son, bicycles and sporting goods, have opened branch house at Binghamton. They will continue their business in this city.

Bellefonte, Pa.—John S. Waite, bicycle., will open new store after the first of April.

Big Springs, Tex.—Bressis Bros. & Co., dry goods, etc., contemplate adding a bicycle department, and invite correspondence with manufacturers of bicycles and bicycle sundries.

Binghamton, N. Y.—N. W. Waldron, bicycles, opened a new store, which is among the finest in the city. He will handle the Syracuse, Rambler, Victor, Crescent and other wheels.

Bristol, Tenn.—J. H. Barker & Co., Hardware, will take up bicycles. Correspondence with manufacturers invited.

Chattanooga, Tenn.—The Kirby Cycle Co., with Harry Kirby as manager, has opened new store at No. 819 Broad Street.

Cortland, N. Y. — William Grady, bicycles, etc., a new store opened in the Wickwire Building.

Cuthbert, Ga.—W. A. Roberts, house furnishing goods, will add a bicycle department, and solicits correspondence for circulars and price lists from manufacturers of bicycles and bicycle sundries.

Dayton, Tenn.—A. G. Slawson, Hardware, etc., will take up bicycles. Desires correspondence with the manufacturers of wheels and sundries.

Dickson, Tenn.—B. B. Miller, Hardware, etc., solicits propositions from manufacturers of bicycles and bicycle sundries, looking to establishing agency.

Fairfield, Fla.—Harry Richard, bicycles, commenced business.

Fonda, N. Y.—Peter W. Sitterly and Lee Cole have formed a co-partnership to commence the bicycle business. They will handle the Remington.

Fort Wayne, Ind.—Gust Steger and William Gouty, bicycles; new firm will open new store at No. 126 Calhoun Street.

Guthrie, Okla.—The Olsmith Arms Co. will put in a full line of bicycles, and conduct a general bicycle supply business.

High Point, N. C.—The Beeson Hardware Co. will add bicycles. Correspondence invited with manufacturers of wheels and sundries.

Marinette, Wis.—James S. Wheeler, bicycles, has opened business, taking the agency for the Lovell Diamond.

Memphis, Tenn. — The Monarch Cycle Co., branch office established, with R. F. Bunting as resident manager.

Meriden, Conn.—Robert E. Badger, bicycles; a new store opened on Centre Street.

Newberne, N. C.—Slover Hardware Co., No. 73 Middle Street, will add a bicycle department. Propositions from manufacturers of bicycles and bicycle sundries are invited.

Newburg, N. Y.—The Rheinhart Yuenger Co., bicycles, will open a new store April 1st.

Philadelphia, Pa.—R. Nuttall & Son, No. 1501 South Second Street, Hardware merchants, announce their intention of fitting up a bicycle repair shop. They will also be prepared to furnish parts. A thorough mechanic, of long experience, will have charge of this department. Catalogues and discount sheets will be appreciated by them, if sent by those that mean honest trade.

Plymouth, Wis.—W. J. Sweet, bicycles, has opened business, taking the agency for the Western Wheel Works.

Portland, Me.—F. O. Bailey & Co., bicycles, opened business at No. 46 Exchange Street, taking the agency of the Stearns bicycles.

Riverhead, L. I.—The Riverhead Cycle Co. have taken the agency for the Victor Bicycle.

Rochester, N. Y.—C. J. Connolly, bicycles; new store opened at No. 47 Exchange Place.

St. Louis, Mo.—E. C. Meacham Arms Co., offering the trade a new bicycle known as the Club, No. 15.

St. Louis, Mo.— A. F. Shapleigh Hardware Co. have closed a contract with Morgan & Wright, Chicago, to handle that firm's bicycle tires at factory prices.

Stewartsville, Minn. — Demro & Kelly, Hardware, succeeded by J. J. Kelly, who will take up bicycles.

Wilkesbarre, Pa.—Robert Johnson, bicycles, will open new store. Nos. 10 and 12 North Main Street, April 1st. He will add a bicycle repairing department, and increase his stock of sporting goods.

Changes and Removals.

Binghamton, N, Y.—I. A. Lawson and J. J. Carr, of Auburn, N. Y., have moved their bicycle and sporting goods business to this place, and will act as local agents for the sale of the Buffalo, Envoy, Phœnix, Fleetwing and Rochester bicycles. They will open a repairing department. Their place of business is at No. 17 Ferry Street.

Battle Creek, Mich. — Hall-Jones Cycle Co., J. B. Hall retires; business continued by Mr. Jones.

Chattanooga, Tenn. — Harry Kirby, bicycles, has sold out to J. Mitchel.

Cohoes, N. Y.—Clute Bros., bicycles, etc., removed to larger quarters, No. 72 Remsen Street.

Chicago, Ill.—The Overman Wheel Co., Chicago business reported sold to Thorsen & Cassidy, sporting goods, who are said to be capitalized at $100,000.

Council Bluffs, Iowa.—S. M. Williamson & Co., partnership dissolved; business continued by S. M. Williamson.

Omaha, Neb.—A. H. Perrigo & Co., bicycles, dissolution of partnership reported, C. W. Dabney continuing the business.

Salt Lake City, Utah.—Western Hardware Co., on March 1st, removed to larger building on First South Street, and will devote the second floor, 60 by 125 feet, to a stock of new bicycles, and will also conduct a bicycle riding school.

Saratoga, N. Y.— The Hulbert Bicycle Co. has succeeded to the business of Hulbert Bros., heretofore doing business at No. 334 Broadway, which firm has been dissolved, C. N. Hulbert continuing the business under the style first mentioned. He will pay all outstanding claims against the old firm. On March 30th the business will be removed to No. 352 Broadway.

Washington, D. C.—The Overman Wheel Co., No. 713 Thirteenth Street, will remove to No. 909 Pennsylvania Avenue, and add a full line of athletic goods of their own stock. A bicycle repair shop will also be added.

New Goods and Improvements.

Birmingham, Ala.—Iron City Cycle Co., Robert Safely, manager, will manufacture a twenty-two-pound wheel. A bicycle repair shop has been added to the business.

Goshen, Ind.—Charles Parker and Joseph Gallagher, new firm, with $2000 capital, will manufacture the Spark bicycle. Invite correspondence with manufacturers of bicycle parts.

New York, N. Y.—John Nuttall, No. 428 West Twenty-seventh Street, bicycle manufacturer, increasing capacity by the addition of new machinery, and has repairing, nickeling and enameling departments in operation.

New York, N. Y.—Metropolitan Bicycle Co., work on new building at Boulevard and Sixtieth Street is progressing rapidly under the eye of Manager Bridgeman, who is devoting his entire time to getting the business under way so Columbias can be sold.

Recent Fires.

Bridgeport, Conn.—Moses W. Manwaring, bicycles, etc., sustained serious fire loss in burning of building, wherein was being held a military carnival.

Miscellaneous.

Allegheny, Pa.—James Dunlap, bicycle repairing, No. 10 Ohio Street, killed by gas explosion, which demolished the building.

Lockport, N. Y. — Coates, Davidson & Riggs, bicycles, propose a bicycle fair in Music Hall in the near future.

Louisville, Ky.—Harbison & Gathbright, saddlery, etc., F. L. Albert, formerly with Auditorium Hotel & Theatre Co. of Chicago, appointed assistant manager in bicycle department.

Facts of Interest to the Public.

Our PROCESS for 1895, is the MOST PERFECT WORKING and MOST DURABLE PROCESS EVER PLACED ON THE MARKET, and HAS NO EQUAL.

In calling attention to the

"NEW GEM"

we offer the trade a stove FOR the PEOPLE and for the TIMES, CONVENIENT IN SIZE, with the same FLAME as the PROCESS, and will do the same amount of work with LESS FLUID. The original cost is only about ONE HALF that of the regular high stoves, and is MADE ONLY BY US. For further particulars address

THE MILLER OIL HEATERS.

No Disagreeable Odor. No Ashes Light and Heat in Abundance.

No. 327. No. 3 Lift Burner. Height, 23½ inches. Spread of Base, 12½ inches. Nickel Finish.

Just the Thing for All Time and Every Day Use. For Spring, Summer, Autumn and Winter.

They are an Assured Success, from the fact that the Lamps used are "The Miller Lamps" THE LATEST AND BEST.

IN THESE HEATERS YOU HAVE A HAPPY COMBINATION:

The Best Light. The Best Parlor Heater. The Best Cook Stove.

They are Clean and Odorless. Require no more care than an ordinary lamp. Cylinders of Russia Iron, with Removable Nickel Tops, or with Combination Heating Drum and Grate for Cooking. The No. 3 BURNERS have a FLAME OF 15 SOLID INCHES. "MILLER" HEATERS have outside SCREW ADJUSTMENT for regulating the Wick and PLUNGE MOVEMENT FOR EXTINGUISHING; each one is supplied with an extra Flame Spreader so that Lamp can be used for ILLUMINATING when not wanted as a Heater. All of the Best Material and Workmanship.

They will heat a large room perfectly. A tea kettle of water heated in a few minutes by removing canopy.

Perfectly Safe. They Cannot Explode. Oil Never Gets Hot in the "Miller" Heater. A Good Companion for a Cosy Nook. A Comfort on a Chilly Morning.

A MOST IMPORTANT FEATURE.

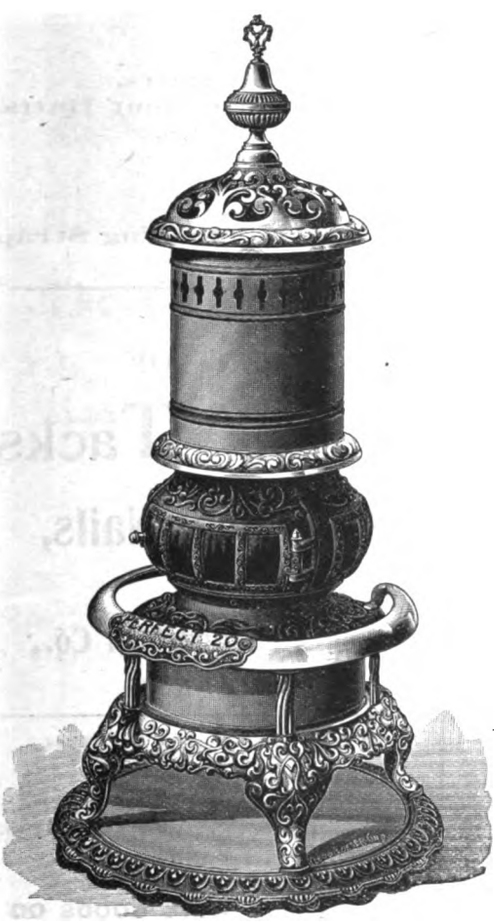
☞All the weight of the Cylinder rests solidly on the FOUNT and not on the BURNER in these Heaters.

In IMITATIONS of these Heaters the Cylinder is supported on the BURNER, a CHEAP and WEAK CONTRIVANCE, which makes it necessary to REMOVE THE CYLINDER for lighting and which renders it impossible or very dangerous to use the Heater for cooking purposes.

Send for circular showing Heaters with ovens for cooking. We have 12 varieties.

These Lamps hold One Gallon of Oil. Will Burn 12 hours. Easily Lighted by Lifting Top of Burner.

READY TO LIGHT, WITHOUT REMOVING CHIMNEY.



No. 328. No. 3 Lift Burner. Height, 22 inches. Spread of Feet, 11¼ inches. Russia Iron with Nickel Lamp and Trimmings.

NEW HAMMERLESS DOUBLE GUN.

This GUN has rebounding locks, and the BARRELS CAN BE TAKEN OFF AND PUT ON AGAIN WITHOUT COCKING THE ARM, and when cocked the hammers may be let down gradually, and without the full force of the blow. It is simple in construction, having very many less pieces than any other hammerless gun.

MANUFACTURED BY

FOREHAND ARMS CO.,

THE BERRY CLOTHES SPRINKLER

Fills automatically and will enable you to iron your clothes immediately after sprinkling, if you so desire.
For starched clothes it is unsurpassed.
It is an excellent sprinkler for house plants.
It is capital for laying the dust while you are sweeping.
Long used carpets can be made much brighter by putting a few drops of ammonia in water and sprinkling before sweeping. Retails for 25 cents.
Libe al discount to the trade. Send for price.

The Conroy patented New Automatic Refrigerator Door Fastener, with lock and key.

THIS FASTENER is the most complete one ever invented The door will push to more easily with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order By lifting the handle quarter circle the door will open, and if it sticks it will release it It has a new and improved lock, absolutely secure Made for flush or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental.

Hardwaremen's Exchange.

Notices of Help Wanted or Situations Wanted will be inserted in this column free of charge. Should not exceed Four Lines in length. Other notices, twenty-five cents per line.

Help Wanted.

WANTED—A competent salesman of table cutlery; one who can command trade and manage that department. Address R., care HARDWARE, No. 143 Chambers Street, New York.

WANTED—A man thoroughly posted in handling Builders' Hardware, reading specifications, taking quantities from plans, and familiar with its application to the work. Address, giving particulars as to age, experience and salary expected, Bordeaux, care HARDWARE, No. 143 Chambers Street, New York City.

WANTED—An experienced Builders' Hardware salesman. Must be capable of handling the trade through architects, etc. Address, giving age, experience and salary expected, Locks, care HARDWARE, No. 143 Chambers Street, New York City.

EXPERIENCED SALESMAN to travel and sell wire goods and solicit orders on iron work where necessary; state where last employed and salary expected. Address "Wire Goods," care HARDWARE, No. 143 Chambers Street, New York.

Situations Wanted.

TRAVELING salesman, of long experience, acquainted with Hardware trade through Middle and Western States, want side line from manufacturer; mechanics' tools preferred. Address C. D. Ferre, No. 9 Locust Street, Springfield, Mass.

SITUATION wanted by a first-class tinner, an expert at furnace work, roofing, spouting and general jobbing and repairing; also understands bicycle repairing. Young man, single, speaks English and German; industrious, steady and sober References Address H. F. Thompson, No. 135 Lake Street, Chicago, Ill.

WANTED—By a young man with twelve years' experience in the Hardware business, a position either in the house or on the road. Unquestionable references. Address M. G., care HARDWARE, No. 143 Chambers Street, New York.

A SHEET metal salesman with eight years' factory experience, wishes a change of employers, same line, or with manufacturing or jobbing Hardware house. Address "New Jersey," care HARDWARE, No. 143 Chambers Street, New York.

A POSITION as commercial traveler is wanted by young man of great ability, having a fine education. Good references given Address J. N. Patterson, England, Pa.

YOUNG man, twenty-two, desires situation in city or country; rapid penman; accurate, honest, temperate; liking for hard work; can give bond. Address A. E. McLean, Tremont, N. Y. C.

WANTED—By a young man, thirty-five years of age, with fourteen years' experience in the retail Hardware business, position as salesman with a good house. Thoroughly posted in builders' Hardware, and capable of making estimates from architects' specifications. Can furnish unexceptional references. Address Capable, care HARDWARE, No. 143 Chambers Street, New York.

Agencies for Hardware Specialties Wanted.

TO Manufacturers: A well established and pushing firm of manufacturers' selling agents of San Francisco can handle one more line of staples. Concerns wishing their business with the Pacific Coast increased may be assured of thorough and competent representation on a perfectly safe commission basis. References exchanged. Address "Pacific Coast," care HARDWARE, No. 143 Chambers Street, New York.

Side Lines Offered.

WANTED—Experienced Salesman in Western States to sell good staple in Hardware line, representing manufacturer direct. Liberal commission. Address Box 156, Wilkinsburg P. O., Pittsburg, Pa.

EXPERIENCED SALESMEN wanted to sell the retail trade the greatest garden device on the market. Sells to Hardware, Seed and Implement houses. Large commissions to parties with good references. For further information, address Lewis Mfg. Co., Utica, N. Y.

WANTED—Traveling salesmen visiting stove and tinware, Hardware house furnishing or plumbing and gas fitting trade, either retail or jobbing, will learn of something of interest by addressing B. J. W. & Co Lock Box 47, Mercer, Pa.

EXPERIENCED salesmen wanted to sell the best garden tool on the market. Sells to Hardware and implement houses; States, New York, Pennsylvania, New Jersey, Delaware, Maryland, Ohio; also for New England States. Address Lock Box 545, Rock Falls, Ill.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co, No 115 North Vine Street, Hazleton, Pa.

Side Line Wanted.

POSITION by a young man to represent barbers' supply or good cutlery house in two or three Southern States. Good references as to character and ability; three years' experience with barbers' supply and cutlery house. Address, stating salary given, to Cutlery, care HARDWARE, No. 143 Chambers Street, New York.

TO MANUFACTURERS: An established pushing manufacturers' selling agent, visiting jobbing and large retail trade, Michigan, Indiana and Ohio, can handle one more line staples, or A I specialty. Reference exchanged with those who desire competent, safe representation. Address A. D. D., care HARDWARE, No. 143 Chambers Street, New York.

Business Opportunity.

WANTED—An active, energetic young man who can command from $5000 to $8000 capital to enter into a co-partnership with an old established company. He will be wanted to take care of the finances of the company, and attend to the office business. This is an unequaled chance, and to the right man will present an opportunity that will be very valuable. Address XX, care HARDWARE, No. 143 Chambers Street, New York City.

For Sale.

A FOUR-HORSE Power Gas Engine, in good running order; now in use by us at our stores. Edward Darby & Sons, 233 Arch Street, Philadelphia, Pa.

Bicycle Agency Wanted.

WANTED for Chicago and vicinity the agency for a good standard bicycle by three live men. For the trade only. Good showroom on prominent thoroughfare. D. Hymes, No. 135 Lake Street, Chicago, Ill.

Philadelphia Office: Reeves & Smiley, 129 N. 2nd St.

STANLEY'S PATENT
HAND-Y LEVEL.

The shallow grooves along the two sides of this Level give the owner an excellent grip on the Tool. In climbing ladders, walking on stagings or on the frame of a building, the peculiar form of the Level imparts a feeling of steadiness to the workman who carries it. For ascertaining a Plumb, it can be brought to a perpendicular position with remarkable ease and accuracy.

No. 16. Hand-y Plumb and Level, Cherry, Polished and Tipped.....$1.25

Manufactured by THE STANLEY RULE & LEVEL CO. New Britain, Conn.

SOLD BY ALL HARDWARE DEALERS.
